

Name	Version	Summary	Description	URL	Install Time
a52dec	0.7.4	A free ATSC A/52 stream decoder	liba52 is a free library for decoding ATSC A/52 streams. The A/52 standard is used in a variety of applications, including digital television and DVD. It is also known as AC-3. The package also includes a52dec, a small test program for liba52.	http://liba52.sourceforge.net/	Tue 26 Mar 2013 01:01:29 PM EDT
aalib-libs	1.4.0	Library files for aalib	This package contains library files for aalib.	http://aa-project.sourceforge.net/aalib/	Wed 20 Mar 2013 09:52:24 AM EDT
abattis-cantarell-fonts	0.0.10.1	Cantarell, a Humanist sans-serif font family	Cantarell is a set of fonts designed by Dave Crossland. It is a sans-serif humanist typeface family.	http://abattis.org/cantarell/	Wed 20 Mar 2013 09:51:34 AM EDT
abrt	2.1.2	Automatic bug detection and reporting tool	abrt is a tool to help users to detect defects in applications and to create a bug report with all information needed by maintainer to fix it. It uses plugin system to extend its functionality.	https://fedorahosted.org/abrt/	Tue 26 Mar 2013 01:26:06 PM EDT
abrt-addon-ccpp	2.1.2	abrt's C/C++ addon	This package contains hook for C/C++ crashed programs and abrt's C/C++ analyzer plugin.	https://fedorahosted.org/abrt/	Tue 26 Mar 2013 01:26:06 PM EDT
abrt-addon-kerneloops	2.1.2	abrt's kerneloops addon	This package contains plugin for collecting kernel crash information from system log.	https://fedorahosted.org/abrt/	Tue 26 Mar 2013 01:26:07 PM EDT
abrt-addon-python	2.1.2	abrt's addon for catching and analyzing Python exceptions	This package contains python hook and python analyzer plugin for handling uncaught exception in python programs.	https://fedorahosted.org/abrt/	Tue 26 Mar 2013 01:26:07 PM EDT

Name	Version	Summary	Description	URL	Install Time
abrt-addon-vmcore	2.1.2	abrt's vmcore addon	This package contains plugin for collecting kernel crash information from vmcore files.	https://fedorahosted.org/abrt/	Tue 26 Mar 2013 01:26:07 PM EDT
abrt-addon-xorg	2.1.2	abrt's Xorg addon	This package contains plugin for collecting Xorg crash information from Xorg log.	https://fedorahosted.org/abrt/	Tue 26 Mar 2013 01:26:07 PM EDT
abrt-dbus	2.1.2	ABRT DBus service	ABRT DBus service which provides org.freedesktop.problems API on dbus and uses PolicyKit to authorize to access the problem data.	https://fedorahosted.org/abrt/	Tue 26 Mar 2013 01:26:07 PM EDT
abrt-gui	2.1.2	abrt's gui	GTK+ wizard for convenient bug reporting.	https://fedorahosted.org/abrt/	Tue 26 Mar 2013 01:26:07 PM EDT
abrt-libs	2.1.2	Libraries for abrt	Libraries for abrt.	https://fedorahosted.org/abrt/	Tue 26 Mar 2013 01:26:05 PM EDT
abrt-plugin-bodhi	2.1.2	abrt's bodhi plugin	Search for a new updates in bodhi server.	https://fedorahosted.org/abrt/	Tue 26 Mar 2013 01:26:06 PM EDT
abrt-retrace-client	2.1.2	abrt's retrace client	This package contains the client application for Retrace server which is able to analyze C/C++ crashes remotely.	https://fedorahosted.org/abrt/	Tue 26 Mar 2013 01:26:06 PM EDT
acl	2.2.51	Access control list utilities	This package contains the getfacl and setfacl utilities needed for manipulating access control lists.	http://acl.bestbits.at/	Wed 20 Mar 2013 09:51:18 AM EDT
adobe-release-i386	1.0	linux.adobe.com Repository Configuration	linuxdownload.adobe.com repository contains RPM packages of Adobe Linux Software	http://linuxdownload.adobe.com/	Thu 02 May 2013 12:28:11 AM EDT

Name	Version	Summary	Description	URL	Install Time
AdobeReader	9.5.4	Adobe Reader, an application to easily view, print and collaborate on PDF files.	Adobe Reader software is the global standard for electronic document sharing. It is the only PDF file viewer that can open and interact with all PDF documents. Use Adobe Reader to view, search, digitally sign, verify, print, and collaborate on Adobe PDF files.	http://www.adobe.com	Thu 02 May 2013 12:32:53 AM EDT
adwaita-cursor-theme	3.6.5	Adwaita cursor theme	The adwaita-cursor-theme package contains a modern set of cursors originally designed for the GNOME desktop.	http://git.gnome.org/browse/gnome-themes-standard	Sun 24 Mar 2013 04:44:29 PM EDT
adwaita-gtk2-theme	3.6.5	Adwaita gtk2 theme	The adwaita-gtk2-theme package contains a gtk2 theme for presenting widgets with a GNOME look and feel.	http://git.gnome.org/browse/gnome-themes-standard	Sun 24 Mar 2013 04:46:02 PM EDT
adwaita-gtk3-theme	3.6.5	Adwaita gtk3 theme	The adwaita-gtk3-theme package contains a gtk3 theme for rendering widgets with a GNOME look and feel.	http://git.gnome.org/browse/gnome-themes-standard	Sun 24 Mar 2013 04:46:01 PM EDT
aic94xx-firmware	30	Adaptec SAS 44300, 48300, 58300 Sequencer Firmware for AIC94xx driver	Adaptec SAS 44300, 48300, 58300 Sequencer Firmware for Open-Source AIC94xx Driver.	http://www.adaptec.com/en-US/speed/scsi/linux/aic94xx-seq-30-1_tar_gz.htm	Wed 20 Mar 2013 09:58:38 AM EDT
akonadi	1.9.1	PIM Storage Service	PIM Storage Service.	http://community.kde.org/KDE_PIM/Akonadi	Sun 24 Mar 2013 04:46:27 PM EDT

Name	Version	Summary	Description	URL	Install Time
akonadi-mysql	1.9.1	Akonadi MySQL backend support	Configures akonadi to use mysql backend by default. Requires an available instance of mysql server at runtime. Akonadi can spawn a per-user one automatically if the mysql-server package is installed on the machine. See also: <code>/etc/akonadi/mysql-global.conf</code>	http://community.kde.org/KDE_PIM/Akonadi	Sun 24 Mar 2013 04:47:35 PM EDT
alsa-firmware	1.0.25	Firmware for several ALSA-supported sound cards	This package contains the firmware binaries for a number of sound cards. Some (but not all of these) require firmware loaders which are included in the alsa-tools-firmware package.	http://www.alsa-project.org/	Wed 20 Mar 2013 09:54:31 AM EDT
alsa-lib	1.0.26	The Advanced Linux Sound Architecture (ALSA) library	The Advanced Linux Sound Architecture (ALSA) provides audio and MIDI functionality to the Linux operating system. This package includes the ALSA runtime libraries to simplify application programming and provide higher level functionality as well as support for the older OSS API, providing binary compatibility for most OSS programs.	http://www.alsa-project.org/	Wed 20 Mar 2013 09:51:39 AM EDT

Name	Version	Summary	Description	URL	Install Time
alsa-lib-devel	1.0.26	Development files from the ALSA library	The Advanced Linux Sound Architecture (ALSA) provides audio and MIDI functionality to the Linux operating system. This package includes the ALSA development libraries for developing against the ALSA libraries and interfaces.	http://www.alsa-project.org/	Fri 05 Apr 2013 04:33:04 PM EDT
alsa-oss	1.0.17	Advanced Linux Sound Architecture (ALSA) wrapper for OSS	This package contains the compatibility library and wrapper script for running legacy OSS applications through ALSA. Unlike the kernel driver, this has the advantage of supporting DMIX software mixing.	http://www.alsa-project.org/	Fri 05 Apr 2013 04:33:04 PM EDT
alsa-oss-devel	1.0.17	Headers for ALSA wrapper for OSS	Header files for alsa-oss.	http://www.alsa-project.org/	Fri 05 Apr 2013 04:33:04 PM EDT
alsa-oss-libs	1.0.17	ALSA/OSS wrapper libraries	System libraries for alsa-oss.	http://www.alsa-project.org/	Fri 05 Apr 2013 04:33:04 PM EDT
alsa-plugins-pulseaudio	1.0.26	Alsa to PulseAudio backend	This plugin allows any program that uses the ALSA API to access a PulseAudio sound daemon. In other words, native ALSA applications can play and record sound across a network. There are two plugins in the suite, one for PCM and one for mixer control.	http://www.alsa-project.org/	Wed 20 Mar 2013 10:00:13 AM EDT

Name	Version	Summary	Description	URL	Install Time
alsa-tools-firmware	1.0.26.1	ALSA tools for uploading firmware to some soundcards	This package contains tools for flashing firmware into certain sound cards. The following tools are available: * hdsploder - for RME Hammerfall DSP cards * mixartloader - for Digigram miXart soundcards * vxloader - for Digigram VX soundcards * usx2yloader - second phase firmware loader for Tascam USX2Y USB soundcards	http://www.alsa-project.org/	Wed 20 Mar 2013 09:54:31 AM EDT
alsa-utils	1.0.26	Advanced Linux Sound Architecture (ALSA) utilities	This package contains command line utilities for the Advanced Linux Sound Architecture (ALSA).	http://www.alsa-project.org/	Wed 20 Mar 2013 09:54:28 AM EDT
amarok	2.7.0	Media player	Amarok is a multimedia player with: - fresh playlist concept, very fast to use, with drag and drop - plays all formats supported by the various engines - audio effects, like reverb and compressor - compatible with the .m3u and .pls formats for playlists - nice GUI, integrates into the KDE look, but with a unique touch	http://amarok.kde.org/	Sun 24 Mar 2013 04:47:12 PM EDT
amarok-libs	2.7.0	Runtime libraries for amarok	Runtime libraries for amarok.	http://amarok.kde.org/	Sun 24 Mar 2013 04:47:11 PM EDT
amarok-utils	2.7.0	Amarok standalone utilities	Amarok standalone utilities, including amarokcollection-scanner.	http://amarok.kde.org/	Sun 24 Mar 2013 04:47:10 PM EDT

Name	Version	Summary	Description	URL	Install Time
anaconda-yum-plugins	1.0	Installation-related yum plugins	The anaconda yum-plugins package contains yum plugins that are useful for anaconda and other system installation-related programs.	http://fedoraproject.org/wiki/Anaconda	Wed 20 Mar 2013 09:52:40 AM EDT
analitza	4.10.2	Library of mathematical features	Library of mathematical features.	https://projects.kde.org/projects/kde/kdeedu/analitza	Tue 23 Apr 2013 09:34:55 AM EDT
ant	1.8.4	Build tool for java	Ant is a platform-independent build tool for java. It's used by apache jakarta and xml projects.	http://ant.apache.org/	Wed 24 Apr 2013 11:45:36 AM EDT
anthy	9100h	Japanese character set input library	Anthy provides the library to input Japanese on the applications, such as X applications and emacs. and the user dictionaries and the users information which is used for the conversion, is stored into their own home directory. So Anthy is secure than other conversion server.	http://sourceforge.jp/projects/anthy/	Wed 20 Mar 2013 09:50:41 AM EDT
apper	0.8.0	KDE interface for PackageKit	KDE interface for PackageKit.	http://kde-apps.org/content/show.php/Appper?content=84745	Sun 24 Mar 2013 04:47:35 PM EDT

Name	Version	Summary	Description	URL	Install Time
apr	1.4.6	Apache Portable Runtime library	The mission of the Apache Portable Runtime (APR) is to provide a free library of C data structures and routines, forming a system portability layer to as many operating systems as possible, including Unices, MS Win32, BeOS and OS/2.	http://apr.apache.org/	Wed 20 Mar 2013 09:50:21 AM EDT
apr-util	1.4.1	Apache Portable Runtime Utility library	The mission of the Apache Portable Runtime (APR) is to provide a free library of C data structures and routines. This library contains additional utility interfaces for APR; including support for XML, LDAP, database interfaces, URI parsing and more.	http://apr.apache.org/	Wed 20 Mar 2013 09:50:27 AM EDT
ark	4.10.2	Archive manager	Ark is a program for managing various archive formats. Archives can be viewed, extracted, created and modified from within Ark. The program can handle various formats such as tar, gzip, bzip2, zip, rar and lha (if appropriate command-line programs are installed).	http://utils.kde.org/projects/ark	Tue 23 Apr 2013 09:35:20 AM EDT
ark-libs	4.10.2	Runtime libraries for ark	Runtime libraries for ark.	http://utils.kde.org/projects/ark	Tue 23 Apr 2013 09:35:20 AM EDT

Name	Version	Summary	Description	URL	Install Time
aspell	0.60.6.1	Spell checker	GNU Aspell is a spell checker designed to eventually replace Ispell. It can either be used as a library or as an independent spell checker. Its main feature is that it does a much better job of coming up with possible suggestions than just about any other spell checker out there for the English language, including Ispell and Microsoft Word. It also has many other technical enhancements over Ispell such as using shared memory for dictionaries and intelligently handling personal dictionaries when more than one Aspell process is open at once.	http://aspell.net/	Wed 20 Mar 2013 09:50:38 AM EDT
aspell-en	7.1	English dictionaries for Aspell	Provides the word list/dictionaries for the following: English, Canadian English, British English	http://aspell.net/	Wed 20 Mar 2013 09:58:59 AM EDT

Name	Version	Summary	Description	URL	Install Time
at	3.1.13	Job spooling tools	At and batch read commands from standard input or from a specified file. At allows you to specify that a command will be run at a particular time. Batch will execute commands when the system load levels drop to a particular level. Both commands use user's shell. You should install the at package if you need a utility for time-oriented job control. Note: If it is a recurring job that will need to be repeated at the same time every day/week, etc. you should use crontab instead.	http://ftp.debian.org/debian/pool/main/a/at	Wed 20 Mar 2013 09:58:36 AM EDT
at-spi2-atk	2.6.2	A GTK+ module that bridges ATK to D-Bus at-spi	at-spi allows assistive technologies to access GTK-based applications. Essentially it exposes the internals of applications for automation, so tools such as screen readers, magnifiers, or even scripting interfaces can query and interact with GUI controls. This version of at-spi is a major break from previous versions. It has been completely rewritten to use D-Bus rather than ORBIT / CORBA for its transport protocol. This package includes a gtk-module that bridges ATK to the new D-Bus based at-spi.	http://www.linuxfoundation.org/en/AT-SPI_on_D-Bus	Wed 20 Mar 2013 09:54:03 AM EDT

Name	Version	Summary	Description	URL	Install Time
at-spi2-core	2.6.3	Protocol definitions and daemon for D-Bus at-spi	at-spi allows assistive technologies to access GTK-based applications. Essentially it exposes the internals of applications for automation, so tools such as screen readers, magnifiers, or even scripting interfaces can query and interact with GUI controls. This version of at-spi is a major break from previous versions. It has been completely rewritten to use D-Bus rather than ORBIT / CORBA for its transport protocol.	http://www.linuxfoundation.org/en/AT-SPI_on_D-Bus	Sun 24 Mar 2013 04:49:05 PM EDT
atk	2.6.0	Interfaces for accessibility support	The ATK library provides a set of interfaces for adding accessibility support to applications and graphical user interface toolkits. By supporting the ATK interfaces, an application or toolkit can be used with tools such as screen readers, magnifiers, and alternative input devices.	http://developer.gnome.org/projects/gap/	Fri 05 Apr 2013 04:24:06 PM EDT

Name	Version	Summary	Description	URL	Install Time
atk	2.6.0	Interfaces for accessibility support	The ATK library provides a set of interfaces for adding accessibility support to applications and graphical user interface toolkits. By supporting the ATK interfaces, an application or toolkit can be used with tools such as screen readers, magnifiers, and alternative input devices.	http://developer.gnome.org/projects/gap/	Wed 20 Mar 2013 09:49:57 AM EDT
atkmm	2.22.6	C++ interface for the ATK library	atkmm provides a C++ interface for the ATK library. Highlights include typesafe callbacks, widgets extensible via inheritance and a comprehensive set of widget classes that can be freely combined to quickly create complex user interfaces.	http://www.gtkmm.org/	Wed 20 Mar 2013 09:50:19 AM EDT

Name	Version	Summary	Description	URL	Install Time
atlas	3.8.4	Automatically Tuned Linear Algebra Software	<p>The ATLAS (Automatically Tuned Linear Algebra Software) project is an ongoing research effort focusing on applying empirical techniques in order to provide portable performance. At present, it provides C and Fortran77 interfaces to a portably efficient BLAS implementation, as well as a few routines from LAPACK.</p> <p>The performance improvements in ATLAS are obtained largely via compile-time optimizations and tend to be specific to a given hardware configuration. In order to package ATLAS for Fedora some compromises are necessary so that good performance can be obtained on a variety of hardware. This set of ATLAS binary packages is therefore not necessarily optimal for any specific hardware configuration. However, the source package can be used to compile customized ATLAS packages; see the documentation for information.</p>	http://math-atlas.sourceforge.net/	Wed 20 Mar 2013 09:50:09 AM EDT

Name	Version	Summary	Description	URL	Install Time
atmel-firmware	1.3	Firmware for Atmel at76c50x wireless network chips	The drivers for Atmel at76c50x wireless network chips in the Linux 2.6.x kernel but do not include the firmware. This firmware needs to be loaded by the host on most cards using these chips.	http://at76c503a.berlios.de/	Wed 20 Mar 2013 10:00:02 AM EDT
attica	0.4.0	Implementation of the Open Collaboration Services API	Attica is a Qt library that implements the Open Collaboration Services API version 1.4.	http://www.kde.org	Wed 20 Mar 2013 09:50:51 AM EDT
attr	2.4.46	Utilities for managing filesystem extended attributes	A set of tools for manipulating extended attributes on filesystem objects, in particular getfattr(1) and setfattr(1). An attr(1) command is also provided which is largely compatible with the SGI IRIX tool of the same name.	http://acl.bestbits.at/	Wed 20 Mar 2013 09:59:04 AM EDT
audacious	3.3.4	Advanced audio player	Audacious is an advanced audio player. It is free, lightweight, currently based on GTK+ 3, runs on Linux and many other *nix platforms and is focused on audio quality and supporting a wide range of audio codecs. It still features an alternative skinned user interface (based on Winamp 2.x skins). Historically, it started as a fork of Beep Media Player (BMP), which itself forked from XMMS.	http://audacious-media-player.org/	Tue 26 Mar 2013 01:15:41 PM EDT

Name	Version	Summary	Description	URL	Install Time
audacious-libs	3.3.4	Library files for the Audacious audio player	Library files for the Audacious audio player.	http://audacious-media-player.org/	Tue 26 Mar 2013 01:15:39 PM EDT
audacious-plugins	3.3.4	Plugins for the Audacious audio player	This package provides essential plugins for the Audacious audio player.	http://audacious-media-player.org/	Tue 26 Mar 2013 01:15:39 PM EDT
audiocd-kio	4.10.2	Audiocd kio slave	Audiocd kio slave.	https://projects.kde.org/projects/kde/kdemultimedia/audiocd-kio	Tue 23 Apr 2013 09:35:17 AM EDT
audiocd-kio-libs	4.10.2	Runtime libraries for audiocd-kio	Runtime libraries for audiocd-kio.	https://projects.kde.org/projects/kde/kdemultimedia/audiocd-kio	Tue 23 Apr 2013 09:35:17 AM EDT
audit	2.2.3	User space tools for 2.6 kernel auditing	The audit package contains the user space utilities for storing and searching the audit records generate by the audit subsystem in the Linux 2.6 kernel.	http://people.redhat.com/sgrubb/audit/	Mon 08 Apr 2013 10:15:38 AM EDT
audit-libs	2.2.3	Dynamic library for libaudit	The audit-libs package contains the dynamic libraries needed for applications to use the audit framework.	http://people.redhat.com/sgrubb/audit/	Mon 08 Apr 2013 10:15:41 AM EDT
audit-libs	2.2.3	Dynamic library for libaudit	The audit-libs package contains the dynamic libraries needed for applications to use the audit framework.	http://people.redhat.com/sgrubb/audit/	Mon 08 Apr 2013 10:15:31 AM EDT
audit-libs-python	2.2.3	Python bindings for libaudit	The audit-libs-python package contains the bindings so that libaudit and libauparse can be used by python.	http://people.redhat.com/sgrubb/audit/	Mon 08 Apr 2013 10:15:39 AM EDT

Name	Version	Summary	Description	URL	Install Time
authconfig	6.2.5	Command line tool for setting up authentication from network services	Authconfig is a command line utility which can configure a workstation to use shadow (more secure) passwords. Authconfig can also configure a system to be a client for certain networked user information and authentication schemes.	https://fedorahosted.org/authconfig	Wed 20 Mar 2013 09:52:34 AM EDT
authconfig-gtk	6.2.5	Graphical tool for setting up authentication from network services	Authconfig-gtk is a GUI program which can configure a workstation to use shadow (more secure) passwords. Authconfig-gtk can also configure a system to be a client for certain networked user information and authentication schemes.	https://fedorahosted.org/authconfig	Wed 20 Mar 2013 09:53:38 AM EDT

Name	Version	Summary	Description	URL	Install Time
autoconf	2.69	A GNU tool for automatically configuring source code	<p>GNU's Autoconf is a tool for configuring source code and Makefiles. Using Autoconf, programmers can create portable and configurable packages, since the person building the package is allowed to specify various configuration options.</p> <p>You should install Autoconf if you are developing software and would like to create shell scripts that configure your source code packages. If you are installing Autoconf, you will also need to install the GNU m4 package.</p> <p>Note that the Autoconf package is not required for the end-user who may be configuring software with an Autoconf-generated script; Autoconf is only required for the generation of the scripts, not their use.</p>	http://www.gnu.org/software/autoconf/	Wed 20 Mar 2013 09:50:56 AM EDT
autocorr-en	3.6.6.2	English auto-correction rules	Rules for auto-correcting common English typing errors.	http://www.documentfoundation.org/develop	Tue 23 Apr 2013 09:34:18 AM EDT

Name	Version	Summary	Description	URL	Install Time
automake	1.12.2	A GNU tool for automatically creating Makefiles	Automake is a tool for automatically generating ‘Makefile.in’ files compliant with the GNU Coding Standards. You should install Automake if you are developing software and would like to use its ability to automatically generate GNU standard Makefiles.	http://www.gnu.org/software/automake/	Wed 20 Mar 2013 09:51:48 AM EDT
automake14	1.4p6	A GNU tool for automatically creating Makefiles	Automake is a tool for automatically generating ‘Makefile.in’ files compliant with the GNU Coding Standards. This package contains Automake 1.4, an older version of Automake. You should install it if you need to run automake in a project that has not yet been updated to work with newer versions of Automake.	http://sources.redhat.com/automake	Wed 20 Mar 2013 09:58:44 AM EDT
automake17	1.7.9	A GNU tool for automatically creating Makefiles	Automake is a tool for automatically generating ‘Makefile.in’ files compliant with the GNU Coding Standards. This package contains Automake 1.7, an older version of Automake. You should install it if you need to run automake in a project that has not yet been updated to work with latest version of Automake.	http://sources.redhat.com/automake	Wed 20 Mar 2013 09:58:44 AM EDT

Name	Version	Summary	Description	URL	Install Time
autotrace	0.31.1	Utility for converting bitmaps to vector graphics	AutoTrace is a program for converting bitmaps to vector graphics. Supported input formats include BMP, TGA, PNM, PPM, and any format supported by ImageMagick, whereas output can be produced in Postscript, SVG, xfig, SWF, and others.	http://autotrace.sourceforge.net/	Wed 20 Mar 2013 09:54:12 AM EDT
avahi-autoipd	0.6.31	Link-local IPv4 address automatic configuration daemon (IPv4LL)	avahi-autoipd implements IPv4LL, "Dynamic Configuration of IPv4 Link-Local Addresses" (IETF RFC3927), a protocol for automatic IP address configuration from the link-local 169.254.0.0/16 range without the need for a central server. It is primarily intended to be used in ad-hoc networks which lack a DHCP server.	http://avahi.org	Wed 20 Mar 2013 09:56:51 AM EDT
avahi-compat-libdns_sd	0.6.31	Libraries for Apple Bonjour mDNSResponder compatibility	Libraries for Apple Bonjour mDNSResponder compatibility.	http://avahi.org	Tue 26 Mar 2013 01:15:40 PM EDT
avahi-glib	0.6.31	Glib libraries for avahi	Libraries for easy use of avahi from glib applications.	http://avahi.org	Wed 20 Mar 2013 09:50:33 AM EDT
avahi-libs	0.6.31	Libraries for avahi run-time use	The avahi-libs package contains the libraries needed to run programs that use avahi.	http://avahi.org	Fri 05 Apr 2013 04:24:04 PM EDT
avahi-libs	0.6.31	Libraries for avahi run-time use	The avahi-libs package contains the libraries needed to run programs that use avahi.	http://avahi.org	Wed 20 Mar 2013 09:50:01 AM EDT

Name	Version	Summary	Description	URL	Install Time
avogadro-libs	1.0.3	Shared libraries for Avogadro	This package contains the shared libraries for the molecular editor Avogadro.	http://avogadro.openmolecules.net/	Sun 24 Mar 2013 04:46:31 PM EDT
b43-fwcutter	016	Firmware extraction tool for Broadcom wireless driver	This package contains the 'b43-fwcutter' tool which is used to extract firmware for the Broadcom network devices. See the README.too file shipped in the package's documentation for instructions on using this tool.	http://bues.ch/b43/fwcutter/	Wed 20 Mar 2013 09:59:52 AM EDT
b43-openfwfwf	5.2	Open firmware for some Broadcom 43xx series WLAN chips	Open firmware for some Broadcom 43xx series WLAN chips. Currently supported models are 4306, 4311(rev1), 4318 and 4320.	http://www.ing.unibs.it/openfwfwf/	Wed 20 Mar 2013 09:58:38 AM EDT
babl	0.1.10	A dynamic, any to any, pixel format conversion library	Babl is a dynamic, any to any, pixel format conversion library. It provides conversions between the myriad of buffer types images can be stored in. Babl doesn't only help with existing pixel formats, but also facilitates creation of new and uncommon ones.	http://www.gegl.org/babl/	Wed 20 Mar 2013 09:50:44 AM EDT

Name	Version	Summary	Description	URL	Install Time
bash	4.2.45	The GNU Bourne Again shell	The GNU Bourne Again shell (Bash) is a shell or command language interpreter that is compatible with the Bourne shell (sh). Bash incorporates useful features from the Korn shell (ksh) and the C shell (csh). Most sh scripts can be run by bash without modification.	http://www.gnu.org/software/bash	Sun 24 Mar 2013 04:44:31 PM EDT
bash-completion	2.1	Programmable completion for Bash	bash-completion is a collection of shell functions that take advantage of the programmable completion feature of bash.	http://bash-completion.alioth.debian.org/	Tue 23 Apr 2013 09:36:43 AM EDT
bc	1.06.95	GNU's bc (a numeric processing language) and dc (a calculator)	The bc package includes bc and dc. Bc is an arbitrary precision numeric processing arithmetic language. Dc is an interactive arbitrary precision stack based calculator, which can be used as a text mode calculator. Install the bc package if you need its number handling capabilities or if you would like to use its text mode calculator.	http://www.gnu.org/software/bc/	Wed 20 Mar 2013 09:59:02 AM EDT
bind-libs	9.9.2	Libraries used by the BIND DNS packages	Contains heavyweight version of BIND suite libraries used by both named DNS server and utilities in bind-utils package.	http://www.isc.org/products/BIND/	Mon 08 Apr 2013 10:15:31 AM EDT
bind-libs-lite	9.9.2	Libraries for working with the DNS protocol	Contains lite version of BIND suite libraries which are used by various programs to work with DNS protocol.	http://www.isc.org/products/BIND/	Mon 08 Apr 2013 10:15:39 AM EDT

Name	Version	Summary	Description	URL	Install Time
bind-license	9.9.2	License of the BIND DNS suite	Contains license of the BIND DNS suite.	http://www.isc.org/products/BIND/	Mon 08 Apr 2013 10:15:31 AM EDT
bind-utils	9.9.2	Utilities for querying DNS name servers	Bind-utils contains a collection of utilities for querying DNS (Domain Name System) name servers to find out information about Internet hosts. These tools will provide you with the IP addresses for given host names, as well as other information about registered domains and network addresses. You should install bind-utils if you need to get information from DNS name servers.	http://www.isc.org/products/BIND/	Mon 08 Apr 2013 10:15:38 AM EDT

Name	Version	Summary	Description	URL	Install Time
binutils	2.23.51.0.1	A GNU collection of binary utilities	Binutils is a collection of binary utilities, including ar (for creating, modifying and extracting from archives), as (a family of GNU assemblers), gprof (for displaying call graph profile data), ld (the GNU linker), nm (for listing symbols from object files), objcopy (for copying and translating object files), objdump (for displaying information from object files), ranlib (for generating an index for the contents of an archive), readelf (for displaying detailed information about binary files), size (for listing the section sizes of an object or archive file), strings (for listing printable strings from files), strip (for discarding symbols), and addr2line (for converting addresses to file and line).	http://sources.redhat.com/binutils	Sun 24 Mar 2013 04:44:47 PM EDT

Name	Version	Summary	Description	URL	Install Time
binutils-devel	2.23.51.0.1	BFD and opcodes static and dynamic libraries and header files	<p>This package contains BFD and opcodes static and dynamic libraries.</p> <p>The dynamic libraries are in this package, rather than a separate base package because they are actually linker scripts that force the use of the static libraries. This is because the API of the BFD library is too unstable to be used dynamically.</p> <p>The static libraries are here because they are now needed by the dynamic libraries.</p> <p>Developers starting new projects are strongly encouraged to consider using libelf instead of BFD.</p>	http://sources.redhat.com/binutils	Fri 05 Apr 2013 04:34:46 PM EDT
biosdevname	0.4.1	Udev helper for naming devices per BIOS names	<p>biosdevname in its simplest form takes a kernel device name as an argument, and returns the BIOS-given name it "should" be. This is necessary on systems where the BIOS name for a given device (e.g. the label on the chassis is "Gb1") doesn't map directly and obviously to the kernel name (e.g. eth0).</p>	http://linux.dell.com/files/biosdevname	Wed 20 Mar 2013 09:58:36 AM EDT

Name	Version	Summary	Description	URL	Install Time
bison	2.6.1	A GNU general-purpose parser generator	<p>Bison is a general purpose parser generator that converts a grammar description for an LALR(1) context-free grammar into a C program to parse that grammar. Bison can be used to develop a wide range of language parsers, from ones used in simple desk calculators to complex programming languages. Bison is upwardly compatible with Yacc, so any correctly written Yacc grammar should work with Bison without any changes. If you know Yacc, you shouldn't have any trouble using Bison. You do need to be very proficient in C programming to be able to use Bison. Bison is only needed on systems that are used for development.</p> <p>If your system will be used for C development, you should install Bison.</p>	http://www.gnu.org/software/bison/	Wed 20 Mar 2013 09:58:59 AM EDT

Name	Version	Summary	Description	URL	Install Time
blender	2.65a	3D modeling, animation, rendering and post-production	Blender is the essential software solution you need for 3D, from modeling, animation, rendering and post-production to interactive creation and playback. Professionals and novices can easily and inexpensively publish stand-alone, secure, multi-platform content to the web, CD-ROMs, and other media.	http://www.blender.org	Sun 24 Mar 2013 04:48:31 PM EDT
blinken	4.10.2	Memory Enhancement Game	Memory Enhancement Game.	https://projects.kde.org/projects/kde/kdeedu/blinken	Tue 23 Apr 2013 09:35:58 AM EDT
bluedevil	1.3	Bluetooth stack for KDE	BlueDevil is the bluetooth stack for KDE.	https://projects.kde.org/projects/extragear/base/bluedevil	Sun 24 Mar 2013 04:49:32 PM EDT
bluez	4.101	Bluetooth utilities	Utilities for use in Bluetooth applications: - hcitool - hciattach - hciconfig - bluetoothd - l2ping - start scripts (Red Hat) - pcmcia configuration files The BLUETOOTH trademarks are owned by Bluetooth SIG, Inc., U.S.A.	http://www.bluez.org/	Sun 24 Mar 2013 04:49:32 PM EDT
bluez-cups	4.101	CUPS printer backend for Bluetooth printers	This package contains the CUPS backend	http://www.bluez.org/	Sun 24 Mar 2013 04:47:53 PM EDT
bluez-libs	4.101	Libraries for use in Bluetooth applications	Libraries for use in Bluetooth applications.	http://www.bluez.org/	Sun 24 Mar 2013 04:44:50 PM EDT

Name	Version	Summary	Description	URL	Install Time
bomber	4.10.2	Arcade bombing game	Bomber is a single player arcade game. The player is invading various cities in a plane that is decreasing in height. The goal of the game is to destroy all the buildings and advance to the next level. Each level gets a harder by increasing the speed of the plane and the height of the buildings.	https://projects.kde.org/projects/kde/kdegames/bomber	Tue 23 Apr 2013 09:35:04 AM EDT
boost	1.50.0	The free peer-reviewed portable C++ source libraries	Boost provides free peer-reviewed portable C++ source libraries. The emphasis is on libraries which work well with the C++ Standard Library, in the hopes of establishing "existing practice" for extensions and providing reference implementations so that the Boost libraries are suitable for eventual standardization. (Some of the libraries have already been included in the C++ 2011 standard and others have been proposed to the C++ Standards Committee for inclusion in future standards.)	http://www.boost.org	Fri 05 Apr 2013 04:34:32 PM EDT
boost-chrono	1.50.0	Run-Time component of boost chrono library	Run-Time support for Boost.Chrono, a set of useful time utilities.	http://www.boost.org	Sun 24 Mar 2013 04:44:51 PM EDT

Name	Version	Summary	Description	URL	Install Time
boost-date-time	1.50.0	Run-Time component of boost date-time library	Run-Time support for Boost Date Time, set of date-time libraries based on generic programming concepts.	http://www.boost.org	Sun 24 Mar 2013 04:44:54 PM EDT
boost-devel	1.50.0	The Boost C++ headers and shared development libraries	Headers and shared object symbolic links for the Boost C++ libraries.	http://www.boost.org	Fri 05 Apr 2013 04:34:45 PM EDT
boost-filesystem	1.50.0	Run-Time component of boost filesystem library	Run-Time support for the Boost Filesystem Library, which provides portable facilities to query and manipulate paths, files, and directories.	http://www.boost.org	Sun 24 Mar 2013 04:44:51 PM EDT
boost-graph	1.50.0	Run-Time component of boost graph library	Run-Time support for the BGL graph library. BGL interface and graph components are generic, in the same sense as the the Standard Template Library (STL).	http://www.boost.org	Sun 24 Mar 2013 04:49:02 PM EDT
boost-iostreams	1.50.0	Run-Time component of boost iostreams library	Run-Time support for Boost.IOStreams, a framework for defining streams, stream buffers and i/o filters.	http://www.boost.org	Sun 24 Mar 2013 04:49:06 PM EDT
boost-locale	1.50.0	Run-Time component of boost locale library	Run-Time support for Boost.Locale, a set of localization and Unicode handling tools.	http://www.boost.org	Sun 24 Mar 2013 04:44:55 PM EDT
boost-math	1.50.0	Math functions for boost TR1 library	Run-Time support for C99 and C++ TR1 C-style Functions from math portion of Boost.TR1.	http://www.boost.org	Fri 05 Apr 2013 04:34:32 PM EDT

Name	Version	Summary	Description	URL	Install Time
boost-program-options	1.50.0	Run-Time component of boost program_options library	Run-Time support of boost program options library, which allows program developers to obtain (name, value) pairs from the user, via conventional methods such as command line and configuration file.	http://www.boost.org	Sun 24 Mar 2013 04:45:49 PM EDT
boost-python	1.50.0	Run-Time component of boost python library	The Boost Python Library is a framework for interfacing Python and C++. It allows you to quickly and seamlessly expose C++ classes functions and objects to Python, and vice versa, using no special tools – just your C++ compiler. This package contains run-time support for Boost Python Library.	http://www.boost.org	Sun 24 Mar 2013 04:44:46 PM EDT
boost-python3	1.50.0	Run-Time component of boost python library for Python 3	The Boost Python Library is a framework for interfacing Python and C++. It allows you to quickly and seamlessly expose C++ classes functions and objects to Python, and vice versa, using no special tools – just your C++ compiler. This package contains run-time support for Boost Python Library compiled for Python 3.	http://www.boost.org	Fri 05 Apr 2013 04:34:32 PM EDT
boost-random	1.50.0	Run-Time component of boost random library	Run-Time support for boost random library.	http://www.boost.org	Fri 05 Apr 2013 04:34:31 PM EDT
boost-regex	1.50.0	Run-Time component of boost regular expression library	Run-Time support for boost regular expression library.	http://www.boost.org	Sun 24 Mar 2013 04:44:49 PM EDT

Name	Version	Summary	Description	URL	Install Time
boost-serialization	1.50.0	Run-Time component of boost serialization library	Run-Time support for serialization for persistence and marshaling.	http://www.boost.org	Fri 05 Apr 2013 04:34:32 PM EDT
boost-signals	1.50.0	Run-Time component of boost signals and slots library	Run-Time support for managed signals & slots callback implementation.	http://www.boost.org	Sun 24 Mar 2013 04:49:07 PM EDT
boost-system	1.50.0	Run-Time component of boost system support library	Run-Time component of Boost operating system support library, including the diagnostics support that will be part of the C++0x standard library.	http://www.boost.org	Sun 24 Mar 2013 04:44:43 PM EDT
boost-test	1.50.0	Run-Time component of boost test library	Run-Time support for simple program testing, full unit testing, and for program execution monitoring.	http://www.boost.org	Fri 05 Apr 2013 04:34:31 PM EDT
boost-thread	1.50.0	Run-Time component of boost thread library	Run-Time component Boost.Thread library, which provides classes and functions for managing multiple threads of execution, and for synchronizing data between the threads or providing separate copies of data specific to individual threads.	http://www.boost.org	Sun 24 Mar 2013 04:44:51 PM EDT
boost-timer	1.50.0	Run-Time component of boost timer library	"How long does my C++ code take to run?" The Boost Timer library answers that question and does so portably, with as little as one <code>#include</code> and one additional line of code.	http://www.boost.org	Fri 05 Apr 2013 04:34:32 PM EDT

Name	Version	Summary	Description	URL	Install Time
boost-wave	1.50.0	Run-Time component of boost C99/C++ pre-processing library	Run-Time support for the Boost.Wave library, a Standards conforming, and highly configurable implementation of the mandated C99/C++ pre-processor functionality.	http://www.boost.org	Fri 05 Apr 2013 04:34:32 PM EDT
bovo	4.10.2	Five in a row game	Bovo is a five-in-a-row game for two players, where the opponents alternate in placing their respective pictogram on the game board. The aim of this game is to connect five of your own pieces in an unbroken row vertically, horizontally or diagonally.	https://projects.kde.org/projects/kde/kdegames/bovo	Tue 23 Apr 2013 09:34:58 AM EDT
bridge-utils	1.5	Utilities for configuring the linux ethernet bridge	This package contains utilities for configuring the linux ethernet bridge. The linux ethernet bridge can be used for connecting multiple ethernet devices together. The connecting is fully transparent: hosts connected to one ethernet device see hosts connected to the other ethernet devices directly. Install bridge-utils if you want to use the linux ethernet bridge.	http://www.linuxfoundation.org/collaborate/workgroups/networking/bridge	Wed 20 Mar 2013 09:59:52 AM EDT

broadcom-wl	5.100.82.112	Common files for Broadcom 802.11 STA driver	This package contains the license, README.txt and configuration files for the Broadcom 802.11 Linux STA Driver for WiFi, a Linux device driver for use with Broadcom's BCM4311-, BCM4312-, BCM4313-, BCM4321-, BCM4322-, BCM4324-, and BCM43225-, BCM43227- and BCM43228-based hardware.	http://www.broadcom.com/support/802.11/linux/_sta.php	Mon 22 Apr 2013 05:30:17 PM EDT

Name	Version	Summary	Description	URL	Install Time
btparser	0.25	Parser and analyzer for backtraces produced by GDB	Btparser is a backtrace parser and analyzer, which works with backtraces produced by the GNU Project Debugger. It can parse a text file with a backtrace to a tree of C structures, allowing to analyze the threads and frames of the backtrace and work with them. Btparser also contains some backtrace manipulation and extraction routines: - it can find a frame in the crash-time backtrace where the program most likely crashed (a chance is that the function described in that frame is buggy) - it can produce a duplication hash of the backtrace, which helps to discover that two crash-time backtraces are duplicates, triggered by the same flaw of the code - it can "rate" the backtrace quality, which depends on the number of frames with and without the function name known (missing function name is caused by missing debugging symbols)	http://fedorahosted.org/btparser	Sun 24 Mar 2013 04:44:47 PM EDT

Name	Version	Summary	Description	URL	Install Time
btrfs-progs	0.20.rc1. 2012101 7git91d 9eec	Userspace programs for btrfs	The btrfs-progs package provides all the userspace programs needed to create, check, modify and correct any inconsistencies in the btrfs filesystem.	http://btrfs.wiki.kernel.org/index.php/Main_Page	Wed 20 Mar 2013 09:58:42 AM EDT
byacc	1.9.2012 0115	Berkeley Yacc, a parser generator	This package provides a parser generator utility that reads a grammar specification from a file and generates an LR(1) parser for it. The parsers consist of a set of LALR(1) parsing tables and a driver routine written in the C programming language. It has a public domain license which includes the generated C. If you are going to do development on your system, you will want to install this package.	http://invisible-island.net/byacc/byacc.html	Wed 20 Mar 2013 09:59:52 AM EDT

Name	Version	Summary	Description	URL	Install Time
bzip2	1.0.6	A file compression utility	Bzip2 is a freely available, patent-free, high quality data compressor. Bzip2 compresses files to within 10 to 15 percent of the capabilities of the best techniques available. However, bzip2 has the added benefit of being approximately two times faster at compression and six times faster at decompression than those techniques. Bzip2 is not the fastest compression utility, but it does strike a balance between speed and compression capability. Install bzip2 if you need a compression utility.	http://www.bzip.org/	Wed 20 Mar 2013 09:50:22 AM EDT
bzip2-devel	1.0.6	Libraries and header files for apps which will use bzip2	Header files and a library of bzip2 functions, for developing apps which will use the library.	http://www.bzip.org/	Fri 05 Apr 2013 04:34:47 PM EDT
bzip2-libs	1.0.6	Libraries for applications using bzip2	Libraries for applications using the bzip2 compression format.	http://www.bzip.org/	Wed 20 Mar 2013 09:49:48 AM EDT
c-ares	1.9.1	A library that performs asynchronous DNS operations	c-ares is a C library that performs DNS requests and name resolves asynchronously. c-ares is a fork of the library named 'ares', written by Greg Hudson at MIT.	http://c-ares.haxx.se/	Wed 20 Mar 2013 09:56:54 AM EDT
ca-certificates	2012.87	The Mozilla CA root certificate bundle	This package contains the set of CA certificates chosen by the Mozilla Foundation for use with the Internet PKI.	http://www.mozilla.org/	Sun 24 Mar 2013 04:44:29 PM EDT

Name	Version	Summary	Description	URL	Install Time
cagibi	0.2.0	SSDP (UPnP discovery) cache/proxy daemon	Cagibi is a cache/proxy daemon for SSDP (the discovery part of UPnP).	http://www.kde.org/	Wed 20 Mar 2013 09:58:58 AM EDT
cairo	1.12.14	A 2D graphics library	<p>Cairo is a 2D graphics library designed to provide high-quality display and print output. Currently supported output targets include the X Window System, OpenGL (via glitz), in-memory image buffers, and image files (PDF, PostScript, and SVG).</p> <p>Cairo is designed to produce consistent output on all output media while taking advantage of display hardware acceleration when available (e.g. through the X Render Extension or OpenGL).</p>	http://cairographics.org	Fri 05 Apr 2013 04:24:13 PM EDT

Name	Version	Summary	Description	URL	Install Time

calligra-words	2.6.2	An intuitive word processor application with desktop publishing features	KWord is an intuitive word processor and desktop publisher application. With it, you can create informative and attractive documents with pleasure and ease.	http://www.calligra-suite.org/	Fri 05 Apr 2013 04:36:27 PM EDT
calligra-words-libs	2.6.2	Runtime libraries for calligra-words	Runtime libraries for calligra-words.	http://www.calligra-suite.org/	Fri 05 Apr 2013 04:36:27 PM EDT
cantor	4.10.2	KDE Frontend to Mathematical Software	KDE Frontend to Mathematical Software.	https://projects.kde.org/projects/kde/kdeedu/cantor	Tue 23 Apr 2013 09:35:22 AM EDT
cantor-libs	4.10.2	Runtime files for cantor	Runtime files for cantor.	https://projects.kde.org/projects/kde/kdeedu/cantor	Tue 23 Apr 2013 09:35:22 AM EDT
ccache	3.1.9	C/C++ compiler cache	ccache is a compiler cache. It speeds up recompilation of C/C++ code by caching previous compiles and detecting when the same compile is being done again. The main focus is to handle the GNU C/C++ compiler (GCC), but it may also work with compilers that mimic GCC good enough.	http://ccache.samba.org/	Sun 24 Mar 2013 04:49:04 PM EDT
cdparanoia-libs	10.2	Libraries for libcddda_paranoia (Paranoia III)	The cdparanoia-libs package contains the dynamic libraries needed for applications which read CD Digital Audio disks.	http://www.xiph.org/paranoia/index.html	Wed 20 Mar 2013 09:50:25 AM EDT

Name	Version	Summary	Description	URL	Install Time
cdrdao	1.2.3	Writes audio CD-Rs in disk-at-once (DAO) mode	Cdrdao records audio CD-Rs in disk-at-once (DAO) mode, based on a textual description of the CD contents. Recording in DAO mode writes the complete disc (lead-in, one or more tracks, and lead-out) in a single step. DAO allows full control over the length and the contents of pre-gaps, the pause areas between tracks.	http://cdrdao.sourceforge.net/	Wed 20 Mar 2013 09:51:50 AM EDT
celt	0.11.1	An audio codec for use in low-delay speech and audio communication	CELT (Constrained Energy Lapped Transform) is an ultra-low delay audio codec designed for realtime transmission of high quality speech and audio. This is meant to close the gap between traditional speech codecs (such as Speex) and traditional audio codecs (such as Vorbis).	http://www.celt-codec.org/	Wed 20 Mar 2013 09:51:16 AM EDT

Name	Version	Summary	Description	URL	Install Time
cfitsio	3.300	Library for manipulating FITS data files	CFITSIO is a library of C and FORTRAN subroutines for reading and writing data files in FITS (Flexible Image Transport System) data format. CFITSIO simplifies the task of writing software that deals with FITS files by providing an easy to use set of high-level routines that insulate the programmer from the internal complexities of the FITS file format. At the same time, CFITSIO provides many advanced features that have made it the most widely used FITS file programming interface in the astronomical community.	http://heasarc.gsfc.nasa.gov/fitsio/	Wed 20 Mar 2013 09:50:23 AM EDT

Name	Version	Summary	Description	URL	Install Time
checkpolicy	2.1.12	SELinux policy compiler	<p>Security-enhanced Linux is a feature of the Linux kernel and a number of utilities with enhanced security functionality designed to add mandatory access controls to Linux. The Security-enhanced Linux kernel contains new architectural components originally developed to improve the security of the Flask operating system. These architectural components provide general support for the enforcement of many kinds of mandatory access control policies, including those based on the concepts of Type Enforcement, Role-based Access Control, and Multi-level Security.</p> <p>This package contains check-policy, the SELinux policy compiler. Only required for building policies.</p>		Fri 05 Apr 2013 04:36:38 PM EDT
chkconfig	1.3.59	A system tool for maintaining the /etc/rc*.d hierarchy	<p>Chkconfig is a basic system utility. It updates and queries runlevel information for system services. Chkconfig manipulates the numerous symbolic links in /etc/rc.d, to relieve system administrators of some of the drudgery of manually editing the symbolic links.</p>		Wed 20 Mar 2013 09:49:48 AM EDT

Name	Version	Summary	Description	URL	Install Time
chmlib	0.40	Library for dealing with ITSS/CHM format files	CHMLIB is a library for dealing with ITSS/CHM format files. Right now, it is a very simple library, but sufficient for dealing with all of the .chm files I've come across. Due to the fairly well-designed indexing built into this particular file format, even a small library is able to gain reasonably good performance indexing into ITSS archives.	http://www.jedrea.com/chmlib/	Wed 20 Mar 2013 09:50:44 AM EDT
chrony	1.27	An NTP client/server	A client/server for the Network Time Protocol, this program keeps your computer's clock accurate. It was specially designed to support systems with intermittent internet connections, but it also works well in permanently connected environments. It can use also hardware reference clocks, system real-time clock or manual input as time references.	http://chrony.tuxfamily.org	Wed 20 Mar 2013 09:58:38 AM EDT

Name	Version	Summary	Description	URL	Install Time
cifs-utils	6.0	Utilities for mounting and managing CIFS mounts	The SMB/CIFS protocol is a standard file sharing protocol widely deployed on Microsoft Windows machines. This package contains tools for mounting shares on Linux using the SMB/CIFS protocol. The tools in this package work in conjunction with support in the kernel to allow one to mount a SMB/CIFS share onto a client and use it as if it were a standard Linux file system.	http://linux-cifs.samba.org/cifs-utils/	Fri 05 Apr 2013 04:37:07 PM EDT
cinpaint	1.3	CinePaint is a tool for manipulating images	CinePaint is used for motion picture frame-by-frame retouching, dirt removal, wire rig removal, render repair, background plates, and 3d model textures. It's been used on many feature films, including The Last Samurai where it was used to add flying arrows. It's also being used by pro photographers who need greater color fidelity than is available in other tools.	http://www.cinpaint.org/	Wed 20 Mar 2013 09:58:18 AM EDT

Name	Version	Summary	Description	URL	Install Time
cinpaint-libs	1.3	Libraries for cinpaint	CinePaint is used for motion picture frame-by-frame re-touching, dirt removal, wire rig removal, render repair, background plates, and 3d model textures. It's been used on many feature films, including The Last Samurai where it was used to add flying arrows. It's also being used by pro photographers who need greater color fidelity than is available in other tools.	http://www.cinpaint.org/	Wed 20 Mar 2013 09:53:57 AM EDT
cjkuni-uming-fonts	0.2.20080216.1	Chinese Unicode TrueType font in Ming face	CJK Unifonts are Unicode TrueType fonts derived from original fonts made available by Arphic Technology under "Arphic Public License" and extended by the CJK Unifonts project. CJK Unifonts in Ming face.	http://www.freedesktop.org/wiki/Software/CJKUnifonts	Sun 24 Mar 2013 04:49:14 PM EDT
cln	1.3.2	Class Library for Numbers	A collection of C++ math classes and functions, which are designed for memory and speed efficiency, and enable type safety and algebraic syntax.	http://www.ginac.de/CLN/	Wed 20 Mar 2013 09:50:06 AM EDT
cloog-ppl	0.15.11	Parma Polyhedra Library backend (ppl) based version of the Cloog binaries	The dynamic shared libraries of the Chunky Loop Generator	http://www.cloog.org	Wed 20 Mar 2013 09:52:15 AM EDT
clucene-contribs-lib	2.3.3.4	Language specific text analyzers for clucene	Language specific text analyzers for clucene.	http://www.sourceforge.net/projects/clucene	Wed 20 Mar 2013 09:50:52 AM EDT

Name	Version	Summary	Description	URL	Install Time
clucene-core	2.3.3.4	Core clucene module	CLucene is a C++ port of the popular Apache Lucene search engine (http://lucene.apache.org/java). CLucene aims to be a high-speed alternative to Java Lucene, its API is very similar to that of the Java version. CLucene has recently been brought up to date with Lucene 2.3.2. It contains most of the same functionality as the Java version.	http://www.sourceforge.net/projects/clucene	Wed 20 Mar 2013 09:50:23 AM EDT
color-filesystem	1	Color filesystem layout	This package provides some directories that are required/used to store color.		Wed 20 Mar 2013 09:51:56 AM EDT
colord	0.1.31	Color daemon	colord is a low level system activated daemon that maps color devices to color profiles in the system context.	http://www.freedesktop.org/software/colord/	Sun 24 Mar 2013 04:48:59 PM EDT

Name	Version	Summary	Description	URL	Install Time
colord-libs	0.1.31	Color daemon library	colord is a low level system activated daemon that maps color devices to color profiles in the system context.	http://www.freedesktop.org/software/colord/	Sun 24 Mar 2013 04:44:52 PM EDT
compat-readline5	5.2	A library for editing typed command lines	The Readline library provides a set of functions that allow users to edit command lines. Both Emacs and vi editing modes are available. The Readline library includes additional functions for maintaining a list of previously-entered command lines for recalling or editing those lines, and for performing csh-like history expansion on previous commands.	http://cnswww.cns.cwru.edu/php/chet/readline/rltop.html	Wed 20 Mar 2013 09:52:11 AM EDT
comps-extras	21	Images for components included in Fedora	This package contains images for the components included in Fedora.	http://git.fedorahosted.org/git/?p=comps-extras.git;a=summary	Sun 24 Mar 2013 04:44:31 PM EDT
coolkey	1.1.0	CoolKey PKCS #11 module	Linux Driver support for the CoolKey and CAC products.	http://directory.fedora.redhat.com/wiki/CoolKey	Wed 20 Mar 2013 09:58:23 AM EDT
coolkey-devel	1.1.0	CoolKey Applet libraries	Linux Driver support to access the CoolKey applet.	http://directory.fedora.redhat.com/wiki/CoolKey	Fri 05 Apr 2013 04:34:46 PM EDT
coreutils	8.17	A set of basic GNU tools commonly used in shell scripts	These are the GNU core utilities. This package is the combination of the old GNU fileutils, sh-utils, and textutils packages.	http://www.gnu.org/software/coreutils/	Sun 24 Mar 2013 04:44:38 PM EDT

Name	Version	Summary	Description	URL	Install Time
cpio	2.11	A GNU archiving program	<p>GNU cpio copies files into or out of a cpio or tar archive. Archives are files which contain a collection of other files plus information about them, such as their file name, owner, timestamps, and access permissions. The archive can be another file on the disk, a magnetic tape, or a pipe. GNU cpio supports the following archive formats: binary, old ASCII, new ASCII, crc, HPUX binary, HPUX old ASCII, old tar and POSIX.1 tar. By default, cpio creates binary format archives, so that they are compatible with older cpio programs. When it is extracting files from archives, cpio automatically recognizes which kind of archive it is reading and can read archives created on machines with a different byte-order.</p> <p>Install cpio if you need a program to manage file archives.</p>	http://www.gnu.org/software/cpio/	Wed 20 Mar 2013 09:50:08 AM EDT

Name	Version	Summary	Description	URL	Install Time
cpp	4.7.2	The C Preprocessor	<p>Cpp is the GNU C-Compatible Compiler Preprocessor. Cpp is a macro processor which is used automatically by the C compiler to transform your program before actual compilation. It is called a macro processor because it allows you to define macros, abbreviations for longer constructs.</p> <p>The C preprocessor provides four separate functionalities: the inclusion of header files (files of declarations that can be substituted into your program); macro expansion (you can define macros, and the C preprocessor will replace the macros with their definitions throughout the program); conditional compilation (using special preprocessing directives, you can include or exclude parts of the program according to various conditions); and line control (if you use a program to combine or rearrange source files into an intermediate file which is then compiled, you can use line control to inform the compiler about where each source line originated).</p> <p>You should install this package if you are a C programmer and you use macros.</p>	http://gcc.gnu.org	Wed 20 Mar 2013 09:51:08 AM EDT

Name	Version	Summary	Description	URL	Install Time
cracklib	2.8.22	A password-checking library	<p>CrackLib tests passwords to determine whether they match certain security-oriented characteristics, with the purpose of stopping users from choosing passwords that are easy to guess. CrackLib performs several tests on passwords: it tries to generate words from a username and gecost entry and checks those words against the password; it checks for simplistic patterns in passwords; and it checks for the password in a dictionary. CrackLib is actually a library containing a particular C function which is used to check the password, as well as other C functions. CrackLib is not a replacement for a passwd program; it must be used in conjunction with an existing passwd program.</p> <p>Install the cracklib package if you need a program to check users' passwords to see if they are at least minimally secure. If you install CrackLib, you will also want to install the cracklib-dicts package.</p>	http://sourceforge.net/projects/cracklib/	Fri 05 Apr 2013 04:24:07 PM EDT

Name	Version	Summary	Description	URL	Install Time
cracklib-dicts	2.8.22	The standard CrackLib dictionaries	The cracklib-dicts package includes the CrackLib dictionaries. CrackLib will need to use the dictionary appropriate to your system, which is normally put in /usr/share/dict/words. Cracklib-dicts also contains the utilities necessary for the creation of new dictionaries. If you are installing CrackLib, you should also install cracklib-dicts.	http://sourceforge.net/projects/cracklib/	Wed 20 Mar 2013 09:51:36 AM EDT
crash	6.1.4	Kernel analysis utility for live systems, netdump, diskdump, kdump, LKCD or mcore dumpfiles	The core analysis suite is a self-contained tool that can be used to investigate either live systems, kernel core dumps created from the netdump, diskdump and kdump packages from Red Hat Linux, the mcore kernel patch offered by Mission Critical Linux, or the LKCD kernel patch.	http://people.redhat.com/anderson	Sun 24 Mar 2013 04:44:56 PM EDT
crda	1.1.3-2013.02.13	Regulatory compliance daemon for 802.11 wireless networking	CRDA acts as the udev helper for communication between the kernel and userspace for regulatory compliance. It relies on nl80211 for communication. CRDA is intended to be run only through udev communication from the kernel.	http://www.linuxwireless.org/en/developers/Regulatory/CRDA	Sun 24 Mar 2013 04:49:01 PM EDT
createrepo	0.9.9	Creates a common metadata repository	This utility will generate a common metadata repository from a directory of rpm packages.	http://createrepo.baseurl.org/	Sun 24 Mar 2013 04:48:00 PM EDT

Name	Version	Summary	Description	URL	Install Time
cronie	1.4.10	Cron daemon for executing programs at set times	Cronie contains the standard UNIX daemon crond that runs specified programs at scheduled times and related tools. It is a fork of the original vixie-cron and has security and configuration enhancements like the ability to use pam and SELinux.	https://fedorahosted.org/cronie	Wed 20 Mar 2013 09:53:25 AM EDT
cronie-anacron	1.4.10	Utility for running regular jobs	Anacron is part of cronie that is used for running jobs with regular periodicity which do not have exact time of day of execution. The default settings of anacron execute the daily, weekly, and monthly jobs, but anacron allows setting arbitrary periodicity of jobs. Using anacron allows running the periodic jobs even if the system is often powered off and it also allows randomizing the time of the job execution for better utilization of resources shared among multiple systems.	https://fedorahosted.org/cronie	Wed 20 Mar 2013 09:53:25 AM EDT

Name	Version	Summary	Description	URL	Install Time
crontabs	1.11	Root crontab files used to schedule the execution of programs	<p>This package is used by Fedora mainly for executing files by cron.</p> <p>The crontabs package contains root crontab files and directories. You will need to install cron daemon to run the jobs from the crontabs. The cron daemon such as cronie or fcrn checks the crontab files to see when particular commands are scheduled to be executed. If commands are scheduled, it executes them.</p> <p>Crontabs handles a basic system function, so it should be installed on your system.</p>	https://fedorahosted.org/crontabs	Wed 20 Mar 2013 09:53:25 AM EDT
cryptsetup	1.6.1	A utility for setting up encrypted disks	The cryptsetup package contains a utility for setting up disk encryption using dm-crypt kernel module.	http://cryptsetup.googlecode.com/	Mon 08 Apr 2013 10:15:33 AM EDT
cryptsetup-libs	1.6.1	Cryptsetup shared library	This package contains the cryptsetup shared library, libcryptsetup.	http://cryptsetup.googlecode.com/	Mon 08 Apr 2013 10:15:33 AM EDT
crystalhd-firmware	3.10.0	Firmware for the Broadcom Crystal HD video decoder	Firmwares for the Broadcom Crystal HD (bcm970012 and bcm970015) video decoders.	http://www.broadcom.com/support/crystal_hd/	Tue 26 Mar 2013 01:02:00 PM EDT

cscope	15.8	C source code tree search and browse tool	cscope is a mature, ncurses based, C source code tree browsing tool. It allows users to search large source code bases for variables, functions, macros, etc, as well as perform general regex and plain text searches. Results are returned in lists, from which the user can select individual matches for use in file editing.	http://cscope.sourceforge.net	Wed 20 Mar 2013 09:59:26 AM EDT

Name	Version	Summary	Description	URL	Install Time
ctags	5.8	A C programming language indexing and/or cross-reference tool	<p>Ctags generates an index (or tag) file of C language objects found in C source and header files. The index makes it easy for text editors or other utilities to locate the indexed items. Ctags can also generate a cross reference file which lists information about the various objects found in a set of C language files in human readable form. Exuberant Ctags improves on ctags because it can find all types of C language tags, including macro definitions, enumerated values (values inside enum{...}), function and method definitions, enum/struct/union tags, external function prototypes, typedef names and variable declarations. Exuberant Ctags is far less likely to be fooled by code containing #if preprocessor conditional constructs than ctags. Exuberant ctags supports output of Emacs style TAGS files and can be used to print out a list of selected objects found in source files.</p> <p>Install ctags if you are going to use your system for C programming.</p>	http://ctags.sourceforge.net/	Wed 20 Mar 2013 09:59:52 AM EDT

Name	Version	Summary	Description	URL	Install Time
cups	1.5.4	Common Unix Printing System	The Common UNIX Printing System provides a portable printing layer for UNIX operating systems. It has been developed by Easy Software Products to promote a standard printing solution for all UNIX vendors and users. CUPS provides the System V and Berkeley command-line interfaces.	http://www.cups.org/	Sun 24 Mar 2013 04:45:57 PM EDT
cups-libs	1.5.4	Common Unix Printing System - libraries	The Common UNIX Printing System provides a portable printing layer for UNIX operating systems. It has been developed by Easy Software Products to promote a standard printing solution for all UNIX vendors and users. CUPS provides the System V and Berkeley command-line interfaces. The cups-libs package provides libraries used by applications to use CUPS natively, without needing the lp/lpr commands.	http://www.cups.org/	Fri 05 Apr 2013 04:24:14 PM EDT

curl	7.27.0	A utility for getting files from remote servers (FTP, HTTP, and others)	curl is a command line tool for transferring data with URL syntax, supporting FTP, FTPS, HTTP, HTTPS, SCP, SFTP, TFTP, TELNET, DICT, LDAP, LDAPS, FILE, IMAP, SMTP, POP3 and RTSP. curl supports SSL certificates, HTTP POST, HTTP PUT, FTP uploading, HTTP form based upload, proxies, cookies, user+password authentication (Basic, Digest, NTLM, Negotiate, kerberos...), file transfer resume, proxy tunneling and a busload of other useful tricks.	http://curl.haxx.se/	Tue 23 Apr 2013 09:36:18 AM EDT

Name	Version	Summary	Description	URL	Install Time
cvs	1.11.23	Concurrent Versions System	CVS (Concurrent Versions System) is a version control system that can record the history of your files (usually, but not always, source code). CVS only stores the differences between versions, instead of every version of every file you have ever created. CVS also keeps a log of who, when, and why changes occurred. CVS is very helpful for managing releases and controlling the concurrent editing of source files among multiple authors. Instead of providing version control for a collection of files in a single directory, CVS provides version control for a hierarchical collection of directories consisting of revision controlled files. These directories and files can then be combined together to form a software release.	http://cvs.nongnu.org/	Sun 24 Mar 2013 04:48:59 PM EDT
cyrus-sasl	2.1.23	The Cyrus SASL library	The cyrus-sasl package contains the Cyrus implementation of SASL. SASL is the Simple Authentication and Security Layer, a method for adding authentication support to connection-based protocols.	http://asg.web.cmu.edu/sasl/sasl-library.html	Sun 24 Mar 2013 04:45:12 PM EDT

Name	Version	Summary	Description	URL	Install Time
cyrus-sasl-devel	2.1.23	Files needed for developing applications with Cyrus SASL	The cyrus-sasl-devel package contains files needed for developing and compiling applications which use the Cyrus SASL library.	http://asg.web.cmu.edu/sasl/sasl-library.html	Fri 05 Apr 2013 04:34:34 PM EDT
cyrus-sasl-gssapi	2.1.23	GSSAPI authentication support for Cyrus SASL	The cyrus-sasl-gssapi package contains the Cyrus SASL plugins which support GSSAPI authentication. GSSAPI is commonly used for Kerberos authentication.	http://asg.web.cmu.edu/sasl/sasl-library.html	Sun 24 Mar 2013 04:44:58 PM EDT
cyrus-sasl-lib	2.1.23	Shared libraries needed by applications which use Cyrus SASL	The cyrus-sasl-lib package contains shared libraries which are needed by applications which use the Cyrus SASL library.	http://asg.web.cmu.edu/sasl/sasl-library.html	Thu 02 May 2013 12:32:47 AM EDT
cyrus-sasl-lib	2.1.23	Shared libraries needed by applications which use Cyrus SASL	The cyrus-sasl-lib package contains shared libraries which are needed by applications which use the Cyrus SASL library.	http://asg.web.cmu.edu/sasl/sasl-library.html	Sun 24 Mar 2013 04:44:43 PM EDT
cyrus-sasl-plain	2.1.23	PLAIN and LOGIN authentication support for Cyrus SASL	The cyrus-sasl-plain package contains the Cyrus SASL plugins which support PLAIN and LOGIN authentication schemes.	http://asg.web.cmu.edu/sasl/sasl-library.html	Sun 24 Mar 2013 04:44:58 PM EDT
dbus	1.6.8	D-BUS message bus	D-BUS is a system for sending messages between applications. It is used both for the system-wide message bus service, and as a per-user-login-session messaging facility.	http://www.freedesktop.org/software/dbus/	Wed 20 Mar 2013 09:52:49 AM EDT

Name	Version	Summary	Description	URL	Install Time
dbus-devel	1.6.8	Development files for D-BUS	This package contains libraries and header files needed for developing software that uses D-BUS.	http://www.freedesktop.org/software/dbus/	Fri 05 Apr 2013 04:34:31 PM EDT
dbus-glib	0.100	GLib bindings for D-Bus	D-Bus add-on library to integrate the standard D-Bus library with the GLib thread abstraction and main loop.	http://www.freedesktop.org/software/dbus/	Wed 20 Mar 2013 09:49:57 AM EDT
dbus-glib-devel	0.100	Libraries and headers for the D-Bus GLib bindings	Headers and static libraries for the D-Bus GLib bindings	http://www.freedesktop.org/software/dbus/	Fri 05 Apr 2013 04:34:31 PM EDT
dbus-libs	1.6.8	Libraries for accessing D-BUS	This package contains lowlevel libraries for accessing D-BUS.	http://www.freedesktop.org/software/dbus/	Fri 05 Apr 2013 04:24:03 PM EDT
dbus-libs	1.6.8	Libraries for accessing D-BUS	This package contains lowlevel libraries for accessing D-BUS.	http://www.freedesktop.org/software/dbus/	Wed 20 Mar 2013 09:49:46 AM EDT
dbus-python	1.1.1	D-Bus Python Bindings	D-Bus python bindings for use with python programs.	http://www.freedesktop.org/software/dbus/	Sun 24 Mar 2013 04:44:44 PM EDT
dbus-x11	1.6.8	X11-requiring add-ons for D-BUS	D-BUS contains some tools that require Xlib to be installed, those are in this separate package so server systems need not install X.	http://www.freedesktop.org/software/dbus/	Wed 20 Mar 2013 09:52:56 AM EDT
dbusmenu-qt	0.9.2	A Qt implementation of the DBusMenu protocol	This library provides a Qt implementation of the DBusMenu protocol. The DBusMenu protocol makes it possible for applications to export and import their menus over DBus.	https://launchpad.net/libdbusmenu-qt/	Wed 20 Mar 2013 09:52:57 AM EDT

Name	Version	Summary	Description	URL	Install Time
dconf	0.14.1	A configuration system	dconf is a low-level configuration system. Its main purpose is to provide a backend to the GSettings API in GLib.	http://live.gnome.org/dconf	Wed 20 Mar 2013 09:53:24 AM EDT
dejavu-fonts-common	2.33	Common files for the DejaVu font set	The DejaVu font set is based on the Bitstream Vera fonts, release 1.10. Its purpose is to provide a wider range of characters, while maintaining the original style, using an open collaborative development process. This package consists of files used by other DejaVu packages.	http://dejavu-fonts.org/	Wed 20 Mar 2013 09:49:30 AM EDT
dejavu-sans-fonts	2.33	Variable-width sans-serif font faces	The DejaVu font set is based on the Bitstream Vera fonts, release 1.10. Its purpose is to provide a wider range of characters, while maintaining the original style, using an open collaborative development process. This package consists of the DejaVu sans-serif variable-width font faces, in their unabridged version.	http://dejavu-fonts.org/	Wed 20 Mar 2013 09:50:16 AM EDT

Name	Version	Summary	Description	URL	Install Time
dejavu-sans-mono-fonts	2.33	Monospace sans-serif font faces	The DejaVu font set is based on the Bitstream Vera fonts, release 1.10. Its purpose is to provide a wider range of characters, while maintaining the original style, using an open collaborative development process. This package consists of the DejaVu sans-serif monospace font faces, in their unabridged version.	http://dejavu-fonts.org/	Wed 20 Mar 2013 09:51:35 AM EDT
dejavu-serif-fonts	2.33	Variable-width serif font faces	The DejaVu font set is based on the Bitstream Vera fonts, release 1.10. Its purpose is to provide a wider range of characters, while maintaining the original style, using an open collaborative development process. This package consists of the DejaVu serif variable-width font faces, in their unabridged version.	http://dejavu-fonts.org/	Wed 20 Mar 2013 09:51:22 AM EDT
deltarpm	3.6	Create deltas between rpms	A deltarpm contains the difference between an old and a new version of a rpm, which makes it possible to recreate the new rpm from the deltarpm and the old one. You don't have to have a copy of the old rpm, deltarpms can also work with installed rpms.	http://gitorious.org/deltarpm/deltarpm	Wed 20 Mar 2013 09:51:56 AM EDT

desktop-backgrounds-gnome	18.0.0	The default Fedora wallpaper from GNOME desktop	The desktop-backgrounds-gnome package sets default background in gnome.		Wed 20 Mar 2013 09:51:07 AM EDT

Name	Version	Summary	Description	URL	Install Time
desktop-file-utils	0.21	Utilities for manipulating .desktop files	.desktop files are used to describe an application for inclusion in GNOME or KDE menus. This package contains desktop-file-validate which checks whether a .desktop file complies with the specification at http://www.freedesktop.org/standards/ , and desktop-file-install which	http://www.freedesktop.org/software/desktop-file-utils	Wed 20 Mar 2013 09:49:58 AM EDT

Name	Version	Summary	Description	URL	Install Time
device-mapper	1.02.77	Device mapper utility	This package contains the supporting userspace utility, dmsetup, for the kernel device-mapper.	http://sources.redhat.com/dm	Wed 20 Mar 2013 09:52:48 AM EDT
device-mapper-event	1.02.77	Device-mapper event daemon	This package contains the dmeventd daemon for monitoring the state of device-mapper devices.	http://sources.redhat.com/lvm2	Wed 20 Mar 2013 09:52:58 AM EDT
device-mapper-event-libs	1.02.77	Device-mapper event daemon shared library	This package contains the device-mapper event daemon shared library, libdevmapper-event.	http://sources.redhat.com/lvm2	Wed 20 Mar 2013 09:52:56 AM EDT
device-mapper-libs	1.02.77	Device-mapper shared library	This package contains the device-mapper shared library, libdevmapper.	http://sources.redhat.com/lvm2	Wed 20 Mar 2013 09:52:48 AM EDT
device-mapper-persistent-data	0.1.4	Device-mapper thin provisioning tools	thin-provisioning-tools contains dump,restore and repair tools to manage device-mapper thin provisioning target metadata devices.	https://github.com/jthorner/thin-provisioning-tools	Wed 20 Mar 2013 09:51:18 AM EDT

Name	Version	Summary	Description	URL	Install Time
dhclient	4.2.5	Provides the ISC DHCP client daemon and dhclient-script	<p>DHCP (Dynamic Host Configuration Protocol) is a protocol which allows individual devices on an IP network to get their own network configuration information (IP address, subnetmask, broadcast address, etc.) from a DHCP server. The overall purpose of DHCP is to make it easier to administer a large network.</p> <p>To use DHCP on your network, install a DHCP service (or relay agent), and on clients run a DHCP client daemon. The dhclient package provides the ISC DHCP client daemon.</p>	http://isc.org/products/DHCP/	Sun 24 Mar 2013 04:45:12 PM EDT
dhcp-common	4.2.5	Common files used by ISC dhcp client and server	<p>DHCP (Dynamic Host Configuration Protocol) is a protocol which allows individual devices on an IP network to get their own network configuration information (IP address, subnetmask, broadcast address, etc.) from a DHCP server. The overall purpose of DHCP is to make it easier to administer a large network.</p> <p>This package provides common files used by dhcp and dhclient package.</p>	http://isc.org/products/DHCP/	Sun 24 Mar 2013 04:44:54 PM EDT

Name	Version	Summary	Description	URL	Install Time
dhcp-libs	4.2.5	Shared libraries used by ISC dhcp client and server	This package contains shared libraries used by ISC dhcp client and server	http://isc.org/products/DHCP/	Sun 24 Mar 2013 04:44:52 PM EDT
dia	0.97.2	Diagram drawing program	The Dia drawing program can be used to draw different types of diagrams, and includes support for UML static structure diagrams (class diagrams), entity relationship modeling, and network diagrams. Dia can load and save diagrams to a custom file format, can load and save in .xml format, and can export to PostScript(TM).	http://www.gnome.org/projects/dia/	Wed 20 Mar 2013 09:57:50 AM EDT
dialog	1.1	A utility for creating TTY dialog boxes	Dialog is a utility that allows you to show dialog boxes (containing questions or messages) in TTY (text mode) interfaces. Dialog is called from within a shell script. The following dialog boxes are implemented: yes/no, menu, input, message, text, info, checklist, radiolist, and gauge. Install dialog if you would like to create TTY dialog boxes.	http://invisible-island.net/dialog/dialog.html	Wed 20 Mar 2013 09:52:11 AM EDT

Name	Version	Summary	Description	URL	Install Time
diffstat	1.55	A utility which provides statistics based on the output of diff	The diff command compares files line by line. Diffstat reads the output of the diff command and displays a histogram of the insertions, deletions and modifications in each file. Diffstat is commonly used to provide a summary of the changes in large, complex patch files. Install diffstat if you need a program which provides a summary of the diff command's output.	http://invisible-island.net/diffstat	Wed 20 Mar 2013 09:59:53 AM EDT
diffutils	3.2	A GNU collection of diff utilities	Diffutils includes four utilities: diff, cmp, diff3 and sdiff. Diff compares two files and shows the differences, line by line. The cmp command shows the offset and line numbers where two files differ, or cmp can show the characters that differ between the two files. The diff3 command shows the differences between three files. Diff3 can be used when two people have made independent changes to a common original; diff3 can produce a merged file that contains both sets of changes and warnings about conflicts. The sdiff command can be used to merge two files interactively. Install diffutils if you need to compare text files.	http://www.gnu.org/software/diffutils/diffutils.html	Sun 24 Mar 2013 04:44:53 PM EDT

Name	Version	Summary	Description	URL	Install Time
digikam	3.1.0	A digital camera accessing & photo management application	<p>digiKam is an easy to use and powerful digital photo management application, which makes importing, organizing and manipulating digital photos a "snap". An easy to use interface is provided to connect to your digital camera, preview the images and download and/or delete them.</p> <p>digiKam built-in image editor makes the common photo correction a simple task. The image editor is extensible via plugins, can also make use of the KIPi image handling plugins to extend its capabilities even further for photo manipulations, import and export, etc. Install the kipi-plugins packages to use them.</p>	http://www.digikam.org/	Fri 05 Apr 2013 04:36:20 PM EDT
digikam-libs	3.1.0	Runtime libraries for digikam	Runtime libraries for digikam.	http://www.digikam.org/	Fri 05 Apr 2013 04:36:19 PM EDT
dirac-libs	1.0.2	Libraries for dirac	This package contains libraries for dirac.	http://diracvideo.org	Tue 26 Mar 2013 01:02:03 PM EDT
djvulibre-libs	3.5.25.3	Library files for DjVuLibre	Library files for DjVuLibre.	http://djvu.sourceforge.net/	Wed 20 Mar 2013 09:51:20 AM EDT

Name	Version	Summary	Description	URL	Install Time
dmraid	1.0.0.rc16	dmraid (Device-mapper RAID tool and library)	DMRAID supports RAID device discovery, RAID set activation, creation, removal, rebuild and display of properties for ATARAID/DDF1 metadata on Linux >= 2.4 using device-mapper.	http://people.redhat.com/heinzm/sw/dmraid	Sun 24 Mar 2013 04:45:48 PM EDT
dmraid-events	1.0.0.rc16	dmevent_tool (Device-mapper event tool) and DSO	Provides a dmeventd DSO and the dmevent_tool to register devices with it for device monitoring. All active RAID sets should be manually registered with dmevent_tool.	http://people.redhat.com/heinzm/sw/dmraid	Sun 24 Mar 2013 04:45:48 PM EDT
dnsmasq	2.65	A lightweight DHCP/caching DNS server	Dnsmasq is lightweight, easy to configure DNS forwarder and DHCP server. It is designed to provide DNS and, optionally, DHCP, to a small network. It can serve the names of local machines which are not in the global DNS. The DHCP server integrates with the DNS server and allows machines with DHCP-allocated addresses to appear in the DNS with names configured either in each host or in a central configuration file. Dnsmasq supports static and dynamic DHCP leases and BOOTP for network booting of diskless machines.	http://www.thekelleys.org.uk/dnsmasq/	Fri 05 Apr 2013 04:37:07 PM EDT

Name	Version	Summary	Description	URL	Install Time
docbook-dtds	1.0	SGML and XML document type definitions for DocBook	The DocBook Document Type Definition (DTD) describes the syntax of technical documentation texts (articles, books and manual pages). This syntax is XML-compliant and is developed by the OASIS consortium. This package contains SGML and XML versions of the DocBook DTD.	http://www.oasis-open.org/docbook/	Wed 20 Mar 2013 09:52:09 AM EDT
docbook-style-xsl	1.78.1	Norman Walsh's XSL stylesheets for DocBook XML	These XSL stylesheets allow you to transform any DocBook XML document to other formats, such as HTML, FO, and XHTML. They are highly customizable.	http://docbook.sourceforge.net/projects/xsl/	Mon 08 Apr 2013 10:15:41 AM EDT
dos2unix	6.0.1	Text file format converters	Convert text files with DOS or Mac line endings to Unix line endings and vice versa.	http://waterlan.home.xs4all.nl/dos2unix.html	Wed 20 Mar 2013 09:59:52 AM EDT
dosfstools	3.0.16	Utilities for making and checking MS-DOS FAT filesystems on Linux	The dosfstools package includes the mkdosfs and dosfsck utilities, which respectively make and check MS-DOS FAT filesystems on hard drives or on floppies.	http://www.daniel-baumann.ch/software/dosfstools/	Wed 27 Mar 2013 12:47:30 PM EDT
dotconf	1.3	Libraries to parse configuration files	Dotconf is a library used to handle configuration files.	https://github.com/williamh/dotconf	Wed 20 Mar 2013 09:56:43 AM EDT

Name	Version	Summary	Description	URL	Install Time
doxygen	1.8.3.1	A documentation system for C/C++	Doxygen can generate an on-line class browser (in HTML) and/or a reference manual (in LaTeX) from a set of documented source files. The documentation is extracted directly from the sources. Doxygen can also be configured to extract the code structure from undocumented source files.	http://www.stack.nl/~dimitri/doxygen/index.html	Sun 24 Mar 2013 04:49:06 PM EDT
dracut	024	Initramfs generator using udev	dracut contains tools to create a bootable initramfs for 2.6 Linux kernels. Unlike existing implementations, dracut does hard-code as little as possible into the initramfs. dracut contains various modules which are driven by the event-based udev. Having root on MD, DM, LVM2, LUKS is supported as well as NFS, iSCSI, NBD, FCoE with the dracut-network package.	https://dracut.wiki.kernel.org/	Sun 24 Mar 2013 04:45:12 PM EDT
dragon	4.10.2	Media player	Media player.	https://projects.kde.org/projects/kde/kdemultimedia/dragon	Tue 23 Apr 2013 09:35:57 AM EDT

Name	Version	Summary	Description	URL	Install Time
dump	0.4	Programs for backing up and restoring ext2/ext3 filesystems	<p>The dump package contains both dump and restore. Dump examines files in a filesystem, determines which ones need to be backed up, and copies those files to a specified disk, tape, or other storage medium. The restore command performs the inverse function of dump; it can restore a full backup of a filesystem. Subsequent incremental backups can then be layered on top of the full backup. Single files and directory subtrees may also be restored from full or partial backups.</p> <p>Install dump if you need a system for both backing up filesystems and restoring filesystems after backups.</p>	http://dump.sourceforge.net/	Sun 24 Mar 2013 04:49:02 PM EDT
dustin-domestic-manners-fonts	20030527	Handwriting font by Dustin Norlander	<p>This font mimics the authors handwriting. The name comes from the book Domestic Manners of the Americans, by Fanny Trollope.</p> <p>Font contains, letters, numbers, punctuation, accented characters and some special characters (most European Latin characters).</p>	http://www.dustismo.com	Wed 20 Mar 2013 09:51:22 AM EDT

Name	Version	Summary	Description	URL	Install Time
dustin-dustismo-fonts-common	20030318	Common files for dustin-dustismo-fonts	General purpose fonts by Dustin Norlander available in serif and sans-serif versions. The fonts cover all European Latin characters. This package consists of files used by other dustin-dustismo-fonts packages.	http://www.dustismo.com	Wed 20 Mar 2013 09:49:34 AM EDT
dustin-dustismo-roman-fonts	20030318	General purpose serif font	General purpose fonts by Dustin Norlander available in serif and sans-serif versions. The fonts cover all European Latin characters. General purpose serif font with bold, italic and bold-italic variations	http://www.dustismo.com	Wed 20 Mar 2013 09:51:34 AM EDT

Name	Version	Summary	Description	URL	Install Time
dvd+rw-tools	7.1	Toolchain to master DVD+RW/+R media	Collection of tools to master DVD+RW/+R media. For further information see http://fy.chalmers.se/~appro/linux/DVD+RW/ .	http://fy.chalmers.se/~appro/linux/DVD+RW/	Wed 20 Mar 2013 09:51:49 AM EDT

Name	Version	Summary	Description	URL	Install Time
dwz	0.8	DWARF optimization and duplicate removal tool	The dwz package contains a program that attempts to optimize DWARF debugging information contained in ELF shared libraries and ELF executables for size, by replacing DWARF information representation with equivalent smaller representation where possible and by reducing the amount of duplication using techniques from DWARF standard appendix E - creating DW_TAG_partial_unit compilation units (CUs) for duplicated information and using DW_TAG_imported_unit to import it into each CU that needs it.		Wed 20 Mar 2013 09:51:15 AM EDT

Name	Version	Summary	Description	URL	Install Time
dyninst	8.1.1	An API for Run-time Code Generation	Dyninst is an Application Program Interface (API) to permit the insertion of code into a running program. The API also permits changing or removing subroutine calls from the application program. Run-time code changes are useful to support a variety of applications including debugging, performance monitoring, and to support composing applications out of existing packages. The goal of this API is to provide a machine independent interface to permit the creation of tools and applications that use run-time code patching.	http://www.dyninst.org	Tue 23 Apr 2013 09:35:31 AM EDT

Name	Version	Summary	Description	URL	Install Time
e2fsprogs	1.42.5	Utilities for managing ext2, ext3, and ext4 filesystems	The e2fsprogs package contains a number of utilities for creating, checking, modifying, and correcting any inconsistencies in second, third and fourth extended (ext2/ext3/ext4) filesystems. E2fsprogs contains e2fsck (used to repair filesystem inconsistencies after an unclean shutdown), mke2fs (used to initialize a partition to contain an empty ext2 filesystem), debugfs (used to examine the internal structure of a filesystem, to manually repair a corrupted filesystem, or to create test cases for e2fsck), tune2fs (used to modify filesystem parameters), and most of the other core ext2fs filesystem utilities. You should install the e2fsprogs package if you need to manage the performance of an ext2, ext3, or ext4 filesystem.	http://e2fsprogs.sourceforge.net/	Wed 20 Mar 2013 09:51:51 AM EDT
e2fsprogs-libs	1.42.5	Ext2/3/4 filesystem-specific shared libraries	E2fsprogs-libs contains libe2p and libext2fs, the libraries of the e2fsprogs package. These libraries are used to directly access ext2/3/4 filesystems from userspace.	http://e2fsprogs.sourceforge.net/	Wed 20 Mar 2013 09:50:07 AM EDT

Name	Version	Summary	Description	URL	Install Time
eatables	2.0.10	Ethernet Bridge frame table administration tool	Ethernet bridge tables is a fire-walling tool to transparently filter network traffic passing a bridge. The filtering possibilities are limited to link layer filtering and some basic filtering on higher network layers. This tool is the userspace control for the bridge and etables kernel components (built by default in Fedora kernels). The etables tool can be used together with the other Linux filtering tools, like iptables. There are no known incompatibility issues.	http://etables.sourceforge.net/	Wed 20 Mar 2013 09:56:40 AM EDT
ecore	1.2.1	Event/X abstraction layer	Ecore is the event/X abstraction layer that makes doing selections, Xdnd, general X stuff, event loops, timeouts and idle handlers fast, optimized, and convenient.	http://web.enlightenment.org/p.php?p=about/efl\&l=en	Tue 26 Mar 2013 01:15:40 PM EDT

Name	Version	Summary	Description	URL	Install Time
ed	1.6	The GNU line editor	Ed is a line-oriented text editor, used to create, display, and modify text files (both interactively and via shell scripts). For most purposes, ed has been replaced in normal usage by full-screen editors (emacs and vi, for example). Ed was the original UNIX editor, and may be used by some programs. In general, however, you probably don't need to install it and you probably won't use it.	http://www.gnu.org/software/ed/	Wed 20 Mar 2013 09:59:02 AM EDT
eekboard-libs	1.0.8	Runtime libraries for eekboard	This package contains the libraries for eekboard	http://fedorahosted.org/eekboard/	Wed 20 Mar 2013 09:54:11 AM EDT
eekboard-service	1.0.8	Runtime service for eekboard	This package contains the D-Bus service for eekboard	http://fedorahosted.org/eekboard/	Wed 20 Mar 2013 09:54:11 AM EDT

Name	Version	Summary	Description	URL	Install Time
eet	1.6.1	Library for speedy data storage, retrieval, and compression	<p>Eet is a tiny library designed to write an arbitrary set of chunks of data to a file and optionally compress each chunk (very much like a zip file) and allow fast random-access reading of the file later on. It does not do zip as a zip itself has more complexity than is needed, and it was much simpler to implement this once here.</p> <p>It also can encode and decode data structures in memory, as well as image data for saving to eet files or sending across the network to other machines, or just writing to arbitrary files on the system. All data is encoded in a platform independent way and can be written and read by any architecture.</p>	http://web.enlightenment.org/p.php?p=about/efl/eet	Tue 26 Mar 2013 01:15:39 PM EDT

Name	Version	Summary	Description	URL	Install Time
elektra	0.7.0	A key/value pair database to store software configurations	<p>Elektra provides a universal and secure framework to store configuration parameters in a hierarchical key-value pair mechanism, instead of each program using its own text configuration files. This allows any program to read and save its configuration with a consistent API, and allows them to be aware of other applications' configurations, permitting easy application integration. While architecturally similar to other OS registries, Elektra does not have most of the problems found in those implementations.</p> <p>This package also contains a Berkeley DB backend for Elektra, to let Elektra use Berkeley DB databases to store its keys and daemon which can be used as a proxy for access to the keys.</p>	http://www.libelektra.org	Wed 20 Mar 2013 09:50:11 AM EDT
elfutils	0.155	A collection of utilities and DSOs to handle compiled objects	<p>Elfutils is a collection of utilities, including ld (a linker), nm (for listing symbols from object files), size (for listing the section sizes of an object or archive file), strip (for discarding symbols), readelf (to see the raw ELF file structures), and elflint (to check for well-formed ELF files).</p>	https://fedorahosted.org/elfutils/	Wed 20 Mar 2013 09:50:31 AM EDT

Name	Version	Summary	Description	URL	Install Time
elfutils-libelf	0.155	Library to read and write ELF files	The elfutils-libelf package provides a DSO which allows reading and writing ELF files on a high level. Third party programs depend on this package to read internals of ELF files. The programs of the elfutils package use it also to generate new ELF files.	https://fedorahosted.org/elfutils/	Wed 20 Mar 2013 09:49:52 AM EDT
elfutils-libs	0.155	Libraries to handle compiled objects	The elfutils-libs package contains libraries which implement DWARF, ELF, and machine-specific ELF handling. These libraries are used by the programs in the elfutils package. The elfutils-devel package enables building other programs using these libraries.	https://fedorahosted.org/elfutils/	Wed 20 Mar 2013 09:50:13 AM EDT
emacs	24.2	GNU Emacs text editor	Emacs is a powerful, customizable, self-documenting, modeless text editor. Emacs contains special code editing features, a scripting language (elisp), and the capability to read mail, news, and more without leaving the editor. This package provides an emacs binary with support for X windows.	http://www.gnu.org/software/emacs/	Wed 20 Mar 2013 10:25:19 AM EDT

Name	Version	Summary	Description	URL	Install Time
emacs-common	24.2	Emacs common files	Emacs is a powerful, customizable, self-documenting, modeless text editor. Emacs contains special code editing features, a scripting language (elisp), and the capability to read mail, news, and more without leaving the editor. This package contains all the common files needed by emacs or emacs-nox.	http://www.gnu.org/software/emacs/	Wed 20 Mar 2013 10:25:18 AM EDT
emacs-filesystem	24.2	Emacs filesystem layout	This package provides some directories which are required by other packages that add functionality to Emacs.	http://www.gnu.org/software/emacs/	Sun 24 Mar 2013 04:49:27 PM EDT
enblend	4.0	Image Blending with Multiresolution Splines	Enblend is a tool for compositing images, given a set of images that overlap in some irregular way, Enblend overlays them in such a way that the seam between the images is invisible, or at least very difficult to see. Enfuse combines multiple images of the same subject into a single image with good exposure and good focus. Enblend and Enfuse do not line up the images for you, use a tool like Hugin to do that.	http://enblend.sourceforge.net/	Wed 20 Mar 2013 09:53:52 AM EDT

Name	Version	Summary	Description	URL	Install Time
enca	1.13	Character set analyzer and detector	<p>Enca is an Extremely Naive Charset Analyser. It detects character set and encoding of text files and can also convert them to other encodings using either a built-in converter or external libraries and tools like libiconv, librecode, or cstocs. Currently, it has support for Belarussian, Bulgarian, Croatian, Czech, Estonian, Latvian, Lithuanian, Polish, Russian, Slovak, Slovene, Ukrainian, Chinese and some multibyte encodings (mostly variants of Unicode) independent on the language.</p> <p>This package also contains shared Enca library other programs can make use of.</p> <p>Install enca if you need to cope with text files of dubious origin and unknown encoding and convert them to some reasonable encoding.</p>	http://gitorious.org/enca	Wed 20 Mar 2013 09:56:51 AM EDT
enchant	1.6.0	An Enchanting Spell Checking Library	A library that wraps other spell checking backends.	http://www.abisource.com/	Wed 20 Mar 2013 09:50:10 AM EDT

Name	Version	Summary	Description	URL	Install Time
entangle	0.5.0	Tethered shooting & control of digital cameras	Entangle is an application which uses GTK and libgphoto2 to provide a graphical interface for tethered photography with digital cameras. It includes control over camera shooting and configuration settings and 'hands off' shooting directly from the controlling computer.	http://entangle-photo.org/	Sun 24 Mar 2013 04:47:58 PM EDT
espeak	1.47.03	Software speech synthesizer (text-to-speech)	eSpeak is a software speech synthesizer for English and other languages. eSpeak produces good quality English speech. It uses a different synthesis method from other open source TTS engines, and sounds quite different. It's perhaps not as natural or "smooth", but some people may find the articulation clearer and easier to listen to for long periods. eSpeak supports several languages, however in most cases these are initial drafts and need more work to improve them. It can run as a command line program to speak text from a file or from stdin.	http://espeak.sourceforge.net	Fri 05 Apr 2013 04:37:07 PM EDT

Name	Version	Summary	Description	URL	Install Time
ethtool	3.4.1	Settings tool for Ethernet NICs	This utility allows querying and changing settings such as speed, port, auto-negotiation, PCI locations and checksum offload on many network devices, especially of Ethernet devices.	http://ftp.kernel.org/pub/software/network/ethtool/	Wed 20 Mar 2013 09:59:53 AM EDT
evas	1.2.1	Hardware-accelerated state-aware canvas API	Evas is a clean display canvas API for several target display systems that can draw anti-aliased text, smooth super and sub-sampled scaled images, alpha-blend objects and much more.	http://web.enlightenment.org/p.php?p=about/efl\&l=en	Tue 26 Mar 2013 01:15:39 PM EDT
exempi	2.2.0	Library for easy parsing of XMP metadata	Exempi provides a library for easy parsing of XMP metadata. It is a port of Adobe XMP SDK to work on UNIX and to be build with GNU automake. It includes XMPCore and XMPFiles.	http://libopenraw.freedesktop.org/wiki/Exempi	Sun 24 Mar 2013 04:45:08 PM EDT
exiv2-libs	0.23	Exif and Iptc metadata manipulation library	A C++ library to access image metadata, supporting full read and write access to the Exif and Iptc metadata, Exif MakerNote support, extract and delete methods for Exif thumbnails, classes to access Ifd and so on.	http://www.exiv2.org/	Wed 20 Mar 2013 09:49:54 AM EDT

Name	Version	Summary	Description	URL	Install Time
expat	2.1.0	An XML parser library	This is expat, the C library for parsing XML, written by James Clark. Expat is a stream oriented XML parser. This means that you register handlers with the parser prior to starting the parse. These handlers are called when the parser discovers the associated structures in the document being parsed. A start tag is an example of the kind of structures for which you may register handlers.	http://www.libexpat.org/	Fri 05 Apr 2013 04:24:11 PM EDT
expat	2.1.0	An XML parser library	This is expat, the C library for parsing XML, written by James Clark. Expat is a stream oriented XML parser. This means that you register handlers with the parser prior to starting the parse. These handlers are called when the parser discovers the associated structures in the document being parsed. A start tag is an example of the kind of structures for which you may register handlers.	http://www.libexpat.org/	Wed 20 Mar 2013 09:49:50 AM EDT
expat-devel	2.1.0	Libraries and header files to develop applications using expat	The expat-devel package contains the libraries, include files and documentation to develop XML applications with expat.	http://www.libexpat.org/	Fri 05 Apr 2013 04:34:46 PM EDT

Name	Version	Summary	Description	URL	Install Time
faad2-libs	2.7	Shared libraries of the FAAD 2 AAC decoder	FAAD 2 is a LC, MAIN and LTP profile, MPEG2 and MPEG-4 AAC decoder, completely written from scratch. This package contains libfaad.	http://www.audiocoding.com/faad2.html	Tue 26 Mar 2013 01:01:29 PM EDT
fedora-bookmarks	15	Fedora bookmarks	This package contains the default bookmarks for Fedora.	http://fedoraproject.org/	Wed 20 Mar 2013 10:23:51 AM EDT
fedora-logos	17.0.3	Fedora-related icons and pictures	The fedora-logos package contains image files which incorporate the Fedora trademarks (the "Marks"). The Marks are trademarks or registered trademarks of Red Hat, Inc. in the United States and other countries and are used by permission. This package and its content may not be distributed with anything but unmodified packages from Fedora Project. It can be used in a Fedora Spin, but not in a Fedora Remix. If necessary, this package can be replaced by the more liberally licensed generic-logos package. See the included COPYING file for full information on copying and redistribution of this package and its contents.	http://git.fedorahosted.org/git/fedora-logos.git/	Sun 24 Mar 2013 04:44:49 PM EDT
fedora-release	18	Fedora release files	Fedora release files such as yum configs and various /etc/ files that define the release.	http://fedoraproject.org	Wed 20 Mar 2013 09:49:34 AM EDT

Name	Version	Summary	Description	URL	Install Time
festival	1.96	Speech synthesis and text-to-speech system	Festival is a general multi-lingual speech synthesis system developed at CSTR. It offers a full text to speech system with various APIs, as well as an environment for development and research of speech synthesis techniques. It is written in C++ with a Scheme-based command interpreter for general control.	http://www.cstr.ed.ac.uk/projects/festival/	Wed 20 Mar 2013 09:50:49 AM EDT

Name	Version	Summary	Description	URL	Install Time
festival-freebsoft-utils	0.10	A collection of utilities that enhance Festival with some useful features	<p>A collection of utilities that enhance Festival with some useful features. They provide all that is needed for interaction with Speech Dispatcher.</p> <p>Key festival-freebsoft-utils features are:</p> <ul style="list-style-type: none"> - Generalized concept of input events. festival-freebsoft-utils allows not only plain text synthesis, but also combining it with sounds. Additionally, mechanism of logical events mapped to other events is provided. - Substitution of events for given words. - High-level voice selection mechanism and setting of basic prosodic parameters. - Spelling mode. - Capital letter signalization. - Punctuation modes, for explicit reading or not reading punctuation characters. - Incremental synthesis of texts and events. - Speech Dispatcher support. - Rudimentary SSML support. - Enhance the Festival extension language with functions commonly used in Lisp. - Support for wrapping already defined Festival functions by your own code. - Everything is written in the extension language, no patching of the Festival C++ sources is needed. 	http://www.freebsoft.org/festival-freebsoft-utils	Wed 20 Mar 2013 09:51:51 AM EDT

Name	Version	Summary	Description	URL	Install Time
festival-lib	1.96	Library for the Festival speech synthesis system	The shared library used by the Festival text-to-speech and speech synthesis system.	http://www.cstr.ed.ac.uk/projects/festival/	Wed 20 Mar 2013 09:50:48 AM EDT
festival-speechtools-libs	1.2.96	The Edinburgh Speech Tools libraries	The Edinburgh Speech Tools libraries, used by the Festival text-to-speech and speech synthesis system.	http://www.cstr.ed.ac.uk/projects/festival/	Wed 20 Mar 2013 09:50:29 AM EDT
festvox-slt-arctic-hts	0.20061229	US English female speaker "SLT" for Festival	US English female speaker ("SLT") voice for Festival. This is a HMM-based Speech Synthesis System (HTS) voice from the Nagoya Institute of Technology, trained using the CMU ARCTIC database. This voice is based on 1132 utterances spoken by a US English female speaker. The speaker is experienced in building synthetic voices. This was recorded at 16bit 32KHz, in a sound proof room, in stereo, one channel was the waveform, the other EGG. The database was automatically labelled using CMU Sphinx using the FestVox labelling scripts. No hand correction has been made.	http://www.cstr.ed.ac.uk/projects/festival/	Wed 20 Mar 2013 09:50:48 AM EDT

Name	Version	Summary	Description	URL	Install Time
ffmpeg	1.0.5	Digital VCR and streaming server	FFmpeg is a complete and free Internet live audio and video broadcasting solution for Linux/Unix. It also includes a digital VCR. It can encode in real time in many formats including MPEG1 audio and video, MPEG4, h263, ac3, asf, avi, real, mjpeg, and flash.	http://ffmpeg.org/	Fri 05 Apr 2013 04:41:13 PM EDT
ffmpeg-compat	0.6.6	Digital VCR and streaming server	FFmpeg is a complete and free Internet live audio and video broadcasting solution for Linux/Unix. It also includes a digital VCR. It can encode in real time in many formats including MPEG1 audio and video, MPEG4, h263, ac3, asf, avi, real, mjpeg, and flash. !!! BIG FAT WARNING!!! This package is made for compatibility with older components It is not intended to be used in insecure environment.	http://ffmpeg.org/	Fri 05 Apr 2013 04:41:13 PM EDT

Name	Version	Summary	Description	URL	Install Time
ffmpeg-compat-devel	0.6.6	Development package for ffmpeg-compat	FFmpeg is a complete and free Internet live audio and video broadcasting solution for Linux/Unix. It also includes a digital VCR. It can encode in real time in many formats including MPEG1 audio and video, MPEG4, h263, ac3, asf, avi, real, mjpeg, and flash. This package contains development files for ffmpeg-compat	http://ffmpeg.org/	Fri 05 Apr 2013 04:41:13 PM EDT
ffmpeg-devel	1.0.5	Development package for ffmpeg	FFmpeg is a complete and free Internet live audio and video broadcasting solution for Linux/Unix. It also includes a digital VCR. It can encode in real time in many formats including MPEG1 audio and video, MPEG4, h263, ac3, asf, avi, real, mjpeg, and flash. This package contains development files for ffmpeg	http://ffmpeg.org/	Fri 05 Apr 2013 04:41:13 PM EDT
ffmpeg-libs	1.0.5	Libraries for ffmpeg	FFmpeg is a complete and free Internet live audio and video broadcasting solution for Linux/Unix. It also includes a digital VCR. It can encode in real time in many formats including MPEG1 audio and video, MPEG4, h263, ac3, asf, avi, real, mjpeg, and flash. This package contains the libraries for ffmpeg	http://ffmpeg.org/	Tue 26 Mar 2013 01:02:01 PM EDT

Name	Version	Summary	Description	URL	Install Time
fftw	3.3.3	A Fast Fourier Transform library	FFTW is a C subroutine library for computing the Discrete Fourier Transform (DFT) in one or more dimensions, of both real and complex data, and of arbitrary input size.	http://www.fftw.org	Tue 23 Apr 2013 09:35:07 AM EDT
fftw-libs-double	3.3.3	FFTW library, double precision	This package contains the FFTW library compiled in double precision.	http://www.fftw.org	Sun 24 Mar 2013 04:44:53 PM EDT
fftw-libs-long	3.3.3	FFTW library, long double precision	This package contains the FFTW library compiled in long double precision.	http://www.fftw.org	Tue 23 Apr 2013 09:35:07 AM EDT
fftw-libs-quad	3.3.3	FFTW library, quadruple	This package contains the FFTW library compiled in quadruple precision.	http://www.fftw.org	Tue 23 Apr 2013 09:35:07 AM EDT
fftw-libs-single	3.3.3	FFTW library, single precision	This package contains the FFTW library compiled in single precision.	http://www.fftw.org	Tue 26 Mar 2013 01:15:40 PM EDT
Field3D	1.3.2	Library for storing voxel data	Field3D is an open source library for storing voxel data. It provides C++ classes that handle in-memory storage and a file format based on HDF5 that allows the C++ objects to be written to and read from disk.	https://sites.google.com/site/field3d/	Wed 20 Mar 2013 09:51:11 AM EDT
file	5.11	A utility for determining file types	The file command is used to identify a particular file according to the type of data contained by the file. File can identify many different file types, including ELF binaries, system libraries, RPM packages, and different graphics formats.	http://www.darwinsys.com/file/	Wed 20 Mar 2013 09:50:10 AM EDT

Name	Version	Summary	Description	URL	Install Time
file-libs	5.11	Libraries for applications using libmagic	Libraries for applications using libmagic.	http://www.darwinsys.com/file/	Wed 20 Mar 2013 09:50:04 AM EDT
filesystem	3.1	The basic directory layout for a Linux system	The filesystem package is one of the basic packages that is installed on a Linux system. Filesystem contains the basic directory layout for a Linux operating system, including the correct permissions for the directories.	https://fedorahosted.org/filesystem	Wed 20 Mar 2013 09:49:29 AM EDT
findutils	4.5.10	The GNU versions of find utilities (find and xargs)	The findutils package contains programs which will help you locate files on your system. The find utility searches through a hierarchy of directories looking for files which match a certain set of criteria (such as a file name pattern). The xargs utility builds and executes command lines from standard input arguments (usually lists of file names generated by the find command). You should install findutils because it includes tools that are very useful for finding things on your system.	http://www.gnu.org/software/findutils/	Wed 20 Mar 2013 09:50:05 AM EDT

Name	Version	Summary	Description	URL	Install Time
finger	0.17	The finger client	Finger is a utility which allows users to see information about system users (login name, home directory, name, how long they've been logged in to the system, etc.). The finger package includes a standard finger client. You should install finger if you'd like to retrieve finger information from other systems.		Sun 24 Mar 2013 04:49:05 PM EDT
fipscheck	1.3.1	A library for integrity verification of FIPS validated modules	FIPSCheck is a library for integrity verification of FIPS validated modules. The package also provides helper binaries for creation and verification of the HMAC-SHA256 checksum files.	http://fedorahosted.org/fipscheck/	Wed 20 Mar 2013 09:51:11 AM EDT
fipscheck-lib	1.3.1	Library files for fipscheck	This package contains the FIPSCheck library.	http://fedorahosted.org/fipscheck/	Wed 20 Mar 2013 09:51:11 AM EDT
firefox	20.0	Mozilla Firefox Web browser	Mozilla Firefox is an open-source web browser, designed for standards compliance, performance and portability.	http://www.mozilla.org/projects/firefox/	Fri 05 Apr 2013 04:37:03 PM EDT
firewall-config	0.2.12	Firewall configuration application	The firewall configuration application provides an configuration interface for firewalld.	http://fedorahosted.org/firewalld	Tue 23 Apr 2013 09:36:03 AM EDT
firewalld	0.2.12	A firewall daemon with D-BUS interface providing a dynamic firewall	firewalld is a firewall service daemon that provides a dynamic customizable firewall with a D-BUS interface.	http://fedorahosted.org/firewalld	Tue 23 Apr 2013 09:34:23 AM EDT

Name	Version	Summary	Description	URL	Install Time
firstboot	18.6	Initial system configuration utility	The firstboot utility runs after installation. It guides the user through a series of steps that allows for easier configuration of the machine.	http://fedoraproject.org/wiki/FirstBoot	Wed 20 Mar 2013 09:57:14 AM EDT
flac	1.2.1	An encoder/decoder for the Free Lossless Audio Codec	FLAC stands for Free Lossless Audio Codec. Grossly oversimplified, FLAC is similar to Ogg Vorbis, but lossless. The FLAC project consists of the stream format, reference encoders and decoders in library form, flac, a command-line program to encode and decode FLAC files, metaflac, a command-line metadata editor for FLAC files and input plugins for various music players.	http://flac.sourceforge.net/	Wed 20 Mar 2013 09:50:03 AM EDT
flann	1.7.1	Fast Library for Approximate Nearest Neighbors	FLANN is a library for performing fast approximate nearest neighbor searches in high dimensional spaces. It contains a collection of algorithms found to work best for nearest neighbor search and a system for automatically choosing the best algorithm and optimum parameters depending on the data sets.	http://www.cs.ubc.ca/~{}mariusm/index.php/FLANN/FLANN	Wed 20 Mar 2013 09:52:14 AM EDT

Name	Version	Summary	Description	URL	Install Time
flex	2.5.36	A tool for creating scanners (text pattern recognizers)	The flex program generates scanners. Scanners are programs which can recognize lexical patterns in text. Flex takes pairs of regular expressions and C code as input and generates a C source file as output. The output file is compiled and linked with a library to produce an executable. The executable searches through its input for occurrences of the regular expressions. When a match is found, it executes the corresponding C code. Flex was designed to work with both Yacc and Bison, and is used by many programs as part of their build process. You should install flex if you are going to use your system for application development.	http://flex.sourceforge.net/	Wed 20 Mar 2013 09:58:59 AM EDT
flite	1.3	Small, fast speech synthesis engine (text-to-speech)	Flite (festival-lite) is a small, fast run-time speech synthesis engine developed at CMU and primarily designed for small embedded machines and/or large servers. Flite is designed as an alternative synthesis engine to Festival for voices built using the FestVox suite of voice building tools.	http://www.speech.cs.cmu.edu/flite/	Wed 20 Mar 2013 09:51:53 AM EDT

Name	Version	Summary	Description	URL	Install Time
fltk	1.3.0	C++ user interface toolkit	FLTK (pronounced "fulltick") is a cross-platform C++ GUI toolkit. It provides modern GUI functionality without the bloat, and supports 3D graphics via OpenGL and its built-in GLUT emulation.	http://www.fltk.org/	Wed 20 Mar 2013 09:52:59 AM EDT
fontconfig	2.10.2	Font configuration and customization library	Fontconfig is designed to locate fonts within the system and select them according to requirements specified by applications.	http://fontconfig.org	Fri 05 Apr 2013 04:24:11 PM EDT
fontconfig	2.10.2	Font configuration and customization library	Fontconfig is designed to locate fonts within the system and select them according to requirements specified by applications.	http://fontconfig.org	Sun 24 Mar 2013 04:44:39 PM EDT
fontconfig-devel	2.10.2	Font configuration and customization library	The fontconfig-devel package includes the header files, and developer docs for the fontconfig package. Install fontconfig-devel if you want to develop programs which will use fontconfig.	http://fontconfig.org	Fri 05 Apr 2013 04:45:49 PM EDT
fontforge	20120731b	Outline and bitmap font editor	FontForge (former PfaEdit) is a font editor for outline and bitmap fonts. It supports a range of font formats, including PostScript (ASCII and binary Type 1, some Type 3 and Type 0), TrueType, OpenType (Type2) and CID-keyed fonts.	http://fontforge.sourceforge.net/	Sun 24 Mar 2013 04:46:03 PM EDT

Name	Version	Summary	Description	URL	Install Time
fontmatrix	0.9.99	A fonts manager	A powerful and well designed fonts manager		Sun 24 Mar 2013 04:47:44 PM EDT
fontpackages-filesystem	1.44	Directories used by font packages	This package contains the basic directory layout used by font packages, including the correct permissions for the directories.	http://fedoraproject.org/wiki/fontpackages	Wed 20 Mar 2013 09:49:29 AM EDT
foomatic	4.0.8	Tools for using the foomatic database of printers and printer drivers	Foomatic is a comprehensive, spooler-independent database of printers, printer drivers, and driver descriptions. This package contains utilities to generate driver description files and printer queues for CUPS, LPD, LPRng, and PDQ using the database (packaged separately). There is also the possibility to read the PJI options out of PJI-capable laser printers and take them into account at the driver description file generation. There are spooler-independent command line interfaces to manipulate queues (foomatic-configure) and to print files/manipulate jobs (foomatic printjob). The site http://www.linuxprinting.org/ is based on this database.	http://www.linuxprinting.org	Wed 20 Mar 2013 09:57:13 AM EDT

Name	Version	Summary	Description	URL	Install Time
foomatic-db	4.0	Database of printers and printer drivers	This is the database of printers, printer drivers, and driver options for Foomatic. The site http://www.openprinting.org/ is based on this database.	http://www.openprinting.org	Wed 20 Mar 2013 09:56:40 AM EDT
foomatic-db-filesystem	4.0	Directory layout for the foomatic package	Directory layout for the foomatic package.	http://www.openprinting.org	Wed 20 Mar 2013 09:49:30 AM EDT
foomatic-db-ppds	4.0	PPDs from printer manufacturers	PPDs from printer manufacturers.	http://www.openprinting.org	Wed 20 Mar 2013 09:56:39 AM EDT
foomatic-filters	4.0.8	CUPS print filters for the foomatic package	CUPS print filters for the foomatic package.	http://www.linuxprinting.org	Wed 20 Mar 2013 09:51:20 AM EDT
fpaste	0.3.7.1	A simple tool for pasting info onto fpaste.org	It is often useful to be able to easily paste text to the Fedora Pastebin at http://fpaste.org and this simple script will do that and return the resulting URL so that people may examine the output. This can hopefully help folks who are for some reason stuck without X, working remotely, or any other reason they may be unable to paste something into the pastebin	https://fedorahosted.org/fpaste/	Sun 24 Mar 2013 04:49:04 PM EDT
fprintd	0.4.1	D-Bus service for Fingerprint reader access	D-Bus service to access fingerprint readers.	http://www.reactivated.net/fprint/wiki/Fprintd	Wed 20 Mar 2013 09:53:59 AM EDT
fprintd-pam	0.4.1	PAM module for fingerprint authentication	PAM module that uses the fprintd D-Bus service for fingerprint authentication.	http://www.reactivated.net/fprint/wiki/Fprintd	Wed 20 Mar 2013 09:58:14 AM EDT

Name	Version	Summary	Description	URL	Install Time
freeglut	2.8.0	A freely licensed alternative to the GLUT library	freeglut is a completely open source alternative to the OpenGL Utility Toolkit (GLUT) library with an OSI approved free software license. GLUT was originally written by Mark Kilgard to support the sample programs in the second edition OpenGL 'RedBook'. Since then, GLUT has been used in a wide variety of practical applications because it is simple, universally available and highly portable. freeglut allows the user to create and manage windows containing OpenGL contexts on a wide range of platforms and also read the mouse, keyboard and joystick functions.	http://freeglut.sourceforge.net	Wed 20 Mar 2013 09:52:59 AM EDT
freetds	0.91	Implementation of the TDS (Tabular DataStream) protocol	FreeTDS is a project to document and implement the TDS (Tabular DataStream) protocol. TDS is used by Sybase(TM) and Microsoft(TM) for client to database server communications. FreeTDS includes call level interfaces for DB-Lib, CT-Lib, and ODBC.	http://www.freetds.org/	Wed 20 Mar 2013 09:51:12 AM EDT

Name	Version	Summary	Description	URL	Install Time
freetype	2.4.10	A free and portable font rendering engine	The FreeType engine is a free and portable font rendering engine, developed to provide advanced font support for a variety of platforms and environments. FreeType is a library which can open and manages font files as well as efficiently load, hint and render individual glyphs. FreeType is not a font server or a complete text-rendering library.	http://www.freetype.org	Fri 05 Apr 2013 04:24:01 PM EDT
freetype	2.4.10	A free and portable font rendering engine	The FreeType engine is a free and portable font rendering engine, developed to provide advanced font support for a variety of platforms and environments. FreeType is a library which can open and manages font files as well as efficiently load, hint and render individual glyphs. FreeType is not a font server or a complete text-rendering library.	http://www.freetype.org	Fri 05 Apr 2013 04:24:00 PM EDT
freetype-devel	2.4.10	FreeType development libraries and header files	The freetype-devel package includes the static libraries and header files for the FreeType font rendering engine. Install freetype-devel if you want to develop programs which will use FreeType.	http://www.freetype.org	Fri 05 Apr 2013 04:45:49 PM EDT

Name	Version	Summary	Description	URL	Install Time
fribidi	0.19.4	Library implementing the Unicode Bidirectional Algorithm	A library to handle bidirectional scripts (for example Hebrew, Arabic), so that the display is done in the proper way; while the text data itself is always written in logical order.	http://fribidi.org	Tue 26 Mar 2013 01:01:59 PM EDT
ftgl	2.1.3	OpenGL frontend to Freetype 2	FTGL is a free open source library to enable developers to use arbitrary fonts in their OpenGL (www.opengl.org) applications. Unlike other OpenGL font libraries FTGL uses standard font file formats so doesn't need a preprocessing step to convert the high quality font data into a lesser quality, proprietary format. FTGL uses the Freetype (www.freetype.org) font library to open and 'decode' the fonts. It then takes that output and stores it in a format most efficient for OpenGL rendering.	http://ftgl.wiki.sourceforge.net/	Wed 20 Mar 2013 09:53:56 AM EDT
ftp	0.17	The standard UNIX FTP (File Transfer Protocol) client	The ftp package provides the standard UNIX command-line FTP (File Transfer Protocol) client. FTP is a widely used protocol for transferring files over the Internet and for archiving files. If your system is on a network, you should install ftp in order to do file transfers.	ftp://ftp.linux.org.uk/pub/linux/Networking/netkit	Wed 20 Mar 2013 09:59:01 AM EDT

Name	Version	Summary	Description	URL	Install Time
fuse-libs	2.9.2	File System in Userspace (FUSE) libraries	Devel With FUSE it is possible to implement a fully functional filesystem in a userspace program. This package contains the FUSE libraries.	http://fuse.sf.net	Wed 20 Mar 2013 09:52:18 AM EDT
fxload	2002_04_11	A helper program to download firmware into FX and FX2 EZ-USB devices	This program is conveniently able to download firmware into FX and FX2 EZ-USB devices, as well as the original AnchorChips EZ-USB. It is intended to be invoked by udev scripts when the unprogrammed device appears on the bus.	http://linux-hotplug.sourceforge.net/	Wed 20 Mar 2013 09:54:30 AM EDT

Name	Version	Summary	Description	URL	Install Time
game-music-emu	0.5.5	Video game music file emulation/playback library	Game_Music_Emu is a collection of video game music file emulators that support the following formats and systems: * AY ZX Spectrum/Amstrad CPC * GBS Nintendo Game Boy * GYM Sega Genesis/Mega Drive * HES NEC TurboGrafx-16/PC Engine * KSS MSX Home Computer/other Z80 systems (doesn't support FM sound) * NSF/NSFE Nintendo NES/Famicom (with VRC 6, Namco 106, and FME-7 sound) * SAP Atari systems using POKEY sound chip * SPC Super Nintendo/Super Famicom * VGM/VGZ Sega Master System/Mark III, Sega Genesis/Mega Drive,BBC Micro	http://code.google.com/p/game-music-emu/	Tue 26 Mar 2013 01:02:03 PM EDT
gamin	0.1.10	Library providing the FAM File Alteration Monitor API	This C library provides an API and ABI compatible file alteration monitor mechanism compatible with FAM but not dependent on a system wide daemon.	http://www.gnome.org/~{}veillard/gamin/	Fri 05 Apr 2013 04:24:05 PM EDT
gamin	0.1.10	Library providing the FAM File Alteration Monitor API	This C library provides an API and ABI compatible file alteration monitor mechanism compatible with FAM but not dependent on a system wide daemon.	http://www.gnome.org/~{}veillard/gamin/	Wed 20 Mar 2013 09:49:55 AM EDT

Name	Version	Summary	Description	URL	Install Time
gamin-python	0.1.10	Python bindings for the gamin library	The gamin-python package contains a module that allow monitoring of files and directories from the Python language based on the support of the gamin package.	http://www.gnome.org/~{}veillard/gamin/	Wed 20 Mar 2013 09:52:42 AM EDT
gawk	4.0.1	The GNU version of the awk text processing utility	The gawk package contains the GNU version of awk, a text processing utility. Awk interprets a special-purpose programming language to do quick and easy text pattern matching and reformatting jobs. Install the gawk package if you need a text processing utility. Gawk is considered to be a standard Linux tool for processing text.	http://www.gnu.org/software/gawk/gawk.html	Wed 20 Mar 2013 09:50:01 AM EDT
gc	7.2c	A garbage collector for C and C++	The Boehm-Demers-Weiser conservative garbage collector can be used as a garbage collecting replacement for C malloc or C++ new.	http://www.hpl.hp.com/personal/Hans_Boehm/gc/	Wed 20 Mar 2013 09:52:12 AM EDT
gcc	4.7.2	Various compilers (C, C++, Objective-C, Java, ...)	The gcc package contains the GNU Compiler Collection version 4.7. You'll need this package in order to compile C code.	http://gcc.gnu.org	Wed 20 Mar 2013 09:57:03 AM EDT
gcc-c++	4.7.2	C++ support for GCC	This package adds C++ support to the GNU Compiler Collection. It includes support for most of the current C++ specification, including templates and exception handling.	http://gcc.gnu.org	Wed 20 Mar 2013 09:57:06 AM EDT

Name	Version	Summary	Description	URL	Install Time
gcc-gfortran	4.7.2	Fortran support	The gcc-gfortran package provides support for compiling Fortran programs with the GNU Compiler Collection.	http://gcc.gnu.org	Wed 20 Mar 2013 09:57:04 AM EDT
GConf2	3.2.5	A process-transparent configuration system	GConf is a process-transparent configuration database API used to store user preferences. It has pluggable backends and features to support workgroup administration.	http://projects.gnome.org/gconf/	Wed 20 Mar 2013 09:52:51 AM EDT
gcr	3.6.2	A library for bits of crypto UI and parsing	gcr is a library for displaying certificates, and crypto UI, accessing key stores. It also provides a viewer for crypto files on the GNOME desktop. gck is a library for accessing PKCS#11 modules like smart cards.	http://live.gnome.org/CryptoGlue/	Sun 24 Mar 2013 04:46:00 PM EDT
gd	2.0.35	A graphics library for quick creation of PNG or JPEG images	The gd graphics library allows your code to quickly draw images complete with lines, arcs, text, multiple colors, cut and paste from other images, and flood fills, and to write out the result as a PNG or JPEG file. This is particularly useful in Web applications, where PNG and JPEG are two of the formats accepted for inline images by most browsers. Note that gd is not a paint program.	http://www.libgd.org/Main_Page	Wed 20 Mar 2013 09:51:48 AM EDT

Name	Version	Summary	Description	URL	Install Time
gdb	7.5.1	A GNU source-level debugger for C, C++, Fortran, Go and other languages	GDB, the GNU debugger, allows you to debug programs written in C, C++, Java, and other languages, by executing them in a controlled fashion and printing their data.	http://gnu.org/software/gdb/	Fri 05 Apr 2013 04:34:47 PM EDT
gdbm	1.10	A GNU set of database routines which use extensible hashing	Gdbm is a GNU database indexing library, including routines which use extensible hashing. Gdbm works in a similar way to standard UNIX dbm routines. Gdbm is useful for developers who write C applications and need access to a simple and efficient database or who are building C applications which will use such a database. If you're a C developer and your programs need access to simple database routines, you should install gdbm. You'll also need to install gdbm-devel.	http://www.gnu.org/software/gdbm/	Wed 20 Mar 2013 09:50:17 AM EDT

Name	Version	Summary	Description	URL	Install Time
gdbm-devel	1.10	Development libraries and header files for the gdbm library	Gdbm-devel contains the development libraries and header files for gdbm, the GNU database system. These libraries and header files are necessary if you plan to do development using the gdbm database. Install gdbm-devel if you are developing C programs which will use the gdbm database library. You'll also need to install the gdbm package.	http://www.gnu.org/software/gdbm/	Fri 05 Apr 2013 04:34:47 PM EDT
gdisk	0.8.5	An fdisk-like partitioning tool for GPT disks	An fdisk-like partitioning tool for GPT disks. GPT fdisk features a command-line interface, fairly direct manipulation of partition table structures, recovery tools to help you deal with corrupt partition tables, and the ability to convert MBR disks to GPT format.	http://www.rodsbooks.com/gdisk/	Wed 20 Mar 2013 09:51:15 AM EDT
gdk-pixbuf2	2.26.5	An image loading library	gdk-pixbuf is an image loading library that can be extended by loadable modules for new image formats. It is used by toolkits such as GTK+ or clutter.	http://www.gt.org	Fri 05 Apr 2013 04:24:08 PM EDT
gdk-pixbuf2	2.26.5	An image loading library	gdk-pixbuf is an image loading library that can be extended by loadable modules for new image formats. It is used by toolkits such as GTK+ or clutter.	http://www.gt.org	Wed 20 Mar 2013 09:52:19 AM EDT

Name	Version	Summary	Description	URL	Install Time
gegl	0.2.0	A graph based image processing framework	GEGL (Generic Graphics Library) is a graph based image processing framework. GEGLs original design was made to scratch GIMPs itches for a new compositing and processing core. This core is being designed to have minimal dependencies. and a simple well defined API.	http://www.gegl.org/	Wed 20 Mar 2013 09:54:22 AM EDT
genisoimage	1.1.11	Creates an image of an ISO9660 file-system	The genisoimage program is used as a pre-mastering program; i.e., it generates the ISO9660 file-system. Genisoimage takes a snapshot of a given directory tree and generates a binary image of the tree which will correspond to an ISO9660 file-system when written to a block device. Genisoimage is used for writing CD-ROMs, and includes support for creating boot-able El Torito CD-ROMs. Install the genisoimage package if you need a program for writing CD-ROMs.	http://cdrkit.org/	Wed 20 Mar 2013 09:51:48 AM EDT

Name	Version	Summary	Description	URL	Install Time
geoclue	0.12.99	A modular geoinformation service	Geoclue is a modular geoinformation service built on top of the D-Bus messaging system. The goal of the Geoclue project is to make creating location-aware applications as simple as possible.	http://geoclue.freedesktop.org/	Wed 20 Mar 2013 09:52:58 AM EDT
geoclue-devel	0.12.99	Development package for geoclue	Files for development with geoclue.	http://geoclue.freedesktop.org/	Fri 05 Apr 2013 04:34:39 PM EDT
GeoIP	1.4.8	Library for country/city/organization to IP address or hostname mapping	GeoIP is a C library that enables the user to find the country that any IP address or hostname originates from. It uses a file based database that is accurate as of February 2009. This database simply contains IP blocks as keys, and countries as values. This database should be more complete and accurate than using reverse DNS lookups.	http://www.maxmind.com/app/c	Wed 20 Mar 2013 09:51:21 AM EDT

Name	Version	Summary	Description	URL	Install Time
gettext	0.18.1.1	GNU libraries and utilities for producing multi-lingual messages	The GNU gettext package provides a set of tools and documentation for producing multi-lingual messages in programs. Tools include a set of conventions about how programs should be written to support message catalogs, a directory and file naming organization for the message catalogs, a runtime library which supports the retrieval of translated messages, and stand-alone programs for handling the translatable and the already translated strings. Gettext provides an easy to use library and tools for creating, using, and modifying natural language catalogs and is a powerful and simple method for internationalizing programs.	http://www.gnu.org/software/gettext/	Wed 20 Mar 2013 09:52:32 AM EDT
gettext-common-devel	0.18.1.1	Common development files for gettext	This package contains common architecture independent gettext development files.	http://www.gnu.org/software/gettext/	Wed 20 Mar 2013 09:49:34 AM EDT
gettext-devel	0.18.1.1	Development files for gettext	This package contains all development related files necessary for developing or compiling applications/libraries that needs internationalization capability. You also need this package if you want to add gettext support for your project.	http://www.gnu.org/software/gettext/	Wed 20 Mar 2013 09:53:26 AM EDT

Name	Version	Summary	Description	URL	Install Time
gettext-libs	0.18.1.1	Libraries for gettext	This package contains libraries used internationalization support.	http://www.gnu.org/software/gettext/	Wed 20 Mar 2013 09:50:27 AM EDT
ghostscript	9.06	A PostScript interpreter and renderer	Ghostscript is a set of software that provides a PostScript interpreter, a set of C procedures (the Ghostscript library, which implements the graphics capabilities in the PostScript language) and an interpreter for Portable Document Format (PDF) files. Ghostscript translates PostScript code into many common, bitmapped formats, like those understood by your printer or screen. Ghostscript is normally used to display PostScript files and to print PostScript files to non-PostScript printers. If you need to display PostScript files or print them to non-PostScript printers, you should install ghostscript. If you install ghostscript, you also need to install the ghostscript-fonts package.	http://www.ghostscript.com/	Sun 24 Mar 2013 04:45:04 PM EDT
ghostscript-cups	9.06	CUPS filter for interpreting PostScript and PDF	CUPS filter and conversion rules for interpreting PostScript and PDF.	http://www.ghostscript.com/	Sun 24 Mar 2013 04:45:57 PM EDT

Name	Version	Summary	Description	URL	Install Time
ghostscript-fonts	5.50	Fonts for the Ghostscript PostScript interpreter	Ghostscript-fonts contains a set of fonts that Ghostscript, a PostScript interpreter, uses to render text. These fonts are in addition to the fonts shared by Ghostscript and the X Window System.	http://www.gnu.org/software/ghostscript/	Wed 20 Mar 2013 09:51:53 AM EDT
giflib	4.1.6	Library for manipulating GIF format image files	The giflib package contains a shared library of functions for loading and saving GIF format image files. It is API and ABI compatible with libungif, the library which supported uncompressed GIFs while the Unisys LZW patent was in effect.	http://www.sourceforge.net/projects/giflib/	Wed 20 Mar 2013 09:50:07 AM EDT
gimp	2.8.4	GNU Image Manipulation Program	GIMP (GNU Image Manipulation Program) is a powerful image composition and editing program, which can be extremely useful for creating logos and other graphics for webpages. GIMP has many of the tools and filters you would expect to find in similar commercial offerings, and some interesting extras as well. GIMP provides a large image manipulation toolbox, including channel operations and layers, effects, sub-pixel imaging and anti-aliasing, and conversions, all with multi-level undo.	http://www.gimp.org/	Sun 24 Mar 2013 04:46:06 PM EDT

Name	Version	Summary	Description	URL	Install Time
gimp-data-extras	2.0.2	Extra files for GIMP	Patterns, gradients, and other extra files for the GIMP.	http://www.gimp.org/	Wed 20 Mar 2013 09:58:01 AM EDT
gimp-help	2.8.0	Help files for GIMP	This package contains a user manual written for the GNU Image Manipulation Program.	http://wiki.gimp.org/gimp/GimpDocs	Wed 20 Mar 2013 09:58:12 AM EDT
gimp-help-browser	2.8.4	GIMP help browser plug-in	The gimp-help-browser package contains a lightweight help browser plugin for viewing GIMP online help.	http://www.gimp.org/	Sun 24 Mar 2013 04:47:51 PM EDT
gimp-libs	2.8.4	GIMP libraries	The gimp-libs package contains shared libraries needed for the GNU Image Manipulation Program (GIMP).	http://www.gimp.org/	Sun 24 Mar 2013 04:45:57 PM EDT
git	1.8.1.4	Fast Version Control System	Git is a fast, scalable, distributed revision control system with an unusually rich command set that provides both high-level operations and full access to internals. The git rpm installs the core tools with minimal dependencies. To install all git packages, including tools for integrating with other SCMs, install the git-all meta-package.	http://git-scm.com/	Tue 26 Mar 2013 01:26:03 PM EDT
gjs	1.34.0	Javascript Bindings for GNOME	Gjs allows using GNOME libraries from Javascript. It's based on the Spidermonkey Javascript engine from Mozilla and the GObject introspection framework.	http://live.gnome.org/Gjs/	Wed 20 Mar 2013 09:53:38 AM EDT

Name	Version	Summary	Description	URL	Install Time
glib-networking	2.34.2	Networking support for GLib	This package contains modules that extend the networking support in GIO. In particular, it contains libproxy- and GSettings-based GProxyResolver implementations and a gnutls-based GTlsConnection implementation.	http://www.gnome.org	Wed 20 Mar 2013 09:52:13 AM EDT
glib2	2.34.2	A library of handy utility functions	GLib is the low-level core library that forms the basis for projects such as GTK+ and GNOME. It provides data structure handling for C, portability wrappers, and interfaces for such runtime functionality as an event loop, threads, dynamic loading, and an object system.	http://www.gtk.org	Fri 05 Apr 2013 04:24:06 PM EDT
glib2	2.34.2	A library of handy utility functions	GLib is the low-level core library that forms the basis for projects such as GTK+ and GNOME. It provides data structure handling for C, portability wrappers, and interfaces for such runtime functionality as an event loop, threads, dynamic loading, and an object system.	http://www.gtk.org	Sun 24 Mar 2013 04:44:37 PM EDT
glib2-devel	2.34.2	A library of handy utility functions	The glib2-devel package includes the header files for the GLib library.	http://www.gtk.org	Fri 05 Apr 2013 04:34:31 PM EDT

Name	Version	Summary	Description	URL	Install Time
glibc	2.16	The GNU libc libraries	The glibc package contains standard libraries which are used by multiple programs on the system. In order to save disk space and memory, as well as to make upgrading easier, common system code is kept in one place and shared between programs. This particular package contains the most important sets of shared libraries: the standard C library and the standard math library. Without these two libraries, a Linux system will not function.	http://www.gnu.org/software/glibc/	Fri 05 Apr 2013 04:24:01 PM EDT
glibc	2.16	The GNU libc libraries	The glibc package contains standard libraries which are used by multiple programs on the system. In order to save disk space and memory, as well as to make upgrading easier, common system code is kept in one place and shared between programs. This particular package contains the most important sets of shared libraries: the standard C library and the standard math library. Without these two libraries, a Linux system will not function.	http://www.gnu.org/software/glibc/	Fri 05 Apr 2013 04:23:59 PM EDT

Name	Version	Summary	Description	URL	Install Time
glibc-common	2.16	Common binaries and locale data for glibc	The glibc-common package includes common binaries for the GNU libc libraries, as well as national language (locale) support.	http://www.gnu.org/software/glibc/	Fri 05 Apr 2013 04:23:57 PM EDT
glibc-devel	2.16	Object files for development using standard C libraries.	The glibc-devel package contains the object files necessary for developing programs which use the standard C libraries (which are used by nearly all programs). If you are developing programs which will use the standard C libraries, your system needs to have these standard object files available in order to create the executables. Install glibc-devel if you are going to develop programs which will use the standard C libraries.	http://www.gnu.org/software/glibc/	Fri 05 Apr 2013 04:24:01 PM EDT

Name	Version	Summary	Description	URL	Install Time
glibc-headers	2.16	Header files for development using standard C libraries.	The glibc-headers package contains the header files necessary for developing programs which use the standard C libraries (which are used by nearly all programs). If you are developing programs which will use the standard C libraries, your system needs to have these standard header files available in order to create the executables. Install glibc-headers if you are going to develop programs which will use the standard C libraries.	http://www.gnu.org/software/glibc/	Fri 05 Apr 2013 04:24:00 PM EDT
glibmm24	2.34.1	C++ interface for the GLib library	glibmm is the official C++ interface for the popular cross-platform library GLib. It provides non-UI API that is not available in standard C++ and makes it possible for gtkmm to wrap GObject-based APIs.	http://www.gtkmm.org/	Wed 20 Mar 2013 09:50:00 AM EDT
glx-utils	8.1.0	GLX utilities	The glx-utils package provides the glxinfo and glxgears utilities.	http://www.mesa3d.org	Tue 23 Apr 2013 09:36:41 AM EDT
gmime	2.6.12	Library for creating and parsing MIME messages	The GMime suite provides a core library and set of utilities which may be used for the creation and parsing of messages using the Multipurpose Internet Mail Extension (MIME).	http://spruce.sourceforge.net/gmime/	Wed 20 Mar 2013 09:51:14 AM EDT

Name	Version	Summary	Description	URL	Install Time
gmp	5.0.5	A GNU arbitrary precision library	<p>The gmp package contains GNU MP, a library for arbitrary precision arithmetic, signed integers operations, rational numbers and floating point numbers. GNU MP is designed for speed, for both small and very large operands. GNU MP is fast because it uses fullwords as the basic arithmetic type, it uses fast algorithms, it carefully optimizes assembly code for many CPUs' most common inner loops, and it generally emphasizes speed over simplicity/elegance in its operations.</p> <p>Install the gmp package if you need a fast arbitrary precision library.</p>	http://gmplib.org/	Wed 20 Mar 2013 09:49:53 AM EDT
gmp-devel	5.0.5	Development tools for the GNU MP arbitrary precision library	<p>The libraries, header files and documentation for using the GNU MP arbitrary precision library in applications.</p> <p>If you want to develop applications which will use the GNU MP library, you'll need to install the gmp-devel package. You'll also need to install the gmp package.</p>	http://gmplib.org/	Fri 05 Apr 2013 04:34:46 PM EDT

Name	Version	Summary	Description	URL	Install Time
gnome-abrt	0.2.10	A utility for viewing problems that have occurred with the system	A GNOME application allows users to browse through detected problems and provides them with convenient way for managing these problems.	https://fedorahosted.org/abrt/	Tue 23 Apr 2013 09:36:44 AM EDT
gnome-desktop3	3.6.3	Shared code among gnome-panel, gnome-session, nautilus, etc	The gnome-desktop package contains an internal library (libgnomedesktop) used to implement some portions of the GNOME desktop, and also some data files and other shared components of the GNOME user environment.	http://www.gnome.org	Wed 27 Mar 2013 12:47:30 PM EDT
gnome-icon-theme	3.6.2	GNOME icon theme	This package contains the default icon theme used by the GNOME desktop.		Wed 20 Mar 2013 09:51:45 AM EDT
gnome-icon-theme-legacy	3.6.2	Old names for icons in gnome-icon-theme	This package contains symlinks to make the icons in gnome-icon-theme available under old names.		Wed 20 Mar 2013 09:51:49 AM EDT
gnome-js-common	0.1.2	Common modules for GNOME JavaScript interpreters	This package contains some JavaScript modules for use by GNOME JavaScript extensions, namely GJS and Seed.	http://ftp.gnome.org/pub/GNOME/sources/gnome-js-common	Wed 20 Mar 2013 09:49:37 AM EDT
gnome-keyring	3.6.3	Framework for managing passwords and other secrets	The gnome-keyring session daemon manages passwords and other types of secrets for the user, storing them encrypted with a main password. Applications can use the gnome-keyring library to integrate with the keyring.	http://www.gnome.org	Sun 24 Mar 2013 04:47:53 PM EDT

Name	Version	Summary	Description	URL	Install Time
gnome-python2	2.28.1	PyGNOME Python extension module	The gnome-python package contains the source packages for the Python bindings for GNOME called PyGNOME. PyGNOME is an extension module for Python that provides access to the base GNOME libraries, so you have access to more widgets, a simple configuration interface, and metadata support.	http://download.gnome.org/sources/gnome-python/	Wed 20 Mar 2013 09:53:22 AM EDT
gnome-python2-canvas	2.28.1	Python bindings for the GNOME Canvas	This module contains a wrapper that allows use of the GNOME Canvas in Python.	http://download.gnome.org/sources/gnome-python/	Wed 20 Mar 2013 09:53:22 AM EDT
gnome-python2-desktop	2.32.0	The sources for additional PyGNOME Python extension modules	The gnome-python-desktop package contains the source packages for additional Python bindings for GNOME. It should be used together with gnome-python.		Wed 20 Mar 2013 09:53:28 AM EDT
gnome-python2-gconf	2.28.1	Python bindings for interacting with GConf	This module contains a wrapper that allows the use of GConf via Python.	http://download.gnome.org/sources/gnome-python/	Wed 20 Mar 2013 09:53:28 AM EDT
gnome-python2-gnomekeyring	2.32.0	Python bindings for interacting with gnome-keyring	This module contains a wrapper that allows the use of gnome-keyring via Python.		Wed 20 Mar 2013 09:54:28 AM EDT
gnome-themes-standard	3.6.5	Standard themes for GNOME applications	The gnome-themes-standard package contains the standard theme for the GNOME desktop, which provides default appearance for cursors, desktop background, window borders and GTK+ applications.	http://git.gnome.org/browse/gnome-themes-standard	Sun 24 Mar 2013 04:47:52 PM EDT

Name	Version	Summary	Description	URL	Install Time
gnome-vfs2	2.24.4	The GNOME virtual file-system libraries	GNOME VFS is the GNOME virtual file system. It is the foundation of the Nautilus file manager. It provides a modular architecture and ships with several modules that implement support for file systems, http, ftp, and others. It provides a URI-based API, backend supporting asynchronous file operations, a MIME type manipulation library, and other features.	http://www.gnome.org/	Sun 24 Mar 2013 04:47:53 PM EDT

gnupg	1.4.13	A GNU utility for secure communication and data storage	GnuPG (GNU Privacy Guard) is a GNU utility for encrypting data and creating digital signatures. GnuPG has advanced key management capabilities and is compliant with the proposed OpenPGP Internet standard described in RFC2440. Since GnuPG doesn't use any patented algorithm, it is not compatible with any version of PGP2 (PGP2.x uses only IDEA for symmetric-key encryption, which is patented worldwide).	http://www.gnupg.org/	Sun 24 Mar 2013 04:45:01 PM EDT

Name	Version	Summary	Description	URL	Install Time
gnupg2	2.0.19	Utility for secure communication and data storage	<p>GnuPG is GNU's tool for secure communication and data storage. It can be used to encrypt data and to create digital signatures. It includes an advanced key management facility and is compliant with the proposed OpenPGP Internet standard as described in RFC2440 and the S/MIME standard as described by several RFCs.</p> <p>GnuPG 2.0 is a newer version of GnuPG with additional support for S/MIME. It has a different design philosophy that splits functionality up into several modules. The S/MIME and smartcard functionality is provided by the gnupg2-smime package.</p>	http://www.gnupg.org/	Wed 20 Mar 2013 09:52:17 AM EDT
gnutls	2.12.23	A TLS protocol implementation	GnuTLS is a project that aims to develop a library which provides a secure layer, over a reliable transport layer. Currently the GnuTLS library implements the proposed standards by the IETF's TLS working group.	http://www.gnutls.org/	Fri 05 Apr 2013 04:24:14 PM EDT

Name	Version	Summary	Description	URL	Install Time
gnutls	2.12.23	A TLS protocol implementation	GnuTLS is a project that aims to develop a library which provides a secure layer, over a reliable transport layer. Currently the GnuTLS library implements the proposed standards by the IETF's TLS working group.	http://www.gnutls.org/	Sun 24 Mar 2013 04:44:44 PM EDT
gnutls-c++	2.12.23	The C++ interface to GnuTLS	GnuTLS is a project that aims to develop a library which provides a secure layer, over a reliable transport layer. Currently the GnuTLS library implements the proposed standards by the IETF's TLS working group. This package contains the C++ interface for the GnuTLS library.	http://www.gnutls.org/	Fri 05 Apr 2013 04:34:33 PM EDT
gnutls-devel	2.12.23	Development files for the gnutls package	GnuTLS is a project that aims to develop a library which provides a secure layer, over a reliable transport layer. Currently the GnuTLS library implements the proposed standards by the IETF's TLS working group. This package contains files needed for developing applications with the GnuTLS library.	http://www.gnutls.org/	Fri 05 Apr 2013 04:34:35 PM EDT

grantlee	0.3.0	Qt string template engine based on the Django template system	<p>Grantlee is a plug-in based String Template system written using the Qt framework. The goals of the project are to make it easier for application developers to separate the structure of documents from the data they contain, opening the door for theming.</p> <p>The syntax is intended to follow the syntax of the Django template system, and the design of Django is reused in Grantlee. Django is covered by a BSD style license.</p> <p>Part of the design of both is that application developers can extend the syntax by implementing their own tags and filters. For details of how to do that, see the API documentation.</p> <p>For template authors, different applications using Grantlee will present the same interface and core syntax for creating new themes. For details of how to write templates, see the documentation.</p>	http://www.gititorious.org/grantlee/pages/Home	Wed 20 Mar 2013 09:52:59 AM EDT

grep	2.14	Pattern matching utilities	The GNU versions of commonly used grep utilities. Grep searches through textual input for lines which contain a match to a specified pattern and then prints the matching lines. GNU's grep utilities include grep, egrep and fgrep. GNU grep is needed by many scripts, so it shall be installed on every system.	http://www.gnu.org/software/grep/	Wed 20 Mar 2013 09:49:52 AM EDT
GREYCstoration	1.0	An image denoising and interpolation tool	GREYCstoration is an image regularization algorithm which is able to process a color image by locally removing small variations of pixel intensities while preserving significant global image features, such as edges and corners. The most direct application of image regularization is image denoising. By extension, it can also be used to inpaint or resize images.	http://www.greyc.ensicaen.fr/~dtschump/greycstoration/index.html	Wed 20 Mar 2013 09:58:40 AM EDT
groff-base	1.22.1	Parts of the groff formatting system required to display manual pages	The groff-base package contains only necessary parts of groff formatting system which are required to display manual pages, and the groff's default display device (PostScript).	http://groff.ffii.org	Sun 24 Mar 2013 04:45:38 PM EDT

Name	Version	Summary	Description	URL	Install Time
grub2	2.00	Bootloader with support for Linux, Multiboot and more	The GRand Unified Bootloader (GRUB) is a highly configurable and customizable bootloader with modular architecture. It support rich varietyof kernel formats, file systems, computer architectures and hardware devices. This subpackage provides support for PC BIOS systems.	http://www.gnu.org/software/grub/	Sun 24 Mar 2013 04:48:33 PM EDT
grub2-tools	2.00	Support tools for GRUB.	The GRand Unified Bootloader (GRUB) is a highly configurable and customizable bootloader with modular architecture. It support rich varietyof kernel formats, file systems, computer architectures and hardware devices. This subpackage provides tools for support of all platforms.	http://www.gnu.org/software/grub/	Sun 24 Mar 2013 04:45:13 PM EDT
grubby	8.22	Command line tool for updating bootloader configs	grubby is a command line tool for updating and displaying information about the configuration files for the grub, lilo, elilo (ia64), yaboot (powerpc) and zipl (s390) boot loaders. It is primarily designed to be used from scripts which install new kernels and need to find information about the current boot environment.	http://git.fedorahosted.org/git/grubby.git	Sun 24 Mar 2013 04:44:57 PM EDT

gsettings-desktop-schemas	3.6.1	A collection of GSettings schemas	gsettings-desktop-schemas contains a collection of GSettings schemas for settings shared by various components of a desktop.	http://bugzilla.gnome.org/enter_bug.cgi?product=gsettings-desktop-schemas	Wed 20 Mar 2013 09:50:11 AM EDT
gsl	1.15	The GNU Scientific Library for numerical analysis	The GNU Scientific Library (GSL) is a collection of routines for numerical analysis, written in C.	http://www.gnu.org/software/gsl/	Wed 20 Mar 2013 09:50:19 AM EDT

Name	Version	Summary	Description	URL	Install Time
gsm	1.0.13	Shared libraries for GSM speech compressor	<p>Contains runtime shared libraries for libgsm, an implementation of the European GSM 06.10 provisional standard for full-rate speech transcoding, prI-ETS 300 036, which uses RPE/LTP (residual pulse excitation/long term prediction) coding at 13 kbit/s. GSM 06.10 compresses frames of 162 13-bit samples (8 kHz sampling rate, i.e. a frame rate of 50 Hz) into 260 bits; for compatibility with typical UNIX applications, our implementation turns frames of 160 16-bit linear samples into 33-byte frames (1650 Bytes/s). The quality of the algorithm is good enough for reliable speaker recognition; even music often survives transcoding in recognizable form (given the bandwidth limitations of 8 kHz sampling rate).</p> <p>The interfaces offered are a front end modelled after compress(1), and a library API. Compression and decompression run faster than realtime on most SPARCstations. The implementation has been verified against the ETSI standard test patterns.</p>	http://www.quut.com/gsm/	Wed 20 Mar 2013 09:50:17 AM EDT

Name	Version	Summary	Description	URL	Install Time
gssdp	0.12.2.1	Resource discovery and announcement over SSDP	GSSDP implements resource discovery and announcement over SSDP and is part of gUPnP. GUPnP is an object-oriented open source framework for creating UPnP devices and control points, written in C using GObject and libsoup. The GUPnP API is intended to be easy to use, efficient and flexible.	http://www.gupnp.org/	Fri 05 Apr 2013 04:34:31 PM EDT
gssdp-devel	0.12.2.1	Development package for gssdp	Files for development with gssdp.	http://www.gupnp.org/	Fri 05 Apr 2013 04:34:36 PM EDT
gststreamer	0.10.36	GStreamer streaming media framework runtime	GStreamer is a streaming media framework, based on graphs of filters which operate on media data. Applications using this library can do anything from real-time sound processing to playing videos, and just about anything else media-related. Its plugin-based architecture means that new data types or processing capabilities can be added simply by installing new plugins.	http://gststreamer.freedesktop.org/	Wed 20 Mar 2013 09:51:08 AM EDT

Name	Version	Summary	Description	URL	Install Time
gststreamer-plugins-bad-free	0.10.23	GStreamer streaming media framework "bad" plug-ins	GStreamer is a streaming media framework, based on graphs of elements which operate on media data. This package contains plug-ins that aren't tested well enough, or the code is not of good enough quality.	http://gststreamer.freedesktop.org/	Wed 20 Mar 2013 09:54:15 AM EDT
gststreamer-plugins-base	0.10.36	GStreamer streaming media framework base plug-ins	GStreamer is a streaming media framework, based on graphs of filters which operate on media data. Applications using this library can do anything from real-time sound processing to playing videos, and just about anything else media-related. Its plugin-based architecture means that new data types or processing capabilities can be added simply by installing new plug-ins. This package contains a set of well-maintained base plug-ins.	http://gststreamer.freedesktop.org/	Wed 20 Mar 2013 09:53:01 AM EDT
gststreamer-plugins-espeak	0.4.0	A simple gstreamer plugin to use espeak	A simple gstreamer plugin to use espeak as a sound source. It was developed to simplify the espeak usage in the Sugar Speak activity. The plugin uses given text to produce audio output.	http://wiki.sugarlabs.org/go/Activity_Team/gst-plugins-espeak	Wed 20 Mar 2013 09:58:30 AM EDT

gstreamer1-plugins-ugly	1.0.6	GStreamer 1.0 streaming media framework "ugly" plug-ins	GStreamer is a streaming media framework, based on graphs of elements which operate on media data. This package contains well-written plug-ins that can't be shipped in gstreamer-plugins-good because: - the license is not LGPL - the license of the library is not LGPL - there are possible licensing issues with the code.	http://gstreamer.freedesktop.org/	Fri 05 Apr 2013 04:37:03 PM EDT

Name	Version	Summary	Description	URL	Install Time
gtk-recordmydesktop	0.3.8	GUI Desktop session recorder with audio and video	Graphical frontend for the recordmydesktop desktop session recorder. recordMyDesktop is a desktop session recorder for linux that attempts to be easy to use, yet also effective at it's primary task. As such, the program is separated in two parts; a simple command line tool that performs the basic tasks of capturing and encoding and an interface that exposes the program functionality in a usable way.	http://recordmydesktop.sourceforge.net/	Tue 26 Mar 2013 04:01:52 PM EDT
gtk-sharp2	2.12.11	GTK+ and GNOME bindings for Mono	This package provides a library that allows you to build fully native graphical GNOME applications using Mono. Gtk# is a binding to GTK+, the cross platform user interface toolkit used in GNOME. It includes bindings for Gtk, Atk, Pango, Gdk.	http://www.mono-project.com/GtkSharp	Wed 20 Mar 2013 09:53:51 AM EDT
gtk2	2.24.16	The GIMP ToolKit (GTK+), a library for creating GUIs for X	GTK+ is a multi-platform toolkit for creating graphical user interfaces. Offering a complete set of widgets, GTK+ is suitable for projects ranging from small one-off tools to complete application suites.	http://www.gtk.org	Fri 05 Apr 2013 04:24:15 PM EDT

Name	Version	Summary	Description	URL	Install Time
gtk2	2.24.16	The GIMP ToolKit (GTK+), a library for creating GUIs for X	GTK+ is a multi-platform toolkit for creating graphical user interfaces. Offering a complete set of widgets, GTK+ is suitable for projects ranging from small one-off tools to complete application suites.	http://www.gtk.org	Sun 24 Mar 2013 04:45:51 PM EDT
gtk2-immodule-xim	2.24.16	XIM support for GTK+	The gtk2-immodule-xim package contains XIM support for GTK+.	http://www.gtk.org	Sun 24 Mar 2013 04:47:59 PM EDT
gtk3	3.6.4	The GIMP ToolKit (GTK+), a library for creating GUIs for X	GTK+ is a multi-platform toolkit for creating graphical user interfaces. Offering a complete set of widgets, GTK+ is suitable for projects ranging from small one-off tools to complete application suites. This package contains version 3 of GTK+.	http://www.gtk.org	Sun 24 Mar 2013 04:45:52 PM EDT
gtk3-immodule-xim	3.6.4	XIM support for GTK+	The gtk3-immodule-xim package contains XIM support for GTK+ 3.	http://www.gtk.org	Sun 24 Mar 2013 04:47:58 PM EDT
gtkimageview	1.6.4	Simple image viewer widget	GtkImageView is a simple image viewer widget for GTK. It makes writing image viewing and editing applications easy.	http://trac.bjournel.com	Wed 20 Mar 2013 09:53:39 AM EDT

Name	Version	Summary	Description	URL	Install Time
gtkmm24	2.24.2	C++ interface for GTK2 (a GUI library for X)	gtkmm provides a C++ interface to the GTK+ GUI library. gtkmm2 wraps GTK+ 2. Highlights include typesafe callbacks, widgets extensible via inheritance and a comprehensive set of widget classes that can be freely combined to quickly create complex user interfaces.	http://www.gtkmm.org/	Wed 20 Mar 2013 09:53:17 AM EDT
gtkspell	2.0.16	On-the-fly spell checking for GtkTextView widgets	GtkSpell provides word-processor-style highlighting and replacement of misspelled words in a GtkTextView widget as you type. Right-clicking a misspelled word pops up a menu of suggested replacements.	http://gtkspell.sourceforge.net/	Wed 20 Mar 2013 09:53:39 AM EDT
gupnp	0.18.4	A framework for creating UPnP devices & control points	GUPnP is an object-oriented open source framework for creating UPnP devices and control points, written in C using GObject and libsoup. The GUPnP API is intended to be easy to use, efficient and flexible.	http://www.gupnp.org/	Fri 05 Apr 2013 04:34:32 PM EDT
gupnp-devel	0.18.4	Development package for gupnp	Files for development with gupnp.	http://www.gupnp.org/	Fri 05 Apr 2013 04:34:39 PM EDT
gutenprint	5.2.9	Printer Drivers Package	Gutenprint is a package of high quality printer drivers for Linux, BSD, Solaris, IRIX, and other UNIX-alike operating systems. Gutenprint was formerly called Gimp-Print.	http://gimp-print.sourceforge.net/	Sun 24 Mar 2013 04:46:01 PM EDT

Name	Version	Summary	Description	URL	Install Time
gutenprint-cups	5.2.9	CUPS drivers for Canon, Epson, HP and compatible printers	This package contains native CUPS support for a wide range of Canon, Epson, HP and compatible printers.	http://gimp-print.sourceforge.net/	Sun 24 Mar 2013 04:47:52 PM EDT
gvfs	1.14.2	Backends for the gio framework in GLib	The gvfs package provides backend implementations for the gio framework in GLib. It includes ftp, sftp, cifs.	http://www.gtk.org	Sun 24 Mar 2013 04:45:55 PM EDT
gwenview	4.10.2	An image viewer	An image viewer.	https://projects.kde.org/projects/kde/kdegraphics/gwenview	Tue 23 Apr 2013 09:35:21 AM EDT
gwenview-libs	4.10.2	Runtime files for gwenview	Runtime files for gwenview.	https://projects.kde.org/projects/kde/kdegraphics/gwenview	Tue 23 Apr 2013 09:35:20 AM EDT
gxmmms2	0.7.1	A graphical audio player	gxmmms2 is a GTK2 based XMMS2 client, written in C. Its main window is small and simple. It includes a playlist editor and a file details dialog.	http://wejp.k.vu/projects/xmms2/	Tue 26 Mar 2013 01:15:41 PM EDT
gypsy	0.8	A GPS multiplexing daemon	Gypsy is a GPS multiplexing daemon which allows multiple clients to access GPS data from multiple GPS sources concurrently.	http://gypsy.freedesktop.org/	Fri 05 Apr 2013 04:34:33 PM EDT
gypsy-devel	0.8	Development package for gypsy	Header files for development with gypsy.	http://gypsy.freedesktop.org/	Fri 05 Apr 2013 04:34:39 PM EDT

Name	Version	Summary	Description	URL	Install Time
gzip	1.5	The GNU data compression program	The gzip package contains the popular GNU gzip data compression program. Gzipped files have a .gz extension. Gzip should be installed on your system, because it is a very commonly used data compression program.	http://www.gzip.org/	Wed 20 Mar 2013 09:51:35 AM EDT
h264enc	9.4.6	An interactive menu-driven frontend for mencoder	h264enc is an advanced and powerful interactive menu-driven shell script written for the GNU/Linux operating system which can help you to encode a DVD, a video file, a directory with video files or a (S)VCD to the H.264/MPEG-4 Part 10/AVC video format using the MEncoder encoder from the MPlayer project and the libx264 library. It supports muxing the final encode from AVI to Matroska, from AVI to OGM, from AVI to TS and from AVI to the MP4 container.	http://h264enc.sourceforge.net/	Tue 26 Mar 2013 03:53:38 PM EDT
hardlink	1.0	Create a tree of hardlinks	hardlink is used to create a tree of hard links. It's used by kernel installation to dramatically reduce the amount of disk space used by each kernel package installed.	http://pkgs.fedoraproject.org/gitweb/?p=hardlink.git	Wed 20 Mar 2013 09:56:54 AM EDT

Name	Version	Summary	Description	URL	Install Time
harfbuzz	0.9.12	Text shaping library	HarfBuzz is an implementation of the OpenType Layout engine.	http://freedesktop.org/wiki/Software/HarfBuzz	Fri 05 Apr 2013 04:24:10 PM EDT
harfbuzz	0.9.12	Text shaping library	HarfBuzz is an implementation of the OpenType Layout engine.	http://freedesktop.org/wiki/Software/HarfBuzz	Sun 24 Mar 2013 04:49:02 PM EDT
hdf5	1.8.9	A general purpose library and file format for storing scientific data	HDF5 is a general purpose library and file format for storing scientific data. HDF5 can store two primary objects: datasets and groups. A dataset is essentially a multidimensional array of data elements, and a group is a structure for organizing objects in an HDF5 file. Using these two basic objects, one can create and store almost any kind of scientific data structure, such as images, arrays of vectors, and structured and unstructured grids. You can also mix and match them in HDF5 files according to your needs.	http://www.hdfgroup.org/HDF5/	Wed 20 Mar 2013 09:50:32 AM EDT
herqq	1.0.0	A software library for building UPnP devices and control points	Herqq UPnP (HUPnP) is a software library for building UPnP devices and control points conforming to the UPnP Device Architecture version 1.1.	http://herqq.org/	Wed 20 Mar 2013 09:53:58 AM EDT

Name	Version	Summary	Description	URL	Install Time
hesiod	3.1.0	Shared libraries for querying the Hesiod naming service	Hesiod is a system which uses existing DNS functionality to provide access to databases of information that changes infrequently. It is often used to distribute information kept in the /etc/passwd, /etc/group, and /etc/printcap files, among others.		Wed 20 Mar 2013 09:52:27 AM EDT
hesiod-devel	3.1.0	Development libraries and headers for Hesiod	Hesiod is a system which uses existing DNS functionality to provide access to databases of information that changes infrequently. It is often used to distribute information which might otherwise kept in the /etc/passwd, /etc/group, and /etc/printcap files over a network, eliminating the need to ensure the files are synchronized among multiple hosts. This package contains the header files and libraries required for building programs which use Hesiod.		Fri 05 Apr 2013 04:34:46 PM EDT
hicolor-icon-theme	0.12	Basic requirement for icon themes	Contains the basic directories and files needed for icon theme support.	http://icon-theme.freedesktop.org/wiki/HicolorTheme	Wed 20 Mar 2013 09:51:39 AM EDT
hostname	3.11	Utility to set/show the host name or domain name	This package provides commands which can be used to display the system's DNS name, and to display or set its hostname or NIS domain name.	http://packages.qa.debian.org/h/hostname.html	Wed 20 Mar 2013 09:52:26 AM EDT

Name	Version	Summary	Description	URL	Install Time
hpijs	3.13.3	HP Printer Drivers	hpijs is a collection of optimized drivers for HP printers. hpijs supports the DeskJet 350C, 600C, 600C Photo, 630C, Apollo 2000, Apollo 2100, Apollo 2560, DeskJet 800C, DeskJet 825, DeskJet 900, PhotoSmart, DeskJet 990C, and PhotoSmart 100 series.	http://hplip.sourceforge.net/	Tue 23 Apr 2013 09:35:09 AM EDT
hplip	3.13.3	HP Linux Imaging and Printing Project	The Hewlett-Packard Linux Imaging and Printing Project provides drivers for HP printers and multi-function peripherals.	http://hplip.sourceforge.net/	Tue 23 Apr 2013 09:36:01 AM EDT
hplip-common	3.13.3	Files needed by the HPLIP printer and scanner drivers	Files needed by the HPLIP printer and scanner drivers.	http://hplip.sourceforge.net/	Tue 23 Apr 2013 09:35:08 AM EDT
hplip-libs	3.13.3	HPLIP libraries	Libraries needed by HPLIP.	http://hplip.sourceforge.net/	Tue 23 Apr 2013 09:35:08 AM EDT
hugin-base	2012.0.0	Command-line tools and libraries required by hugin	Command-line tools used to generate panoramic images, install this package separately from hugin if you want to batch-process hugin projects on a machine without a GUI environment.	http://hugin.sourceforge.net/	Wed 20 Mar 2013 09:53:54 AM EDT

Name	Version	Summary	Description	URL	Install Time
hunspell	1.3.2	A spell checker and morphological analyzer library	Hunspell is a spell checker and morphological analyzer library and program designed for languages with rich morphology and complex word compounding or character encoding. Hunspell interfaces: Ispell-like terminal interface using Curses library, Ispell pipe interface, OpenOffice.org UNO module.	http://hunspell.sourceforge.net/	Fri 05 Apr 2013 04:36:21 PM EDT
hunspell-en	0.20110318	English hunspell dictionaries	English (US, UK, etc.) hunspell dictionaries	http://wordlist.sourceforge.net/	Wed 20 Mar 2013 09:51:09 AM EDT
hunspell-en-GB	0.20110318	UK English hunspell dictionaries	UK English hunspell dictionaries	http://wordlist.sourceforge.net/	Wed 20 Mar 2013 09:51:09 AM EDT

hwdata	0.244	Hardware identification and configuration data	hwdata contains various hardware identification and configuration data, such as the pci.ids and usb.ids databases.	http://git.fedorahosted.org/git/hwdata.git	Sun 24 Mar 2013 04:44:29 PM EDT
hyphen	2.8.5	A text hyphenation library	Hyphen is a library for high quality hyphenation and justification.	http://hunspell.sf.net	Wed 20 Mar 2013 09:50:27 AM EDT
hyphen-en	2.8.5	English hyphenation rules	English hyphenation rules.	http://hunspell.sf.net	Wed 20 Mar 2013 09:50:27 AM EDT
ibus	1.5.1	Intelligent Input Bus for Linux OS	IBus means Intelligent Input Bus. It is an input framework for Linux OS.	http://code.google.com/p/ibus/	Sun 24 Mar 2013 04:45:52 PM EDT
ibus-anthy	1.5.0	The Anthy engine for IBus input platform	The Anthy engine for IBus platform. It provides Japanese input method from a library of the Anthy.	http://code.google.com/p/ibus/	Sun 24 Mar 2013 04:47:57 PM EDT

Name	Version	Summary	Description	URL	Install Time
ibus-chewing	1.4.3	The Chewing engine for IBus input platform	IBus-chewing is an IBus front-end of Chewing, an intelligent Chinese input method for Zhuyin (BoPoMoFo) users. It supports various Zhuyin keyboard layout, such as standard (DaChen), IBM, Gin-Yeah, Eten, Eten 26, Hsu, Dvorak, Dvorak-Hsu, and DaChen26. Chewing also support toned Hanyu pinyin input.	http://code.google.com/p/ibus/	Wed 20 Mar 2013 09:57:09 AM EDT
ibus-gtk2	1.5.1	IBus im module for gtk2	This package contains ibus im module for gtk2	http://code.google.com/p/ibus/	Sun 24 Mar 2013 04:45:52 PM EDT
ibus-gtk3	1.5.1	IBus im module for gtk3	This package contains ibus im module for gtk3	http://code.google.com/p/ibus/	Sun 24 Mar 2013 04:45:52 PM EDT
ibus-hangul	1.4.1	The Hangul engine for IBus input platform	The Hangul engine for IBus platform. It provides Korean input method from libhangul.	http://code.google.com/p/ibus/	Wed 20 Mar 2013 09:57:17 AM EDT
ibus-libpinyin	1.4.93	Intelligent Pinyin engine based on libpinyin for IBus	It includes a Chinese Pinyin input method and a Chinese ZhuYin (Bopomofo) input method based on libpinyin for IBus.	https://github.com/libpinyin/ibus-libpinyin	Wed 20 Mar 2013 09:57:16 AM EDT
ibus-libs	1.5.1	IBus libraries	This package contains the libraries for IBus	http://code.google.com/p/ibus/	Sun 24 Mar 2013 04:44:49 PM EDT
ibus-m17n	1.3.4	The M17N engine for IBus platform	M17N engine for IBus input platform. It allows input of many languages using the input table maps from m17n-db.	http://code.google.com/p/ibus/	Wed 20 Mar 2013 09:57:16 AM EDT
ibus-qt	1.3.2	Qt IBus library and Qt input method plugin	Qt IBus library and Qt input method plugin.	http://code.google.com/p/ibus/	Fri 05 Apr 2013 04:37:04 PM EDT

Name	Version	Summary	Description	URL	Install Time
ibus-rawcode	1.3.1.20100707	The Rawcode engine for IBus input platform	The Rawcode engine for IBus platform.	https://fedorahosted.org/ibus-rawcode/	Wed 20 Mar 2013 09:57:17 AM EDT
ibus-typing-booster	0.0.26	A typing booster engine for the IBus platform	The Typing Booster engine for IBus platform.	http://git.fedorahosted.org/git/?p=ibus-typing-booster.git	Sun 24 Mar 2013 04:47:58 PM EDT
ICAClient	12.1.0	Citrix Receiver for Linux	<p>The Citrix Receiver for Linux provides users with access to resources published on XenApp or XenDesktop servers. The clients combine ease of deployment and use, and offer quick, secure access to applications, content, and virtual desktops. Users can connect to resources published on XenApp servers using either individual ICA connections or, if using Citrix XenApp, predefined ICA connection configurations from servers running the Web Interface.</p> <p>Users can also connect to virtual desktops provided by XenDesktop, enabling them to use those virtual desktops as if they were connecting to a local Windows desktop.</p>	http://www.citrix.com/	Fri 05 Apr 2013 04:24:15 PM EDT
icc-profiles-basiccolor-printing2009	1.2.0	The OpenICC profiles from basIColor	Printing profiles according to ISO 12647-2. These are CMYK ICC profiles for ISO Printing conditions.	http://www.freedesktop.org/wiki/OpenIcc	Wed 20 Mar 2013 09:52:03 AM EDT

Name	Version	Summary	Description	URL	Install Time
icc-profiles-openicc	1.3.1	The OpenICC profiles	The OpenICC profiles are provided to serve color managed applications and services.	http://www.freedesktop.org/wiki/OpenIcc	Wed 20 Mar 2013 09:51:57 AM EDT
icoutils	0.30.0	Utility for extracting and converting Microsoft icon and cursor files	The icoutils are a set of programs for extracting and converting images in Microsoft Windows icon and cursor files. These files usually have the extension .ico or .cur, but they can also be embedded in executables or libraries.	http://www.nongnu.org/icoutils/	Fri 05 Apr 2013 04:37:05 PM EDT
ifuse	1.1.2	Mount Apple iPhone and iPod touch devices	A fuse filesystem for mounting iPhone and iPod touch devices	http://www.libimobiledevice.org/	Wed 20 Mar 2013 09:53:55 AM EDT
ilmbase	1.0.3	Abstraction/convenience libraries	Half is a class that encapsulates the ilm 16-bit floating-point format. IlmThread is a thread abstraction library for use with OpenEXR and other software packages. Imath implements 2D and 3D vectors, 3x3 and 4x4 matrices, quaternions and other useful 2D and 3D math functions. Iex is an exception-handling library.	http://www.openexr.com/	Wed 20 Mar 2013 09:49:48 AM EDT
im-chooser	1.6.2	Desktop Input Method configuration tool	im-chooser is a GUI configuration tool to choose the Input Method to be used or disable Input Method usage on the desktop.	http://fedorahosted.org/im-chooser/	Wed 20 Mar 2013 09:55:51 AM EDT

Name	Version	Summary	Description	URL	Install Time
im-chooser-common	1.6.2	Common files for im-chooser subpackages	im-chooser is a GUI configuration tool to choose the Input Method to be used or disable Input Method usage on the desktop. This package contains the common libraries/files to be used in im-chooser subpackages.	http://fedorahosted.org/im-chooser/	Wed 20 Mar 2013 09:55:51 AM EDT
ImageMagick	6.7.7.5	An X application for displaying and manipulating images	ImageMagick is an image display and manipulation tool for the X Window System. ImageMagick can read and write JPEG, TIFF, PNM, GIF, and Photo CD image formats. It can resize, rotate, sharpen, color reduce, or add special effects to an image, and when finished you can either save the completed work in the original format or a different one. ImageMagick also includes command line programs for creating animated or transparent .gifs, creating composite images, creating thumbnail images, and more. ImageMagick is one of your choices if you need a program to manipulate and display images. If you want to develop your own applications which use ImageMagick code or APIs, you need to install ImageMagick-devel as well.	http://www.imagemagick.org/	Wed 20 Mar 2013 09:54:05 AM EDT

Name	Version	Summary	Description	URL	Install Time
ImageMagick-c++	6.7.7.5	ImageMagick Magick++ library (C++ bindings)	This package contains the Magick++ library, a C++ binding to the ImageMagick graphics manipulation library. Install ImageMagick-c++ if you want to use any applications that use Magick++.	http://www.imagemagick.org/	Wed 20 Mar 2013 09:54:12 AM EDT
imsettings	1.5.1	Delivery framework for general Input Method configuration	IMSettings is a framework that delivers Input Method settings and applies the changes so they take effect immediately without any need to restart applications or the desktop. This package contains the core DBus services and some utilities.	https://tagoh.bitbucket.org/imsettings/	Sun 24 Mar 2013 04:44:55 PM EDT
imsettings-libs	1.5.1	Libraries for imsettings	IMSettings is a framework that delivers Input Method settings and applies the changes so they take effect immediately without any need to restart applications or the desktop. This package contains the shared library for imsettings.	https://tagoh.bitbucket.org/imsettings/	Sun 24 Mar 2013 04:44:52 PM EDT
imsettings-qt	1.5.1	Qt support on imsettings	IMSettings is a framework that delivers Input Method settings and applies the changes so they take effect immediately without any need to restart applications or the desktop. This package contains a module to get this working on Qt applications.	https://tagoh.bitbucket.org/imsettings/	Sun 24 Mar 2013 04:44:55 PM EDT

Name	Version	Summary	Description	URL	Install Time
inchi	1.0.4	The IUPAC International Chemical Identifier library	The IUPAC International Chemical Identifier (InChITM) is a non-proprietary identifier for chemical substances that can be used in printed and electronic data sources thus enabling easier linking of diverse data compilations. It was developed under IUPAC Project 2000-025-1-800 during the period 2000-2004. Details of the project and the history of its progress are available from the project web site.	http://www.inchi-trust.org/?q=node/14	Wed 20 Mar 2013 09:52:25 AM EDT
indent	2.2.11	A GNU program for formatting C code	Indent is a GNU program for beautifying C code, so that it is easier to read. Indent can also convert from one C writing style to a different one. Indent understands correct C syntax and tries to handle incorrect C syntax. Install the indent package if you are developing applications in C and you want a program to format your code.	http://indent.isidore-it.eu/beautify.html	Wed 20 Mar 2013 09:59:03 AM EDT
info	4.13a	A stand-alone TTY-based reader for GNU texinfo documentation	The GNU project uses the texinfo file format for much of its documentation. The info package provides a standalone TTY-based browser program for viewing texinfo files.	http://www.gnu.org/software/texinfo/	Wed 20 Mar 2013 09:49:47 AM EDT

Name	Version	Summary	Description	URL	Install Time
initscripts	9.42.2	The inittab file and the /etc/init.d scripts	The initscripts package contains the basic system scripts used to boot your Red Hat or Fedora system, change runlevels, and shut the system down cleanly. Initscripts also contains the scripts that activate and deactivate most network interfaces.	http://fedorahosted.org/releases/i/n/initscripts/	Tue 26 Mar 2013 01:26:21 PM EDT
inkscape	0.48.4	Vector-based drawing program using SVG	Inkscape is a vector graphics editor, with capabilities similar to Illustrator, CorelDraw, or Xara X, using the W3C standard Scalable Vector Graphics (SVG) file format. It is therefore a very useful tool for web designers and as an interchange format for desktop publishing. Inkscape supports many advanced SVG features (markers, clones, alpha blending, etc.) and great care is taken in designing a streamlined interface. It is very easy to edit nodes, perform complex path operations, trace bitmaps and much more.	http://inkscape.sourceforge.net/	Wed 20 Mar 2013 09:57:54 AM EDT
intltool	0.50.2	Utility for internationalizing various kinds of data files	This tool automatically extracts translatable strings from oaf, glade, bonobo ui, nautilus theme, .desktop, and other data files and puts them in the po files.	http://www.gnome.org	Wed 20 Mar 2013 09:58:22 AM EDT

Name	Version	Summary	Description	URL	Install Time
iok	2.1.3	Indic Onscreen Virtual Keyboard	iok is Indic Onscreen Keyboard. It provides virtual Keyboard functionality. It currently works with Inscript and xkb keymaps for Indian languages. iok can even try to parse non-inscript keymaps and show them in iok.	http://iok.sourceforge.net	Wed 20 Mar 2013 09:54:11 AM EDT
iotop	0.4.4	Top like utility for I/O	Linux has always been able to show how much I/O was going on (the bi and bo columns of the vmstat 1 command). iotop is a Python program with a top like UI used to show of behalf of which process is the I/O going on.	http://guichaz.free.fr/iotop/	Mon 29 Apr 2013 04:09:57 PM EDT
iproute	3.6.0	Advanced IP routing and network device configuration tools	The iproute package contains networking utilities (ip and rtmon, for example) which are designed to use the advanced networking capabilities of the Linux 2.4.x and 2.6.x kernel.	http://kernel.org/pub/linux/utils/net/iproute2/	Tue 26 Mar 2013 01:26:04 PM EDT
iptables	1.4.16.2	Tools for managing Linux kernel packet filtering capabilities	The iptables utility controls the network packet filtering code in the Linux kernel. If you need to set up firewalls and/or IP masquerading, you should install this package.	http://www.netfilter.org/	Wed 20 Mar 2013 09:50:23 AM EDT

Name	Version	Summary	Description	URL	Install Time
iptstate	2.2.2	A top-like display of IP Tables state table entries	<p>IP Tables State (iptstate) was originally written to implement the "state top" feature of IP Filter in IP Tables. "State top" displays the states held by your stateful firewall in a top-like manner.</p> <p>Since IP Tables doesn't have a built in way to easily display this information even once, an option was added to just have it display the state table once.</p> <p>Features include: - Top-like real-time state table information - Sorting by any field - Reversible sorting - Single display of state table - Customizable refresh rate - Display filtering - Color-coding - Open Source - much more...</p>	http://www.phildev.net/iptstate/	Wed 20 Mar 2013 09:57:09 AM EDT
iputils	20121221	Network monitoring tools including ping	The iputils package contains basic utilities for monitoring a network, including ping. The ping command sends a series of ICMP protocol ECHO_REQUEST packets to a specified network host to discover whether the target machine is alive and receiving network traffic.	http://www.skbuff.net/iputils	Sun 24 Mar 2013 04:45:11 PM EDT

Name	Version	Summary	Description	URL	Install Time
ipw2100-firmware	1.3	Firmware for Intel PRO/Wireless 2100 network adaptors	This package contains the firmware files required by the ipw2100 driver for Linux. Usage of the firmware is subject to the terms and conditions contained in /lib/firmware/LICENSE.ipw2100. Please read it carefully.	http://ipw2100.sourceforge.net/firmware.php	Wed 20 Mar 2013 09:59:55 AM EDT

Name	Version	Summary	Description	URL	Install Time
ipw2200-firmware	3.1	Firmware for Intel PRO/Wireless 2200 network adaptors	This package contains the firmware files required by the ipw2200 driver for Linux. Usage of the firmware is subject to the terms and conditions contained in /lib/firmware/LICENSE.ipw2200. Please read it carefully.	http://ipw2200.sourceforge.net/firmware.php	Wed 20 Mar 2013 09:59:55 AM EDT

Name	Version	Summary	Description	URL	Install Time
irda-utils	0.9.18	Utilities for infrared communication between devices	<p>IrDA(TM) (Infrared Data Association) is an industry standard for wireless, infrared communication between devices. IrDA speeds range from 9600 bps to 4 Mbps, and IrDA can be used by many modern devices including laptops, LAN adapters, PDAs, printers, and mobile phones.</p> <p>The Linux-IrDA project is a GPL'd implementation, written from scratch, of the IrDA protocols. Supported IrDA protocols include IrLAP, IrLMP, IrIAP, IrTTP, IrLPT, IrLAN, IrCOMM and IrOBEX.</p> <p>The irda-utils package contains a collection of programs that enable the use of IrDA protocols. Most IrDA features are implemented in the kernel, so IrDA support must be enabled in the kernel before any IrDA tools or programs can be used. Some configuration outside the kernel is required, however, and some IrDA features, like IrOBEX, are actually implemented outside the kernel.</p>	http://irda.sourceforge.net	Wed 20 Mar 2013 09:58:39 AM EDT
iris	1.0.0	A library for working with the XMPP/Jabber protocol	A library for working with the XMPP/Jabber protocol.	http://delta.affinix.com/iris/	Sun 24 Mar 2013 04:47:16 PM EDT

Name	Version	Summary	Description	URL	Install Time
irqbalance	1.0.3	IRQ balancing daemon	irqbalance is a daemon that evenly distributes IRQ load across multiple CPUs for enhanced performance.	http://irqbalance.org/	Sun 24 Mar 2013 04:49:01 PM EDT
isdn4k-utils	3.2	Utilities for configuring an ISDN subsystem	The isdn4k-utils package contains a collection of utilities needed for configuring an ISDN subsystem.	http://www.isdn4linux.de/	Sun 24 Mar 2013 04:48:34 PM EDT
iso-codes	3.40	ISO code lists and translations	This package provides the ISO 639 Language code list, the ISO 4217 Currency code list, the ISO 3166 Territory code list, and ISO 3166-2 sub-territory lists, and all their translations in gettext format.	http://alioth.debian.org/projects/pkg-isocodes/	Wed 20 Mar 2013 09:50:15 AM EDT
ivtv-firmware	20080701	Firmware for the Hauppauge PVR 250/350/150/500/USB2 model series	This package contains the firmware for WinTV Hauppauge PVR 250/350/150/500/USB2 cards.	http://dl.ivtvdriver.org/ivtv/firmware/	Wed 20 Mar 2013 09:59:56 AM EDT
iw	3.7	A nl80211 based wireless configuration tool	iw is a new nl80211 based CLI configuration utility for wireless devices. Currently you can only use this utility to configure devices which use a mac80211 driver as these are the new drivers being written - only because most new wireless devices being sold are now SoftMAC.	http://www.linuxwireless.org/en/users/Documentation/iw	Wed 20 Mar 2013 09:51:06 AM EDT

jack-audio-connection-kit	1.9.9.5	The Jack Audio Connection Kit	JACK is a low-latency audio server, written primarily for the Linux operating system. It can connect a number of different applications to an audio device, as well as allowing them to share audio between themselves. Its clients can run in their own processes (i.e. as a normal application), or can they can run within a JACK server (i.e. a "plugin"). JACK is different from other audio server efforts in that it has been designed from the ground up to be suitable for professional audio work. This means that it focuses on two key areas: synchronous execution of all clients, and low latency operation.	http://www.jackaudio.org	Sun 24 Mar 2013 04:44:49 PM EDT
jack-audio-connection-kit-example-clients	1.9.9.5	Example clients that use Jack	Small example clients that use the Jack Audio Connection Kit.	http://www.jackaudio.org	Sun 24 Mar 2013 04:44:55 PM EDT

js	1.8.5	JavaScript interpreter and libraries	JavaScript is the Netscape-developed object scripting language used in millions of web pages and server applications worldwide. Netscape's JavaScript is a superset of the ECMA-262 Edition 3 (ECMAScript) standard scripting language, with only mild differences from the published standard.	http://www.mozilla.org/js/	Sun 24 Mar 2013 04:49:08 PM EDT
json-c	0.10	A JSON implementation in C	JSON-C implements a reference counting object model that allows you to easily construct JSON objects in C, output them as JSON formatted strings and parse JSON formatted strings back into the C representation of JSON objects.	https://github.com/json-c/json-c/wiki	Wed 20 Mar 2013 09:49:57 AM EDT
json-glib	0.15.2	Library for JavaScript Object Notation format	json-glib is a library providing serialization and deserialization support for the JavaScript Object Notation (JSON) format.	http://live.gnome.org/JsonGlib	Wed 20 Mar 2013 09:51:13 AM EDT
jwhois	4.0	Internet whois/nicname client	A whois client that accepts both traditional and finger-style queries.	http://www.gnu.org/software/jwhois/	Wed 20 Mar 2013 09:59:00 AM EDT

Name	Version	Summary	Description	URL	Install Time
k3b	2.0.2	CD/DVD/Blu-ray burning application	K3b provides a comfortable user interface to perform most CD/DVD burning tasks. While the experienced user can take influence in all steps of the burning process the beginner may find comfort in the automatic settings and the reasonable k3b defaults which allow a quick start.	http://www.k3b.org/	Sun 24 Mar 2013 04:46:48 PM EDT
k3b-common	2.0.2	Common files of k3b	{summary}.	http://www.k3b.org/	Sun 24 Mar 2013 04:46:47 PM EDT
k3b-libs	2.0.2	Runtime libraries for k3b	Runtime libraries for k3b.	http://www.k3b.org/	Sun 24 Mar 2013 04:46:47 PM EDT
kaccessible	4.10.2	An accessibility bridge plugin	Provides accessibility services like focus tracking and a screen reader.	http://accessibility.kde.org/	Tue 23 Apr 2013 09:34:53 AM EDT
kaccessible-libs	4.10.2	Runtime libraries for kaccessible	Runtime libraries for kaccessible.	http://accessibility.kde.org/	Tue 23 Apr 2013 09:34:53 AM EDT
kactivities	4.10.2	API for using and interacting with Activities	API for using and interacting with Activities as a consumer, application adding information to them or as an activity manager.	https://projects.kde.org/projects/kde/kdelibs/kactivities	Tue 23 Apr 2013 09:34:52 AM EDT

Name	Version	Summary	Description	URL	Install Time
kajongg	4.10.2	Classical Mah Jongg game for four players	Kajongg is the ancient Chinese board game for 4 players. Kajongg can be used in two different ways: Scoring a manual game where you play as always and use Kajongg for the computation of scores and for bookkeeping. Or you can use Kajongg to play against any combination of other human players or computer players.	https://projects.kde.org/projects/kde/kdegames/kajongg	Tue 23 Apr 2013 09:34:57 AM EDT
kalgebra	4.10.2	2D and 3D Graph Calculator	2D and 3D Graph Calculator.	https://projects.kde.org/projects/kde/kdeedu/kalgebra	Tue 23 Apr 2013 09:35:58 AM EDT
kalzium	4.10.2	Periodic Table of Elements	Periodic Table of Elements.	https://projects.kde.org/projects/kde/kdeedu/kalzium	Tue 23 Apr 2013 09:35:24 AM EDT
kalzium-libs	4.10.2	Runtime files for kalzium	Runtime files for kalzium.	https://projects.kde.org/projects/kde/kdeedu/kalzium	Tue 23 Apr 2013 09:35:24 AM EDT
kamera	4.10.2	Digital camera support for KDE	Digital camera support for KDE.	https://projects.kde.org/projects/kde/kdegraphics/kamera	Tue 23 Apr 2013 09:35:59 AM EDT
kamoso	2.0.2	Application for taking pictures and videos from a webcam	Kamoso is an application to take pictures and videos out of your webcam.	https://projects.kde.org/projects/extragear/multimedia/kamoso/	Sun 24 Mar 2013 04:47:43 PM EDT
kanagram	4.10.2	Letter Order Game	Letter Order Game.	https://projects.kde.org/projects/kde/kdeedu/kanagram	Tue 23 Apr 2013 09:35:30 AM EDT

Name	Version	Summary	Description	URL	Install Time
kanagram-libs	4.10.2	Runtime libraries for kanagram	Runtime libraries for kana-gram.	https://projects.kde.org/projects/kde/kdeedu/kanagram	Tue 23 Apr 2013 09:35:30 AM EDT
kanjistrokeorder- fonts	3.900	Font to view stroke order diagrams for Kanji, Kana and etc	This font will assist people who are learning kanji, and will help teachers of Japanese in the preparation of classroom material. In the parts of your document where you want the kanji to be annotated with stroke order numbers simply set your document s font to KanjiStrokeOrders. You will need to set the size of the font to be large to allow the stroke order numbers to show up: 100pt seems to be the minimum usable size.	http://sites.google.com/site/nihilistorguk/	Wed 20 Mar 2013 09:51:25 AM EDT

Name	Version	Summary	Description	URL	Install Time
kapman	4.10.2	A collecting game	Kapman is a collecting game. You must go through the levels escaping ghosts in a maze. You lose a life when a ghost eats you, but you can eat the ghosts for a few seconds when eating an energizer. You win points when eating pills, energizers, and bonus, and you win one life for each 10,000 points. When you have eaten all the pills and energizers of a level, you go to the next level, and the player and ghost speeds increase. The game ends when you have lost all your lives.	https://projects.kde.org/projects/kde/kdegames/kapman	Tue 23 Apr 2013 09:35:02 AM EDT
kasumi	2.5	An anthy dictionary management tool	Kasumi is a dictionary management tool for Anthy.	http://kasumi.sourceforge.jp/	Wed 20 Mar 2013 09:53:38 AM EDT
kate-part	4.10.2	Kate kpart plugin	Kate kpart plugin.	https://projects.kde.org/projects/kde/kdebase/kate	Tue 23 Apr 2013 09:34:53 AM EDT

Name	Version	Summary	Description	URL	Install Time
katomic	4.10.2	An educational game built around molecular geometry	KAtomic is a fun and educational game built around molecular geometry. It employs a simplistic two-dimensional look at the elements which comprise a molecule. A molecule is disassembled into its separate atoms and scattered around the playing field. The player must reassemble the molecule in order to complete the current level and move up to the next one.	https://projects.kde.org/projects/kde/kdegames/katomic	Tue 23 Apr 2013 09:34:58 AM EDT
kbd	1.15.3	Tools for configuring the console (keyboard, virtual terminals, etc.)	The kbd package contains tools for managing a Linux system's console's behavior, including the keyboard, the screen fonts, the virtual terminals and font files.	http://ftp.altlinux.org/pub/people/legion/kbd	Sun 24 Mar 2013 04:45:12 PM EDT
kbd-misc	1.15.3	Data for kbd package	The kbd-misc package contains data for kbd package - console fonts, keymaps etc. Please note that kbd-misc is not helpful without kbd.	http://ftp.altlinux.org/pub/people/legion/kbd	Sun 24 Mar 2013 04:44:30 PM EDT

Name	Version	Summary	Description	URL	Install Time
kblackbox	4.10.2	A game of hide and seek played on a grid of boxes	KBlackBox is a game of hide and seek played on a grid of boxes. The computer has hidden several balls within this box. By shooting beams into the box and observing where they emerge it is possible to deduce the positions of the hidden balls. The fewer beams you use and the quicker you are to find the balls, the better (the lower) your score.	https://projects.kde.org/projects/kde/kdegames/kblackbox	Tue 23 Apr 2013 09:35:05 AM EDT
kblocks	4.10.2	A classic falling blocks game	KBlocks is the classic falling blocks game. The idea is stack the falling blocks in a way that lines are completely filled. When a line is completed it is removed, and more space is available in the play area. When there is not enough space for blocks to fall, the game is over.	https://projects.kde.org/projects/kde/kdegames/kblocks	Tue 23 Apr 2013 09:35:00 AM EDT
kbounce	4.10.2	Ball bouncing game	KBounce is a single player arcade game with the elements of puzzle. It is played on a field, surrounded by walls, with two or more balls that move about in the field bouncing off of walls. The player can build new walls, decreasing the size of the active field. The goal of the game is to fill at least 75% of the field and advance to the next level.	https://projects.kde.org/projects/kde/kdegames/kbounce	Tue 23 Apr 2013 09:34:59 AM EDT

Name	Version	Summary	Description	URL	Install Time
kbreakout	4.10.2	Destroy bricks with a ball	The objective KBreakout game is to destroy as many bricks as possible without losing the ball.	https://projects.kde.org/projects/kde/kdegames/kbreakout	Tue 23 Apr 2013 09:35:01 AM EDT
kbruch	4.10.2	Practice Fractions	Practice Fractions.	https://projects.kde.org/projects/kde/kdeedu/kbruch	Tue 23 Apr 2013 09:35:58 AM EDT
kcalc	4.10.2	Scientific Calculator	KCalc is a calculator which offers many more mathematical functions than meet the eye on a first glance.	https://projects.kde.org/projects/kde/kdeutils/kcalc	Tue 23 Apr 2013 09:36:02 AM EDT
kcharselect	4.10.2	Character selector	KCharSelect is a tool to select special characters from all installed fonts and copy them into the clipboard.	http://utils.kde.org/projects/kcharselect	Tue 23 Apr 2013 09:36:02 AM EDT
kcm-gtk	0.5.3	Configure the appearance of GTK apps in KDE	This is a System Settings configuration module for configuring the appearance of GTK apps in KDE.	https://launchpad.net/kcm-gtk	Wed 20 Mar 2013 09:57:19 AM EDT
kcm.colors	4.10.2	Colors KDE Control Module	The Color Selection module is comprised of several sections: * The Scheme tab, used to manage schemes * The Options tab, used to change the options of the current scheme * The Colors tab, used to change the colors of the current scheme * The state effects tabs (Inactive, Disabled)	https://projects.kde.org/projects/kde/kde-workspace	Tue 23 Apr 2013 09:35:26 AM EDT
kcm.touchpad	0.3.1	Synaptics driver based touchpads kcontrol module	A KDE System Settings module to to configure synaptics based touchpads.	http://kde-apps.org/content/show.php/kcm_touchpad?content=113335	Wed 20 Mar 2013 09:57:28 AM EDT

Name	Version	Summary	Description	URL	Install Time
kcolorchooser	4.10.2	A color chooser	A color chooser.	https://projects.kde.org/projects/kde/kdegraphics/kcolorchooser	Tue 23 Apr 2013 09:35:54 AM EDT
kde-baseapps	4.10.2	KDE Core Applications	Core applications for KDE 4, including: dolphin : File manager kdepasswd : Changes a UNIX password. kdialog : Nice dialog boxes from shell scripts keditbookmarks : Bookmark oranizer and editor kfind : File find utility kfmclient : Tool for opening URLs from the command line konqueror : Web browser, file manager and document viewer	https://projects.kde.org/projects/kde/kde-baseapps	Tue 23 Apr 2013 09:35:20 AM EDT
kde-baseapps-libs	4.10.2	Runtime libraries for kde-baseapps	Runtime libraries for kde-baseapps.	https://projects.kde.org/projects/kde/kde-baseapps	Tue 23 Apr 2013 09:35:19 AM EDT
kde-filesystem	4	KDE filesystem layout	This package provides some directories that are required/used by KDE.		Sun 24 Mar 2013 04:45:00 PM EDT
kde-plasma-networkmanagement	0.9.0.8	NetworkManager KDE 4 integration	A Plasma applet to control your wired and wireless network(s) in KDE 4 using the default NetworkManager service.	https://projects.kde.org/projects/extragear/base/networkmanagement	Tue 26 Mar 2013 01:26:04 PM EDT
kde-plasma-networkmanagement-libs	0.9.0.8	Runtime libraries for kde-plasma-networkmanagement	Runtime libraries for kde-plasma-networkmanagement.	https://projects.kde.org/projects/extragear/base/networkmanagement	Tue 26 Mar 2013 01:26:04 PM EDT

Name	Version	Summary	Description	URL	Install Time
kde-plasma-networkmanagement-openconnect	0.9.0.8	OpenConnect support for kde-plasma-networkmanagement	OpenConnect support for kde-plasma-networkmanagement.	https://projects.kde.org/projects/extragear/base/networkmanagement	Tue 26 Mar 2013 01:26:21 PM EDT
kde-plasma-networkmanagement-openvpn	0.9.0.8	OpenVPN support for kde-plasma-networkmanagement	OpenVPN support for kde-plasma-networkmanagement.	https://projects.kde.org/projects/extragear/base/networkmanagement	Tue 26 Mar 2013 01:26:21 PM EDT

killbots	4.10.2	A simple game of evading killer robots	Killbots is a simple game of evading killer robots. Who created the robots and why they have been programmed to destroy, no one knows. All that is known is that the robots are numerous and their sole objective is to destroy you. Fortunately for you, their creator has focused on quantity rather than quality and as a result the robots are severely lacking in intelligence. Your superior wit and a fancy teleportation device are your only weapons against the never-ending stream of mindless automatons.	https://projects.kde.org/projects/kde/kdegames/killbots	Tue 23 Apr 2013 09:35:02 AM EDT

kiriki	4.10.2	A dice game	Kiriki is an addictive and fun dice game for KDE, designed to be played by as many as six players. Participants have to collect points by rolling five dice for up to three times per single turn. Each roll generates a specific combination of numbers which the player is free to either accept or decline. However, each specific combination of numbers can be accepted only once. After thirteen turns the game ends and the scores are compared. The player with the largest amount of points wins the game.	https://projects.kde.org/projects/kde/kdegames/kiriki	Tue 23 Apr 2013 09:35:00 AM EDT

kjumpingcube	4.10.2	Territory capture game	KJumpingCube is a simple tactical game. You can play it against the computer or a friend. The playing area consists of squares containing points. When the game starts each square has only one point, and no owner. Players move by clicking on either a vacant square or one of their own squares, thus increasing the squares point value by one. When a squares value reaches a maximum, the excess points are distributed around the neighboring squares, taking over ownership of them. The winner is the player who ends up owning all the squares.	https://projects.kde.org/projects/kde/kdegames/kjumpingcube	Tue 23 Apr 2013 09:35:00 AM EDT
klettres	4.10.2	Learn the alphabet and read some syllables in different languages	KLettres aims to help to learn the alphabet and then to read some syllables in different languages. It is meant to help learning the very first sounds of a new language, for children or for adults.	http://edu.kde.org/klettres/	Tue 23 Apr 2013 09:36:00 AM EDT

Name	Version	Summary	Description	URL	Install Time
klickety	4.10.2	Destroy groups of blocks	In Klickety, your goal is to clear the board by clicking on groups to destroy them. The overall aim is to get the lowest score possible. It will provide entertainment for all abilities, but a challenge in logical thought if you want to get a really low score.	https://projects.kde.org/projects/kde/kdegames/klickety	Tue 23 Apr 2013 09:35:04 AM EDT
klines	4.10.2	Color lines game	The goal of Kolor Lines is quite plain. The player has to move the colored balls around the game board, gathering them into the lines of the same color by five. Once the line is complete it is removed from the board, therefore freeing precious space. In the same time the new balls keep arriving by three after each move, filling up the game board. Kolor Lines cannot be won, and is played against the high score exclusively. The game ends once the whole game board is filled up with balls	https://projects.kde.org/projects/kde/kdegames/klines	Tue 23 Apr 2013 09:35:03 AM EDT
kmag	4.10.2	A screen magnifier	A screen magnifier.	http://accessibility.kde.org/	Tue 23 Apr 2013 09:34:57 AM EDT

konquest	4.10.2	Galactic conquest game	Konquest is the KDE version of Gnu-Lactic. Players conquer other planets by sending ships to them. The goal is to build an interstellar empire and ultimately conquer all other player's planets. Konquest can be played against other people or a computer.	https://projects.kde.org/projects/kde/kdegames/konquest	Tue 23 Apr 2013 09:35:02 AM EDT
konsole	4.10.2	KDE Terminal emulator	KDE Terminal emulator.	http://konsole.kde.org/	Tue 23 Apr 2013 09:35:21 AM EDT
konsole-part	4.10.2	Konsole kpart plugin	Konsole kpart plugin.	http://konsole.kde.org/	Tue 23 Apr 2013 09:35:21 AM EDT

Name	Version	Summary	Description	URL	Install Time
konversation	1.4	A user friendly IRC client	A simple and easy to use IRC client with support for strike-out; multi-channel joins; away / unaway messages; ignore list functionality; support for foreign language characters; auto-connect to server; optional timestamps to chat windows; configurable background colors and much more	http://konversation.kde.org/	Wed 20 Mar 2013 09:57:41 AM EDT
kpartx	0.4.9	Partition device manager for device-mapper devices	kpartx manages partition creation and removal for device-mapper devices.	http://christophe.varoqui.free.fr/	Wed 20 Mar 2013 09:53:25 AM EDT
kpat	4.10.2	A selection of solitaire card games	A selection of solitaire card games. To play patience you need, as the name suggests, patience. For simple games, where the way the game goes depends only upon how the cards fall, your patience might be the only thing you need. There are also patience games where you must plan your strategy and think ahead in order to win. A theme common to all the games is the player must put the cards in a special order moving, turning and reordering them.	https://projects.kde.org/projects/kde/kdegames/kpat	Tue 23 Apr 2013 09:35:04 AM EDT

Name	Version	Summary	Description	URL	Install Time
krb5-devel	1.10.3	Development files needed to compile Kerberos 5 programs	Kerberos is a network authentication system. The krb5-devel package contains the header files and libraries needed for compiling Kerberos 5 programs. If you want to develop Kerberos-aware programs, you need to install this package.	http://web.mit.edu/kerberos/www/	Tue 23 Apr 2013 09:36:40 AM EDT
krb5-libs	1.10.3	The shared libraries used by Kerberos 5	Kerberos is a network authentication system. The krb5-libs package contains the shared libraries needed by Kerberos 5. If you are using Kerberos, you need to install this package.	http://web.mit.edu/kerberos/www/	Tue 23 Apr 2013 09:36:47 AM EDT
krb5-libs	1.10.3	The shared libraries used by Kerberos 5	Kerberos is a network authentication system. The krb5-libs package contains the shared libraries needed by Kerberos 5. If you are using Kerberos, you need to install this package.	http://web.mit.edu/kerberos/www/	Tue 23 Apr 2013 09:34:16 AM EDT
krb5-workstation	1.10.3	Kerberos 5 programs for use on workstations	Kerberos is a network authentication system. The krb5-workstation package contains the basic Kerberos programs (kinit, klist, kdestroy, kpasswd). If your network uses Kerberos, this package should be installed on every workstation.	http://web.mit.edu/kerberos/www/	Tue 23 Apr 2013 09:36:40 AM EDT

Name	Version	Summary	Description	URL	Install Time
kreversi	4.10.2	Reversi board game	Kreversi is a simple one player strategy game played against the computer. The playing field is an 8 by 8 square board divided into 64 squares. The game pieces used are two sided stones, where each side has its own, distinctive color. If a piece is captured by an opposing player, that piece is turned over to reveal the color of that player. A winner is declared when one player has more pieces of his own color on the board and there are no more possible moves.	https://projects.kde.org/projects/kde/kdegames/kreversi	Tue 23 Apr 2013 09:35:03 AM EDT
kross-python	4.10.2	Kross plugin for python	Python plugin for the Kross architecture in KDE.	http://developer.kde.org/language-bindings/	Tue 23 Apr 2013 09:35:07 AM EDT
kruler	4.10.2	A screen ruler and color measurement tool	A screen ruler and color measurement tool.	https://projects.kde.org/projects/kde/kdegraphics/kruler	Tue 23 Apr 2013 09:35:58 AM EDT

Name	Version	Summary	Description	URL	Install Time
krusader	2.4.0	An advanced twin-panel (commander-style) file-manager for KDE	Krusader is an advanced twin panel (commander style) file manager for KDE and other desktops in the *nix world, similar to Midnight or Total Commander. It provides all the file management features you could possibly want. Plus: extensive archive handling, mounted filesystem support, FTP, advanced search module, an internal viewer/editor, directory synchronisation, file content comparisons, powerful batch renaming and much much more. It supports a wide variety of archive formats and can handle other KIO slaves such as smb or fish. It is (almost) completely customizable, very user friendly, fast and looks great on your desktop! You should give it a try.	http://www.krusader.org/	Wed 20 Mar 2013 09:57:16 AM EDT
kscd	4.10.2	CD Player	KsCD is a small, fast, CDDb enabled audio CD player.	http://www.kde.org/applications/multimedia/kscd/	Tue 23 Apr 2013 09:35:54 AM EDT

Name	Version	Summary	Description	URL	Install Time
kshisen	4.10.2	Shisen-Sho Mahjongg-like tile game	Shisen-Sho is a solitaire-like game played using the standard set of Mahjong tiles. Unlike Mahjong however, Shisen-Sho has only one layer of scrambled tiles. You can remove matching pieces if they can be connected with a line with at most two bends in it. At the same time, the line must not cross any other tiles. To win a game of Shisen-Sho the player has to remove all the tiles from the game board	https://projects.kde.org/projects/kde/kdegames/kshisen	Tue 23 Apr 2013 09:34:57 AM EDT
ksirk	4.10.2	Conquer-the-world strategy game	The goal of KSirk is to conquer the World. It is done by attacking your neighbors with your armies.	https://projects.kde.org/projects/kde/kdegames/ksirk	Tue 23 Apr 2013 09:34:58 AM EDT
ksnakeduel	4.10.2	Snake duel game	KSnakeDuel is a simple snake duel game. You can play KSnakeDuel against the computer or a friend. The aim of the game is to live longer than your opponent. To do that, avoid running into a wall, your own tail and that of your opponent.	https://projects.kde.org/projects/kde/kdegames/ksnakeduel	Tue 23 Apr 2013 09:35:03 AM EDT
ksnapshot	4.10.2	A screen capture utility	A screen capture utility.	https://projects.kde.org/projects/kde/kdegraphics/ksnapshot	Tue 23 Apr 2013 09:35:57 AM EDT

Name	Version	Summary	Description	URL	Install Time
kspaceduel	4.10.2	Space arcade game	The idea behind KSpaceDuel is simple, but addictive. Each of two possible players controls a satellite spaceship orbiting the sun. As the game progresses players have to eliminate opponent's spacecraft. As soon as the opponent's satellite is destroyed, the remaining player wins the round	https://projects.kde.org/projects/kde/kdegames/kspaceduel	Tue 23 Apr 2013 09:34:59 AM EDT
ksquares	4.10.2	Connect the dots to create squares	The idea behind KSquares is to construct squares by interconnecting the dots on the grid. Up to four players can play this game together, taking turns. The trick is regardless of who has constructed most of the square, it is the player who completes the square that gets the point for it. To win the game round player has to collect the most points by covering the most area with the squares of player's own color.	https://projects.kde.org/projects/kde/kdegames/ksquares	Tue 23 Apr 2013 09:34:58 AM EDT
ksshaskpass	0.5.3	A KDE version of ssh-askpass with KWallet support	A KDE version of ssh-askpass with KWallet support. Please read /usr/share/doc/ksshaskpass-0.5.3/README.Fedora for usage instructions	http://www.kde-apps.org/content/show.php?content=50971	Wed 20 Mar 2013 09:57:44 AM EDT

lcms-libs	1.19	Library for lcms	The lcms-libs package contains library for lcms.	http://www.littlecms.com/	Wed 20 Mar 2013 09:49:50 AM EDT

Name	Version	Summary	Description	URL	Install Time
lcms2	2.4	Color Management Engine	LittleCMS intends to be a small-footprint, speed optimized color management engine in open source form. LCMS2 is the current version of LCMS, and can be parallel installed with the original (deprecated) lcms.	http://www.littlecms.com/	Wed 20 Mar 2013 09:49:53 AM EDT
lensfun	0.2.6	Library to rectify defects introduced by photographic lenses	The lensfun library provides an open source database of photographic lenses and their characteristics. It not only provides a way to read and search the database, but also provides a set of algorithms for correcting images based on detailed knowledge of lens properties. Right now lensfun is designed to correct distortion, transversal (also known as lateral) chromatic aberrations, vignetting and color contribution of a lens.	http://lensfun.berlios.de/	Wed 20 Mar 2013 09:50:11 AM EDT

Name	Version	Summary	Description	URL	Install Time
less	444	A text file browser similar to more, but better	The less utility is a text file browser that resembles more, but has more capabilities. Less allows you to move backwards in the file as well as forwards. Since less doesn't have to read the entire input file before it starts, less starts up more quickly than text editors (for example, vi). You should install less because it is a basic utility for viewing text files, and you'll use it frequently.	http://www.greenwoodsoftware.com/less/	Wed 20 Mar 2013 09:50:27 AM EDT
lftp	4.4.2	A sophisticated file transfer program	LFTP is a sophisticated ftp/http file transfer program. Like bash, it has job control and uses the readline library for input. It has bookmarks, built-in mirroring, and can transfer several files in parallel. It is designed with reliability in mind.	http://lftp.yar.ru/	Sun 24 Mar 2013 04:49:03 PM EDT
libacl	2.2.51	Dynamic library for access control list support	This package contains the libacl.so dynamic library which contains the POSIX 1003.1e draft standard 17 functions for manipulating access control lists.	http://acl.bestbits.at/	Wed 20 Mar 2013 09:49:50 AM EDT

Name	Version	Summary	Description	URL	Install Time
libacl-devel	2.2.51	Files needed for building programs with libacl	This package contains header files and documentation needed to develop programs which make use of the access control list programming interface defined in POSIX 1003.1e draft standard 17.	http://acl.bestbits.at/	Fri 05 Apr 2013 04:34:38 PM EDT
libaio	0.3.109	Linux-native asynchronous I/O access library	The Linux-native asynchronous I/O facility ("async I/O", or "aio") has a richer API and capability set than the simple POSIX async I/O facility. This library, libaio, provides the Linux-native API for async I/O. The POSIX async I/O facility requires this library in order to provide kernel-accelerated async I/O capabilities, as do applications which require the Linux-native async I/O API.		Wed 20 Mar 2013 09:50:41 AM EDT
libao	1.1.0	Cross Platform Audio Output Library	Libao is a cross platform audio output library. It currently supports ESD, OSS, Solaris, and IRIX.	http://xiph.org/ao/	Wed 20 Mar 2013 09:51:40 AM EDT

Name	Version	Summary	Description	URL	Install Time
libarchive	3.0.4	A library for handling streaming archive formats	Libarchive is a programming library that can create and read several different streaming archive formats, including most popular tar variants, several cpio formats, and both BSD and GNU ar variants. It can also write shar archives and read ISO9660 CDROM images and ZIP archives.	http://code.google.com/p/libarchive/	Tue 23 Apr 2013 09:35:09 AM EDT
libart_lgpl	2.3.21	Library of graphics routines used by libgnomecanvas	Graphics routines used by the GnomeCanvas widget and some other applications. libart renders vector paths and the like.	http://www.gnome.org/	Wed 20 Mar 2013 09:50:05 AM EDT
libass	0.10.1	Portable library for SSA/ASS subtitles rendering	Libass is a portable library for SSA/ASS subtitles rendering.	http://code.google.com/p/libass/	Tue 26 Mar 2013 01:01:59 PM EDT
libassuan	2.0.3	GnuPG IPC library	This is the IPC library used by GnuPG 2, GPGME and a few other packages.	http://www.gnupg.org/	Wed 20 Mar 2013 09:50:15 AM EDT
libasyncns	0.8	Asynchronous Name Service Library	A small and lightweight library that implements easy to use asynchronous wrappers around the libc NSS functions getaddrinfo(), res_query() and related.	http://0pointer.de/lennart/projects/libasyncns/	Wed 20 Mar 2013 09:50:06 AM EDT
libatasmart	0.19	ATA S.M.A.R.T. Disk Health Monitoring Library	A small and lightweight parser library for ATA S.M.A.R.T. hard disk health monitoring.	http://git.0pointer.de/?p=libatasmart.git;a=summary	Wed 20 Mar 2013 09:51:53 AM EDT

Name	Version	Summary	Description	URL	Install Time
libattr	2.4.46	Dynamic library for extended attribute support	This package contains the libattr.so dynamic library which contains the extended attribute system calls and library functions.	http://acl.bestbits.at/	Fri 05 Apr 2013 04:24:10 PM EDT
libattr	2.4.46	Dynamic library for extended attribute support	This package contains the libattr.so dynamic library which contains the extended attribute system calls and library functions.	http://acl.bestbits.at/	Wed 20 Mar 2013 09:49:45 AM EDT
libattr-devel	2.4.46	Files needed for building programs with libattr	This package contains header files and documentation needed to develop programs which make use of extended attributes. For Linux programs, the documented system call API is the recommended interface, but an SGI IRIX compatibility interface is also provided. Currently only ext2, ext3 and XFS support extended attributes. The SGI IRIX compatibility API built above the Linux system calls is used by programs such as xfsdump(8), xfsrestore(8) and xfs_fsr(8). You should install libattr-devel if you want to develop programs which make use of extended attributes. If you install libattr-devel, you'll also want to install attr.	http://acl.bestbits.at/	Fri 05 Apr 2013 04:34:38 PM EDT

Name	Version	Summary	Description	URL	Install Time
libavc1394	0.5.3	Audio/Video Control library for IEEE-1394 devices	The libavc1394 library allows utilities to control IEEE-1394 devices using the AV/C specification. Audio/Video Control allows applications to control devices like the tape on a VCR or camcorder.	http://sourceforge.net/projects/libavc1394/	Wed 20 Mar 2013 09:50:32 AM EDT
libbasicobjects	0.1.0	Basic object types for C	Basic object types	http://fedorahosted.org/sssd/	Wed 20 Mar 2013 09:52:18 AM EDT
libblkid	2.22.2	Block device ID library	This is block device identification library, part of util-linux.	http://en.wikipedia.org/wiki/Util-linux	Sun 24 Mar 2013 04:44:44 PM EDT
libbluedevil	1.9.2	A Qt wrapper for bluez	libbluedevil is Qt-based library written handle all Bluetooth functionality.	https://projects.kde.org/projects/playground/libs/libbluedevil	Wed 20 Mar 2013 10:00:12 AM EDT
libbluray	0.2.3	Library to access Blu-Ray disks for video playback	This package is aiming to provide a full portable free open source bluray library, which can be plugged into popular media players to allow full bluray navigation and playback on Linux. It will eventually be compatible with all current titles, and will be easily portable and embeddable in standard players such as mplayer and vlc.	http://www.videolan.org/developers/libbluray.html	Wed 20 Mar 2013 09:51:18 AM EDT
libbonobo	2.32.1	Bonobo component system	Bonobo is a component system based on CORBA, used by the GNOME desktop.	http://ftp.gnome.org	Wed 20 Mar 2013 09:51:14 AM EDT

Name	Version	Summary	Description	URL	Install Time
libbonoboui	2.24.5	Bonobo user interface components	Bonobo is a component system based on CORBA, used by the GNOME desktop. libbonoboui contains the user interface related components that come with Bonobo.	http://www.gnome.org	Wed 20 Mar 2013 09:54:50 AM EDT
libbs2b	3.1.0	Bauer stereophonic-to-binaural DSP library	The Bauer stereophonic-to-binaural DSP (bs2b) library and plugins is designed to improve headphone listening of stereo audio records. Recommended for headphone prolonged listening to disable superstereo fatigue without essential distortions.	http://bs2b.sourceforge.net/	Tue 26 Mar 2013 01:02:24 PM EDT
libbsd	0.4.2	Library providing BSD-compatible functions for portability	libbsd provides useful functions commonly found on BSD systems, and lacking on others like GNU systems, thus making it easier to port projects with strong BSD origins, without needing to embed the same code over and over again on each project.	http://libbsd.freedesktop.org/	Wed 20 Mar 2013 09:50:08 AM EDT
libcaca	0.99	Library for Colour AsCii Art, text mode graphics	libcaca is the Colour AsCii Art library. It provides high level functions for color text drawing, simple primitives for line, polygon and ellipse drawing, as well as powerful image to text conversion routines.	http://caca.zoy.org/wiki/libcaca	Tue 26 Mar 2013 01:02:02 PM EDT

Name	Version	Summary	Description	URL	Install Time
libcanberra	0.30	Portable Sound Event Library	A small and lightweight implementation of the XDG Sound Theme Specification (http://0pointer.de/public/sound-theme-spec.html).	http://git.0pointer.de/?p=libcanberra.git;a=summary	Wed 20 Mar 2013 09:52:58 AM EDT
libcanberra-gtk2	0.30	Gtk+ 2.x Bindings for libcanberra	Gtk+ 2.x bindings for libcanberra	http://git.0pointer.de/?p=libcanberra.git;a=summary	Tue 23 Apr 2013 09:35:30 AM EDT
libcanberra-gtk3	0.30	Gtk+ 3.x Bindings for libcanberra	Gtk+ 3.x bindings for libcanberra	http://git.0pointer.de/?p=libcanberra.git;a=summary	Tue 23 Apr 2013 09:35:30 AM EDT
libcap	2.22	Library for getting and setting POSIX.1e capabilities	libcap is a library for getting and setting POSIX.1e (formerly POSIX 6) draft 15 capabilities.	http://ftp.kernel.org/pub/linux/libs/security/linux-privs/kernel-2.6/	Fri 05 Apr 2013 04:24:10 PM EDT

Name	Version	Summary	Description	URL	Install Time
libcap	2.22	Library for getting and setting POSIX.1e capabilities	libcap is a library for getting and setting POSIX.1e (formerly POSIX 6) draft 15 capabilities.	http://ftp.kernel.org/pub/linux/libs/security/linux-privs/kernel-2.6/	Wed 20 Mar 2013 09:49:45 AM EDT
libcap-devel	2.22	Development files for libcap	Development files (Headers, libraries for static linking, etc) for libcap. libcap is a library for getting and setting POSIX.1e (formerly POSIX 6) draft 15 capabilities. Install libcap-devel if you want to develop or compile applications using libcap.	http://ftp.kernel.org/pub/linux/libs/security/linux-privs/kernel-2.6/	Fri 05 Apr 2013 04:34:46 PM EDT
libcap-ng	0.7.3	An alternate posix capabilities library	Libcap-ng is a library that makes using posix capabilities easier	http://people.redhat.com/sgrubb/libcap-ng	Wed 20 Mar 2013 09:50:04 AM EDT
libcddb	1.3.2	Library (C API) for accessing CDDB servers	Libcddb is a library that implements the different protocols (CDDBP, HTTP, SMTP) to access data on a CDDB server (e.g http://freedb.org/).	http://libcddb.sourceforge.net/	Tue 26 Mar 2013 01:02:02 PM EDT
libcdio	0.83	CD-ROM input and control library	This library provides an interface for CD-ROM access. It can be used by applications that need OS- and device-independent access to CD-ROM devices.	http://www.gnu.org/software/libcdio/	Wed 20 Mar 2013 09:51:19 AM EDT
libcdr	0.0.11	A library providing ability to interpret and import Corel Draw drawings	Libcdr is library providing ability to interpret and import Corel Draw drawings into various applications. You can find it being used in libreoffice.	http://www.freedesktop.org/wiki/Software/libcdr	Sun 24 Mar 2013 04:44:58 PM EDT

Name	Version	Summary	Description	URL	Install Time
libcgroup	0.38	Library to control and monitor control groups	Control groups infrastructure. The library helps manipulate, control, administrate and monitor control groups and the associated controllers.	http://libcg.sourceforge.net/	Wed 20 Mar 2013 09:54:30 AM EDT
libchewing	0.3.4	Intelligent phonetic input method library for Traditional Chinese	libchewing is an intelligent phonetic input method library for Chinese. It provides the core algorithm and logic that can be used by various input methods. The Chewing input method is a smart bopomofo phonetics input method that is useful for inputting Mandarin Chinese.	http://chewing.csie.net/	Sun 24 Mar 2013 04:49:07 PM EDT
libcmis	0.2.3	A C++ client library for the CMIS interface	LibCMIS is a C++ client library for the CMIS interface. This allows C++ applications to connect to any ECM behaving as a CMIS server like Alfresco, Nuxeo for the open source ones.	http://sourceforge.net/projects/libcmis/	Wed 20 Mar 2013 09:52:05 AM EDT
libcollection	0.6.2	Collection data-type for C	A data-type to collect data in a hierarchical structure for easy iteration and serialization	http://fedorahosted.org/sssd/	Wed 20 Mar 2013 09:50:42 AM EDT
libcom_err	1.42.5	Common error description library	This is the common error description library, part of e2fsprogs. libcom_err is an attempt to present a common error-handling mechanism.	http://e2fsprogs.sourceforge.net/	Fri 05 Apr 2013 04:24:04 PM EDT

Name	Version	Summary	Description	URL	Install Time
libcom_err	1.42.5	Common error description library	This is the common error description library, part of e2fsprogs. libcom_err is an attempt to present a common error-handling mechanism.	http://e2fsprogs.sourceforge.net/	Wed 20 Mar 2013 09:49:47 AM EDT
libcom_err-devel	1.42.5	Common error description library	This is the common error description development library and headers, part of e2fsprogs. It contains the compile_et command, used to convert a table listing error-code names and associated messages into a C source file suitable for use with the library. libcom_err is an attempt to present a common error-handling mechanism.	http://e2fsprogs.sourceforge.net/	Fri 05 Apr 2013 04:34:33 PM EDT
libconfig	1.4.8	C/C++ configuration file library	Libconfig is a simple library for manipulating structured configuration files. This file format is more compact and more readable than XML. And unlike XML, it is type-aware, so it is not necessary to do string parsing in application code.	http://www.hyperrealm.com/libconfig/	Wed 20 Mar 2013 09:52:14 AM EDT
libcroco	0.6.8	A CSS2 parsing library	CSS2 parsing and manipulation library for GNOME		Wed 20 Mar 2013 09:50:06 AM EDT

Name	Version	Summary	Description	URL	Install Time
libcrystalhd	3.10.0	Broadcom Crystal HD device interface library	The libcrystalhd library provides userspace access to Broadcom Crystal HD video decoder devices. The device supports hardware decoding of MPEG-2, h.264 and VC1 video codecs, up to 1080p at 40fps for the first-generation bcm970012 hardware, and up to 1080p at 60fps for the second-generation bcm970015 hardware.	http://www.broadcom.com/support/crystal_hd/	Tue 26 Mar 2013 01:02:00 PM EDT
libcue	1.3.0	Cue sheet parser library	Libcue is intended for parsing a so-called cue sheet from a char string or a file pointer. For handling of the parsed data a convenient API is available.	http://libcue.sourceforge.net/	Wed 20 Mar 2013 09:56:55 AM EDT
libcurl	7.27.0	A library for getting files from web servers	libcurl is a free and easy-to-use client-side URL transfer library, supporting FTP, FTPS, HTTP, HTTPS, SCP, SFTP, TFTP, TELNET, DICT, LDAP, LDAPS, FILE, IMAP, SMTP, POP3 and RTSP. libcurl supports SSL certificates, HTTP POST, HTTP PUT, FTP uploading, HTTP form based upload, proxies, cookies, user+password authentication (Basic, Digest, NTLM, Negotiate, Kerberos4), file transfer resume, http proxy tunneling and more.	http://curl.haxx.se/	Thu 02 May 2013 12:33:06 AM EDT

Name	Version	Summary	Description	URL	Install Time
libcurl	7.27.0	A library for getting files from web servers	libcurl is a free and easy-to-use client-side URL transfer library, supporting FTP, FTPS, HTTP, HTTPS, SCP, SFTP, TFTP, TELNET, DICT, LDAP, LDAPS, FILE, IMAP, SMTP, POP3 and RTSP. libcurl supports SSL certificates, HTTP POST, HTTP PUT, FTP uploading, HTTP form based upload, proxies, cookies, user+password authentication (Basic, Digest, NTLM, Negotiate, Kerberos4), file transfer resume, http proxy tunneling and more.	http://curl.haxx.se/	Tue 23 Apr 2013 09:34:18 AM EDT
libcurl-devel	7.27.0	Files needed for building applications with libcurl	The libcurl-devel package includes header files and libraries necessary for developing programs which use the libcurl library. It contains the API documentation of the library, too.	http://curl.haxx.se/	Tue 23 Apr 2013 09:36:03 AM EDT

Name	Version	Summary	Description	URL	Install Time
libdaemon	0.14	Library for writing UNIX daemons	libdaemon is a lightweight C library which eases the writing of UNIX daemons. It consists of the following parts: * A wrapper around fork() which does the correct daemonization procedure of a process * A wrapper around syslog() for simpler and compatible log output to Syslog or STDERR * An API for writing PID files * An API for serializing UNIX signals into a pipe for usage with select() or poll() * An API for running subprocesses with STDOUT and STDERR redirected to syslog.	http://0pointer.de/lennart/projects/libdaemon/	Wed 20 Mar 2013 09:56:51 AM EDT
libdb	5.3.21	The Berkeley DB database library for C	The Berkeley Database (Berkeley DB) is a programmatic toolkit that provides embedded database support for both traditional and client/server applications. The Berkeley DB includes B+tree, Extended Linear Hashing, Fixed and Variable-length record access methods, transactions, locking, logging, shared memory caching, and database recovery. The Berkeley DB supports C, C++, Java, and Perl APIs. It is used by many applications, including Python and Perl, so this should be installed on all systems.	http://www.oracle.com/database/berkeley-db/	Fri 05 Apr 2013 04:24:09 PM EDT

Name	Version	Summary	Description	URL	Install Time
libdb	5.3.21	The Berkeley DB database library for C	The Berkeley Database (Berkeley DB) is a programmatic toolkit that provides embedded database support for both traditional and client/server applications. The Berkeley DB includes B+tree, Extended Linear Hashing, Fixed and Variable-length record access methods, transactions, locking, logging, shared memory caching, and database recovery. The Berkeley DB supports C, C++, Java, and Perl APIs. It is used by many applications, including Python and Perl, so this should be installed on all systems.	http://www.oracle.com/database/berkeley-db/	Wed 20 Mar 2013 09:49:51 AM EDT
libdb-devel	5.3.21	C development files for the Berkeley DB library	The Berkeley Database (Berkeley DB) is a programmatic toolkit that provides embedded database support for both traditional and client/server applications. This package contains the header files, libraries, and documentation for building programs which use the Berkeley DB.	http://www.oracle.com/database/berkeley-db/	Fri 05 Apr 2013 04:34:46 PM EDT

Name	Version	Summary	Description	URL	Install Time
libdb-utils	5.3.21	Command line tools for managing Berkeley DB databases	The Berkeley Database (Berkeley DB) is a programmatic toolkit that provides embedded database support for both traditional and client/server applications. Berkeley DB includes B+tree, Extended Linear Hashing, Fixed and Variable-length record access methods, transactions, locking, logging, shared memory caching, and database recovery. DB supports C, C++, Java and Perl APIs.	http://www.oracle.com/database/berkeley-db/	Wed 20 Mar 2013 09:51:17 AM EDT
libdb4	4.8.30	The Berkeley DB database library (version 4) for C	The Berkeley Database (Berkeley DB) is a programmatic toolkit that provides embedded database support for both traditional and client/server applications. The Berkeley DB includes B+tree, Extended Linear Hashing, Fixed and Variable-length record access methods, transactions, locking, logging, shared memory caching, and database recovery. The Berkeley DB supports C, C++, Java, and Perl APIs. It is used by many applications, including Python and Perl, so this should be installed on all systems.	http://www.oracle.com/database/berkeley-db/	Wed 20 Mar 2013 09:52:28 AM EDT

Name	Version	Summary	Description	URL	Install Time
libdc1394	2.1.4	1394-based digital camera control library	Libdc1394 is a library that is intended to provide a high level programming interface for application developers who wish to control IEEE 1394 based cameras that conform to the 1394-based Digital Camera Specification.	http://sourceforge.net/projects/libdc1394/	Wed 20 Mar 2013 09:51:09 AM EDT
libdca	0.0.5	DTS Coherent Acoustics decoder library	libdca is a free library for decoding DTS Coherent Acoustics streams. It is released under the terms of the GPL license. The DTS Coherent Acoustics standard is used in a variety of applications, including DVD, DTS audio CD and radio broadcasting.	http://www.videolan.org/developers/libdca.html	Tue 26 Mar 2013 01:01:30 PM EDT
libdhash	0.4.3	Dynamic hash table	A hash table which will dynamically resize to achieve optimal storage & access time properties	http://fedorahosted.org/sssd/	Wed 20 Mar 2013 09:52:24 AM EDT
libdiscid	0.2.2	A Library for creating MusicBrainz DiscIDs	This C library libdiscid creates MusicBrainz DiscIDs from audio CDs. It reads the table of contents (TOC) of a CD and generates an identifier which can be used to lookup the CD at MusicBrainz. Additionally, it provides a submission URL for adding the DiscID to the database.	http://musicbrainz.org/doc/libdiscid	Wed 20 Mar 2013 09:56:58 AM EDT

Name	Version	Summary	Description	URL	Install Time
libdmtx	0.7.2	Library for working with Data Matrix 2D bar-codes	libdmtx is open source software for reading and writing Data Matrix 2D bar-codes on Linux, Unix, OS X, Windows, and mobile devices. At its core libdmtx is a shared library, allowing C/C++ programs to use its capabilities without restrictions or overhead. The included utility programs, dmtxread and dmtxwrite, provide the official interface to libdmtx from the command line, and also serve as a good reference for programmers who wish to write their own programs that interact with libdmtx. All of the software in the libdmtx package is distributed under the LGPLv2 and can be used freely under these terms.	http://www.libdmtx.org/	Wed 20 Mar 2013 09:52:17 AM EDT
libdmx	1.1.2	X.Org X11 DMX runtime library	The X.Org X11 DMX (Distributed Multihead X) runtime library.	http://www.x.org	Wed 20 Mar 2013 09:51:16 AM EDT
libdrm	2.4.42	Direct Rendering Manager runtime library	Direct Rendering Manager runtime library	http://dri.sourceforge.net	Fri 05 Apr 2013 04:24:08 PM EDT
libdrm	2.4.42	Direct Rendering Manager runtime library	Direct Rendering Manager runtime library	http://dri.sourceforge.net	Sun 24 Mar 2013 04:45:10 PM EDT

Name	Version	Summary	Description	URL	Install Time
libdv	1.0.0	Software decoder for DV format video	The Quasar DV codec (libdv) is a software codec for DV video, the encoding format used by most digital camcorders, typically those that support the IEEE 1394 (a.k.a. FireWire or i.Link) interface. libdv was developed according to the official standards for DV video: IEC 61834 and SMPTE 314M.	http://libdv.sourceforge.net/	Wed 20 Mar 2013 09:50:44 AM EDT
libdvbpsi	0.2.2	Library for MPEG TS and DVB PSI tables decoding and generation	libdvbpsi is a very simple and fully portable library designed for MPEG TS and DVB PSI table decoding and generation.	http://www.videolan.org/developers/libdvbpsi.html	Tue 26 Mar 2013 01:02:02 PM EDT
libdvdnv	4.2.0	A library for reading DVD video discs based on Ogle code	libdvdnv provides a simple library for reading DVD video discs. The code is based on Ogle and used in, among others, the Xine dvdnv plug-in.		Wed 20 Mar 2013 09:50:28 AM EDT
libdvread	4.2.0	A library for reading DVD video discs based on Ogle code	libdvread provides a simple foundation for reading DVD video disks. It provides the functionality that is required to access many DVDs.		Wed 20 Mar 2013 09:50:18 AM EDT
libdwarf	20130126	Library to access the DWARF Debugging file format	Library to access the DWARF debugging file format which supports source level debugging of a number of procedural languages, such as C, C++, and Fortran. Please see http://www.dwarfstd.org for DWARF specification.	http://reality.sgiweb.org/davea/dwarf.html	Sun 24 Mar 2013 04:45:50 PM EDT

Name	Version	Summary	Description	URL	Install Time
libebml	1.2.2	Extensible Binary Meta Language library	Extensible Binary Meta Language access library A library for reading and writing files with the Extensible Binary Meta Language, a binary pendant to XML.	http://www.matroska.org/	Tue 26 Mar 2013 01:02:00 PM EDT
libedit	3.0	The NetBSD Editline library	Libedit is an autotool- and libtoolized port of the NetBSD Editline library. It provides generic line editing, history, and tokenization functions, similar to those found in GNU Readline.	http://www.thrysoee.dk/editline/	Wed 20 Mar 2013 09:50:39 AM EDT
libee	0.4.1	Event expression library inspired by CEE	The core idea of libee is to provide a small but hopefully convenient API layer above the CEE standard. CEE is under heavy development and even some of its core data structures have not been fully specified. CEE is an upcoming standard used to describe network events in a number of normalized formats. It's goal is to unify many different representations that exist in the industry.	http://www.libee.org	Wed 20 Mar 2013 09:50:27 AM EDT
libeina	1.2.1	Data Type Library	Eina is a multi-platform library that provides optimized data types and useful tools for projects.	http://www.enlightenment.org/	Tue 26 Mar 2013 01:15:39 PM EDT

Name	Version	Summary	Description	URL	Install Time
libEMF	1.0.7	A library for generating Enhanced Metafiles	libEMF is a library for generating Enhanced Metafiles on systems which don't natively support the ECMA-234 Graphics Device Interface (GDI). The library is intended to be used as a driver for other graphics programs such as Grace or gnuplot. Therefore, it implements a very limited subset of the GDI.	http://libemf.sourceforge.net/	Tue 26 Mar 2013 01:26:23 PM EDT
liberation-fonts-common	1.07.2	Shared common files of Liberation font families	The Liberation Fonts are intended to be replacements for the three most commonly used fonts on Microsoft systems: Times New Roman, Arial, and Courier New. Shared common files of Liberation font families.	http://fedorahosted.org/liberation-fonts/	Wed 20 Mar 2013 09:49:30 AM EDT
liberation-mono-fonts	1.07.2	Monospace fonts to replace commonly used Microsoft Courier New	The Liberation Fonts are intended to be replacements for the three most commonly used fonts on Microsoft systems: Times New Roman, Arial, and Courier New. This is Monospace TrueType fonts that replaced commonly used Microsoft Courier \{\} New.	http://fedorahosted.org/liberation-fonts/	Wed 20 Mar 2013 09:51:33 AM EDT

Name	Version	Summary	Description	URL	Install Time
liberation-sans-fonts	1.07.2	Sans-serif fonts to replace commonly used Microsoft Arial	The Liberation Fonts are intended to be replacements for the three most commonly used fonts on Microsoft systems: Times New Roman, Arial, and Courier New. This is Sans-serif TrueType fonts that replaced commonly used Microsoft Arial.	http://fedorahosted.org/liberation-fonts/	Wed 20 Mar 2013 09:51:26 AM EDT
liberation-serif-fonts	1.07.2	Serif fonts to replace commonly used Microsoft Times New Roman	The Liberation Fonts are intended to be replacements for the three most commonly used fonts on Microsoft systems: Times New Roman, Arial, and Courier New. This is Serif TrueType fonts that replaced commonly used Microsoft Times New \{\} Roman.	http://fedorahosted.org/liberation-fonts/	Wed 20 Mar 2013 09:51:22 AM EDT
libertas-usb8388-firmware	20130418	Firmware for Marvell Libertas USB 8388 Network Adapter	Firmware for Marvell Libertas USB 8388 Network Adapter	http://www.kernel.org/	Tue 23 Apr 2013 09:36:41 AM EDT
libestr	0.1.5	String handling essentials library	This package compiles the string handling essentials library used by the Rsyslog daemon.	http://libestr.adiscon.com/	Tue 23 Apr 2013 09:35:33 AM EDT

Name	Version	Summary	Description	URL	Install Time
libevent	2.0.18	Abstract asynchronous event notification library	The libevent API provides a mechanism to execute a callback function when a specific event occurs on a file descriptor or after a timeout has been reached. libevent is meant to replace the asynchronous event loop found in event driven network servers. An application just needs to call event_dispatch() and can then add or remove events dynamically without having to change the event loop.	http://sourceforge.net/projects/levent/	Wed 20 Mar 2013 09:51:10 AM EDT
libexif	0.6.21	Library for extracting extra information from image files	Most digital cameras produce EXIF files, which are JPEG files with extra tags that contain information about the image. The EXIF library allows you to parse an EXIF file and read the data from those tags.	http://libexif.sourceforge.net/	Wed 20 Mar 2013 09:49:58 AM EDT
libexttextcat	3.3.1	Text categorization library	libexttextcat is an N-Gram-Based Text Categorization library primarily intended for language guessing.	http://www.freedesktop.org/wiki/Software/libexttextcat	Wed 20 Mar 2013 09:54:52 AM EDT
libffado	2.1.0	Free firewire audio driver library	The FFADO project aims to provide a generic, open-source solution for the support of FireWire based audio devices for the Linux platform. It is the successor of the FreeBoB project.	http://www.ffado.org/	Wed 20 Mar 2013 09:54:32 AM EDT

Name	Version	Summary	Description	URL	Install Time
libffi	3.0.10	A portable foreign function interface library	<p>Compilers for high level languages generate code that follow certain conventions. These conventions are necessary, in part, for separate compilation to work. One such convention is the "calling convention". The calling convention is a set of assumptions made by the compiler about where function arguments will be found on entry to a function. A calling convention also specifies where the return value for a function is found. Some programs may not know at the time of compilation what arguments are to be passed to a function. For instance, an interpreter may be told at run-time about the number and types of arguments used to call a given function. 'Libffi' can be used in such programs to provide a bridge from the interpreter program to compiled code.</p> <p>The 'libffi' library provides a portable, high level programming interface to various calling conventions. This allows a programmer to call any function specified by a call interface description at run time. FFI stands for Foreign Function Interface. A foreign function interface is the popular name for the interface that allows code written in one language to call code written in another language. The 'libffi' library really only provides the lowest, machine dependent layer of a fully featured foreign</p>	http://sourceware.org/libffi	Fri 05 Apr 2013 04:24:02 PM EDT

libfontenc	1.1.1	X.Org X11 libfontenc runtime library	X.Org X11 libfontenc runtime library	http://www.x.org	Wed 20 Mar 2013 09:50:38 AM EDT
libfprint	0.5.0	Toolkit for fingerprint scanner	libfprint offers support for consumer fingerprint reader devices.	http://www.freedesktop.org/wiki/Software/fprint/libfprint	Sun 24 Mar 2013 04:49:05 PM EDT
libgcc	4.7.2	GCC version 4.7 shared support library	This package contains GCC shared support library which is needed e.g. for exception handling support.	http://gcc.gnu.org	Fri 05 Apr 2013 04:23:54 PM EDT
libgcc	4.7.2	GCC version 4.7 shared support library	This package contains GCC shared support library which is needed e.g. for exception handling support.	http://gcc.gnu.org	Wed 20 Mar 2013 09:49:29 AM EDT
libgcj	4.7.2	Java runtime library for gcc	The Java(tm) runtime library. You will need this package to run your Java programs compiled using the Java compiler from GNU Compiler Collection (gcj).	http://gcc.gnu.org	Wed 20 Mar 2013 09:53:09 AM EDT
libgcrypt	1.5.0	A general-purpose cryptography library	Libgcrypt is a general purpose crypto library based on the code used in GNU Privacy Guard. This is a development version.	http://www.gnupg.org/	Fri 05 Apr 2013 04:24:02 PM EDT
libgcrypt	1.5.0	A general-purpose cryptography library	Libgcrypt is a general purpose crypto library based on the code used in GNU Privacy Guard. This is a development version.	http://www.gnupg.org/	Sun 24 Mar 2013 04:44:42 PM EDT

Name	Version	Summary	Description	URL	Install Time
libgcrypt-devel	1.5.0	Development files for the libgcrypt package	Libgcrypt is a general purpose crypto library based on the code used in GNU Privacy Guard. This package contains files needed to develop applications using libgcrypt.	http://www.gnupg.org/	Fri 05 Apr 2013 04:34:35 PM EDT
libgdiplus	2.10	An Open Source implementation of the GDI+ API	An Open Source implementation of the GDI+ API, it is part of the Mono Project	http://www.mono-project.com/Main_Page	Wed 20 Mar 2013 09:53:48 AM EDT

Name	Version	Summary	Description	URL	Install Time
libgee06	0.6.6.1	GObject collection library	<p>libgee is a collection library providing GObject-based interfaces and classes for commonly used data structures. libgee provides the following interfaces:</p> <p>* Iterable * Collection * List * Set * MultiSet * Queue * Deque * Iterator * Map * MultiMap</p> <p>The ArrayList, HashSet, HashMap, HashMultiSet, HashMultiMap, LinkedList, PriorityQueue, TreeSet, TreeMap, TreeMultiSet, and TreeMultiMap classes provide a reasonable sample implementation of those interfaces. In addition, a set of abstract classes are provided to ease the implementation of new collections. Around that, the API provide means to retrieve read-only views, efficient sort algorithms, simple, bi-directional or index-based mutable iterators depending on the collection type. libgee is written in Vala and can be used like any GObject-based C library.</p>	http://live.gnome.org/Libgee	Wed 20 Mar 2013 09:51:13 AM EDT
libgexiv2	0.5.0	Gexiv2 is a GObject-based wrapper around the Exiv2 library	libgexiv2 is a GObject-based wrapper around the Exiv2 library. It makes the basic features of Exiv2 available to GNOME applications.	http://trac.yorba.org/wiki/gexiv2	Tue 23 Apr 2013 09:36:41 AM EDT

Name	Version	Summary	Description	URL	Install Time
libgfortran	4.7.2	Fortran runtime	This package contains Fortran shared library which is needed to run Fortran dynamically linked programs.	http://gcc.gnu.org	Wed 20 Mar 2013 09:50:09 AM EDT
libglade2	2.6.4	The libglade library for loading user interfaces	Libglade is a small library that allows a program to load its user interface from an XML description at runtime. Libglade uses the XML file format used by the GLADE user interface builder GLADE, so libglade acts as an alternative to GLADE's code generation approach. Libglade also provides a simple interface for connecting handlers to the various signals in the interface (on platforms where the gmodule library works correctly, it is possible to connect all the handlers with a single function call). Once the interface has been instantiated, libglade gives no overhead, so other than the short initial interface loading time, there is no performance tradeoff.	http://www.gnome.org	Wed 20 Mar 2013 09:53:02 AM EDT

Name	Version	Summary	Description	URL	Install Time
libgle	3.1.0	A Tubing and Extrusion Library for OpenGL	The GLE Tubing and Extrusion Library consists of a number of "C" language subroutines for drawing tubing and extrusions. It is a very fast implementation of these shapes, outperforming all other implementations, most by orders of magnitude. It uses the OpenGL programming API to perform the actual drawing of the tubing and extrusions.	http://www.linas.org/gle/	Wed 20 Mar 2013 09:52:24 AM EDT
libGLEW	1.7.0	libGLEW	libGLEW	http://glew.sourceforge.net	Wed 20 Mar 2013 09:52:55 AM EDT
libgnome	2.32.1	GNOME base library	GNOME (GNU Network Object Model Environment) is a user-friendly set of GUI applications and desktop tools to be used in conjunction with a window manager for the X Window System. The libgnome package includes non-GUI-related libraries that are needed to run GNOME. The libgnomeui package contains X11-dependent GNOME library features.	http://www.gnome.org	Wed 20 Mar 2013 09:54:38 AM EDT
libgnome-keyring	3.6.0	Framework for managing passwords and other secrets	gnome-keyring is a program that keep password and other secrets for users. The library libgnome-keyring is used by applications to integrate with the gnome-keyring system.	http://live.gnome.org/GnomeKeyring	Wed 20 Mar 2013 09:49:59 AM EDT

Name	Version	Summary	Description	URL	Install Time
libgnomecanvas	2.30.3	GnomeCanvas widget	The canvas widget allows you to create custom displays using stock items such as circles, lines, text, and so on. It was originally a port of the Tk canvas widget but has evolved quite a bit over time.	http://www.gnome.org/	Wed 20 Mar 2013 09:53:04 AM EDT
libgnomeui	2.24.5	GNOME base GUI library	GNOME (GNU Network Object Model Environment) is a user-friendly set of GUI applications and desktop tools to be used in conjunction with a window manager for the X Window System. The libgnomeui package includes GUI-related libraries that are needed to run GNOME. (The libgnome package includes the library features that don't use the X Window System.)	http://www.gnome.org	Wed 20 Mar 2013 09:54:51 AM EDT
libgomp	4.7.2	GCC OpenMP v3.0 shared support library	This package contains GCC shared support library which is needed for OpenMP v3.0 support.	http://gcc.gnu.org	Wed 20 Mar 2013 09:49:51 AM EDT
libgpg-error	1.10	Library for error values used by GnuPG components	This is a library that defines common error values for all GnuPG components. Among these are GPG, GPGSM, GPGME, GPG-Agent, libgcrypt, pinentry, SmartCard Daemon and possibly more in the future.	ftp://ftp.gnupg.org/gcrypt/libgpg-error/	Fri 05 Apr 2013 04:24:02 PM EDT

Name	Version	Summary	Description	URL	Install Time
libgpg-error	1.10	Library for error values used by GnuPG components	This is a library that defines common error values for all GnuPG components. Among these are GPG, GPGSM, GPGME, GPG-Agent, libgcrypt, pinentry, SmartCard Daemon and possibly more in the future.	ftp://ftp.gnupg.org/gcrypt/libgpg-error/	Wed 20 Mar 2013 09:49:49 AM EDT
libgpg-error-devel	1.10	Development files for the libgpg-error package	This is a library that defines common error values for all GnuPG components. Among these are GPG, GPGSM, GPGME, GPG-Agent, libgcrypt, pinentry, SmartCard Daemon and possibly more in the future. This package contains files necessary to develop applications using libgpg-error.	ftp://ftp.gnupg.org/gcrypt/libgpg-error/	Fri 05 Apr 2013 04:34:35 PM EDT
libgphoto2	2.5.1.1	Library for accessing digital cameras	libgphoto2 is a library that can be used by applications to access various digital cameras. libgphoto2 itself is not a GUI application, opposed to gphoto. There are GUI frontends for the gphoto2 library, however, such as gtkam for example.	http://www.gphoto.org/	Sun 24 Mar 2013 04:44:46 PM EDT
libgpod	0.8.2	Library to access the contents of an iPod	Libgpod is a library to access the contents of an iPod. It supports playlists, smart playlists, playcounts, ratings, podcasts, album artwork, photos, etc.	http://www.gtkpod.org/libgpod.html	Wed 20 Mar 2013 09:56:46 AM EDT

Name	Version	Summary	Description	URL	Install Time
libgsf	1.14.24	GNOME Structured File library	A library for reading and writing structured files (e.g. MS OLE and Zip)	http://www.gnome.org/projects/libgsf/	Fri 05 Apr 2013 04:36:36 PM EDT
libgssglue	0.4	Generic Security Services Application Programming Interface Library	This library exports a gssapi interface, but doesn't implement any gssapi mechanisms itself; instead it calls gssapi routines in other libraries, depending on the mechanism.	http://www.citi.umich.edu/projects/nfsv4/linux/	Wed 20 Mar 2013 09:50:33 AM EDT
libgudev1	197	Libraries for adding libudev support to applications that use glib	This package contains the libraries that make it easier to use libudev functionality from applications that use glib.	http://www.freedesktop.org/wiki/Software/systemd	Sun 24 Mar 2013 04:45:10 PM EDT
libguess	1.1	High-speed character set detection library	libguess employs discrete-finite automata to deduce the character set of the input buffer. The advantage of this is that all character sets can be checked in parallel, and quickly. Right now, libguess passes a byte to each DFA on the same pass, meaning that the winning character set can be deduced as efficiently as possible. libguess is fully reentrant, using only local stack memory for DFA operations.	http://www.atheme.org/project/libguess	Tue 26 Mar 2013 01:15:41 PM EDT
libgusb	0.1.6	GLib wrapper around libusb1	GUsb is a GObject wrapper for libusb1 that makes it easy to do asynchronous control, bulk and interrupt transfers with proper cancellation and integration into a mainloop.	https://gitorious.org/gusb/	Tue 23 Apr 2013 09:36:43 AM EDT

Name	Version	Summary	Description	URL	Install Time
libgxps	0.2.2	GObject based library for handling and rendering XPS documents	libgxps is a GObject based library for handling and rendering XPS documents.	http://live.gnome.org/libgxps	Fri 05 Apr 2013 04:36:20 PM EDT
libhangul	0.1.0	Hangul input library	libhangul provides common features for Hangul input method programs.	http://kldp.net/projects/hangul/	Wed 20 Mar 2013 09:52:47 AM EDT
libical	0.48	Reference implementation of the iCalendar data type and serialization format	Reference implementation of the iCalendar data type and serialization format used in dozens of calendaring and scheduling products.	http://freeassociation.sourceforge.net/	Wed 20 Mar 2013 09:52:27 AM EDT
libICE	1.0.8	X.Org X11 ICE runtime library	The X.Org X11 ICE (Inter-Client Exchange) runtime library.	http://www.x.org	Fri 05 Apr 2013 04:24:02 PM EDT
libICE	1.0.8	X.Org X11 ICE runtime library	The X.Org X11 ICE (Inter-Client Exchange) runtime library.	http://www.x.org	Wed 20 Mar 2013 09:49:46 AM EDT
libICE-devel	1.0.8	X.Org X11 ICE development package	The X.Org X11 ICE (Inter-Client Exchange) development package.	http://www.x.org	Fri 05 Apr 2013 04:45:49 PM EDT

Name	Version	Summary	Description	URL	Install Time
libicu	49.1.1	International Components for Unicode - libraries	The International Components for Unicode (ICU) libraries provide robust and full-featured Unicode services on a wide variety of platforms. ICU supports the most current version of the Unicode standard, and they provide support for supplementary Unicode characters (needed for GB 18030 repertoire support). As computing environments become more heterogeneous, software portability becomes more important. ICU lets you produce the same results across all the various platforms you support, without sacrificing performance. It offers great flexibility to extend and customize the supplied services.	http://www.icu-project.org/	Fri 05 Apr 2013 04:24:07 PM EDT

libidn	1.26	Internationalized Domain Name support library	GNU Libidn is an implementation of the Stringprep, Punycode and IDNA specifications defined by the IETF Internationalized Domain Names (IDN) working group, used for internationalized domain names.	http://www.gnu.org/software/libidn/	Thu 02 May 2013 12:32:45 AM EDT
libidn	1.26	Internationalized Domain Name support library	GNU Libidn is an implementation of the Stringprep, Punycode and IDNA specifications defined by the IETF Internationalized Domain Names (IDN) working group, used for internationalized domain names.	http://www.gnu.org/software/libidn/	Sun 24 Mar 2013 04:44:47 PM EDT
libiec61883	1.2.0	Streaming library for IEEE1394	The libiec61883 library provides an higher level API for streaming DV, MPEG-2 and audio over IEEE1394. Based on the libraw1394 isochronous functionality, this library acts as a filter that accepts DV-frames, MPEG-2 frames or audio samples from the application and breaks these down to isochronous packets, which are transmitted using libraw1394.	http://ieee1394.wiki.kernel.org/index.php/Libraries\#libiec61883	Wed 20 Mar 2013 09:50:19 AM EDT
libieee1284	0.2.11	A library for interfacing IEEE 1284-compatible devices	The libieee1284 library is for communicating with parallel port devices.	http://cyberelk.net/tim/libieee1284/	Wed 20 Mar 2013 09:50:24 AM EDT

Name	Version	Summary	Description	URL	Install Time
libimobiledevice	1.1.4	Library for connecting to mobile devices	libimobiledevice is a library for connecting to mobile devices including phones and music players	http://www.libimobiledevice.org/	Wed 20 Mar 2013 09:52:57 AM EDT
libindi	0.9	Instrument Neutral Distributed Interface	INDI is a distributed control protocol designed to operate astronomical instrumentation. INDI is small, flexible, easy to parse, and scalable. It supports common DCS functions such as remote control, data acquisition, monitoring, and a lot more.	http://www.indilib.org	Wed 20 Mar 2013 09:52:26 AM EDT
libini_config	0.7.0	INI file parser for C	Library to process config files in INI format into a libcollection data structure	http://fedorahosted.org/sssd/	Wed 20 Mar 2013 09:56:54 AM EDT
libiodbc	3.52.7	iODBC Driver Manager	The iODBC Driver Manager is a free implementation of the SAG CLI and ODBC compliant driver manager which allows developers to write ODBC compliant applications that can connect to various databases using appropriate backend drivers.	http://www.iodbc.org/	Wed 20 Mar 2013 09:50:24 AM EDT
libipa_hbac	1.9.4	FreeIPA HBAC Evaluator library	Utility library to validate FreeIPA HBAC rules for authorization requests	http://fedorahosted.org/sssd/	Tue 23 Apr 2013 09:35:30 AM EDT

Name	Version	Summary	Description	URL	Install Time
libiptcdata	1.0.4	IPTC tag library	libiptcdata is a library for parsing, editing, and saving IPTC data stored inside images. IPTC is a standard for encoding metadata such as captions, titles, locations, etc. in the headers of an image file. libiptcdata also includes a command-line utility for modifying the metadata.	http://libiptcdata.sourceforge.net/	Wed 20 Mar 2013 09:50:41 AM EDT
libjpeg-turbo	1.2.90	A MMX/SSE2 accelerated library for manipulating JPEG image files	The libjpeg-turbo package contains a library of functions for manipulating JPEG images.	http://sourceforge.net/projects/libjpeg-turbo	Fri 05 Apr 2013 04:24:02 PM EDT
libjpeg-turbo	1.2.90	A MMX/SSE2 accelerated library for manipulating JPEG image files	The libjpeg-turbo package contains a library of functions for manipulating JPEG images.	http://sourceforge.net/projects/libjpeg-turbo	Sun 24 Mar 2013 04:44:39 PM EDT
libjpeg-turbo-devel	1.2.90	Headers for the libjpeg-turbo library	This package contains header files necessary for developing programs which will manipulate JPEG files using the libjpeg-turbo library.	http://sourceforge.net/projects/libjpeg-turbo	Fri 05 Apr 2013 04:49:33 PM EDT
libjpeg-turbo-devel	1.2.90	Headers for the libjpeg-turbo library	This package contains header files necessary for developing programs which will manipulate JPEG files using the libjpeg-turbo library.	http://sourceforge.net/projects/libjpeg-turbo	Fri 05 Apr 2013 04:45:52 PM EDT

Name	Version	Summary	Description	URL	Install Time
libkate	0.3.8	Libraries to handle the Kate bitstream format	This is libkate, the reference implementation of a codec for the Kate bitstream format. Kate is a karaoke and text codec meant for encapsulation in an Ogg container. It can carry text, images, and animate them. Kate is meant to be used for karaoke alongside audio/video streams (typically Vorbis and Theora), movie subtitles, song lyrics, and anything that needs text data at arbitrary time intervals.	http://code.google.com/p/libkate/	Tue 26 Mar 2013 01:02:00 PM EDT
libkcddb	4.10.2	CDDb retrieval library	CDDb retrieval library.	http://www.kde.org/	Tue 23 Apr 2013 09:34:56 AM EDT
libkcompactdisc	4.10.2	A KDE compact disc library	A KDE compact disc library.	http://www.kde.org/	Tue 23 Apr 2013 09:34:56 AM EDT
libkdcraw	4.10.2	A C++ interface around LibRaw library	Libkdcraw is a C++ interface around LibRaw library used to decode RAW picture files. More information about LibRaw can be found at http://www.libraw.org .	https://projects.kde.org/projects/kde/kdegraphics/libs/libkdcraw	Tue 23 Apr 2013 09:35:06 AM EDT
libkdeedu	4.10.2	Libraries used by KDE Education applications	Libraries used by KDE Education applications.	https://projects.kde.org/projects/kde/kdeedu/libkdeedu	Tue 23 Apr 2013 09:34:52 AM EDT
libkdegames	4.10.2	Common code and data for many KDE games	Common code and data for many KDE games.	https://projects.kde.org/projects/kde/kdegames/libkdegames	Tue 23 Apr 2013 09:34:52 AM EDT

Name	Version	Summary	Description	URL	Install Time
libkexiv2	4.10.2	An Exiv2 wrapper library	Libkexiv2 is a wrapper around Exiv2 library to manipulate pictures metadata as EXIF/IPTC and XMP.	https://projects.kde.org/projects/kde/kdegraphics/libs/libkexiv2	Tue 23 Apr 2013 09:34:55 AM EDT
libkface	3.1.0	A C++ wrapper around LibFace library to perform face recognition over pictures.	A C++ wrapper around LibFace library to perform face recognition over pictures..	http://www.digikam.org/	Fri 05 Apr 2013 04:36:18 PM EDT
libkgapi	0.4.4	Library to access to Google services	Library to access to Google services, this package is needed by kdepim-runtime to build akonadi-google resources.	https://projects.kde.org/projects/extragear/libs/libkgapi	Sun 24 Mar 2013 04:46:32 PM EDT
libkgeomap	3.1.0	A world map library	A world map library.	http://www.digikam.org/	Fri 05 Apr 2013 04:36:17 PM EDT
libkipi	4.10.2	Common plugin infrastructure for KDE image applications	Kipi (KDE Image Plugin Interface) is an effort to develop a common plugin structure (for Digikam, Gwenview, etc.). Its aim is to share image plugins among graphic applications.	https://projects.kde.org/projects/kde/kdegraphics/libs/libkexiv2	Tue 23 Apr 2013 09:34:55 AM EDT
libkmahjongg	4.10.2	Common code, backgrounds and tile sets for games using Mahjongg tiles	Common code, backgrounds and tile sets for games using Mahjongg tiles.	https://projects.kde.org/projects/kde/kdegames/libkmahjongg	Tue 23 Apr 2013 09:34:54 AM EDT
libkolab	0.4.1	Kolab Object Handling Library	The libkolab library is an advanced library to handle Kolab objects.	http://git.kolab.org/libkolab	Sun 24 Mar 2013 04:46:31 PM EDT

Name	Version	Summary	Description	URL	Install Time
libkolabxml	0.8.1	Kolab XML format collection parser library	The libkolabxml parsing library interprets Kolab XML formats (xCal, xCard) with bindings for Python, PHP and other languages. The language bindings are available through sub-packages.	http://www.kolab.org	Wed 20 Mar 2013 09:51:58 AM EDT
libksane	4.10.2	SANE Library interface for KDE	SANE Library interface for KDE.	https://projects.kde.org/projects/kde/kdegraphics/libs/libksane	Tue 23 Apr 2013 09:36:02 AM EDT
libktorrent	1.3.1	Library providing torrent downloading code	Library providing torrent downloading code.	http://ktorrent.org/	Sun 24 Mar 2013 04:46:27 PM EDT
libkvkontakte	3.1.0	Library implementing VKontakte.ru API	KDE C++ library for asynchronous interaction with vkontakte.ru social network via its open API.	http://www.digikam.org/	Fri 05 Apr 2013 04:36:35 PM EDT
libkworkspace	4.10.2	Runtime libkworkspace library	Runtime libkworkspace library.	https://projects.kde.org/projects/kde/kde-workspace	Tue 23 Apr 2013 09:34:53 AM EDT
liblastfm	1.0.3	Libraries to integrate Last.fm services	Liblastfm is a collection of libraries to help you integrate Last.fm services into your rich desktop software.	https://github.com/lastfm/liblastfm	Sun 24 Mar 2013 04:46:31 PM EDT
libldb	1.1.15	A schema-less, ldap like, API and database	An extensible library that implements an LDAP like API to access remote LDAP servers, or use local tdb databases.	http://ldb.samba.org/	Sun 24 Mar 2013 04:44:49 PM EDT

Name	Version	Summary	Description	URL	Install Time
liblockfile	1.08	This implements a number of functions found in -lmail on SysV systems	This library implements a number of functions found in -lmail on SysV systems. These functions are designed to lock the standard mailboxes in /var/mail (or wherever the system puts them). In additions, this library adds a number of functions to create, manage and remove generic lockfiles.	http://packages.qa.debian.org/libl/liblockfile.html	Wed 20 Mar 2013 10:25:15 AM EDT
liblognorm	0.3.5	Fast samples-based log normalization library	Briefly described, liblognorm is a tool to normalize log data. People who need to take a look at logs often have a common problem. Logs from different machines (from different vendors) usually have different formats for their logs. Even if it is the same type of log (e.g. from firewalls), the log entries are so different, that it is pretty hard to read these. This is where liblognorm comes into the game. With this tool you can normalize all your logs. All you need is liblognorm and its dependencies and a sample database that fits the logs you want to normalize.	http://www.liblognorm.com	Sun 24 Mar 2013 04:44:54 PM EDT

Name	Version	Summary	Description	URL	Install Time
liblqr-1	0.4.1	LiquidRescale library	The LiquidRescale (lqr) library provides a C/C++ API for performing non-uniform resizing of images by the seam-carving technique.	http://liquidrescale.wikidot.com/	Wed 20 Mar 2013 09:51:13 AM EDT
libmad	0.15.1b	MPEG audio decoder library	MAD is a high-quality MPEG audio decoder. It currently supports MPEG-1 and the MPEG-2 extension to Lower Sampling Frequencies, as well as the so-called MPEG 2.5 format. All three audio layers (Layer I, Layer II, and Layer III a.k.a. MP3) are fully implemented.	http://www.underbit.com/products/mad/	Tue 26 Mar 2013 01:01:29 PM EDT
libmatroska	1.3.0	Open audio/video container format library	Matroska is an extensible open standard Audio/Video container. It aims to become THE standard of multimedia container formats. Matroska is usually found as .mkv files (matroska video) and .mka files (matroska audio).	http://www.matroska.org/	Tue 26 Mar 2013 01:02:00 PM EDT
libmcpp	2.7.2	Alternative C/C++ pre-processor (library build)	This package provides a library build of mcpp.	http://mcpp.sourceforge.net/	Wed 20 Mar 2013 09:52:27 AM EDT
libmediawiki	3.1.0	a MediaWiki C++ interface	a MediaWiki C++ interface.	http://www.digikam.org/	Fri 05 Apr 2013 04:36:36 PM EDT

Name	Version	Summary	Description	URL	Install Time
libmicrohttpd	0.9.22	Lightweight library for embedding a webserver in applications	<p>GNU libmicrohttpd is a small C library that is supposed to make it easy to run an HTTP server as part of another application. Key features that distinguish libmicrohttpd from other projects are:</p> <ul style="list-style-type: none"> * C library: fast and small * API is simple, expressive and fully reentrant * Implementation is http 1.1 compliant * HTTP server can listen on multiple ports * Support for IPv6 * Support for incremental processing of POST data * Creates binary of only 25k (for now) * Three different threading models 	http://www.gnu.org/software/libmicrohttpd/	Wed 20 Mar 2013 09:51:06 AM EDT
libmimic	1.0.4	Encoding/decoding library for Mimic V2.x	libmimic is an open source video encoding/decoding library for Mimic V2.x- encoded content (fourCC: ML20), which is the encoding used by MSN Messenger for webcam conversations.	http://farsight.sourceforge.net/	Tue 26 Mar 2013 01:01:29 PM EDT

Name	Version	Summary	Description	URL	Install Time
libmms	0.6.2	Library for Microsoft Media Server (MMS) streaming protocol	MMS is a proprietary streaming protocol used in Microsoft server products, commonly used to stream WMV data. You can encounter mms:// style URLs all over the net, especially on news sites and other content-serving sites. Libmms allows you to download content from such sites, making it easy to add MMS support to your media applications.	http://www.sf.net/projects/libmms	Tue 26 Mar 2013 01:01:29 PM EDT
libmng	1.0.10	Library for Multiple-image Network Graphics support	LibMNG is a library for accessing graphics in MNG (Multi-image Network Graphics) and JNG (JPEG Network Graphics) formats. MNG graphics are basically animated PNGs. JNG graphics are basically JPEG streams integrated into a PNG chunk.	http://www.libmng.com/	Wed 20 Mar 2013 09:50:20 AM EDT
libmnl	1.0.3	A minimalistic Netlink library	libmnl is a minimalistic user-space library oriented to Netlink developers. There are a lot of common tasks in parsing, validating, constructing of both the Netlink header and TLVs that are repetitive and easy to get wrong. This library aims to provide simple helpers that allows you to re-use code and to avoid re-inventing the wheel.	http://netfilter.org/projects/libmnl	Wed 20 Mar 2013 09:56:53 AM EDT

Name	Version	Summary	Description	URL	Install Time
libmodman	2.0.1	A simple library for managing C++ modules (plug-ins)	libmodman is a simple library for managing C++ modules (plug-ins).	http://code.google.com/p/libmodman/	Wed 20 Mar 2013 09:52:12 AM EDT
libmodplug	0.8.8.4	Modplug mod music file format library	Modplug mod music file format library.	http://modplug-xmms.sourceforge.net/	Tue 26 Mar 2013 01:02:02 PM EDT
libmount	2.22.2	Device mounting library	This is the device mounting library, part of util-linux.	http://en.wikipedia.org/wiki/Util-linux	Sun 24 Mar 2013 04:44:51 PM EDT
libmowgli	1.0.0	Library of many utility functions and classes	libmowgli is a development framework for C (like GLib), which provides high performance and highly flexible algorithms. It can be used as a suppliment to GLib (to add additional functions (dictionaries, hashes), or replace some of the slow GLib list manipulation functions), or stand alone. It also provides a powerful hook system and convenient logging for your code, as well as a high performance block allocator.	http://www.atheme.org/project/mowgli	Tue 26 Mar 2013 01:15:41 PM EDT
libmpc	0.9	C library for multiple precision complex arithmetic	MPC is a C library for the arithmetic of complex numbers with arbitrarily high precision and correct rounding of the result. It is built upon and follows the same principles as Mpfr.	http://www.multiprecision.org/	Wed 20 Mar 2013 09:50:10 AM EDT

Name	Version	Summary	Description	URL	Install Time
libmpcdec	1.2.6	Musepack audio decoding library	Musepack is an audio compression format with a strong emphasis on high quality. It's not lossless, but it is designed for transparency, so that you won't be able to hear differences between the original wave file and the much smaller MPC file. It is based on the MPEG-1 Layer-2 / MP2 algorithms, but has rapidly developed and vastly improved and is now at an advanced stage in which it contains heavily optimized and patentless code.	http://www.musepack.net/	Wed 20 Mar 2013 09:50:41 AM EDT
libmpeg2	0.5.1	MPEG-2 decoder libraries	libmpeg2 is a free library for decoding mpeg-2 and mpeg-1 video streams. It is released under the terms of the GPL license.	http://libmpeg2.sourceforge.net/	Tue 26 Mar 2013 01:01:28 PM EDT
libmpg123	1.14.4	MPEG audio Layer 1, 2 and Layer3 library	MPEG audio Layer 1, 2 and Layer3 library.	http://mpg123.org/	Tue 26 Mar 2013 01:01:29 PM EDT
libmtp	1.1.6	A software library for MTP media players	This package provides a software library for communicating with MTP (Media Transfer Protocol) media players, typically audio players, video players etc.	http://libmtp.sourceforge.net/	Fri 05 Apr 2013 04:37:04 PM EDT

Name	Version	Summary	Description	URL	Install Time
libmusicbrainz	2.1.5	Library for accessing MusicBrainz servers	The MusicBrainz client library allows applications to make metadata lookup to a MusicBrainz server, generate signatures from WAV data and create CD Index Disk ids from audio CD roms.	http://www.musicbrainz.org/	Wed 20 Mar 2013 09:51:18 AM EDT
libmusicbrainz	3.0.3	Library for accessing MusicBrainz servers	The MusicBrainz client library allows applications to make metadata lookup to a MusicBrainz server, generate signatures from WAV data and create CD Index Disk ids from audio CD roms.	http://www.musicbrainz.org/	Wed 20 Mar 2013 09:56:58 AM EDT
libmusicbrainz	5.0.1	Library for accessing MusicBrainz servers	The MusicBrainz client library allows applications to make metadata lookup to a MusicBrainz server, generate signatures from WAV data and create CD Index Disk ids from audio CD roms.	http://www.musicbrainz.org/	Mon 08 Apr 2013 10:15:41 AM EDT

Name	Version	Summary	Description	URL	Install Time
libmygpo-qt	1.0.6	Qt Library that wraps the gpodder.net Web API	libmygpo-qt is a Qt Library that wraps the gpodder.net Web API, http://wiki.gpodder.org/wiki/Web_Services/API_2	http://wiki.gpodder.org/wiki/Libmygpo-qt	Wed 20 Mar 2013 09:50:52 AM EDT
libnetfilter_conntrack	1.0.3	Netfilter conntrack userspace library	libnetfilter_conntrack is a userspace library providing a programming interface (API) to the in-kernel connection tracking state table.	http://netfilter.org	Fri 05 Apr 2013 04:37:04 PM EDT
libnfnetlink	1.0.1	Netfilter netlink userspace library	libnfnetlink is a userspace library that provides some low-level nfnetlink handling functions. It is used as a foundation for other, netfilter subsystem specific libraries such as libnfnetlink_conntrack, libnfnetlink_log and libnfnetlink_queue.	http://netfilter.org	Wed 20 Mar 2013 09:52:25 AM EDT
libnfsidmap	0.25	NFSv4 User and Group ID Mapping Library	Library that handles mapping between names and ids for NFSv4.	http://www.citi.umich.edu/projects/nfsv4/linux/	Wed 20 Mar 2013 09:52:06 AM EDT

Name	Version	Summary	Description	URL	Install Time
libnl	1.1	Convenience library for kernel netlink sockets	This package contains a convenience library to simplify using the Linux kernel's netlink sockets interface for network manipulation	http://www.infradead.org/~tgr/libnl/	Wed 20 Mar 2013 09:50:16 AM EDT
libnl3	3.2.21	Convenience library for kernel netlink sockets	This package contains a convenience library to simplify using the Linux kernel's netlink sockets interface for network manipulation	http://www.infradead.org/~tgr/libnl/	Sun 24 Mar 2013 04:45:06 PM EDT
libnotify	0.7.5	Desktop notification library	libnotify is a library for sending desktop notifications to a notification daemon, as defined in the freedesktop.org Desktop Notifications spec. These notifications can be used to inform the user about an event or display some form of information without getting in the user's way.	http://library.gnome.org/devel/notification-spec/	Wed 20 Mar 2013 09:55:43 AM EDT
libnova	0.13.0	Libnova is a general purpose astronomy & astrodynamics library	Libnova is a general purpose, double precision, celestial mechanics, astrometry and astrodynamics library	http://sourceforge.net/projects/libnova/	Wed 20 Mar 2013 09:52:26 AM EDT
libofa	0.9.3	Open Fingerprint Architecture library	Currently, MusicDNS and the Open Fingerprint Architecture are being used to: * identify duplicate tracks, even when the metadata is different, MusicIP identifies the master recording. * fix metadata * find out more about tracks by connecting to MusicBrainz	http://code.google.com/p/musicip-libofa/	Wed 20 Mar 2013 09:51:06 AM EDT

Name	Version	Summary	Description	URL	Install Time
libogg	1.3.0	The Ogg bitstream file format library	Libogg is a library for manipulating Ogg bitstream file formats. Libogg supports both making Ogg bitstreams and getting packets from Ogg bitstreams.	http://www.xiph.org/	Wed 20 Mar 2013 09:49:51 AM EDT
libogg-devel	1.3.0	Files needed for development using libogg	Libogg is a library used for manipulating Ogg bitstreams. The libogg-devel package contains the header files and documentation needed for development using libogg.	http://www.xiph.org/	Fri 05 Apr 2013 04:34:32 PM EDT
libopenraw	0.0.9	Decode camera RAW files	libopenraw is an ongoing project to provide a free software implementation for camera RAW files decoding. One of the main reason is that dcraw is not suited for easy integration into applications, and there is a need for an easy to use API to build free software digital image processing application.	http://libopenraw.freedesktop.org/wiki	Wed 20 Mar 2013 09:51:20 AM EDT
libosinfo	0.2.6	A library for managing OS information for virtualization	libosinfo is a library that allows virtualization provisioning tools to determine the optimal device settings for a hypervisor/operating system combination.	http://libosinfo.org/	Tue 23 Apr 2013 09:36:40 AM EDT

Name	Version	Summary	Description	URL	Install Time
libotf	0.9.12	A Library for handling OpenType Font	The library "libotf" provides the following facilities. Read Open Type Layout Tables from OTF file. Currently these tables are supported; head, name, cmap, GDEF, GSUB, and GPOS. Convert a Unicode character sequence to a glyph code sequence by using the above tables. The combination of libotf and the FreeType library (Ver.2) realizes CTL (complex text layout) by OpenType fonts. This library is currently used by the m17n library. It seems that the project Free Type Layout provides the similar (or better) facility as this library, but currently they have not yet released their library. So, we have developed this one.	http://www.m17n.org/libotf/	Wed 20 Mar 2013 10:25:15 AM EDT
libpano13	2.9.18	Library for manipulating panoramic images	Helmut Dersch's Panorama Tools library. Provides very high quality manipulation, correction and stitching of panoramic photographs. Due to patent restrictions, this library has a maximum fisheye field-of-view restriction of 179 degrees to prevent stitching of hemispherical photographs.	http://panotools.sourceforge.net/	Wed 20 Mar 2013 09:52:23 AM EDT
libpath_utils	0.2.1	Filesystem Path Utilities	Utility functions to manipulate filesystem pathnames	http://fedorahosted.org/sssd/	Wed 20 Mar 2013 09:56:54 AM EDT

Name	Version	Summary	Description	URL	Install Time
libpcap	1.3.0	A system-independent interface for user-level packet capture	Libpcap provides a portable framework for low-level network monitoring. Libpcap can provide network statistics collection, security monitoring and network debugging. Since almost every system vendor provides a different interface for packet capture, the libpcap authors created this system-independent API to ease in porting and to alleviate the need for several system-dependent packet capture modules in each application. Install libpcap if you need to do low-level network traffic monitoring on your network.	http://www.tcpdump.org	Wed 20 Mar 2013 09:50:16 AM EDT
libpciaccess	0.13.1	PCI access library	libpciaccess is a library for portable PCI access routines across multiple operating systems.	http://gitweb.freedesktop.org/?p=xorg/lib/libpciaccess.git	Fri 05 Apr 2013 04:24:08 PM EDT
libpciaccess	0.13.1	PCI access library	libpciaccess is a library for portable PCI access routines across multiple operating systems.	http://gitweb.freedesktop.org/?p=xorg/lib/libpciaccess.git	Wed 20 Mar 2013 09:50:08 AM EDT
libpeas	1.6.2	Plug-ins implementation convenience library	libpeas is a convenience library making adding plug-ins support to GTK+ and glib-based applications.	http://ftp.acc.umu.se/pub/GNOME/sources/libpeas/	Wed 20 Mar 2013 09:54:12 AM EDT

Name	Version	Summary	Description	URL	Install Time
libpgf	6.12.24	PGF (Progressive Graphics File) library	libPGF contains an implementation of the Progressive Graphics File (PGF) which is a new image file format, that is based on a discrete, fast wavelet transform with progressive coding features. PGF can be used for lossless and lossy compression.	http://www.libpgf.org	Wed 20 Mar 2013 09:52:15 AM EDT
libpinyin	0.8.1	Library to deal with pinyin	The libpinyin project aims to provide the algorithms core for intelligent sentence-based Chinese pinyin input methods.	https://github.com/libpinyin/libpinyin	Sun 24 Mar 2013 04:45:07 PM EDT
libpinyin-data	0.8.1	Data files for libpinyin	The libpinyin-data package contains data files.	https://github.com/libpinyin/libpinyin	Sun 24 Mar 2013 04:45:07 PM EDT
libpipeline	1.2.2	A pipeline manipulation library	libpipeline is a C library for setting up and running pipelines of processes, without needing to involve shell command-line parsing which is often error-prone and insecure. This alleviates programmers of the need to laboriously construct pipelines using lower-level primitives such as <code>fork(2)</code> and <code>execve(2)</code> .	http://libpipeline.nongnu.org/	Wed 20 Mar 2013 09:56:50 AM EDT
libplist	1.8	Library for manipulating Apple Binary and XML Property Lists	libplist is a library for manipulating Apple Binary and XML Property Lists	http://www.libimobiledevice.org/	Wed 20 Mar 2013 09:50:07 AM EDT

Name	Version	Summary	Description	URL	Install Time
libpng	1.5.13	A library of functions for manipulating PNG image format files	<p>The libpng package contains a library of functions for creating and manipulating PNG (Portable Network Graphics) image format files. PNG is a bit-mapped graphics format similar to the GIF format. PNG was created to replace the GIF format, since GIF uses a patented data compression algorithm.</p> <p>Libpng should be installed if you need to manipulate PNG format image files.</p>	http://www.libpng.org/pub/png/	Fri 05 Apr 2013 04:24:02 PM EDT
libpng	1.5.13	A library of functions for manipulating PNG image format files	<p>The libpng package contains a library of functions for creating and manipulating PNG (Portable Network Graphics) image format files. PNG is a bit-mapped graphics format similar to the GIF format. PNG was created to replace the GIF format, since GIF uses a patented data compression algorithm.</p> <p>Libpng should be installed if you need to manipulate PNG format image files.</p>	http://www.libpng.org/pub/png/	Wed 20 Mar 2013 09:49:47 AM EDT

Name	Version	Summary	Description	URL	Install Time
libpng-devel	1.5.13	Development tools for programs to manipulate PNG image format files	The libpng-devel package contains header files and documentation necessary for developing programs using the PNG (Portable Network Graphics) library. If you want to develop programs which will manipulate PNG image format files, you should install libpng-devel. You'll also need to install the libpng package.	http://www.libpng.org/pub/png/	Fri 05 Apr 2013 04:49:32 PM EDT
libpng-devel	1.5.13	Development tools for programs to manipulate PNG image format files	The libpng-devel package contains header files and documentation necessary for developing programs using the PNG (Portable Network Graphics) library. If you want to develop programs which will manipulate PNG image format files, you should install libpng-devel. You'll also need to install the libpng package.	http://www.libpng.org/pub/png/	Fri 05 Apr 2013 04:45:52 PM EDT
libpng12	1.2.50	Old version of libpng, needed to run old binaries	The libpng12 package provides libpng 1.2, an older version of the libpng library for manipulating PNG (Portable Network Graphics) image format files. This version should be used only if you are unable to use the current version of libpng.	http://www.libpng.org/pub/png/	Wed 20 Mar 2013 11:29:38 AM EDT

Name	Version	Summary	Description	URL	Install Time
libpqxx	3.2	C++ client API for PostgreSQL	C++ client API for PostgreSQL. The standard front-end (in the sense of "language binding") for writing C++ programs that use PostgreSQL. Supersedes older libpq++ interface.	http://pqxx.org/	Wed 20 Mar 2013 09:51:58 AM EDT
libprojectM	2.0.1	The libraries for the projectM music visualization plugin	projectM is an awesome music visualizer. There is nothing better in the world of Unix. projectM's greatness comes from the hard work of the community. Users like you can create presets that connect music with incredible visuals. projectM is an LGPL'ed reimplementation of Milkdrop under OpenGL. All projectM requires is a video card with 3D acceleration and your favorite music.	http://projectm.sourceforge.net/	Tue 26 Mar 2013 01:02:02 PM EDT

Name	Version	Summary	Description	URL	Install Time
libproxy	0.4.11	A library handling all the details of proxy configuration	libproxy offers the following features: * extremely small core footprint (i 35K) * no external dependencies within libproxy core (libproxy plugins may have dependencies) * only 3 functions in the stable external API * dynamic adjustment to changing network topology * a standard way of dealing with proxy settings across all scenarios * a sublime sense of joy and accomplishment	http://code.google.com/p/libproxy/	Sun 24 Mar 2013 04:44:45 PM EDT
libpwquality	1.2.1	A library for password generation and password quality checking	This is a library for password quality checks and generation of random passwords that pass the checks. This library uses the cracklib and cracklib dictionaries to perform some of the checks.	http://libpwquality.fedorahosted.org/	Sun 24 Mar 2013 04:44:53 PM EDT
libqalculate	0.9.7	Multi-purpose calculator library	This library underpins the Qalculate! multi-purpose desktop calculator for GNU/Linux	http://qalculate.sourceforge.net/	Wed 20 Mar 2013 09:50:10 AM EDT
libQtGTL	0.9.2	Qt bindings for OpenGTL	Qt bindings for OpenGTL.	http://www.opengtl.org/	Wed 20 Mar 2013 09:53:57 AM EDT
libquadmath	4.7.2	GCC _float128 shared support library	This package contains GCC shared support library which is needed for _float128 math support and for Fortran REAL*16 support.	http://gcc.gnu.org	Wed 20 Mar 2013 09:50:07 AM EDT

Name	Version	Summary	Description	URL	Install Time
libquadmath-devel	4.7.2	GCC _float128 support	This package contains headers for building Fortran programs using REAL*16 and programs using _float128 math.	http://gcc.gnu.org	Wed 20 Mar 2013 09:57:03 AM EDT
libquvi	0.4.1	A cross-platform library for parsing flash media stream	Libquvi is a cross-platform library for parsing flash media stream URLs with C API.	http://quvi.sourceforge.net/	Wed 20 Mar 2013 09:52:05 AM EDT
libquvi-scripts	0.4.10	Embedded lua scripts that libquvi uses for parsing the media details	libquvi-scripts contains the embedded lua scripts that libquvi uses for parsing the media details. Some additional utility scripts are also included.	http://quvi.sourceforge.net/	Sun 24 Mar 2013 04:49:28 PM EDT
libqxt	0.6.2	Qt extension library	LibQxt, an extension library for Qt, provides a suite of cross-platform utility classes to add functionality not readily available in the Qt toolkit.	http://www.libqxt.org/	Tue 26 Mar 2013 01:15:40 PM EDT
libqzeitgeist	0.8.0	Qt Zeitgeist Library	A Qt interface to the Zeitgeist event tracking system.	http://projects.kde.org/projects/kdesupport/libqzeitgeist	Wed 20 Mar 2013 09:53:58 AM EDT
LibRaw	0.14.7	Library for reading RAW files obtained from digital photo cameras	LibRaw is a library for reading RAW files obtained from digital photo cameras (CRW/CR2, NEF, RAF, DNG, and others). LibRaw is based on the source codes of the dcraw utility, where part of drawbacks have already been eliminated and part will be fixed in future.	http://www.libraw.org	Fri 05 Apr 2013 04:37:06 PM EDT

Name	Version	Summary	Description	URL	Install Time
libraw1394	2.0.8	Library providing low-level IEEE-1394 access	The libraw1394 library provides direct access to the IEEE-1394 bus. Support for both the obsolete ieee1394 interface and the new firewire intererface are included, with run-time detection of the active stack.	http://www.dennedy.org/libraw1394/	Wed 20 Mar 2013 09:50:04 AM EDT
libref_array	0.1.3	A refcounted array for C	A dynamically-growing, reference-counted array	http://fedorahosted.org/sssd/	Wed 20 Mar 2013 09:52:27 AM EDT
libreoffice-calc	3.6.6.2	LibreOffice Spreadsheet Application	The LibreOffice Spreadsheet application.	http://www.documentfoundation.org/develop	Tue 23 Apr 2013 09:35:48 AM EDT
libreoffice-core	3.6.6.2	Core modules for LibreOffice	The shared core libraries and support files for LibreOffice.	http://www.documentfoundation.org/develop	Tue 23 Apr 2013 09:35:44 AM EDT
libreoffice-draw	3.6.6.2	LibreOffice Drawing Application	The LibreOffice Drawing Application.	http://www.documentfoundation.org/develop	Tue 23 Apr 2013 09:35:45 AM EDT
libreoffice-graphicfilter	3.6.6.2	LibreOffice Extra Graphic filters	The graphicfilter module for LibreOffice provides graphic filters, e.g. svg and flash filters.	http://www.documentfoundation.org/develop	Tue 23 Apr 2013 09:35:45 AM EDT
libreoffice-impress	3.6.6.2	LibreOffice Presentation Application	The LibreOffice Presentation Application.	http://www.documentfoundation.org/develop	Tue 23 Apr 2013 09:35:46 AM EDT
libreoffice-kde	3.6.6.2	LibreOffice KDE integration plug-in	A plug-in for LibreOffice that enables integration into the KDE desktop environment.	http://www.documentfoundation.org/develop	Tue 23 Apr 2013 09:35:47 AM EDT
libreoffice-math	3.6.6.2	LibreOffice Equation Editor Application	The LibreOffice Equation Editor Application.	http://www.documentfoundation.org/develop	Tue 23 Apr 2013 09:35:47 AM EDT

Name	Version	Summary	Description	URL	Install Time
libreoffice-opensymbol-fonts	3.6.6.2	LibreOffice dingbats font	A dingbats font, OpenSymbol, suitable for use by LibreOffice for bullets and mathematical symbols.	http://www.documentfoundation.org/develop	Tue 23 Apr 2013 09:35:34 AM EDT
libreoffice-pdfimport	3.6.6.2	PDF Importer for LibreOffice Draw	The PDF Importer imports PDF into drawing documents to preserve layout and enable basic editing of PDF documents.	http://www.documentfoundation.org/develop	Tue 23 Apr 2013 09:35:45 AM EDT
libreoffice-presenter-screen	3.6.6.2	Presenter Screen for LibreOffice Presentations	The Presenter Screen is used to provide information on a second screen, that typically is not visible to the audience when delivering a presentation. e.g. slide notes.	http://www.documentfoundation.org/develop	Tue 23 Apr 2013 09:35:46 AM EDT
libreoffice-ure	3.6.6.2	UNO Runtime Environment	UNO is the component model of LibreOffice. UNO offers interoperability between programming languages, other components models and hardware architectures, either in process or over process boundaries, in the Intranet as well as in the Internet. UNO components may be implemented in and accessed from any programming language for which a UNO implementation (AKA language binding) and an appropriate bridge or adapter exists	http://www.documentfoundation.org/develop	Tue 23 Apr 2013 09:34:23 AM EDT

Name	Version	Summary	Description	URL	Install Time
libreoffice-writer	3.6.6.2	LibreOffice Word Processor Application	The LibreOffice Word Processor application.	http://www.documentfoundation.org/develop	Tue 23 Apr 2013 09:35:36 AM EDT
libreoffice-xsltfilter	3.6.6.2	Optional xsltfilter module for LibreOffice	The xsltfilter module for LibreOffice, provides additional docbook and xhtml export transforms. Install this to enable docbook export.	http://www.documentfoundation.org/develop	Tue 23 Apr 2013 09:35:47 AM EDT
libreport	2.1.2	Generic library for reporting various problems	Libraries providing API for reporting different problems in applications to different bug targets like Bugzilla, ftp, trac, etc...	https://fedorahosted.org/abrt/	Tue 26 Mar 2013 01:26:05 PM EDT
libreport-fedora	2.1.2	Default configuration for reporting bugs via Fedora infrastructure	Default configuration for reporting bugs via Fedora infrastructure used to easy configure the reporting process for Fedora sytems. Just install this package and you're done.	https://fedorahosted.org/abrt/	Tue 26 Mar 2013 01:26:04 PM EDT
libreport-filesystem	2.1.2	Filesystem layout for libreport	Filesystem layout for libreport	https://fedorahosted.org/abrt/	Tue 26 Mar 2013 01:26:04 PM EDT
libreport-gtk	2.1.2	GTK front-end for libreport	Applications for reporting bugs using libreport backend	https://fedorahosted.org/abrt/	Tue 26 Mar 2013 01:26:06 PM EDT
libreport-newt	2.1.2	libreport's newt interface	This package contains a simple newt application for reporting bugs	https://fedorahosted.org/abrt/	Tue 26 Mar 2013 01:26:20 PM EDT
libreport-plugin-bugzilla	2.1.2	libreport's bugzilla plugin	Plugin to report bugs into the bugzilla.	https://fedorahosted.org/abrt/	Tue 26 Mar 2013 01:26:06 PM EDT

Name	Version	Summary	Description	URL	Install Time
libreport-plugin-kerneloops	2.1.2	libreport's kerneloops reporter plugin	This package contains plugin which sends kernel crash information to specified server, usually to kerneloops.org.	https://fedorahosted.org/abrt/	Tue 26 Mar 2013 01:26:07 PM EDT
libreport-plugin-logger	2.1.2	libreport's logger reporter plugin	The simple reporter plugin which writes a report to a specified file.	https://fedorahosted.org/abrt/	Tue 26 Mar 2013 01:26:07 PM EDT
libreport-plugin-reportuploader	2.1.2	libreport's reportuploader plugin	Plugin to report bugs into anonymous FTP site associated with ticketing system.	https://fedorahosted.org/abrt/	Tue 26 Mar 2013 01:26:06 PM EDT
libreport-plugin-ureport	2.1.2	libreport's micro report plugin	Uploads micro-report to abrt server	https://fedorahosted.org/abrt/	Tue 26 Mar 2013 01:26:06 PM EDT
libreport-python	2.1.2	Python bindings for report_libs	Python bindings for report_libs.	https://fedorahosted.org/abrt/	Tue 26 Mar 2013 01:26:04 PM EDT
libreport-web	2.1.2	Library providing network API for libreport	Library providing network API for libreport	https://fedorahosted.org/abrt/	Tue 26 Mar 2013 01:26:06 PM EDT
libsvg2	2.36.4	An SVG library based on cairo	An SVG library based on cairo.		Wed 20 Mar 2013 09:54:04 AM EDT
librtmp	2.4	Support library for RTMP streams	librtmp is a support library for RTMP streams. All forms of RTMP are supported, including rtmp://, rtmpt://, rtmpe://, rtmpte://, and rtmpts://.	http://rtmpdump.mplayerhq.hu/	Tue 26 Mar 2013 01:01:30 PM EDT

Name	Version	Summary	Description	URL	Install Time
libsamplerate	0.1.8	Sample rate conversion library for audio data	Secret Rabbit Code is a sample rate converter for audio. It is capable of arbitrary and time varying conversions. It can downsample by a factor of 12 and upsample by the same factor. The ratio of input and output sample rates can be a real number. The conversion ratio can also vary with time for speeding up and slowing down effects.	http://www.mega-nerd.com/SRC/	Wed 20 Mar 2013 09:50:18 AM EDT
libsecret	0.12	Library for storing and retrieving passwords and other secrets	libsecret is a library for storing and retrieving passwords and other secrets. It communicates with the "Secret Service" using DBus. gnome-keyring and KSecretService are both implementations of a Secret Service.	https://live.gnome.org/Libsecret	Wed 20 Mar 2013 09:51:14 AM EDT

Name	Version	Summary	Description	URL	Install Time
libselinux	2.1.12	SELinux library and simple utilities	<p>Security-enhanced Linux is a feature of the Linux kernel and a number of utilities with enhanced security functionality designed to add mandatory access controls to Linux. The Security-enhanced Linux kernel contains new architectural components originally developed to improve the security of the Flask operating system. These architectural components provide general support for the enforcement of many kinds of mandatory access control policies, including those based on the concepts of Type Enforcement, Role-based Access Control, and Multi-level Security.</p> <p>libselinux provides an API for SELinux applications to get and set process and file security contexts and to obtain security policy decisions. Required for any applications that use the SELinux API.</p>	http://oss.tresys.com/git/selinux.git	Fri 05 Apr 2013 04:24:05 PM EDT

Name	Version	Summary	Description	URL	Install Time
libselinux	2.1.12	SELinux library and simple utilities	<p>Security-enhanced Linux is a feature of the Linux kernel and a number of utilities with enhanced security functionality designed to add mandatory access controls to Linux. The Security-enhanced Linux kernel contains new architectural components originally developed to improve the security of the Flask operating system. These architectural components provide general support for the enforcement of many kinds of mandatory access control policies, including those based on the concepts of Type Enforcement, Role-based Access Control, and Multi-level Security.</p> <p>libselinux provides an API for SELinux applications to get and set process and file security contexts and to obtain security policy decisions. Required for any applications that use the SELinux API.</p>	http://oss.tresys.com/git/selinux.git	Wed 27 Mar 2013 12:47:29 PM EDT
libselinux-devel	2.1.12	Header files and libraries used to build SELinux	The libselinux-devel package contains the libraries and header files needed for developing SELinux applications.	http://oss.tresys.com/git/selinux.git	Fri 05 Apr 2013 04:34:38 PM EDT

Name	Version	Summary	Description	URL	Install Time
libselinux-python	2.1.12	SELinux python bindings for libselinux	The libselinux-python package contains the python bindings for developing SELinux applications.	http://oss.tresys.com/git/selinux.git	Wed 27 Mar 2013 12:47:29 PM EDT
libselinux-utils	2.1.12	SELinux libselinux utilities	The libselinux-utils package contains the utilities	http://oss.tresys.com/git/selinux.git	Wed 27 Mar 2013 12:47:29 PM EDT

Name	Version	Summary	Description	URL	Install Time
libsemanage	2.1.9	SELinux binary policy manipulation library	<p>Security-enhanced Linux is a feature of the Linux kernel and a number of utilities with enhanced security functionality designed to add mandatory access controls to Linux. The Security-enhanced Linux kernel contains new architectural components originally developed to improve the security of the Flask operating system. These architectural components provide general support for the enforcement of many kinds of mandatory access control policies, including those based on the concepts of Type Enforcement, Role-based Access Control, and Multi-level Security.</p> <p>libsemanage provides an API for the manipulation of SELinux binary policies. It is used by checkpolicy (the policy compiler) and similar tools, as well as by programs like load_policy that need to perform specific transformations on binary policies such as customizing policy boolean settings.</p>	http://oss.tresys.com/git/selinux.git	Wed 20 Mar 2013 09:52:48 AM EDT

Name	Version	Summary	Description	URL	Install Time
libsemanage-python	2.1.9	semanage python bindings for libsemanage	The libsemanage-python package contains the python bindings for developing SELinux management applications.	http://oss.tresys.com/git/selinux.git	Wed 20 Mar 2013 09:54:51 AM EDT
libsepol	2.1.8	SELinux binary policy manipulation library	<p>Security-enhanced Linux is a feature of the Linux kernel and a number of utilities with enhanced security functionality designed to add mandatory access controls to Linux. The Security-enhanced Linux kernel contains new architectural components originally developed to improve the security of the Flask operating system. These architectural components provide general support for the enforcement of many kinds of mandatory access control policies, including those based on the concepts of Type Enforcement, Role-based Access Control, and Multi-level Security.</p> <p>libsepol provides an API for the manipulation of SELinux binary policies. It is used by checkpolicy (the policy compiler) and similar tools, as well as by programs like load_policy that need to perform specific transformations on binary policies such as customizing policy boolean settings.</p>	http://www.selinuxproject.org	Wed 20 Mar 2013 09:49:45 AM EDT

Name	Version	Summary	Description	URL	Install Time
libsepol-devel	2.1.8	Header files and libraries used to build policy manipulation tools	The libsepol-devel package contains the libraries and header files needed for developing applications that manipulate binary policies.	http://www.selinuxproject.org	Fri 05 Apr 2013 04:34:37 PM EDT
libshout	2.2.2	Icecast source streaming library	libshout is a library for communicating with and sending data to an icecast server. It handles the socket connection, the timing of the data, and prevents most bad data from getting to the icecast server.	http://www.icecast.org/	Wed 20 Mar 2013 09:50:32 AM EDT
libsigc++20	2.2.11	Typesafe signal framework for C++	This library implements a full callback system for use in widget libraries, abstract interfaces, and general programming. Originally part of the Gtk+ widget set, libsigc++20 is now a separate library to provide for more general use. It is the most complete library of its kind with the ability to connect an abstract callback to a class method, function, or function object. It contains adaptor classes for connection of dissimilar callbacks and has an ease of use unmatched by other C++ callback libraries. Package GTK+ (gtkmm), which is a C++ binding to the GTK+ library, starting with version 1.1.2, uses libsigc++20.	http://libsigc.sourceforge.net/	Wed 20 Mar 2013 09:49:59 AM EDT

Name	Version	Summary	Description	URL	Install Time
libSM	1.2.1	X.Org X11 SM runtime library	The X.Org X11 SM (Session Management) runtime library.	http://www.x.org	Fri 05 Apr 2013 04:24:09 PM EDT
libSM	1.2.1	X.Org X11 SM runtime library	The X.Org X11 SM (Session Management) runtime library.	http://www.x.org	Wed 20 Mar 2013 09:49:50 AM EDT
libSM-devel	1.2.1	X.Org X11 SM development package	The X.Org X11 SM (Session Management) development package.	http://www.x.org	Fri 05 Apr 2013 04:45:49 PM EDT
libsmbclient	4.0.4	The SMB client library	The libsmbclient contains the SMB client library from the Samba suite.	http://www.samba.org/	Tue 26 Mar 2013 01:26:02 PM EDT
libsndfile	1.0.25	Library for reading and writing sound files	libsndfile is a C library for reading and writing sound files such as AIFF, AU, WAV, and others through one standard interface. It can currently read/write 8, 16, 24 and 32-bit PCM files as well as 32 and 64-bit floating point WAV files and a number of compressed formats. It compiles and runs on *nix, MacOS, and Win32.	http://www.mega-nerd.com/libsndfile/	Wed 20 Mar 2013 09:50:17 AM EDT

Name	Version	Summary	Description	URL	Install Time
libsoup	2.40.3	Soup, an HTTP library implementation	Libsoup is an HTTP library implementation in C. It was originally part of a SOAP (Simple Object Access Protocol) implementation called Soup, but the SOAP and non-SOAP parts have now been split into separate packages. libsoup uses the Glib main loop and is designed to work well with GTK applications. This enables GNOME applications to access HTTP servers on the network in a completely asynchronous fashion, very similar to the Gtk+ programming model (a synchronous operation mode is also supported for those who want it).	http://live.gnome.org/LibSoup	Sun 24 Mar 2013 04:44:45 PM EDT
libsoup-devel	2.40.3	Header files for the Soup library	Libsoup is an HTTP library implementation in C. This package allows you to develop applications that use the libsoup library.	http://live.gnome.org/LibSoup	Fri 05 Apr 2013 04:34:35 PM EDT
libspectre	0.2.7	A library for rendering PostScript(TM) documents	libspectre is a small library for rendering PostScript(TM) documents. It provides a convenient easy to use API for handling and rendering PostScript documents.	http://libspectre.freedesktop.org	Wed 20 Mar 2013 09:52:22 AM EDT

Name	Version	Summary	Description	URL	Install Time
libspiro	20071029	Library to simplify the drawing of beautiful curves	This library will take an array of spiro control points and convert them into a series of bzier splines which can then be used in the myriad of ways the world has come to use bziers.	http://libspiro.sourceforge.net/	Wed 20 Mar 2013 09:50:41 AM EDT
libspnav	0.2.2	Open source alternative to 3DConnexion drivers	The spacenav project provides a free, compatible alternative to the proprietary 3Dconnexion device driver and SDK, for their 3D input devices (called "space navigator", "space pilot", "space traveller", etc). This package provides the library needed for applications to connect to the user land daemon.	http://spacenav.sourceforge.net/	Wed 20 Mar 2013 09:50:42 AM EDT
libss	1.42.5	Command line interface parsing library	This is libss, a command line interface parsing library, part of e2fsprogs. This package includes a tool that parses a command table to generate a simple command-line interface parser, the include files needed to compile and use it. It was originally inspired by the Multics SubSystem library.	http://e2fsprogs.sourceforge.net/	Wed 20 Mar 2013 09:50:38 AM EDT

Name	Version	Summary	Description	URL	Install Time
libssh	0.5.4	A library implementing the SSH2 protocol (0xbadc0de version)	The ssh library was designed to be used by programmers needing a working SSH implementation by the mean of a library. The complete control of the client is made by the programmer. With libssh, you can remotely execute programs, transfer files, use a secure and transparent tunnel for your remote programs. With its Secure FTP implementation, you can play with remote files easily, without third-party programs others than libcrypto (from openssl).	http://www.libssh.org/	Sun 24 Mar 2013 04:44:59 PM EDT
libssh2	1.4.3	A library implementing the SSH2 protocol	libssh2 is a library implementing the SSH2 protocol as defined by Internet Drafts: SECSH-TRANS(22), SECSH-USERAUTH(25), SECSH-CONNECTION(23), SECSH-ARCH(20), SECSH-FILEXFER(06)*, SECSH-DHGEX(04), and SECSH-NUMBERS(10).	http://www.libssh2.org/	Thu 02 May 2013 12:33:06 AM EDT

Name	Version	Summary	Description	URL	Install Time
libssh2	1.4.3	A library implementing the SSH2 protocol	libssh2 is a library implementing the SSH2 protocol as defined by Internet Drafts: SECSH-TRANS(22), SECSH-USERAUTH(25), SECSH-CONNECTION(23), SECSH-ARCH(20), SECSH-FILEXFER(06)*, SECSH-DHGEX(04), and SECSH-NUMBERS(10).	http://www.libssh2.org/	Tue 23 Apr 2013 09:34:18 AM EDT
libsss_idmap	1.9.4	FreeIPA Idmap library	Utility library to convert SIDs to Unix uids and gids	http://fedorahosted.org/sss/	Tue 23 Apr 2013 09:35:46 AM EDT
libstdc++	4.7.2	GNU Standard C++ Library	The libstdc++ package contains a rewritten standard compliant GCC Standard C++ Library.	http://gcc.gnu.org	Fri 05 Apr 2013 04:24:02 PM EDT
libstdc++	4.7.2	GNU Standard C++ Library	The libstdc++ package contains a rewritten standard compliant GCC Standard C++ Library.	http://gcc.gnu.org	Wed 20 Mar 2013 09:49:45 AM EDT
libstdc++-devel	4.7.2	Header files and libraries for C++ development	This is the GNU implementation of the standard C++ libraries. This package includes the header files and libraries needed for C++ development. This includes rewritten implementation of STL.	http://gcc.gnu.org	Wed 20 Mar 2013 09:52:16 AM EDT
libsysfs	2.1.0	Shared library for interfacing with sysfs	Library used in handling linux kernel sysfs mounts and their various files.	http://sourceforge.net/projects/linux-diag/	Wed 20 Mar 2013 09:56:54 AM EDT
libtalloc	2.0.8	The talloc library	A library that implements a hierarchical allocator with destructors.	http://talloc.samba.org/	Sun 24 Mar 2013 04:44:44 PM EDT

Name	Version	Summary	Description	URL	Install Time
libtar	1.2.11	Tar file manipulation API	libtar is a C library for manipulating tar archives. It supports both the strict POSIX tar format and many of the commonly-used GNU extensions.	http://www.feep.net/libtar/	Tue 26 Mar 2013 01:02:02 PM EDT
libtasn1	2.14	The ASN.1 library used in GNUTLS	This is the ASN.1 library used in GNUTLS. More up to date information can be found at http://www.gnu.org/software/gnutls and http://www.gnutls.org	http://www.gnu.org/software/libtasn1/	Fri 05 Apr 2013 04:24:14 PM EDT

Name	Version	Summary	Description	URL	Install Time
libtasn1	2.14	The ASN.1 library used in GNUTLS	This is the ASN.1 library used in GNUTLS. More up to date information can be found at http://www.gnu.org/software/gnutls and http://www.gnutls.org	http://www.gnu.org/software/libtasn1/	Wed 20 Mar 2013 09:50:16 AM EDT

libtasn1-devel	2.14	Files for development of applications which will use libtasn1	<p>This is the ASN.1 library used in GNUTLS. More up to date information can be found at http://www.gnu.org/software/gnutls and http://www.gnutls.org</p> <p>This package contains files for development of applications which will use libtasn1.</p>	http://www.gnu.org/software/libtasn1/	Fri 05 Apr 2013 04:34:32 PM EDT
libtdb	1.2.11	The tdb library	A library that implements a trivial database.	http://tdb.samba.org/	Sun 24 Mar 2013 04:44:44 PM EDT

Name	Version	Summary	Description	URL	Install Time
libtevent	0.9.17	The tevent library	Tevent is an event system based on the talloc memory management library. Tevent has support for many event types, including timers, signals, and the classic file descriptor events. Tevent also provide helpers to deal with asynchronous code providing the tevent_req (Tevent Request) functions.	http://tevent.samba.org/	Wed 20 Mar 2013 09:50:06 AM EDT
libthai	0.1.14	Thai language support routines	LibThai is a set of Thai language support routines aimed to ease developers' tasks to incorporate Thai language support in their applications. It includes important Thai-specific functions e.g. word breaking, input and output methods as well as basic character and string supports.	http://linux.thai.net	Fri 05 Apr 2013 04:24:13 PM EDT
libthai	0.1.14	Thai language support routines	LibThai is a set of Thai language support routines aimed to ease developers' tasks to incorporate Thai language support in their applications. It includes important Thai-specific functions e.g. word breaking, input and output methods as well as basic character and string supports.	http://linux.thai.net	Wed 20 Mar 2013 09:52:46 AM EDT

Name	Version	Summary	Description	URL	Install Time
libtheora	1.1.1	Theora Video Compression Codec	Theora is Xiph.Org's first publicly released video codec, intended for use within the Ogg's project's Ogg multimedia streaming system. Theora is derived directly from On2's VP3 codec; Currently the two are nearly identical, varying only in encapsulating decoder tables in the bitstream headers, but Theora will make use of this extra freedom in the future to improve over what is possible with VP3.	http://www.theora.org	Wed 20 Mar 2013 09:50:07 AM EDT
libtidy	0.99.0	Shared libraries for tidy	Shared libraries for tidy.	http://tidy.sourceforge.net/	Wed 20 Mar 2013 09:52:18 AM EDT
libtiff	4.0.3	Library of functions for manipulating TIFF format image files	The libtiff package contains a library of functions for manipulating TIFF (Tagged Image File Format) image format files. TIFF is a widely used file format for bitmapped images. TIFF files usually end in the .tif extension and they are often quite large. The libtiff package should be installed if you need to manipulate TIFF format image files.	http://www.remotesensing.org/libtiff/	Fri 05 Apr 2013 04:24:07 PM EDT

libtiger	0.3.4	Rendering library for Kate streams using Pango and Cairo	Libtiger is a rendering library for Kate streams using Pango and Cairo. More information about Kate streams may be found at http://wiki.xiph.org/index.php/OggKate	http://libtiger.googlecode.com	Tue 26 Mar 2013 01:02:01 PM EDT

Name	Version	Summary	Description	URL	Install Time
libtirpc	0.2.2	Transport Independent RPC Library	<p>This package contains SunLib's implementation of transport-independent RPC (TI-RPC) documentation. This library forms a piece of the base of Open Network Computing (ONC), and is derived directly from the Solaris 2.3 source.</p> <p>TI-RPC is an enhanced version of TS-RPC that requires the UNIX System V Transport Layer Interface (TLI) or an equivalent X/Open Transport Interface (XTI). TI-RPC is on-the-wire compatible with the TS-RPC, which is supported by almost 70 vendors on all major operating systems. TS-RPC source code (RPCSRC 4.0) remains available from several internet sites.</p>	http://nfsv4.bullopen-source.org/	Wed 20 Mar 2013 09:50:33 AM EDT

Name	Version	Summary	Description	URL	Install Time
libtool	2.4.2	The GNU Portable Library Tool	<p>GNU Libtool is a set of shell scripts which automatically configure UNIX and UNIX-like systems to generically build shared libraries. Libtool provides a consistent, portable interface which simplifies the process of using shared libraries.</p> <p>If you are developing programs which will use shared libraries, but do not use the rest of the GNU Autotools (such as GNU Autoconf and GNU Automake), you should install the libtool package.</p> <p>The libtool package also includes all files needed to integrate the GNU Portable Library Tool (libtool) and the GNU Libtool Dynamic Module Loader (ltdl) into a package built using the GNU Autotools (including GNU Autoconf and GNU Automake).</p>	http://www.gnu.org/software/libtool/	Wed 20 Mar 2013 09:57:04 AM EDT

Name	Version	Summary	Description	URL	Install Time
libtool-ltdl	2.4.2	Runtime libraries for GNU Libtool Dynamic Module Loader	The libtool-ltdl package contains the GNU Libtool Dynamic Module Loader, a library that provides a consistent, portable interface which simplifies the process of using dynamic modules. These runtime libraries are needed by programs that link directly to the system-installed ltdl libraries; they are not needed by software built using the rest of the GNU Autotools (including GNU Autoconf and GNU Automake).	http://www.gnu.org/software/libtool/	Wed 20 Mar 2013 09:49:57 AM EDT
libtranslit	0.0.2	ASCII to Unicode transliteration library with multiple backends	ASCII to Unicode transliteration library with multiple backends.	http://github.com/ueno/libtranslit	Wed 20 Mar 2013 09:51:14 AM EDT
libtranslit-m17n	0.0.2	Transliteration module using m17n-lib for libtranslit	The libtranslit-m17n package contains a transliteration module using m17n-lib for libtranslit.	http://github.com/ueno/libtranslit	Wed 20 Mar 2013 09:51:14 AM EDT
libudisks2	2.0.1	Dynamic library to access the udisks daemon	This package contains the dynamic library libudisks2, which provides access to the udisks daemon. This package is for the udisks 2.x series.	http://www.freedesktop.org/wiki/Software/udisks	Fri 05 Apr 2013 04:36:23 PM EDT

Name	Version	Summary	Description	URL	Install Time
libunistring	0.9.3	GNU Unicode string library	This portable C library implements Unicode string types in three flavours: (UTF-8, UTF-16, UTF-32), together with functions for character processing (names, classifications, properties) and functions for string processing (iteration, formatted output, width, word breaks, line breaks, normalization, case folding and regular expressions).	http://www.gnu.org/software/libunistring/	Wed 20 Mar 2013 09:50:22 AM EDT
libunwind	1.0.1	An unwinding library	Libunwind provides a C ABI to determine the call-chain of a program. This version of libunwind is targetted for the ia64 platform.	http://savannah.nongnu.org/projects/libunwind	Sun 24 Mar 2013 04:45:50 PM EDT
libupnp	1.6.18	Universal Plug and Play (UPnP) SDK	The Universal Plug and Play (UPnP) SDK for Linux provides support for building UPnP-compliant control points, devices, and bridges on Linux.	http://www.libupnp.org/	Tue 26 Mar 2013 01:02:02 PM EDT
libusal	1.1.11	Library to communicate with SCSI devices	The libusal package contains C libraries that allows applications to communicate with SCSI devices and is well suitable for writing CD-R media.	http://cdrkit.org/	Wed 20 Mar 2013 09:50:41 AM EDT

Name	Version	Summary	Description	URL	Install Time
libusb	0.1.3	A library which allows userspace access to USB devices	This package provides a way for applications to access USB devices. Legacy libusb-0.1 is no longer supported by upstream, therefore content of this package was replaced by libusb-compat. It provides compatibility layer allowing applications written for libusb-0.1 to work with libusb-1.0.	http://sourceforge.net/projects/libusb/	Wed 20 Mar 2013 09:49:58 AM EDT
libusbx	1.0.14	Library for accessing USB devices	<p>This package provides a way for applications to access USB devices.</p> <p>Libusbx is a fork of the original libusb, which is a fully API and ABI compatible drop in for the libusb-1.0.9 release. The libusbx fork was started by most of the libusb-1.0 developers, after the original libusb project did not produce a new release for over 18 months.</p> <p>Note that this library is not compatible with the original libusb-0.1 series, if you need libusb-0.1 compatibility install the libusb package.</p>	http://sourceforge.net/apps/mediawiki/libusbx/	Wed 20 Mar 2013 09:49:51 AM EDT

Name	Version	Summary	Description	URL	Install Time
libuser	0.58	A user and group account administration library	The libuser library implements a standardized interface for manipulating and administering user and group accounts. The library uses pluggable back-ends to interface to its data sources. Sample applications modeled after those included with the shadow password suite are included.	https://fedorahosted.org/libuser/	Tue 23 Apr 2013 09:34:18 AM EDT
libuser-devel	0.58	Files needed for developing applications which use libuser	The libuser-devel package contains header files, static libraries, and other files useful for developing applications with libuser.	https://fedorahosted.org/libuser/	Tue 23 Apr 2013 09:36:18 AM EDT
libuser-python	0.58	Python bindings for the libuser library	The libuser-python package contains the Python bindings for the libuser library, which provides a Python API for manipulating and administering user and group accounts.	https://fedorahosted.org/libuser/	Tue 23 Apr 2013 09:36:18 AM EDT
libutempter	1.1.6	A privileged helper for utmp/wtmp updates	This library provides interface for terminal emulators such as screen and xterm to record user sessions to utmp and wtmp files.	ftp://ftp.altlinux.org/pub/people/ldv/utempter	Wed 20 Mar 2013 09:52:48 AM EDT

libuuid	2.22.2	Universally unique ID library	<p>This is the universally unique ID library, part of util-linux. The libuuid library generates and parses 128-bit universally unique id's (UUID's). A UUID is an identifier that is unique across both space and time, with respect to the space of all UUIDs. A UUID can be used for multiple purposes, from tagging objects with an extremely short lifetime, to reliably identifying very persistent objects across a network. See also the "uuid" package, which is a separate implementation.</p>	http://en.wikipedia.org/wiki/Util-linux	Sun 24 Mar 2013 04:44:43 PM EDT

Name	Version	Summary	Description	URL	Install Time
libv4l	0.8.8	Collection of video4linux support libraries	<p>libv4l is a collection of libraries which adds a thin abstraction layer on top of video4linux2 devices. The purpose of this (thin) layer is to make it easy for application writers to support a wide variety of devices without having to write separate code for different devices in the same class. libv4l consists of 3 different libraries: libv4lconvert, libv4l1 and libv4l2.</p> <p>libv4lconvert offers functions to convert from any (known) pixel-format to V4L2_PIX_FMT_BGR24 or V4L2_PIX_FMT_YUV420.</p> <p>libv4l1 offers the (deprecated) v4l1 API on top of v4l2 devices, independent of the drivers for those devices supporting v4l1 compatibility (which many v4l2 drivers do not).</p> <p>libv4l2 offers the v4l2 API on top of v4l2 devices, while adding for the application transparent libv4lconvert conversion where necessary.</p>	http://hansdegoede.livejournal.com/3636.html	Wed 20 Mar 2013 09:50:05 AM EDT
libva	1.1.1	Video Acceleration (VA) API for Linux	Libva is a library providing the VA API video acceleration API.	http://freedesktop.org/wiki/Software/vaapi	Tue 23 Apr 2013 09:35:33 AM EDT

Name	Version	Summary	Description	URL	Install Time
libvdpau	0.5	Wrapper library for the Video Decode and Presentation API	VDPAU is the Video Decode and Presentation API for UNIX. It provides an interface to video decode acceleration and presentation hardware present in modern GPUs.	http://freedesktop.org/wiki/Software/VDPAU	Wed 20 Mar 2013 09:51:16 AM EDT
libvisio	0.0.25	A library providing ability to interpret and import visio diagrams	Libvisio is library providing ability to interpret and import visio diagrams into various applications. You can find it being used in libreoffice.	http://www.freedesktop.org/wiki/Software/libvisio	Sun 24 Mar 2013 04:44:52 PM EDT
libvisual	0.4.0	Abstraction library for audio visualisation plugins	Libvisual is an abstraction library that comes between applications and audio visualisation plugins. Often when it comes to audio visualisation plugins or programs that create visuals they do depend on a player or something else, basically there is no general framework that enable application developers to easy access cool audio visualisation plugins. Libvisual wants to change this by providing an interface towards plugins and applications, through this easy to use interface applications can easily access plugins and since the drawing is done by the application it also enables the developer to draw the visual anywhere he wants.	http://libvisual.sf.net	Wed 20 Mar 2013 09:50:43 AM EDT

Name	Version	Summary	Description	URL	Install Time
libvncserver	0.9.9	Library to make writing a vnc server easy	LibVNCServer makes writing a VNC server (or more correctly, a program exporting a framebuffer via the Remote Frame Buffer protocol) easy. It hides the programmer from the tedious task of managing clients and compression schemata.	http://libvncserver.sourceforge.net/	Sun 24 Mar 2013 04:45:49 PM EDT
libvorbis	1.3.3	The Vorbis General Audio Compression Codec	Ogg Vorbis is a fully open, non-proprietary, patent- and royalty-free, general-purpose compressed audio format for audio and music at fixed and variable bitrates. The libvorbis package contains runtime libraries for use in programs that support Ogg Vorbis.	http://www.xiph.org/	Wed 20 Mar 2013 09:49:53 AM EDT
libvorbis-devel	1.3.3	Development tools for Vorbis applications	The libvorbis-devel package contains the header files and documentation needed to develop applications with Ogg Vorbis.	http://www.xiph.org/	Fri 05 Apr 2013 04:34:45 PM EDT
libvpx	1.2.0	VP8 Video Codec SDK	libvpx provides the VP8 SDK, which allows you to integrate your applications with the VP8 video codec, a high quality, royalty free, open source codec deployed on millions of computers and devices worldwide.	http://www.webmproject.org/tools/vp8-sdk/	Sun 24 Mar 2013 04:45:06 PM EDT
libwayland-client	1.0.5	Wayland client library	Wayland client library	http://wayland.freedesktop.org/	Fri 05 Apr 2013 04:24:05 PM EDT

Name	Version	Summary	Description	URL	Install Time
libwayland-client	1.0.5	Wayland client library	Wayland client library	http://wayland.freedesktop.org/	Sun 24 Mar 2013 04:45:50 PM EDT

libxklavier	5.3	High-level API for X Keyboard Extension	libxklavier is a library providing a high-level API for the X Keyboard Extension (XKB). This library is intended to support XFree86 and other commercial X servers. It is useful for creating XKB-related software (layout indicators etc).	http://www.freedesktop.org/wiki/Software/LibXklavier	Wed 20 Mar 2013 09:50:31 AM EDT
libxml++	2.36.0	C++ wrapper for the libxml2 XML parser library	libxml++ is a C++ wrapper for the libxml2 XML parser library. It's original author is Ari Johnson and it is currently maintained by Christophe de Vienne and Murray Cumming.	http://libxmlplusplus.sourceforge.net/	Wed 20 Mar 2013 09:50:33 AM EDT

Name	Version	Summary	Description	URL	Install Time
libxml2	2.9.1	Library providing XML and HTML support	This library allows to manipulate XML files. It includes support to read, modify and write XML and HTML files. There is DTDs support this includes parsing and validation even with complex DTDs, either at parse time or later once the document has been modified. The output can be a simple SAX stream or and in-memory DOM like representations. In this case one can use the built-in XPath and XPointer implementation to select sub nodes or ranges. A flexible Input/Output mechanism is available, with existing HTTP and FTP modules and combined to an URI library.	http://xmlsoft.org/	Thu 02 May 2013 12:32:47 AM EDT

libzip	0.10.1	C library for reading, creating, and modifying zip archives	libzip is a C library for reading, creating, and modifying zip archives. Files can be added from data buffers, files, or compressed data copied directly from other zip archives. Changes made without closing the archive can be reverted. The API is documented by man pages.	http://www.nih.at/libzip/index.html	Wed 20 Mar 2013 09:51:21 AM EDT
linux-atm	2.5.1	Tools to support ATM networking under Linux	Tools to support ATM networking under Linux.	http://linux-atm.sourceforge.net/	Wed 20 Mar 2013 09:58:58 AM EDT
linux-atm-libs	2.5.1	Linux ATM API library	This package contains the ATM library required for user space ATM tools.	http://linux-atm.sourceforge.net/	Wed 20 Mar 2013 09:50:42 AM EDT
linux-firmware	20130418	Firmware files used by the Linux kernel	Kernel-firmware includes firmware files required for some devices to operate.	http://www.kernel.org/	Tue 23 Apr 2013 09:36:46 AM EDT
linuxconsoletools	1.4	Tools for connecting joysticks & legacy devices to the kernel's input subsystem	This package contains utilities for testing and configuring joysticks, connecting legacy devices to the kernel's input subsystem (providing support for serial mice, touchscreens etc.), and test the input event layer.	http://sourceforge.net/projects/linuxconsole/	Fri 05 Apr 2013 04:34:37 PM EDT

Name	Version	Summary	Description	URL	Install Time
lirc-libs	0.9.0	LIRC libraries	LIRC is a package that allows you to decode and send infrared and other signals of many (but not all) commonly used remote controls. Included applications include daemons which decode the received signals as well as user space applications which allow controlling a computer with a remote control. This package includes shared libraries that applications use to interface with LIRC.	http://www.lirc.org/	Tue 26 Mar 2013 01:02:01 PM EDT

Name	Version	Summary	Description	URL	Install Time
live555	0	Live555.com streaming libraries	This code forms a set of C++ libraries for multimedia streaming, using open standard protocols (RTP/RTCP, RTSP, SIP). These libraries - which can be compiled for Unix (including Linux and Mac OS X), Windows, and QNX (and other POSIX-compliant systems) - can be used to build streaming applications. The libraries can also be used to stream, receive, and process MPEG, H.263+ or JPEG video, and several audio codecs. They can easily be extended to support additional (audio and/or video) codecs, and can also be used to build basic RTSP or SIP clients and servers, and have been used to add streaming support to existing media player applications.	http://live555.com/liveMedia/	Tue 26 Mar 2013 01:02:02 PM EDT
lklug-fonts	0.6	Fonts for Sinhala language	The lklug-fonts package contains fonts for the display of Sinhala. The original font for TeX/LaTeX is developed by Yannis Haralambous and are in GPL. OTF tables are added by Anuradha Ratnaweera and Harshani Devadithya.	http://sinhala.sourceforge.net/	Wed 20 Mar 2013 09:59:48 AM EDT
llvm-libs	3.2	LLVM shared libraries	Shared libraries for the LLVM compiler infrastructure.	http://llvm.org/	Sun 24 Mar 2013 04:44:48 PM EDT

Name	Version	Summary	Description	URL	Install Time
lm_sensors-libs	3.3.2	Lm_sensors core libraries	Core libraries for lm_sensors applications	http://www.lm-sensors.org/	Wed 20 Mar 2013 09:50:25 AM EDT
lockdev	1.0.4	A library for locking devices	Lockdev provides a reliable way to put an exclusive lock to devices using both FSSTND and SVr4 methods.	https://alioth.debian.org/projects/lockdev/	Wed 20 Mar 2013 09:52:57 AM EDT
lockdev-devel	1.0.4	The header files for the lockdev library	The lockdev library provides a reliable way to put an exclusive lock on devices using both FSSTND and SVr4 methods. The lockdev-devel package contains the development headers.	https://alioth.debian.org/projects/lockdev/	Fri 05 Apr 2013 04:34:46 PM EDT
logrotate	3.8.3	Rotates, compresses, removes and mails system log files	The logrotate utility is designed to simplify the administration of log files on a system which generates a lot of log files. Logrotate allows for the automatic rotation compression, removal and mailing of log files. Logrotate can be set to handle a log file daily, weekly, monthly or when the log file gets to a certain size. Normally, logrotate runs as a daily cron job. Install the logrotate package if you need a utility to deal with the log files on your system.	https://fedorahosted.org/logrotate/	Sun 24 Mar 2013 04:44:49 PM EDT
lohit-assamese-fonts	2.5.3	Free Assamese font	This package provides a free Assamese truetype/opentype font.	https://fedorahosted.org/lohit/	Sun 24 Mar 2013 04:49:18 PM EDT
lohit-bengali-fonts	2.5.3	Free Bengali font	This package provides a free Bengali truetype/opentype font.	https://fedorahosted.org/lohit/	Sun 24 Mar 2013 04:49:19 PM EDT

Name	Version	Summary	Description	URL	Install Time
lohit-devanagari-fonts	2.5.3	Free Devanagari Script Font	This package provides a free Devanagari Script TrueType/OpenType font.	https://fedorahosted.org/lohit/	Fri 05 Apr 2013 04:37:05 PM EDT
lohit-gujarati-fonts	2.5.2	Free Gujarati font	This package provides a free Gujarati truetype/opentype font.	https://fedorahosted.org/lohit/	Wed 20 Mar 2013 09:59:06 AM EDT
lohit-kannada-fonts	2.5.3	Free Kannada font	This package provides a free Kannada truetype/opentype font.	https://fedorahosted.org/lohit/	Sun 24 Mar 2013 04:49:20 PM EDT
lohit-oriya-fonts	2.5.3	Free Oriya Font	This package provides a free Oriya truetype/opentype font.	https://fedorahosted.org/lohit/	Sun 24 Mar 2013 04:49:21 PM EDT
lohit-punjabi-fonts	2.5.3	Free Punjabi font	This package provides a free Punjabi truetype/opentype font.	https://fedorahosted.org/lohit/	Sun 24 Mar 2013 04:49:22 PM EDT
lohit-tamil-fonts	2.5.3	Free Tamil font	This package provides a free Tamil truetype/opentype font.	https://fedorahosted.org/lohit/	Sun 24 Mar 2013 04:49:08 PM EDT
lohit-telugu-fonts	2.5.3	Free Telugu font	This package provides a free Telugu truetype/opentype font.	https://fedorahosted.org/lohit/	Sun 24 Mar 2013 04:49:23 PM EDT
loudmouth	1.4.3	XMPP/Jabber C programming library	Loudmouth is a lightweight and easy-to-use C library for programming with the XMPP/Jabber protocol. It's designed to be easy to get started with and yet extensible to let you do anything the XMPP protocol allows.	http://www.loudmouth-project.org/	Wed 20 Mar 2013 09:51:06 AM EDT

Name	Version	Summary	Description	URL	Install Time
lpsolve	5.5.2.0	A Mixed Integer Linear Programming (MILP) solver	Mixed Integer Linear Programming (MILP) solver lpsolve solves pure linear, (mixed) integer/binary, semi-continuous and special ordered sets (SOS) models.	http://sourceforge.net/projects/lpsolve	Wed 20 Mar 2013 09:56:43 AM EDT
lrzsz	0.12.20	The lrz and lsz modem communications programs	Lrzsz (consisting of lrz and lsz) is a cosmetically modified zmodem/ymodem/xmodem package built from the public-domain version of the rzsx package. Lrzsz was created to provide a working GNU copylefted Zmodem solution for Linux systems.	http://www.ohse.de/uwe/software/lrzsz.html	Wed 20 Mar 2013 09:52:26 AM EDT
lskat	4.10.2	A fun and engaging card game	Lieutenant Skat (from German Offiziersskat) is a fun and engaging card game for two players, where the second player is either live opponent, or builtin artificial intelligence.	https://projects.kde.org/projects/kde/kdegames/lskat	Tue 23 Apr 2013 09:34:58 AM EDT
lsof	4.87	A utility which lists open files on a Linux/UNIX system	Lsof stands for LiSt Open Files, and it does just that: it lists information about files that are open by the processes running on a UNIX system.	http://people.freebsd.org/~{}abe/	Sun 24 Mar 2013 04:49:05 PM EDT

Name	Version	Summary	Description	URL	Install Time
ltrace	0.7.2	Tracks runtime library calls from dynamically linked executables	Ltrace is a debugging program which runs a specified command until the command exits. While the command is executing, ltrace intercepts and records both the dynamic library calls called by the executed process and the signals received by the executed process. Ltrace can also intercept and print system calls executed by the process. You should install ltrace if you need a sysadmin tool for tracking the execution of processes.	http://ltrace.alioth.debian.org/	Sun 24 Mar 2013 04:49:05 PM EDT
lua	5.1.4	Powerful light-weight programming language	Lua is a powerful light-weight programming language designed for extending applications. Lua is also frequently used as a general-purpose, stand-alone language. Lua is free software. Lua combines simple procedural syntax with powerful data description constructs based on associative arrays and extensible semantics. Lua is dynamically typed, interpreted from bytecodes, and has automatic memory management with garbage collection, making it ideal for configuration, scripting, and rapid prototyping.	http://www.lua.org/	Wed 20 Mar 2013 09:50:03 AM EDT

Name	Version	Summary	Description	URL	Install Time
lvm2	2.02.98	Userland logical volume management tools	LVM2 includes all of the support for handling read/write operations on physical volumes (hard disks, RAID-Systems, magneto optical, etc., multiple devices (MD), see mdadd(8) or even loop devices, see losetup(8)), creating volume groups (kind of virtual disks) from one or more physical volumes and creating one or more logical volumes (kind of logical partitions) in volume groups.	http://sources.redhat.com/lvm2	Wed 20 Mar 2013 09:58:21 AM EDT
lvm2-libs	2.02.98	Shared libraries for lvm2	This package contains shared lvm2 libraries for applications.	http://sources.redhat.com/lvm2	Wed 20 Mar 2013 09:53:54 AM EDT
lyx-fonts	2.0.5.1	Lyx/MathML fonts	A collection of Math symbol fonts for lyx.	http://www.lyx.org/	Fri 05 Apr 2013 04:36:23 PM EDT
lzo	2.06	Data compression library with very fast (de)compression	LZO is a portable lossless data compression library written in ANSI C. It offers pretty fast compression and very fast decompression. Decompression requires no memory. In addition there are slower compression levels achieving a quite competitive compression ratio while still decompressing at this very high speed.	http://www.oberhumer.com/opensource/lzo/	Sun 24 Mar 2013 04:49:07 PM EDT
lzo-minilzo	2.06	Mini version of lzo for apps which don't need the full version	A small (mini) version of lzo for embedding into applications which don't need full blown lzo compression support.	http://www.oberhumer.com/opensource/lzo/	Sun 24 Mar 2013 04:45:48 PM EDT

Name	Version	Summary	Description	URL	Install Time
m17n-contrib	1.1.14	Contributed multilingualization datafiles for m17n-lib	This package contains contributed multilingualization (m17n) datafiles for the m17n-lib project.	http://www.nongnu.org/m17n	Wed 20 Mar 2013 09:59:01 AM EDT
m17n-db	1.6.4	Multilingualization datafiles for m17n-lib	This package contains multilingualization (m17n) datafiles for m17n-lib which describe input maps, encoding maps, OpenType font data and font layout text rendering for languages.	http://www.nongnu.org/m17n	Wed 20 Mar 2013 09:49:31 AM EDT
m17n-lib	1.6.4	Multilingual text library	m17n-lib is a multilingual text library used primarily to allow the input of many languages with the input table maps from m17n-db. The package provides the core and input method backend libraries.	http://www.nongnu.org/m17n/	Sun 24 Mar 2013 04:49:05 PM EDT
m2crypto	0.21.1	Support for using OpenSSL in python scripts	This package allows you to call OpenSSL functions from python scripts.	http://wiki.osafoundation.org/bin/view/Projects/MeTooCrypto	Wed 20 Mar 2013 09:52:36 AM EDT

Name	Version	Summary	Description	URL	Install Time
m4	1.4.16	The GNU macro processor	A GNU implementation of the traditional UNIX macro processor. M4 is useful for writing text files which can be logically parsed, and is used by many programs as part of their build process. M4 has built-in functions for including files, running shell commands, doing arithmetic, etc. The autoconf program needs m4 for generating configure scripts, but not for running configure scripts. Install m4 if you need a macro processor.	http://www.gnu.org/software/m4/	Wed 20 Mar 2013 09:50:23 AM EDT

Name	Version	Summary	Description	URL	Install Time
mailcap	2.1.40	Helper application and MIME type associations for file types	<p>The mailcap file is used by the metamail program. Metamail reads the mailcap file to determine how it should display non-text or multimedia material. Basically, mailcap associates a particular type of file with a particular program that a mail agent or other program can call in order to handle the file. Mailcap should be installed to allow certain programs to be able to handle non-text files.</p> <p>Also included in this package is the mime.types file which contains a list of MIME types and their filename "extension" associations, used by several applications e.g. to determine MIME types for filenames.</p>	http://git.fedorahosted.org/git/mailcap.git	Wed 20 Mar 2013 09:49:34 AM EDT

Name	Version	Summary	Description	URL	Install Time
mailx	12.5	Enhanced implementation of the mailx command	<p>Mailx is an enhanced mail command, which provides the functionality of the POSIX mailx command, as well as SysV mail and Berkeley Mail (from which it is derived). Additionally to the POSIX features, mailx can work with Maildir/ e-mail storage format (as well as mailboxes), supports IMAP, POP3 and SMTP protocols (including over SSL) to operate with remote hosts, handles mime types and different charsets. There are a lot of other useful features, see mailx(1).</p> <p>And as its ancient analogues, mailx can be used as a mail script language, both for sending and receiving mail.</p> <p>Besides the "mailx" command, this package provides "mail" and "Mail" (which should be compatible with its predecessors from the mailx-8.x source), as well as "nail" (the initial name of this project).</p>	http://heirloom.sourceforge.net/mailx.html	Wed 20 Mar 2013 09:52:07 AM EDT

Name	Version	Summary	Description	URL	Install Time
make	3.82	A GNU tool which simplifies the build process for users	A GNU tool for controlling the generation of executables and other non-source files of a program from the program's source files. Make allows users to build and install packages without any significant knowledge about the details of the build process. The details about how the program should be built are provided for make in the program's makefile.	http://www.gnu.org/software/make/	Wed 20 Mar 2013 09:50:22 AM EDT
man-db	2.6.3	Tools for searching and reading man pages	The man-db package includes five tools for browsing man-pages: man, whatis, apropos, manpath and lexgrog. man formats and displays manual pages. whatis searches the manual page names. apropos searches the manual page names and descriptions. manpath determines search path for manual pages. lexgrog directly reads header information in manual pages.	http://www.nongnu.org/man-db/	Wed 20 Mar 2013 09:57:09 AM EDT
man-pages	3.43	Man (manual) pages from the Linux Documentation Project	A large collection of man pages (documentation) from the Linux Documentation Project (LDP).	http://www.kernel.org/doc/man-pages/	Wed 20 Mar 2013 09:59:59 AM EDT

Name	Version	Summary	Description	URL	Install Time
marble	4.10.2	Virtual globe and world atlas	<p>Marble is a Virtual Globe and World Atlas that you can use to learn more about Earth: You can pan and zoom around and you can look up places and roads. A mouse click on a place label will provide the respective Wikipedia article. Of course it's also possible to measure distances between locations or watch the current cloud cover. Marble offers different thematic maps: A classroom- style topographic map, a satellite view, street map, earth at night and temperature and precipitation maps. All maps include a custom map key, so it can also be used as an educational tool for use in class-rooms. For educational purposes you can also change date and time and watch how the starry sky and the twilight zone on the map change.</p> <p>In opposite to other virtual globes Marble also features multiple projections: Choose between a Flat Map ("Plate carr"), Mercator or the Globe.</p>	http://edu.kde.org/marble/	Tue 23 Apr 2013 09:35:26 AM EDT
marble-libs	4.10.2	Runtime files for marble	Runtime files for marble.	http://edu.kde.org/marble/	Tue 23 Apr 2013 09:35:25 AM EDT

Name	Version	Summary	Description	URL	Install Time
mcelog	1.0	Tool to translate x86-64 CPU Machine Check Exception data	mcelog is a utility that collects and decodes Machine Check Exception data on x86-32 and x86-64 systems. It can be run either as a daemon, or by cron.	https://github.com/andikleen/mcelog.git	Wed 20 Mar 2013 09:58:38 AM EDT
mcpp	2.7.2	Alternative C/C++ preprocessor	<p>C/C++ preprocessor defines and expands macros and processes '#if', '#include' and some other directives.</p> <p>MCPP is an alternative C/C++ preprocessor with the highest conformance. It supports multiple standards: K&R, ISO C90, ISO C99, and ISO C++98. MCPP is especially useful for debugging a source program which uses complicated macros and also useful for checking portability of a source.</p> <p>Though mcpp could be built as a replacement of GCC's resident preprocessor or as a stand-alone program without using library build of mcpp, this package installs only a program named 'mcpp' which links shared library of mcpp and behaves independent from GCC.</p>	http://mcpp.sourceforge.net/	Wed 20 Mar 2013 09:52:27 AM EDT

Name	Version	Summary	Description	URL	Install Time
mdadm	3.2.6	The mdadm program controls Linux md devices (software RAID arrays)	The mdadm program is used to create, manage, and monitor Linux MD (software RAID) devices. As such, it provides similar functionality to the raidtools package. However, mdadm is a single program, and it can perform almost all functions without a configuration file, though a configuration file can be used to help with some common tasks.	http://www.kernel.org/pub/linux/utils/raid/mdadm/	Sun 24 Mar 2013 04:49:01 PM EDT
media-player-info	17	Data files describing media player capabilities	media-player-info is a repository of data files describing media player (mostly USB Mass Storage ones) capabilities. These files contain information about the directory layout to use to add music to these devices, about the supported file formats, etc. The package also installs a udev rule to identify media player devices.	http://www.freedesktop.org/wiki/Software/media-player-info	Sun 24 Mar 2013 04:45:11 PM EDT
mencoder	1.1	MPlayer movie encoder	This package contains the MPlayer movie encoder.	http://www.mplayerhq.hu/	Tue 26 Mar 2013 03:53:38 PM EDT

Name	Version	Summary	Description	URL	Install Time
mercurial	2.4.1	Mercurial – a distributed SCM	Mercurial is a fast, lightweight source control management system designed for efficient handling of very large distributed projects. Quick start: http://www.selenic.com/mercurial/wiki/index.cgi/QuickStart Tutorial: http://www.selenic.com/mercurial/wiki/index.cgi/Tutorial Extensions: http://www.selenic.com/mercurial/wiki/index.cgi/CategoryExtension	http://www.selenic.com/mercurial/	Tue 23 Apr 2013 07:40:35 PM EDT

mesa-libGLU	9.0.0	Mesa libGLU library	Mesa implementation of the standard GLU OpenGL utility API.	http://mesa3d.org/	Thu 02 May 2013 12:32:48 AM EDT
mesa-libGLU	9.0.0	Mesa libGLU library	Mesa implementation of the standard GLU OpenGL utility API.	http://mesa3d.org/	Wed 20 Mar 2013 09:52:54 AM EDT
mesa-libxatracker	9.1	Mesa XA state tracker for vmware	Mesa XA state tracker for vmware	http://www.mesa3d.org	Sun 24 Mar 2013 04:49:03 PM EDT
microcode_ctl	2.0	Tool to transform and deploy CPU microcode update for x86.	The microcode_ctl utility is a companion to the microcode driver written by Tigran Aivazian <tigran@aivazian.fsnet.co.uk>. The microcode update is volatile and needs to be uploaded on each system boot i.e. it doesn't reflash your cpu permanently, reboot and it reverts back to the old microcode.	http://fedorahosted.org/microcode_ctl	Wed 20 Mar 2013 09:59:53 AM EDT
minicom	2.5	A text-based modem control and terminal emulation program	Minicom is a simple text-based modem control and terminal emulation program somewhat similar to MSDOS Telix. Minicom includes a dialing directory, full ANSI and VT100 emulation, an (external) scripting language, and other features.	http://alioth.debian.org/projects/minicom/	Sun 24 Mar 2013 04:49:06 PM EDT

Name	Version	Summary	Description	URL	Install Time
minizip	1.2.7	Library for manipulation with .zip archives	Minizip is a library for manipulation with files from .zip archives.	http://www.zlib.net/	Tue 26 Mar 2013 01:02:00 PM EDT
mjpegtools-libs	2.0.0	MJPEGtools libraries	The mjpeg programs are a set of tools that can do recording of videos and playback, simple cut-and-paste editing and the MPEG compression of audio and video under Linux. This package contains libraries which are used by mjpegtools and also by several other projects.	http://mjpeg.sourceforge.net/	Tue 26 Mar 2013 01:01:29 PM EDT
mlocate	0.26	An utility for finding files by name	mlocate is a locate/updatedb implementation. It keeps a database of all existing files and allows you to lookup files by name. The 'm' stands for "merging": updatedb reuses the existing database to avoid rereading most of the file system, which makes updatedb faster and does not trash the system caches as much as traditional locate implementations.	https://fedorahosted.org/mlocate/	Wed 20 Mar 2013 09:58:40 AM EDT
ModemManager	0.6.0.0	Mobile broadband modem management service	The ModemManager service provides a consistent API to operate many different modems, including mobile broadband (3G) devices.	http://www.gnome.org/projects/NetworkManager/	Sun 24 Mar 2013 04:48:59 PM EDT

Name	Version	Summary	Description	URL	Install Time
mono-addins	0.6.2	Addins for mono	Mono.Addins is a generic framework for creating extensible applications, and for creating libraries which extend those applications.	http://www.mono-project.com/Main_Page	Wed 20 Mar 2013 09:53:52 AM EDT
mono-core	2.10.8	The Mono CIL runtime, suitable for running .NET code	This package contains the core of the Mono runtime including its Virtual Machine, Just-in-time compiler, C# compiler, security tools and libraries (corlib, XML, System.Security, ZipLib, I18N, Cairo and Mono.*).	http://www.mono-project.com/Main_Page	Wed 20 Mar 2013 09:53:51 AM EDT
motif	2.3.4	Run-time libraries and programs	This is the Motif 2.3.4 run-time environment. It includes the Motif shared libraries, needed to run applications which are dynamically linked against Motif and the Motif Window Manager mwm.	http://www.motifzone.net/	Fri 05 Apr 2013 04:49:33 PM EDT
motif	2.3.4	Run-time libraries and programs	This is the Motif 2.3.4 run-time environment. It includes the Motif shared libraries, needed to run applications which are dynamically linked against Motif and the Motif Window Manager mwm.	http://www.motifzone.net/	Fri 05 Apr 2013 04:45:52 PM EDT
motif-devel	2.3.4	Development libraries and header files	This is the Motif 2.3.4 development environment. It includes the header files and also static libraries necessary to build Motif applications.	http://www.motifzone.net/	Fri 05 Apr 2013 04:49:33 PM EDT

Name	Version	Summary	Description	URL	Install Time
motif-devel	2.3.4	Development libraries and header files	This is the Motif 2.3.4 development environment. It includes the header files and also static libraries necessary to build Motif applications.	http://www.motifzone.net/	Fri 05 Apr 2013 04:45:53 PM EDT
motif-static	2.3.4	Static libraries	This package contains the static Motif libraries.	http://www.motifzone.net/	Fri 05 Apr 2013 04:49:34 PM EDT
motif-static	2.3.4	Static libraries	This package contains the static Motif libraries.	http://www.motifzone.net/	Fri 05 Apr 2013 04:45:53 PM EDT
mozilla-adblockplus	2.2.3	Adblocking extension for Mozilla Firefox, Thunderbird, and Seamonkey	Adblock Plus is a content-filtering extension for the Mozilla Firefox- and Mozilla Application Suite-based web browsers. Adblock Plus allows users to prevent page elements, such as advertisements, from being downloaded and displayed. It features improvements to the user interface, filter subscriptions, and element hiding over the original Adblock extension.	https://adblockplus.org/	Fri 05 Apr 2013 04:20:43 PM EDT
mozilla-filesystem	1.9	Mozilla filesystem layout	This package provides some directories required by packages which use Mozilla technologies such as NPAPI plugins or toolkit extensions.		Wed 20 Mar 2013 10:23:49 AM EDT

Name	Version	Summary	Description	URL	Install Time
mpage	2.5.6	A tool for printing multiple pages of text on each printed page	The mpage utility takes plain text files or PostScript(TM) documents as input, reduces the size of the text, and prints the files on a PostScript printer with several pages on each sheet of paper. Mpage is very useful for viewing large printouts without using up lots of paper. Mpage supports many different layout options for the printed pages.	http://www.mesa.nl/pub/mpage/	Wed 20 Mar 2013 09:59:53 AM EDT
mpfr	3.1.1	A C library for multiple-precision floating-point computations	The MPFR library is a C library for multiple-precision floating-point computations with "correct rounding". The MPFR is efficient and also has a well-defined semantics. It copies the good ideas from the ANSI/IEEE-754 standard for double-precision floating-point arithmetic (53-bit mantissa). MPFR is based on the GMP multiple-precision library.	http://www.mpfr.org/	Wed 20 Mar 2013 09:50:03 AM EDT
mpg123	1.14.4	MPEG audio player	Real time command line MPEG audio player for Layer 1, 2 and Layer3.	http://mpg123.org/	Tue 26 Mar 2013 01:15:41 PM EDT

Name	Version	Summary	Description	URL	Install Time
mpg321	0.2.13	Command line MPEG audio player (fixed-point calculations)	<p>mpg321 is a clone of the popular mpg123 command-line mp3 player. It should function as a drop-in replacement for mpg123 in many cases. While some of the functionality of mpg123 is not yet implemented, mpg321 should function properly in most cases for most people, such as for frontends such as gqmpeg.</p> <p>mpg321 is based on the mad MPEG audio decoding library. It therefore is highly accurate, and also uses only fixed-point calculation, making it more efficient on machines without a floating-point unit. It is not as fast as mpg123 on systems which have a floating point unit.</p>	http://mpg321.sourceforge.net/	Tue 26 Mar 2013 01:15:41 PM EDT

Name	Version	Summary	Description	URL	Install Time
mplayer	1.1	Movie player playing most video formats and DVDs	<p>MPlayer is a movie player that plays most MPEG, VOB, AVI, OGG/OGM, VIVO, ASF/WMA/WMV, QT/MOV/MP4, FLI, RM, NuppelVideo, yuv4mpeg, FILM, RoQ, and PVA files. You can also use it to watch VCDs, SVCDs, DVDs, 3ivx, RealMedia, and DivX movies. It supports a wide range of output drivers including X11, XVideo, DGA, OpenGL, SV-GAlib, fbdev, AAlib, DirectFB etc. There are also nice antialiased shaded subtitles and OSD. Non-default rpmbuild options: <code>--with samba</code>: Enable Samba (<code>smb://</code>) support <code>--with xmms</code>: Enable XMMS input plugin support <code>--without amr</code>: Disable AMR support <code>--with faac</code>: Enable FAAC support <code>--with libmad</code>: Enable libmad support <code>--with openal</code>: Enable OpenAL support <code>--with jack</code>: Enable JACK support <code>--with arts</code>: Enable aRts support <code>--with esound</code>: Enable Esound support <code>--with dga</code>: Enable DGA support <code>--with directfb</code>: Enable DirectFB support <code>--with svgalib</code>: Enable SVGAlib support <code>--with nemesi</code>: Enable libnemesi RTSP support</p>	http://www.mplayerhq.hu/	Tue 26 Mar 2013 01:02:24 PM EDT

Name	Version	Summary	Description	URL	Install Time
mplayer-common	1.1	MPlayer common files	This package contains common files for MPlayer packages.	http://www.mplayerhq.hu/	Tue 26 Mar 2013 01:02:24 PM EDT
mtdev	1.1.3	Multitouch Protocol Translation Library	mtdev is a stand-alone library which transforms all variants of kernel MT events to the slotted type B protocol. The events put into mtdev may be from any MT device, specifically type A without contact tracking, type A with contact tracking, or type B with contact tracking.	http://bitmath.org/code/mtdev/	Wed 20 Mar 2013 09:50:43 AM EDT
mtools	4.0.17	Programs for accessing MS-DOS disks without mounting the disks	Mtools is a collection of utilities for accessing MS-DOS files. Mtools allow you to read, write and move around MS-DOS filesystem files (normally on MS-DOS floppy disks). Mtools supports Windows95 style long file names, OS/2 XDF disks, and 2m disks Mtools should be installed if you need to use MS-DOS disks	http://mtools.linux.lu/	Wed 20 Mar 2013 09:51:20 AM EDT
mtr	0.82	A network diagnostic tool	Mtr is a network diagnostic tool that combines ping and traceroute into one program. Mtr provides two interfaces: an ncurses interface, useful for using Mtr from a telnet session; and a GTK+ interface for X (provided in the mtr-gtk package).	http://www.BitWizard.nl/mtr	Wed 20 Mar 2013 09:59:49 AM EDT

Name	Version	Summary	Description	URL	Install Time
mypaint	1.0.0	A fast and easy graphics application for digital painters	MyPaint is a fast and easy graphics application for digital painters. It lets you focus on the art instead of the program. You work on your canvas with minimum distractions, bringing up the interface only when you need it.	http://mypaint.intilinux.com/	Sun 24 Mar 2013 04:46:19 PM EDT
mypaint-data	1.0.0	Common data files for for mypaint	The mypaint-data package contains common data files for mypaint.	http://mypaint.intilinux.com/	Sun 24 Mar 2013 04:46:18 PM EDT
mysql	5.5.30	MySQL client programs and shared libraries	MySQL is a multi-user, multi-threaded SQL database server. MySQL is a client/server implementation consisting of a server daemon (mysqld) and many different client programs and libraries. The base package contains the standard MySQL client programs and generic MySQL files.	http://www.mysql.com	Sun 24 Mar 2013 04:45:45 PM EDT
mysql-embedded	5.5.30	MySQL as an embeddable library	MySQL is a multi-user, multi-threaded SQL database server. This package contains a version of the MySQL server that can be embedded into a client application instead of running as a separate process.	http://www.mysql.com	Sun 24 Mar 2013 04:45:02 PM EDT

Name	Version	Summary	Description	URL	Install Time
mysql-libs	5.5.30	The shared libraries required for MySQL clients	The mysql-libs package provides the essential shared libraries for any MySQL client program or interface. You will need to install this package to use any other MySQL package or any clients that need to connect to a MySQL server.	http://www.mysql.com	Sun 24 Mar 2013 04:44:45 PM EDT
mysql-server	5.5.30	The MySQL server and related files	MySQL is a multi-user, multi-threaded SQL database server. MySQL is a client/server implementation consisting of a server daemon (mysqld) and many different client programs and libraries. This package contains the MySQL server and some accompanying files and directories.	http://www.mysql.com	Sun 24 Mar 2013 04:45:46 PM EDT
mythes	1.2.3	A thesaurus library	MyThes is a simple thesaurus that uses a structured text data file and an index file with binary search to look up words and phrases and return information on part of speech, meanings, and synonyms.	http://hunspell.sourceforge.net/	Wed 20 Mar 2013 09:50:39 AM EDT
mythes-en	3.0	English thesaurus	English thesaurus.	http://www.danielnaber.de/wn2ooo/	Wed 20 Mar 2013 09:50:47 AM EDT
nano	2.3.1	A small text editor	GNU nano is a small and friendly text editor.	http://www.nano-editor.org	Wed 20 Mar 2013 09:59:03 AM EDT

Name	Version	Summary	Description	URL	Install Time
nautilus	3.6.3	File manager for GNOME	Nautilus is the file manager and graphical shell for the GNOME desktop that makes it easy to manage your files and the rest of your system. It allows to browse directories on local and remote filesystems, preview files and launch applications associated with them. It is also responsible for handling the icons on the GNOME desktop.	http://projects.gnome.org/nautilus/	Sun 24 Mar 2013 04:45:59 PM EDT
nautilus-extensions	3.6.3	Nautilus extensions library	This package provides the libraries used by nautilus extensions.	http://projects.gnome.org/nautilus/	Sun 24 Mar 2013 04:45:58 PM EDT
nautilus-image-converter	0.3.1	Nautilus extension to mass resize images	Adds a "Resize Images..." menu item to the context menu of all images. This opens a dialog where you set the desired image size and file name. A click on "Resize" finally resizes the image(s) using ImageMagick's convert tool.	http://www.bitron.ch/software/nautilus-image-converter.php	Wed 20 Mar 2013 09:57:07 AM EDT
nautilus-python	1.1	Python bindings for Nautilus	Python bindings for Nautilus	http://www.gnome.org/	Wed 20 Mar 2013 09:56:58 AM EDT

Name	Version	Summary	Description	URL	Install Time
ncurses	5.9	Ncurses support utilities	The curses library routines are a terminal-independent method of updating character screens with reasonable optimization. The ncurses (new curses) library is a freely distributable replacement for the discontinued 4.4 BSD classic curses library. This package contains support utilities, including a terminfo compiler tic, a decompiler infocmp, clear, tput, tset, and a termcap conversion tool captoinfo.	http://invisible-island.net/ncurses/ncurses.html	Thu 02 May 2013 12:33:06 AM EDT
ncurses-base	5.9	Descriptions of common terminals	This package contains descriptions of common terminals. Other terminal descriptions are included in the ncurses-term package.	http://invisible-island.net/ncurses/ncurses.html	Thu 02 May 2013 12:32:43 AM EDT
ncurses-devel	5.9	Development files for the ncurses library	The header files and libraries for developing applications that use the ncurses terminal handling library. Install the ncurses-devel package if you want to develop applications which will use ncurses.	http://invisible-island.net/ncurses/ncurses.html	Thu 02 May 2013 12:33:05 AM EDT

neon	0.29.6	An HTTP and WebDAV client library	neon is an HTTP and WebDAV client library, with a C interface; providing a high-level interface to HTTP and WebDAV methods along with a low-level interface for HTTP request handling. neon supports persistent connections, proxy servers, basic, digest and Kerberos authentication, and has complete SSL support.	http://www.webdav.org/neon/	Wed 20 Mar 2013 09:52:46 AM EDT

Name	Version	Summary	Description	URL	Install Time
nepomuk-core	4.10.2	Nepomuk Core utilities and libraries	Nepomuk Core utilities and libraries.	http://www.kde.org/	Tue 23 Apr 2013 09:34:52 AM EDT
nepomuk-core-libs	4.10.2	Runtime libraries for nepomuk-core	Runtime libraries for nepomuk-core.	http://www.kde.org/	Tue 23 Apr 2013 09:34:52 AM EDT
nepomuk-widgets	4.10.2	Nepomuk Widgets	Nepomuk Widgets.	http://www.kde.org/	Tue 23 Apr 2013 09:34:53 AM EDT
net-snmp	5.7.2	A collection of SNMP protocol tools and libraries	SNMP (Simple Network Management Protocol) is a protocol used for network management. The NET-SNMP project includes various SNMP tools: an extensible agent, an SNMP library, tools for requesting or setting information from SNMP agents, tools for generating and handling SNMP traps, a version of the netstat command which uses SNMP, and a Tk/Perl mib browser. This package contains the snmpd and snmptrapd daemons, documentation, etc. You will probably also want to install the net-snmp-utils package, which contains NET-SNMP utilities.	http://net-snmp.sourceforge.net/	Sun 24 Mar 2013 04:48:00 PM EDT
net-snmp-agent-libs	5.7.2	The NET-SNMP runtime agent libraries	The net-snmp-agent-libs package contains the runtime agent libraries for shared binaries and applications.	http://net-snmp.sourceforge.net/	Sun 24 Mar 2013 04:45:44 PM EDT

Name	Version	Summary	Description	URL	Install Time
net-snmp-libs	5.7.2	The NET-SNMP runtime client libraries	The net-snmp-libs package contains the runtime client libraries for shared binaries and applications.	http://net-snmp.sourceforge.net/	Sun 24 Mar 2013 04:44:46 PM EDT
net-tools	2.0	Basic networking tools	The net-tools package contains basic networking tools, including ifconfig, netstat, route, and others. Most of them are obsolete. For replacement check iproute package.	http://net-tools.sourceforge.net	Wed 20 Mar 2013 09:58:37 AM EDT
NetworkManager	0.9.8.1	Network connection manager and user applications	NetworkManager is a system network service that manages your network devices and connections, attempting to keep active network connectivity when available. It manages ethernet, WiFi, mobile broadband (WWAN), and PPPoE devices, and provides VPN integration with a variety of different VPN services.	http://www.gnome.org/projects/NetworkManager/	Tue 23 Apr 2013 09:35:50 AM EDT
NetworkManager-glib	0.9.8.1	Libraries for adding NetworkManager support to applications that use glib.	This package contains the libraries that make it easier to use some NetworkManager functionality from applications that use glib.	http://www.gnome.org/projects/NetworkManager/	Tue 23 Apr 2013 09:35:32 AM EDT
NetworkManager-openconnect	0.9.7.0	NetworkManager VPN integration for openconnect	This package contains software for integrating the openconnect VPN software with NetworkManager and the GNOME desktop	http://www.gnome.org/projects/NetworkManager/	Wed 20 Mar 2013 09:56:52 AM EDT

Name	Version	Summary	Description	URL	Install Time
NetworkManager-openvpn	0.9.3.99 7	NetworkManager VPN plugin for OpenVPN	This package contains software for integrating the OpenVPN VPN software with NetworkManager and the GNOME desktop.	http://www.gnome.org/projects/NetworkManager/	Wed 20 Mar 2013 09:56:53 AM EDT
NetworkManager-pptp	0.9.3.99 7	NetworkManager VPN plugin for pptp	This package contains software for integrating PPTP VPN support with the NetworkManager and the GNOME desktop.	http://www.gnome.org/projects/NetworkManager/	Wed 20 Mar 2013 09:56:53 AM EDT
NetworkManager-vpnc	0.9.3.99 7	NetworkManager VPN plugin for vpnc	This package contains software for integrating the vpnc VPN software with NetworkManager and the GNOME desktop	http://www.gnome.org/projects/NetworkManager/	Wed 20 Mar 2013 09:56:53 AM EDT
newt	0.52.14	A library for text mode user interfaces	Newt is a programming library for color text mode, widget based user interfaces. Newt can be used to add stacked windows, entry widgets, checkboxes, radio buttons, labels, plain text fields, scrollbars, etc., to text mode user interfaces. This package also contains the shared library needed by programs built with newt, as well as a /usr/bin/dialog replacement called whiptail. Newt is based on the slang library.	https://fedorahosted.org/newt/	Wed 20 Mar 2013 09:50:25 AM EDT

Name	Version	Summary	Description	URL	Install Time
newt-devel	0.52.14	Newt windowing toolkit development files	The newt-devel package contains the header files and libraries necessary for developing applications which use newt. Newt is a development library for text mode user interfaces. Newt is based on the slang library. Install newt-devel if you want to develop applications which will use newt.	https://fedorahosted.org/newt/	Fri 05 Apr 2013 04:34:39 PM EDT
newt-python	0.52.14	Python bindings for newt	The newt-python package contains the Python bindings for the newt library providing a python API for creating text mode interfaces.	https://fedorahosted.org/newt/	Wed 20 Mar 2013 09:52:31 AM EDT

Name	Version	Summary	Description	URL	Install Time
nfs-utils	1.2.7	NFS utilities and supporting clients and daemons for the kernel NFS server	<p>The nfs-utils package provides a daemon for the kernel NFS server and related tools, which provides a much higher level of performance than the traditional Linux NFS server used by most users.</p> <p>This package also contains the showmount program. Showmount queries the mount daemon on a remote host for information about the NFS (Network File System) server on the remote host. For example, showmount can display the clients which are mounted on that host.</p> <p>This package also contains the mount.nfs and umount.nfs program.</p>	http://sourceforge.net/projects/nfs	Tue 23 Apr 2013 09:36:40 AM EDT
nhn-nanum-gothic-fonts	3.020	Nanum fonts Gothic font faces	Nanum fonts are collection of commonly-used Myeongjo and Gothic Korean font families, designed by Sandoll Communication and Fontrix. The publisher is NHN Corporation. This package consists of the Nanum fonts Gothic font faces.	http://hangeul.naver.com/share.nhn	Wed 20 Mar 2013 09:59:30 AM EDT

Name	Version	Summary	Description	URL	Install Time
nmap	6.25	Network exploration tool and security scanner	Nmap is a utility for network exploration or security auditing. It supports ping scanning (determine which hosts are up), many port scanning techniques (determine what services the hosts are offering), and TCP/IP fingerprinting (remote host operating system identification). Nmap also offers flexible target and port specification, decoy scanning, determination of TCP sequence predictability characteristics, reverse-identd scanning, and more. In addition to the classic command-line nmap executable, the Nmap suite includes a flexible data transfer, redirection, and debugging tool (netcat utility ncat), a utility for comparing scan results (ndiff), and a packet generation and response analysis tool (nping).	http://nmap.org/	Tue 09 Apr 2013 02:37:45 PM EDT
nmap-frontend	6.25	The GTK+ front end for nmap	This package includes zenmap, a GTK+ front end for nmap. The nmap package must be installed before installing nmap front end.	http://nmap.org/	Tue 09 Apr 2013 02:37:45 PM EDT

Name	Version	Summary	Description	URL	Install Time
nmap-ncat	6.25	Nmap's Netcat replacement	Ncat is a feature packed networking utility which will read and write data across a network from the command line. It uses both TCP and UDP for communication and is designed to be a reliable back-end tool to instantly provide network connectivity to other applications and users. Ncat will not only work with IPv4 and IPv6 but provides the user with a virtually limitless number of potential uses.	http://nmap.org/	Sun 24 Mar 2013 04:49:03 PM EDT
notify-python	0.1.1	Python bindings for libnotify	Python bindings for libnotify	http://www.galago-project.org	Wed 20 Mar 2013 09:55:48 AM EDT
nspluginwrapper	1.4.4	A compatibility layer for Netscape 4 plugins	nspluginwrapper makes it possible to use Netscape 4 compatible plugins compiled for i386 architecture (e.g. flash-plugin) into Mozilla for another architecture, e.g. x86_64. This package consists in: * npviewer: the plugin viewer * npwrapper.so: the browser-side plugin * nspluginplayer: stand-alone NPAPI plugin player * mozilla-plugin-config: a tool to manage plugins installation and update	http://gwenole.beauchesne.info/projects/nspluginwrapper/	Thu 02 May 2013 12:33:06 AM EDT

Name	Version	Summary	Description	URL	Install Time
nss-myhostname	0.3	glibc plugin for local system host name resolution	nss-myhostname is a plugin for the GNU Name Service Switch (NSS) functionality of the GNU C Library (glibc) providing host name resolution for the locally configured system hostname as returned by gethostname(2). Various software relies on an always resolvable local host name. When using dynamic hostnames this is usually achieved by patching /etc/hosts at the same time as changing the host name. This however is not ideal since it requires a writable /etc file system and is fragile because the file might be edited by the administrator at the same time. nss-myhostname simply returns all locally configured public IP addresses, or – if none are configured – the IPv4 address 127.0.0.2 (which is on the local loopback) and the IPv6 address ::1 (which is the local host) for whatever system hostname is configured locally. Patching /etc/hosts is thus no longer necessary.	http://0pointer.de/lennart/projects/nss-myhostname/	Wed 20 Mar 2013 09:51:17 AM EDT
nss-softoken	3.14.3	Network Security Services Softoken Module	Network Security Services Softoken Cryptographic Module	http://www.mozilla.org/projects/security/pki/nss/	Thu 02 May 2013 12:32:46 AM EDT

ntfs-3g	2013.1.13	Linux NTFS userspace driver	NTFS-3G is a stable, open source, GPL licensed, POSIX, read/write NTFS driver for Linux and many other operating systems. It provides safe handling of the Windows XP, Windows Server 2003, Windows 2000, Windows Vista, Windows Server 2008 and Windows 7 NTFS file systems. NTFS-3G can create, remove, rename, move files, directories, hard links, and streams; it can read and write normal and transparently compressed files, including streams and sparse files; it can handle special files like symbolic links, devices, and FIFOs, ACL, extended attributes; moreover it provides full file access right and ownership support.	http://www.ntfs-3g.org/	Sun 24 Mar 2013 04:45:37 PM EDT
ntfsprogs	2013.1.13	NTFS filesystem libraries and utilities	The ntfsprogs package currently consists of a library and utilities such as mkntfs, ntfsctl, ntfsfix, ntfsresize, and ntfsundelete (for a full list of included utilities see man 8 ntfsprogs after installation).	http://www.ntfs-3g.org/	Sun 24 Mar 2013 04:45:37 PM EDT

Name	Version	Summary	Description	URL	Install Time
ntsysv	1.3.59	A tool to set the stop/start of system services in a runlevel	Ntsysv provides a simple interface for setting which system services are started or stopped in various runlevels (instead of directly manipulating the numerous symbolic links in /etc/rc.d). Unless you specify a runlevel or runlevels on the command line (see the man page), ntsysv configures the current runlevel (5 if you're using X).		Wed 20 Mar 2013 09:58:59 AM EDT
numactl	2.0.7	Library for tuning for Non Uniform Memory Access machines	Simple NUMA policy support. It consists of a numactl program to run other programs with a specific NUMA policy.	ftp://oss.sgi.com/www/projects/libnuma/download	Wed 20 Mar 2013 09:58:44 AM EDT
numactl-libs	2.0.7	libnuma libraries	numactl-libs provides libnuma, a library to do allocations with NUMA policy in applications.	ftp://oss.sgi.com/www/projects/libnuma/download	Wed 20 Mar 2013 09:50:44 AM EDT

Name	Version	Summary	Description	URL	Install Time
numpy	1.7.1	A fast multidimensional array facility for Python	<p>NumPy is a general-purpose array-processing package designed to efficiently manipulate large multi-dimensional arrays of arbitrary records without sacrificing too much speed for small multi-dimensional arrays. NumPy is built on the Numeric code base and adds features introduced by numarray as well as an extended C-API and the ability to create arrays of arbitrary type.</p> <p>There are also basic facilities for discrete fourier transform, basic linear algebra and random number generation. Also included in this package is a version of f2py that works properly with NumPy.</p>	http://numeric.scipy.org/	Tue 23 Apr 2013 09:35:53 AM EDT
obex-data-server	0.4.6	D-Bus service for Obex access	obex-data-server is a D-Bus service to allow sending and receiving files using the ObexFTP and Obex Push protocols, common on mobile phones and other Bluetooth-equipped devices.	http://tadas.dailyda.com/blog	Wed 20 Mar 2013 09:52:23 AM EDT
obexd	0.46	D-Bus service for Obex Client access	obexd contains obex-client, a D-Bus service to allow sending files using the Obex Push protocol, common on mobile phones and other Bluetooth-equipped devices.	http://www.bluez.org/	Wed 20 Mar 2013 09:51:09 AM EDT

openal-soft	1.15.1	Open Audio Library	OpenAL Soft is a cross-platform software implementation of the OpenAL 3D audio API. It's built off of the open-sourced Windows version available originally from the SVN repository at openal.org. OpenAL provides capabilities for playing audio in a virtual 3d environment. Distance attenuation, doppler shift, and directional sound emitters are among the features handled by the API. More advanced effects, including air absorption, low-pass filters, and reverb, are available through the EFX extension. It also facilitates streaming audio, multi-channel buffers, and audio capture.	http://kcat.strangesoft.net/openal.html	Sun 24 Mar 2013 04:44:54 PM EDT

Name	Version	Summary	Description	URL	Install Time
openbabel-libs	2.3.1	Chemistry software file format converter - libraries	Open Babel is a free, open-source version of the Babel chemistry file translation program. Open Babel is a project designed to pick up where Babel left off, as a cross-platform program and library designed to interconvert between many file formats used in molecular modeling, computational chemistry, and many related areas. This package contains the C++ library, which includes all of the file-translation code.	http://openbabel.org/	Wed 20 Mar 2013 09:53:10 AM EDT
opencc	0.3.0	Libraries for Simplified-Traditional Chinese Conversion	OpenCC is a library for converting characters and phrases between Traditional Chinese and Simplified Chinese.	http://code.google.com/p/opencc/	Wed 20 Mar 2013 09:52:45 AM EDT

Name	Version	Summary	Description	URL	Install Time
openCOLLADA	1.6.0	Collada 3D import and export libraries	COLLADA is a royalty-free XML schema that enables digital asset exchange within the interactive 3D industry. OpenCOLLADA is a Google summer of code opensource project providing libraries for 3D file interchange between applications like blender. COLLADABaseUtils Utils used by many of the other projects COLLADAFramework Datamodel used to load COLLADA files COLLADASTreamWriter Sources (Library to write COLLADA files) COLLADASaxFrameworkLoader Library that loads COLLADA files in a sax like manner into the framework data model COLLADAValidator XML validator for COLLADA files, based on the COLLADASaxFrameworkLoader GeneratedSaxParser Library used to load xml files in the way used by COLLADASaxFrameworkLoader	http://www.opencollada.org/	Wed 20 Mar 2013 09:51:19 AM EDT

Name	Version	Summary	Description	URL	Install Time
OpenColorIO	1.0.8	Enables color transforms and image display across graphics apps	OCIO enables color transforms and image display to be handled in a consistent manner across multiple graphics applications. Unlike other color management solutions, OCIO is geared towards motion-picture post production, with an emphasis on visual effects and animation color pipelines.	http://opencolorio.org/	Sun 24 Mar 2013 04:44:52 PM EDT
openconnect	4.08	Open client for Cisco AnyConnect VPN	This package provides a client for Cisco's "AnyConnect" VPN, which uses HTTPS and DTLS protocols.	http://www.infradead.org/openconnect.html	Sun 24 Mar 2013 04:44:57 PM EDT
opencore-amr	0.1.3	OpenCORE Adaptive Multi Rate Narrowband and Wideband speech lib	Library of OpenCORE Framework implementation of Adaptive Multi Rate Narrowband and Wideband speech codec.	http://sourceforge.net/projects/opencore-amr/	Tue 26 Mar 2013 01:01:29 PM EDT
opencv	2.4.3	Collection of algorithms for computer vision	OpenCV means Intel Open Source Computer Vision Library. It is a collection of C functions and a few C++ classes that implement some popular Image Processing and Computer Vision algorithms.	http://opencv.willowgarage.com/wiki/	Wed 20 Mar 2013 09:53:21 AM EDT
OpenEXR-libs	1.7.1	OpenEXR runtime libraries	OpenEXR runtime libraries.	http://www.openexr.com/	Wed 20 Mar 2013 09:49:48 AM EDT

Name	Version	Summary	Description	URL	Install Time
OpenGTL	0.9.18	Graphics Transformation Languages	OpenGTL provides tools, languages and libraries to create generic transformations for graphics. These transformations can be used by different programs, e.g. Krita, Gimp, CinePaint, etc.	http://opengtl.org/	Fri 05 Apr 2013 04:36:20 PM EDT
OpenGTL-libs	0.9.18	Runtime libraries for OpenGTL	Runtime libraries for OpenGTL.	http://opengtl.org/	Fri 05 Apr 2013 04:36:20 PM EDT
OpenImageIO	1.0.11	Library for reading and writing images	OpenImageIO is a library for reading and writing images, and a bunch of related classes, utilities, and applications. Main features include: - Extremely simple but powerful ImageInput and ImageOutput APIs for reading and writing 2D images that is format agnostic. - Format plugins for TIFF, JPEG/JFIF, OpenEXR, PNG, HDR/RGBE, Targa, JPEG-2000, DPX, Cineon, FITS, BMP, ICO, RMan Zfile, Softimage PIC, DDS, SGI, PNM/PPM/PGM/PBM, Field3d. - An ImageCache class that transparently manages a cache so that it can access truly vast amounts of image data.	https://sites.google.com/site/openimageio/home	Sun 24 Mar 2013 04:45:06 PM EDT
openjpeg-libs	1.5.1	JPEG 2000 codec runtime library	The openjpeg-libs package contains runtime libraries for applications that use OpenJPEG.	http://code.google.com/p/openjpeg/	Wed 20 Mar 2013 09:50:01 AM EDT

Name	Version	Summary	Description	URL	Install Time
openldap	2.4.34	LDAP support libraries	OpenLDAP is an open source suite of LDAP (Lightweight Directory Access Protocol) applications and development tools. LDAP is a set of protocols for accessing directory services (usually phone book style information, but other information is possible) over the Internet, similar to the way DNS (Domain Name System) information is propagated over the Internet. The openldap package contains configuration files, libraries, and documentation for OpenLDAP.	http://www.openldap.org/	Thu 02 May 2013 12:32:48 AM EDT
openldap	2.4.34	LDAP support libraries	OpenLDAP is an open source suite of LDAP (Lightweight Directory Access Protocol) applications and development tools. LDAP is a set of protocols for accessing directory services (usually phone book style information, but other information is possible) over the Internet, similar to the way DNS (Domain Name System) information is propagated over the Internet. The openldap package contains configuration files, libraries, and documentation for OpenLDAP.	http://www.openldap.org/	Wed 27 Mar 2013 12:47:29 PM EDT

Name	Version	Summary	Description	URL	Install Time
openldap-devel	2.4.34	LDAP development libraries and header files	The openldap-devel package includes the development libraries and header files needed for compiling applications that use LDAP (Lightweight Directory Access Protocol) internals. LDAP is a set of protocols for enabling directory services over the Internet. Install this package only if you plan to develop or will need to compile customized LDAP clients.	http://www.openldap.org/	Fri 05 Apr 2013 04:34:39 PM EDT
openobex	1.5	Library for using OBEX	OBEX (OBject EXchange) is a protocol usually used by various mobile devices to exchange all kind of objects like files, pictures, calendar entries (vCal) and business cards (vCard). This package contains the Open OBEX shared C library.	http://openobex.sourceforge.net	Sun 24 Mar 2013 04:49:07 PM EDT
openslp	1.2.1	Open implementation of Service Location Protocol V2	Service Location Protocol is an IETF standards track protocol that provides a framework to allow networking applications to discover the existence, location, and configuration of networked services in enterprise networks. OpenSLP is an open source implementation of the SLPv2 protocol as defined by RFC 2608 and RFC 2614.	http://sourceforge.net/projects/openslp/	Wed 20 Mar 2013 09:51:09 AM EDT

Name	Version	Summary	Description	URL	Install Time
openssh	6.1p1	An open source implementation of SSH protocol versions 1 and 2	<p>SSH (Secure SHell) is a program for logging into and executing commands on a remote machine. SSH is intended to replace rlogin and rsh, and to provide secure encrypted communications between two untrusted hosts over an insecure network. X11 connections and arbitrary TCP/IP ports can also be forwarded over the secure channel.</p> <p>OpenSSH is OpenBSD's version of the last free version of SSH, bringing it up to date in terms of security and features. This package includes the core files necessary for both the OpenSSH client and server. To make this package useful, you should also install openssh-clients, openssh-server, or both.</p>	http://www.openssh.com/portable.html	Sun 24 Mar 2013 04:45:11 PM EDT
openssh-clients	6.1p1	An open source SSH client applications	OpenSSH is a free version of SSH (Secure SHell), a program for logging into and executing commands on a remote machine. This package includes the clients necessary to make encrypted connections to SSH servers.	http://www.openssh.com/portable.html	Sun 24 Mar 2013 04:45:11 PM EDT

Name	Version	Summary	Description	URL	Install Time
openssh-server	6.1p1	An open source SSH server daemon	OpenSSH is a free version of SSH (Secure SHell), a program for logging into and executing commands on a remote machine. This package contains the secure shell daemon (sshd). The sshd daemon allows SSH clients to securely connect to your SSH server.	http://www.openssh.com/portable.html	Sun 24 Mar 2013 04:48:34 PM EDT
openssl	1.0.1e	Utilities from the general purpose cryptography library with TLS implementation	The OpenSSL toolkit provides support for secure communications between machines. OpenSSL includes a certificate management tool and shared libraries which provide various cryptographic algorithms and protocols.	http://www.openssl.org/	Sun 24 Mar 2013 04:49:04 PM EDT
openssl-devel	1.0.1e	Files for development of applications which will use OpenSSL	OpenSSL is a toolkit for supporting cryptography. The openssl-devel package contains include files needed to develop applications which support various cryptographic algorithms and protocols.	http://www.openssl.org/	Fri 05 Apr 2013 04:34:38 PM EDT
openssl-libs	1.0.1e	A general purpose cryptography library with TLS implementation	OpenSSL is a toolkit for supporting cryptography. The openssl-libs package contains the libraries that are used by various applications which support cryptographic algorithms and protocols.	http://www.openssl.org/	Thu 02 May 2013 12:32:49 AM EDT

Name	Version	Summary	Description	URL	Install Time
openssl-lib	1.0.1e	A general purpose cryptography library with TLS implementation	OpenSSL is a toolkit for supporting cryptography. The openssl-lib package contains the libraries that are used by various applications which support cryptographic algorithms and protocols.	http://www.openssl.org/	Sun 24 Mar 2013 04:44:41 PM EDT
openvpn	2.2.2	A full-featured SSL VPN solution	OpenVPN is a robust and highly flexible tunneling application that uses all of the encryption, authentication, and certification features of the OpenSSL library to securely tunnel IP networks over a single UDP or TCP port. It can use the Marcus Franz Xavier Johannes Oberhumer's LZO library for compression.	http://openvpn.net/	Wed 20 Mar 2013 09:54:00 AM EDT
oprofile	0.9.8	System wide profiler	OProfile is a profiling system for systems running Linux. The profiling runs transparently during the background, and profile data can be collected at any time. OProfile makes use of the hardware performance counters provided on Intel P6, and AMD Athlon family processors, and can use the RTC for profiling on other x86 processor types. See the HTML documentation for further details.	http://oprofile.sf.net	Sun 24 Mar 2013 04:44:56 PM EDT

Name	Version	Summary	Description	URL	Install Time
oprofile-gui	0.9.8	GUI for oprofile	The oprof.start GUI for oprofile.	http://oprofile.sf.net	Sun 24 Mar 2013 04:47:46 PM EDT
optipng	0.7.4	PNG optimizer and converter	OptiPNG is a PNG optimizer that recompresses image files to a smaller size, without losing any information. This program also converts external formats (BMP, GIF, PNM and TIFF) to optimized PNG, and performs PNG integrity checks and corrections.	http://optipng.sourceforge.net/	Wed 20 Mar 2013 09:59:02 AM EDT
opus	1.0.2	An audio codec for use in low-delay speech and audio communication	The Opus codec is designed for interactive speech and audio transmission over the Internet. It is designed by the IETF Codec Working Group and incorporates technology from Skype's SILK codec and Xiph.Org's CELT codec.	http://www.opus-codec.org/	Sun 24 Mar 2013 04:45:48 PM EDT

Name	Version	Summary	Description	URL	Install Time
ORBit2	2.14.19	A high-performance CORBA Object Request Broker	ORBit is a high-performance CORBA (Common Object Request Broker Architecture) ORB (object request broker). It allows programs to send requests and receive replies from other programs, regardless of the locations of the two programs. CORBA is an architecture that enables communication between program objects, regardless of the programming language they're written in or the operating system they run on. You will need to install this package and ORBit-devel if you want to write programs that use CORBA technology.	http://www.gnome.org/projects/ORBit2	Wed 20 Mar 2013 09:51:13 AM EDT
orc	0.4.17	The Oil Run-time Compiler	Orc is a library and set of tools for compiling and executing very simple programs that operate on arrays of data. The "language" is a generic assembly language that represents many of the features available in SIMD architectures, including saturated addition and subtraction, and many arithmetic operations.	http://cgit.freedesktop.org/gstreamer/orc/	Tue 23 Apr 2013 09:36:44 AM EDT

paps	0.6.8	Plain Text to PostScript converter	paps is a PostScript converter from plain text file using Pango.	http://paps.sourceforge.net/	Wed 20 Mar 2013 09:58:21 AM EDT
paps-libs	0.6.8	Libraries for paps	paps is a PostScript converter from plain text file using Pango. This package contains the library for paps.	http://paps.sourceforge.net/	Wed 20 Mar 2013 09:53:39 AM EDT

Name	Version	Summary	Description	URL	Install Time
paratype-pt-sans-fonts	20101909	A pan-Cyrillic typeface	<p>The PT Sans family was developed as part of the Public Types of Russian Federation project. This project aims at enabling the peoples of Russia to read and write their native languages, using free/libre fonts. It is dedicated to the 300-year anniversary of the Russian civil type invented by Peter the Great from 1708 to 1710, and was realized with financial support from the Russian Federal Agency for Press and Mass Communications.</p> <p>The fonts include support for all 54 title languages of the Russian Federation as well as more common Western, Central European and Cyrillic blocks making them unique and a very important tool for modern digital communications.</p> <p>PT Sans is a grotesque font based on Russian type designs of the second part of the 20th century. However, it also includes very distinctive features of modern humanistic design, fulfilling present day aesthetic and functional requirements.</p> <p>It was designed by Alexandra Korolkova, Olga Umpeleva and Vladimir Yefimov and released by ParaType.</p> <p>A title language is named after an ethnic group.</p> <p>This package includes the four basic styles and two narrows styles for economic setting.</p>	http://www.paratype.com/public/	Wed 20 Mar 2013 09:59:19 AM EDT

Name	Version	Summary	Description	URL	Install Time
parley	4.10.2	Vocabulary Trainer	Vocabulary Trainer.	https://projects.kde.org/projects/kde/kdeedu/parley	Tue 23 Apr 2013 09:36:00 AM EDT
parted	3.1	The GNU disk partition manipulation program	The GNU Parted program allows you to create, destroy, resize, move, and copy hard disk partitions. Parted can be used for creating space for new operating systems, reorganizing disk usage, and copying data to new hard disks.	http://www.gnu.org/software/parted	Sun 24 Mar 2013 04:44:57 PM EDT
passwd	0.78.99	An utility for setting or changing passwords using PAM	This package contains a system utility (passwd) which sets or changes passwords, using PAM (Pluggable Authentication Modules) library.	http://fedorahosted.org/passwd	Wed 20 Mar 2013 09:52:03 AM EDT

Name	Version	Summary	Description	URL	Install Time
passwdqc	1.2.2	A password/passphrase strength checking and policy enforcement toolset	<p>passwdqc is a password/passphrase strength checking and policy enforcement toolset, including a PAM module (pam_passwdqc), command-line programs (pwqcheck and pwqgen), and a library (libpasswdqc).</p> <p>pam_passwdqc is normally invoked on password changes by programs such as passwd(1). It is capable of checking password or passphrase strength, enforcing a policy, and offering randomly-generated passphrases, with all of these features being optional and easily (re-)configurable.</p> <p>pwqcheck and pwqgen are standalone password/passphrase strength checking and random passphrase generator programs, respectively, which are usable from scripts.</p> <p>libpasswdqc is the underlying library, which may also be used from third-party programs.</p>	http://www.openwall.com/passwdqc/	Wed 20 Mar 2013 09:58:40 AM EDT
passwdqc-lib	1.2.2	Libraries for building passwdqc-aware applications	This package contains libpasswdqc library.	http://www.openwall.com/passwdqc/	Wed 20 Mar 2013 09:52:47 AM EDT

Name	Version	Summary	Description	URL	Install Time
patch	2.6.1	Utility for modifying/upgrading files	The patch program applies diff files to originals. The diff command is used to compare an original to a changed file. Diff lists the changes made to the file. A person who has the original file can then use the patch command with the diff file to add the changes to their original file (patching the file). Patch should be installed because it is a common way of upgrading applications.	http://www.gnu.org/software/patch/patch.html	Wed 20 Mar 2013 09:50:39 AM EDT
patchutils	0.3.2	A collection of programs for manipulating patch files	This is a collection of programs that can manipulate patch files in a variety of ways, such as interpolating between two pre-patches, combining two incremental patches, fixing line numbers in hand-edited patches, and simply listing the files modified by a patch.	http://cyberelk.net/tim/patchutils/	Wed 20 Mar 2013 09:58:44 AM EDT
pax	3.4	POSIX File System Archiver	'pax' is the POSIX standard archive tool. It supports the two most common forms of standard Unix archive (backup) files - CPIO and TAR.	ftp://ftp.suse.com/pub/people/kukuk/pax/	Wed 20 Mar 2013 11:29:36 AM EDT

Name	Version	Summary	Description	URL	Install Time
pciutils	3.1.10	PCI bus related utilities	The pciutils package contains various utilities for inspecting and setting devices connected to the PCI bus. The utilities provided require kernel version 2.1.82 or newer (which support the /proc/bus/pci interface).	http://atrey.karlin.mff.cuni.cz/~{mj}/pciutils.shtml	Wed 20 Mar 2013 09:50:49 AM EDT
pciutils-devel	3.1.10	Linux PCI development library	This package contains a library for inspecting and setting devices connected to the PCI bus.	http://atrey.karlin.mff.cuni.cz/~{mj}/pciutils.shtml	Fri 05 Apr 2013 04:34:46 PM EDT
pciutils-libs	3.1.10	Linux PCI library	This package contains a library for inspecting and setting devices connected to the PCI bus.	http://atrey.karlin.mff.cuni.cz/~{mj}/pciutils.shtml	Wed 20 Mar 2013 09:50:24 AM EDT
pcmciautils	018	PCMCIA utilities and initialization programs	The pcmciautils package contains utilities for initializing and debugging PCMCIA and Cardbus sockets.	http://www.kernel.org/pub/linux/utils/kernel/pcmcia/pcmcia.html	Wed 20 Mar 2013 10:00:14 AM EDT
pcre	8.31	Perl-compatible regular expression library	Perl-compatible regular expression library. PCRE has its own native API, but a set of "wrapper" functions that are based on the POSIX API are also supplied in the library libpcreposix. Note that this just provides a POSIX calling interface to PCRE: the regular expressions themselves still follow Perl syntax and semantics. The header file for the POSIX-style functions is called pcreposix.h.	http://www.pcre.org/	Fri 05 Apr 2013 04:24:05 PM EDT

Name	Version	Summary	Description	URL	Install Time

pcsc-lite-devel	1.8.7	PC/SC Lite development files	PC/SC Lite development files.	http://pcsclite.alioth.debian.org/	Fri 05 Apr 2013 04:34:46 PM EDT
pcsc-lite-lib	1.8.7	PC/SC Lite libraries	PC/SC Lite libraries.	http://pcsclite.alioth.debian.org/	Wed 20 Mar 2013 09:50:17 AM EDT
perl	5.16.3	Practical Extraction and Report Language	Perl is a high-level programming language with roots in C, sed, awk and shell scripting. Perl is good at handling processes and files, and is especially good at handling text. Perl's hallmarks are practicality and efficiency. While it is used to do a lot of different things, Perl's most common applications are system administration utilities and web programming. A large proportion of the CGI scripts on the web are written in Perl. You need the perl package installed on your system so that your system can handle Perl scripts. Install this package if you want to program in Perl or enable your system to handle Perl scripts.	http://www.perl.org/	Tue 23 Apr 2013 09:34:27 AM EDT

Name	Version	Summary	Description	URL	Install Time
perl-AnyEvent	7.04	Framework for multiple event loops	AnyEvent provides an identical interface to multiple event loops. This allows module authors to utilize an event loop without forcing module users to use the same event loop (as multiple event loops cannot coexist peacefully at any one time).	http://search.cpan.org/dist/AnyEvent/	Sun 24 Mar 2013 04:45:41 PM EDT
perl-AnyEvent-AIO	1.1	Truly asynchronous file and directory I/O	Truly asynchronous file and directory I/O.	http://search.cpan.org/dist/AnyEvent-AIO/	Sun 24 Mar 2013 04:45:41 PM EDT
perl-AnyEvent-BDB	1.1	Truly asynchronous Berkeley DB access	This module is an AnyEvent user, you need to make sure that you use and run a supported event loop.	http://search.cpan.org/dist/AnyEvent-BDB/	Sun 24 Mar 2013 04:45:41 PM EDT
perl-BDB	1.90	Asynchronous Berkeley DB access	Asynchronous Berkeley DB access.	http://search.cpan.org/dist/BDB/	Sun 24 Mar 2013 04:45:41 PM EDT
perl-Carp	1.26	Alternative warn and die for modules	The Carp routines are useful in your own modules because they act like die() or warn(), but with a message which is more likely to be useful to a user of your module. In the case of cluck, confess, and longmess that context is a summary of every call in the call-stack. For a shorter message you can use carp or croak which report the error as being from where your module was called. There is no guarantee that that is where the error was, but it is a good educated guess.	http://www.perl.org/	Tue 23 Apr 2013 09:34:24 AM EDT

Name	Version	Summary	Description	URL	Install Time
perl-CGI	3.59	Handle Common Gateway Interface requests and responses	CGI.pm is a stable, complete and mature solution for processing and preparing HTTP requests and responses. Major features including processing form submissions, file uploads, reading and writing cookies, query string generation and manipulation, and processing and preparing HTTP headers. Some HTML generation utilities are included as well. CGI.pm performs very well in in a vanilla CGI.pm environment and also comes with built-in support for mod_perl and mod_perl2 as well as FastCGI.	http://search.cpan.org/dist/CGI	Wed 20 Mar 2013 11:29:36 AM EDT
perl-Class-ISA	0.36	Report the search path for a class's ISA tree	This library provides functions that return the list (in order) of names of (super-)classes Perl would search to find a method, with no duplicates.	http://search.cpan.org/dist/Class-ISA/	Wed 20 Mar 2013 11:29:36 AM EDT

Name	Version	Summary	Description	URL	Install Time
perl-common-sense	3.6	"Common sense" Perl defaults	This module implements some sane defaults for Perl programs, as defined by two typical (or not so typical - use your common sense) specimens of Perl coders: It's supposed to be mostly the same, with much lower memory usage, as: use utf8; use strict qw(vars subs); use feature qw(say state switch); use feature qw(unicode_strings unicode_eval current_sub fc evalbytes); no feature qw(array_base); no warnings; use warnings qw(FATAL closed threads internal debugging pack portable prototype inplace io pipe unpack malloc deprecated glob digit printf layer reserved taint closure semicolon); no warnings qw(exec newline unopened);	http://search.cpan.org/dist/common-sense	Sun 24 Mar 2013 04:45:41 PM EDT
perl-Compress-Raw-Bzip2	2.059	Low-level interface to bzip2 compression library	This module provides a Perl interface to the bzip2 compression library. It is used by IO::Compress::Bzip2.	http://search.cpan.org/dist/Compress-Raw-Bzip2/	Wed 20 Mar 2013 09:50:57 AM EDT
perl-Compress-Raw-Zlib	2.059	Low-level interface to the zlib compression library	The Compress::Raw::Zlib module provides a Perl interface to the zlib compression library, which is used by IO::Compress::Zlib.	http://search.cpan.org/dist/Compress-Raw-Zlib/	Wed 20 Mar 2013 09:50:56 AM EDT

Name	Version	Summary	Description	URL	Install Time
perl-Coro	6.09	The only real threads in perl	This module collection manages continuations in general, most often in the form of cooperative threads (also called coros, or simply "coro" in the documentation). They are similar to kernel threads but don't (in general) run in parallel at the same time even on SMP machines. The specific flavor of thread offered by this module also guarantees you that it will not switch between threads unless necessary, at easily-identified points in your program, so locking and parallel access are rarely an issue, making thread programming much safer and easier than using other thread models.	http://search.cpan.org/dist/Coro/	Sun 24 Mar 2013 04:45:43 PM EDT
perl-CPAN	1.9800	Query, download and build perl modules from CPAN sites	Query, download and build perl modules from CPAN sites.	http://www.perl.org/	Tue 23 Apr 2013 09:36:01 AM EDT
perl-Data-Dumper	2.135.06	Stringify perl data structures, suitable for printing and eval	Given a list of scalars or reference variables, writes out their contents in perl syntax. The references can also be objects. The content of each variable is output in a single Perl statement. Handles self-referential structures correctly.	http://www.perl.org/	Tue 23 Apr 2013 09:34:27 AM EDT

Name	Version	Summary	Description	URL	Install Time
perl-Date-Manip	6.32	Date manipulation routines	Date::Manip is a series of modules designed to make any common date/time operation easy to do. Operations such as comparing two times, determining a data a given amount of time from another, or parsing international times are all easily done. It deals with time as it is used in the Gregorian calendar (the one currently in use) with full support for time changes due to daylight saving time.	http://search.cpan.org/dist/Date-Manip/	Wed 20 Mar 2013 09:51:05 AM EDT
perl-DBD-MySQL	4.022	A MySQL interface for perl	An implementation of DBI for MySQL for Perl.	http://search.cpan.org/dist/DBD-mysql/	Wed 20 Mar 2013 09:50:56 AM EDT
perl-DBI	1.623	A database access API for perl	DBI is a database access Application Programming Interface (API) for the Perl Language. The DBI API Specification defines a set of functions, variables and conventions that provide a consistent database interface independent of the actual database being used.	http://dbi.perl.org/	Sun 24 Mar 2013 04:45:44 PM EDT
perl-devel	5.16.3	Header #files for use in perl development	This package contains header files and development modules. Most perl packages will need to install perl-devel to build.	http://www.perl.org/	Tue 23 Apr 2013 09:35:08 AM EDT

Name	Version	Summary	Description	URL	Install Time
perl-Digest	1.17	Modules that calculate message digests	The Digest:: modules calculate digests, also called "fingerprints" or "hashes", of some data, called a message. The digest is (usually) some small/fixed size string. The actual size of the digest depend of the algorithm used. The message is simply a sequence of arbitrary bytes or bits.	http://www.perl.org/	Tue 23 Apr 2013 09:34:49 AM EDT
perl-Digest-SHA	5.74	Perl extension for SHA-1/224/256/384/512	Digest::SHA is a complete implementation of the NIST Secure Hash Standard. It gives Perl programmers a convenient way to calculate SHA-1, SHA-224, SHA-256, SHA-384, SHA-512, SHA-512/224, and SHA-512/256 message digests. The module can handle all types of input, including partial-byte data.	http://search.cpan.org/dist/Digest-SHA/	Wed 20 Mar 2013 11:29:35 AM EDT
perl-Encode-Locale	1.03	Determine the locale encoding	In many applications it's wise to let Perl use Unicode for the strings it processes. Most of the interfaces Perl has to the outside world is still byte based. Programs therefore needs to decode byte strings that enter the program from the outside and encode them again on the way out.	http://search.cpan.org/dist/Encode-Locale/	Wed 20 Mar 2013 09:50:56 AM EDT

Name	Version	Summary	Description	URL	Install Time
perl-Error	0.17018	Error/exception handling in an OO-ish way	The Error package provides two interfaces. Firstly Error provides a procedural interface to exception handling. Secondly Error is a base class for errors/exceptions that can either be thrown, for subsequent catch, or can simply be recorded.	http://search.cpan.org/dist/Error/	Wed 20 Mar 2013 09:50:56 AM EDT

Name	Version	Summary	Description	URL	Install Time
perl-EV	4.11	Wrapper for the libev high-performance event loop library	<p>This module provides an interface to libev (http://software.schmorp.de/pkg/libev.html).</p> <p>While the included documentation is comprehensive, one might also consult the documentation of libev itself (http://cvs.schmorp.de/libev/ev.html) for more subtle details on watcher semantics or some discussion on the available backends, or how to force</p>	http://search.cpan.org/dist/EV/	Sun 24 Mar 2013 04:45:41 PM EDT

Name	Version	Summary	Description	URL	Install Time
perl-Event	1.20	Event loop processing	The Event module provide a central facility to watch for various types of events and invoke a callback when these events occur. The idea is to delay the handling of events so that they may be dispatched in priority order when it is safe for callbacks to execute.	http://search.cpan.org/dist/Event/	Sun 24 Mar 2013 04:45:43 PM EDT
perl-ExtUtils-Install	1.58	Install files from here to there	Handles the installing and uninstalling of perl modules, scripts, man pages, etc.	http://www.perl.org/	Tue 23 Apr 2013 09:35:08 AM EDT
perl-ExtUtils-MakeMaker	6.63.2	Create a module Makefile	Create a module Makefile.	http://www.perl.org/	Tue 23 Apr 2013 09:35:08 AM EDT
perl-ExtUtils-Manifest	1.61	Utilities to write and check a MANIFEST file	Utilities to write and check a MANIFEST file.	http://www.perl.org/	Tue 23 Apr 2013 09:35:08 AM EDT
perl-ExtUtils-ParseXS	3.16	Module and a script for converting Perl XS code into C code	ExtUtils::ParseXS will compile XS code into C code by embedding the constructs necessary to let C functions manipulate Perl values and creates the glue necessary to let Perl access those functions.	http://www.perl.org/	Tue 23 Apr 2013 09:35:08 AM EDT
perl-FCGI	0.74	FastCGI Perl bindings	Test suite for package perl-FCGI.	http://search.cpan.org/dist/FCGI	Wed 20 Mar 2013 11:29:36 AM EDT
perl-File-Listing	6.04	Parse directory listing	This module exports a single function called <code>parse_dir()</code> , which can be used to parse directory listings.	http://search.cpan.org/dist/File-Listing/	Wed 20 Mar 2013 09:50:58 AM EDT

Name	Version	Summary	Description	URL	Install Time
perl-Filter	1.48	Perl source filters	Source filters alter the program text of a module before Perl sees it, much as a C preprocessor alters the source text of a C program before the compiler sees it.	http://search.cpan.org/dist/Filter/	Tue 23 Apr 2013 09:34:24 AM EDT
perl-Git	1.8.1.4	Perl interface to Git	Perl interface to Git.	http://git-scm.com/	Tue 26 Mar 2013 01:26:02 PM EDT
perl-Guard	1.022	Safe cleanup blocks	This module implements so-called "guards". A guard is something (usually an object) that "guards" a resource, ensuring that it is cleaned up when expected.	http://search.cpan.org/dist/Guard/	Sun 24 Mar 2013 04:45:43 PM EDT
perl-HTML-Parser	3.69	Perl module for parsing HTML	The HTML-Parser module for perl to parse and extract information from HTML documents, including the HTML::Entities, HTML::HeadParser, HTML::LinkExtor, HTML::PullParser, and HTML::Tokenizer modules.	http://search.cpan.org/dist/HTML-Parser/	Wed 20 Mar 2013 09:50:58 AM EDT
perl-HTML-Tagset	3.20	HTML::Tagset - data tables useful in parsing HTML	This module contains several data tables useful in various kinds of HTML parsing operations, such as tag and entity names.	http://search.cpan.org/dist/HTML-Tagset/	Wed 20 Mar 2013 09:50:57 AM EDT

Name	Version	Summary	Description	URL	Install Time
perl-HTTP-Cookies	6.01	HTTP cookie jars	This class is for objects that represent a "cookie jar" – that is, a database of all the HTTP cookies that a given LWP::UserAgent object knows about.	http://search.cpan.org/dist/HTTP-Cookies/	Wed 20 Mar 2013 09:50:58 AM EDT
perl-HTTP-Daemon	6.01	Simple HTTP server class	Instances of the HTTP::Daemon class are HTTP/1.1 servers that listen on a socket for incoming requests. The HTTP::Daemon is a subclass of IO::Socket::INET, so you can perform socket operations directly on it too.	http://search.cpan.org/dist/HTTP-Daemon/	Wed 20 Mar 2013 09:50:58 AM EDT
perl-HTTP-Date	6.02	Date conversion routines	This module provides functions that deal the date formats used by the HTTP protocol (and then some more). Only the first two functions, time2str() and str2time(), are exported by default.	http://search.cpan.org/dist/HTTP-Date/	Wed 20 Mar 2013 09:50:57 AM EDT
perl-HTTP-Message	6.03	HTTP style message	The HTTP-Message distribution contains classes useful for representing the messages passed in HTTP style communication. These are classes representing requests, responses and the headers contained within them.	http://search.cpan.org/dist/HTTP-Message/	Wed 20 Mar 2013 09:50:58 AM EDT

Name	Version	Summary	Description	URL	Install Time
perl-HTTP-Negotiate	6.01	Choose a variant to serve	This module provides a complete implementation of the HTTP content negotiation algorithm specified in draft-ietf-http-v11-spec-00.ps chapter 12. Content negotiation allows for the selection of a preferred content representation based upon attributes of the negotiable variants and the value of the various Accept* header fields in the request.	http://search.cpan.org/dist/HTTP-Negotiate/	Wed 20 Mar 2013 09:50:58 AM EDT
perl-HTTP-Tiny	0.017	A small, simple, correct HTTP/1.1 client	This is a very simple HTTP/1.1 client, designed primarily for doing simple GET requests without the overhead of a large framework like LWP::UserAgent. It is more correct and more complete than HTTP::Lite. It supports proxies (currently only non-authenticating ones) and redirection. It also correctly resumes after EINTR.	http://www.perl.org/	Tue 23 Apr 2013 09:34:27 AM EDT

Name	Version	Summary	Description	URL	Install Time
perl-Image-ExifTool	9.25	Utility for reading and writing image meta info	ExifTool is a Perl module with an included command-line application for reading and writing meta information in image, audio, and video files. It reads EXIF, GPS, IPTC, XMP, JFIF, MakerNotes, GeoTIFF, ICC Profile, Photoshop IRB, FlashPix, AFCP, and ID3 meta information from JPG, JP2, TIFF, GIF, PNG, MNG, JNG, MIFF, EPS, PS, AI, PDF, PSD, BMP, THM, CRW, CR2, MRW, NEF, PEF, ORF, DNG, and many other types of images. ExifTool also extracts information from the maker notes of many digital cameras by various manufacturers including Canon, Casio, FujiFilm, GE, HP, JVC/Victor, Kodak, Leaf, Minolta/Konica-Minolta, Nikon, Olympus/Epson, Panasonic/Leica, Pentax/Asahi, Reconyx, Ricoh, Samsung, Sanyo, Sigma/Foveon, and Sony.	http://www.sno.phy.queensu.ca/~%7Ephil/exiftool/	Tue 23 Apr 2013 09:36:03 AM EDT
perl-IO-AIO	4.15	Asynchronous Input/Output	This module implements asynchronous I/O using whatever means your operating system supports.	http://search.cpan.org/dist/IO-AIO/	Sun 24 Mar 2013 04:45:41 PM EDT

Name	Version	Summary	Description	URL	Install Time
perl-IO-Compress	2.058	Read and write compressed data	<p>This distribution provides a Perl interface to allow reading and writing of compressed data created with the zlib and bzip2 libraries.</p> <p>IO-Compress supports reading and writing of bzip2, RFC 1950, RFC 1951, RFC 1952 (i.e. gzip) and zip files/buffers. The following modules used to be distributed separately, but are now included with the IO-Compress distribution: *</p> <p>Compress-Zlib * IO-Compress-Zlib * IO-Compress-Bzip2 * IO-Compress-Base</p>	http://search.cpan.org/dist/IO-Compress/	Wed 20 Mar 2013 09:50:57 AM EDT
perl-IO-Socket-IP	0.17	Drop-in replacement for IO::Socket::INET supporting both IPv4 and IPv6	This module provides a protocol-independent way to use IPv4 and IPv6 sockets, as a drop-in replacement for IO::Socket::INET. Most constructor arguments and methods are provided in a backward-compatible way.	http://search.cpan.org/dist/IO-Socket-IP/	Wed 20 Mar 2013 09:50:57 AM EDT

Name	Version	Summary	Description	URL	Install Time
perl-IO-Socket-SSL	1.80	Perl library for transparent SSL	This module is a true drop-in replacement for IO::Socket::INET that uses SSL to encrypt data before it is transferred to a remote server or client. IO::Socket::SSL supports all the extra features that one needs to write a full-featured SSL client or server application: multiple SSL contexts, cipher selection, certificate verification, and SSL version selection. As an extra bonus, it works perfectly with mod_perl.	http://search.cpan.org/dist/IO-Socket-SSL/	Wed 20 Mar 2013 09:50:58 AM EDT
perl-libs	5.16.3	The libraries for the perl runtime	The libraries for the perl runtime	http://www.perl.org/	Tue 23 Apr 2013 09:34:24 AM EDT
perl-libwww-perl	6.05	A Perl interface to the World-Wide Web	The libwww-perl collection is a set of Perl modules which provides a simple and consistent application programming interface to the World-Wide Web. The main focus of the library is to provide classes and functions that allow you to write WWW clients. The library also contains modules that are of more general use and even classes that help you implement simple HTTP servers.	http://search.cpan.org/dist/libwww-perl/	Sun 24 Mar 2013 04:45:43 PM EDT

Name	Version	Summary	Description	URL	Install Time
perl-Locale-Codes	3.25	Distribution of modules to handle locale codes	Locale-Codes is a distribution containing a set of modules. The modules each deal with different types of codes which identify parts of the locale including languages, countries, currency, etc.	http://search.cpan.org/dist/Locale-Codes/	Wed 20 Mar 2013 11:29:36 AM EDT
perl-LWP-MediaTypes	6.01	Guess media type for a file or a URL	This module provides functions for handling media (also known as MIME) types and encodings. The mapping from file extensions to media types is defined by the media.types file. If the ~/.media.types file exists it is used instead. For backwards compatibility we will also look for ~/.mime.types.	http://search.cpan.org/dist/LWP-MediaTypes/	Wed 20 Mar 2013 09:50:56 AM EDT
perl-macros	5.16.3	Macros for rpmbuild	Macros for rpmbuild are needed during build of srpm in koji. This sub-package must be installed into buildroot, so it will be needed by perl. Perl is needed because of git.	http://www.perl.org/	Tue 23 Apr 2013 09:34:24 AM EDT
perl-Module-Pluggable	4.00	Automatically give your module the ability to have plugins	Provides a simple but, hopefully, extensible way of having 'plugins' for your module.	http://www.perl.org/	Tue 23 Apr 2013 09:34:24 AM EDT

Name	Version	Summary	Description	URL	Install Time
perl-Net-Daemon	0.48	Perl extension for portable daemons	Net::Daemon is an abstract base class for implementing portable server applications in a very simple way. The module is designed for Perl 5.006 and ithreads (and higher), but can work with fork() and Perl 5.004. The Net::Daemon class offers methods for the most common tasks a daemon needs: Starting up, logging, accepting clients, authorization, restricting its own environment for security and doing the true work. You only have to override those methods that aren't appropriate for you, but typically inheriting will save you a lot of work anyways.	http://search.cpan.org/dist/Net-Daemon/	Sun 24 Mar 2013 04:45:44 PM EDT
perl-Net-HTTP	6.06	Low-level HTTP connection (client)	The Net::HTTP class is a low-level HTTP client. An instance of the Net::HTTP class represents a connection to an HTTP server. The HTTP protocol is described in RFC 2616. The Net::HTTP class supports HTTP/1.0 and HTTP/1.1.	http://search.cpan.org/dist/Net-HTTP/	Sun 24 Mar 2013 04:45:41 PM EDT

Name	Version	Summary	Description	URL	Install Time
perl-Net-LibIDN	0.12	Perl bindings for GNU LibIDN	Provides perl bindings for GNU Libidn, a C library for handling Internationalized Domain Names according to IDNA (RFC 3490), in a way very much inspired by Turbo Fredriksson's PHP-IDN.	http://search.cpan.org/dist/Net-LibIDN/	Wed 20 Mar 2013 09:50:57 AM EDT
perl-Net-SSLeay	1.49	Perl extension for using OpenSSL	This module offers some high level convenience functions for accessing web pages on SSL servers (for symmetry, same API is offered for accessing http servers, too), a sslcat() function for writing your own clients, and finally access to the SSL API of SSLeay/OpenSSL package so you can write servers or clients for more complicated applications.	http://search.cpan.org/dist/Net-SSLeay/	Wed 20 Mar 2013 09:50:58 AM EDT
perl-parent	0.225	Establish an ISA relationship with base classes at compile time	parent allows you to both load one or more modules, while setting up inheritance from those modules at the same time. Mostly similar in effect to: package Baz; BEGIN { require Foo; require Bar; push @ISA, qw(Foo Bar); }	http://www.perl.org/	Tue 23 Apr 2013 09:34:24 AM EDT

Name	Version	Summary	Description	URL	Install Time
perl-Parse-Yapp	1.05	Perl extension for generating and using LALR parsers	Parse::Yapp (Yet Another Perl Parser compiler) is a collection of modules that let you generate and use yacc like thread safe (reentrant) parsers with perl object oriented interface. The script yapp is a front-end to the Parse::Yapp module and let you easily create a Perl OO parser from an input grammar file.	http://search.cpan.org/dist/Parse-Yapp/	Wed 20 Mar 2013 09:51:05 AM EDT
perl-PathTools	3.39.2	PathTools Perl module (Cwd, File::Spec)	PathTools Perl module (Cwd, File::Spec).	http://www.perl.org/	Tue 23 Apr 2013 09:34:24 AM EDT
perl-PIRPC	0.2020	Interface for writing PIRPC clients and servers	PIRPC (Perl RPC) is a package that simplifies the writing of Perl based client/server applications. RPC::PIServer is the package used on the server side, and you guess what RPC::PIClient is for. PIRPC works by defining a set of methods that may be executed by the client.	http://search.cpan.org/dist/PIRPC	Sun 24 Mar 2013 04:45:44 PM EDT
perl-Pod-Escapes	1.04	Perl module for resolving POD escape sequences	This module provides things that are useful in decoding Pod E _i ... _i sequences. Presumably, it should be used only by Pod parsers and/or formatters.	http://www.perl.org/	Tue 23 Apr 2013 09:34:24 AM EDT

Name	Version	Summary	Description	URL	Install Time
perl-Pod-Parser	1.51	Basic perl modules for handling Plain Old Documentation (POD)	This software distribution contains the packages for using Perl5 POD (Plain Old Documentation). See the "perlpod" and "perlsyn" manual pages from your Perl5 distribution for more information about POD.	http://www.perl.org/	Tue 23 Apr 2013 09:34:25 AM EDT
perl-Pod-Perldoc	3.17.00	Look up Perl documentation in Pod format	perldoc looks up a piece of documentation in .pod format that is embedded in the perl installation tree or in a perl script, and displays it via "groff -man — \$PAGER". This is primarily used for the documentation for the perl library modules.	http://www.perl.org/	Tue 23 Apr 2013 09:34:24 AM EDT
perl-Pod-Plainer	1.03	Perl extension for converting Pod to old-style Pod	Pod::Plainer uses Pod::Parser which takes Pod with the (new) 'Cij .. ij' constructs and returns the old(er) style with just 'Cij'; 'i' and 'j' are replaced by 'Eiltj' and 'Eigtj'. This can be used to pre-process Pod before using tools which do not recognize the new style Pods.	http://search.cpan.org/dist/Pod-Plainer/	Wed 20 Mar 2013 11:29:36 AM EDT
perl-Pod-Simple	3.20	Framework for parsing POD documentation	Pod::Simple is a Perl library for parsing text in the Pod ("plain old documentation") markup language that is typically used for writing documentation for Perl and for Perl modules.	http://www.perl.org/	Tue 23 Apr 2013 09:34:25 AM EDT

Name	Version	Summary	Description	URL	Install Time
perl-Scalar-List-Utls	1.25	A selection of general-utility scalar and list subroutines	Scalar::Util and List::Util contain a selection of subroutines that people have expressed would be nice to have in the perl core, but the usage would not really be high enough to warrant the use of a keyword, and the size so small such that being individual extensions would be wasteful.	http://www.perl.org/	Tue 23 Apr 2013 09:34:24 AM EDT
perl-Socket	2.002	C socket.h defines and structure manipulators	This module is just a translation of the C socket.h file. Unlike the old mechanism of requiring a translated socket.ph file, this uses the h2xs program (see the Perl source distribution) and your native C compiler. This means that it has a far more likely chance of getting the numbers right. This includes all of the commonly used pound-defines like AF_INET, SOCK_STREAM, etc.	http://search.cpan.org/dist/Socket/	Wed 20 Mar 2013 09:50:53 AM EDT
perl-srpm-macros	1	RPM macros for building Perl source package from source repository	These RPM macros are used for building Perl source packages from source repositories. They influence build-requires set into the source package.		Wed 20 Mar 2013 09:49:34 AM EDT

Name	Version	Summary	Description	URL	Install Time
perl-Task-Weaken	1.04	Ensure that a platform has weaken support	One recurring problem in modules that use Scalar::Util's weaken function is that it is not present in the pure-perl variant. This restores the functionality testing to a dependency you do once in your Makefile.PL, rather than something you have to write extra tests for each time you write a module.	http://search.cpan.org/dist/Task-Weaken/	Sun 24 Mar 2013 04:45:41 PM EDT
perl-Test-Harness	3.23	Run Perl standard test scripts with statistics	Run Perl standard test scripts with statistics. Use TAP::Parser, Test::Harness package was whole rewritten.	http://www.perl.org/	Tue 23 Apr 2013 09:34:27 AM EDT
perl-Test-Simple	0.98	Basic utilities for writing tests	Basic utilities for writing tests.	http://www.perl.org/	Tue 23 Apr 2013 09:36:02 AM EDT

Name	Version	Summary	Description	URL	Install Time
perl-threads	1.86	Perl interpreter-based threads	<p>Since Perl 5.8, thread programming has been available using a model called interpreter threads which provides a new Perl interpreter for each thread, and, by default, results in no data or state information being shared between threads. (Prior to Perl 5.8, 5005threads was available through the Thread.pm API. This threading model has been deprecated, and was removed as of Perl 5.10.0.)</p> <p>As just mentioned, all variables are, by default, thread local. To use shared variables, you need to also load threads::shared.</p>	http://www.perl.org/	Tue 23 Apr 2013 09:34:24 AM EDT
perl-threads-shared	1.40	Perl extension for sharing data structures between threads	<p>By default, variables are private to each thread, and each newly created thread gets a private copy of each existing variable. This module allows you to share variables across different threads (and pseudo-forks on Win32). It is used together with the threads module. This module supports the sharing of the following data types only: scalars and scalar refs, arrays and array refs, and hashes and hash refs.</p>	http://www.perl.org/	Tue 23 Apr 2013 09:34:25 AM EDT

Name	Version	Summary	Description	URL	Install Time
perl-TimeDate	1.20	A Perl module for time and date manipulation	This module includes a number of smaller modules suited for manipulation of time and date strings with Perl. In particular, the Date::Format and Date::Parse modules can display and read times and dates in various formats, providing a more reliable interface to textual representations of points in time.	http://search.cpan.org/dist/TimeDate/	Wed 20 Mar 2013 09:50:57 AM EDT
perl-URI	1.60	A Perl module implementing URI parsing and manipulation	This module implements the URI class. Objects of this class represent "Uniform Resource Identifier references" as specified in RFC 2396 (and updated by RFC 2732).	http://search.cpan.org/dist/URI/	Wed 20 Mar 2013 09:50:56 AM EDT

Name	Version	Summary	Description	URL	Install Time
perl- WWW- RobotRules	6.02	Database of robots.txt- derived permissions	This mod- ule parses /robots.txt files as spec- i- fied in ”A Stan- dard for Robot Ex- clu- sion”, at http://www.robotstxt.org/wc/norobots.html. Webmasters can use the /robots.txt file to forbid con- forming robots from accessing parts of their web site.	http://search. cpan.org/dist/WWW- RobotRules/	Wed 20 Mar 2013 09:50:56 AM EDT

Name	Version	Summary	Description	URL	Install Time
perl-XML-DOM	1.44	DOM extension to XML::Parser	This is a Perl extension to XML::Parser. It adds a new 'Style' to XML::Parser, called 'Dom', that allows XML::Parser to build an Object Oriented datastructure with a DOM Level 1 compliant interface. For a description of the DOM (Document Object Model), see http://www.w3.org/DOM/	http://search.cpan.org/dist/XML-DOM/	Wed 20 Mar 2013 09:50:58 AM EDT
perl-XML-LibXML	2.0004	Perl interface to the libxml2 library	This module implements a Perl interface to the GNOME libxml2 library which provides interfaces for parsing and manipulating XML files. This module allows Perl programmers to make use of the highly capable validating XML parser and the high performance DOM implementation.	http://search.cpan.org/dist/XML-LibXML/	Wed 20 Mar 2013 11:29:35 AM EDT
perl-XML-NamespaceSupport	1.11	A simple generic namespace support class	A simple generic namespace support class.	http://search.cpan.org/dist/XML-NamespaceSupport/	Wed 20 Mar 2013 11:29:34 AM EDT

Name	Version	Summary	Description	URL	Install Time
perl-XML-Parser	2.41	Perl module for parsing XML files	This module provides ways to parse XML documents. It is built on top of XML::Parser::Expat, which is a lower level interface to James Clark's expat library. Each call to one of the parsing methods creates a new instance of XML::Parser::Expat which is then used to parse the document. Expat options may be provided when the XML::Parser object is created. These options are then passed on to the Expat object on each parse call. They can also be given as extra arguments to the parse methods, in which case they override options given at XML::Parser creation time.	http://search.cpan.org/dist/XML-Parser/	Wed 20 Mar 2013 09:50:58 AM EDT
perl-XML-RegExp	0.03	Regular expressions for XML tokens	This package contains an utility module containing regular expressions for the following XML tokens: BaseChar, Ideographic, Letter, Digit, Extender, CombiningChar, NameChar, EntityRef, CharRef, Reference, Name, NmToken, and AttValue.	http://search.cpan.org/dist/XML-RegExp/	Wed 20 Mar 2013 09:50:56 AM EDT

Name	Version	Summary	Description	URL	Install Time
perl-XML-SAX	0.99	XML-SAX Perl module	XML::SAX consists of several framework classes for using and building Perl SAX2 XML parsers, filters, and drivers. It is designed around the need to be able to "plug in" different SAX parsers to an application without requiring programmer intervention. Those of you familiar with the DBI will be right at home. Some of the designs come from the Java JAXP specification (SAX part), only without the javaness.	http://search.cpan.org/dist/XML-SAX/	Wed 20 Mar 2013 11:29:35 AM EDT
perl-XML-SAX-Base	1.08	Base class SAX Drivers and Filters	This module has a very simple task - to be a base class for PerlSAX drivers and filters. It's default behaviour is to pass the input directly to the output unchanged. It can be useful to use this module as a base class so you don't have to, for example, implement the characters() callback.	http://search.cpan.org/dist/XML-SAX-Base/	Wed 20 Mar 2013 11:29:35 AM EDT
perl-XML-XQL	0.68	Perl module for querying XML tree structures with XQL	This is a Perl extension that allows you to perform XQL queries on XML object trees. Currently only the XML::DOM module is supported, but other implementations, like XML::Grove, may soon follow.	http://search.cpan.org/dist/XML-XQL/	Wed 20 Mar 2013 09:51:05 AM EDT

Name	Version	Summary	Description	URL	Install Time
perl-YAML-Syck	1.20	Fast, lightweight YAML loader and dumper	This module provides a Perl interface to the libsyck data serialization library. It exports the Dump and Load functions for converting Perl data structures to YAML strings, and the other way around.	http://search.cpan.org/dist/YAML-Syck/	Wed 20 Mar 2013 09:51:04 AM EDT
phonon	4.6.0	Multimedia framework api	Multimedia framework api.	http://phonon.kde.org/	Wed 20 Mar 2013 09:53:58 AM EDT
phonon-backend-gstreamer	4.6.3	Gstreamer phonon backend	Gstreamer phonon backend.	http://phonon.kde.org/	Sun 24 Mar 2013 04:47:46 PM EDT
picmi	4.10.2	A nonogram logic game	Picmi is a single player puzzle game. The object of the game is to color cells according to numbers given at the side of the board.	https://projects.kde.org/projects/kde/kdegames/picmi	Tue 23 Apr 2013 09:35:05 AM EDT

Name	Version	Summary	Description	URL	Install Time
pinentry	0.8.1	Collection of simple PIN or passphrase entry dialogs	Pinentry is a collection of simple PIN or passphrase entry dialogs which utilize the Assuan protocol as described by the aegypten project; see http://www.gnupg.org/aegypten/ for details. This package contains the curses (text) based version of the PIN entry dialog.	http://www.gnupg.org/aegypten/	Wed 20 Mar 2013 09:50:38 AM EDT

Name	Version	Summary	Description	URL	Install Time
pinentry-qt	0.8.1	Passphrase/PIN entry dialog based on Qt4	Pinentry is a collection of simple PIN or passphrase entry dialogs which utilize the Assuan protocol as described by the aegypten project; see http://www.gnupg.org/aegypten/ for details. This package contains the Qt4 GUI based version of the PIN entry dialog.	http://www.gnupg.org/aegypten/	Wed 20 Mar 2013 09:53:58 AM EDT

Name	Version	Summary	Description	URL	Install Time
pinfo	0.6.10	An info file viewer	Pinfo is an info file (or man page) viewer with a user interface similar to the Lynx Web browser's interface. Pinfo supports searching using regular expressions, and is based on the ncurses library.	http://pinfo.alioth.debian.org	Wed 20 Mar 2013 09:58:42 AM EDT
pinta	1.4	An easy to use drawing and image editing program	Pinta is an image drawing/editing program. It's goal is to provide a simplified alternative to GIMP for casual users.	http://pinta-project.com/	Wed 20 Mar 2013 09:58:21 AM EDT
pixman	0.28.0	Pixel manipulation library	Pixman is a pixel manipulation library for X and cairo.	http://cgit.freedesktop.org/pixman/	Fri 05 Apr 2013 04:24:09 PM EDT
pixman	0.28.0	Pixel manipulation library	Pixman is a pixel manipulation library for X and cairo.	http://cgit.freedesktop.org/pixman/	Sun 24 Mar 2013 04:44:48 PM EDT

Name	Version	Summary	Description	URL	Install Time
pkcs11-helper	1.09	A library for using PKCS#11 providers	pkcs11-helper is a library that simplifies the interaction with PKCS#11 providers for end-user applications using a simple API and optional OpenSSL engine. The library allows using multiple PKCS#11 providers at the same time, enumerating available token certificates, or selecting a certificate directly by serialized id, handling card removal and card insert events, handling card re-insert to a different slot, supporting session expiration and much more all using a simple API.	http://www.opensc-project.org/opensc/wiki/pkcs11-helper	Wed 20 Mar 2013 09:51:10 AM EDT
pkgconfig	0.27	A tool for determining compilation options	The pkgconfig tool determines compilation options. For each required library, it reads the configuration file and outputs the necessary compiler and linker flags.	http://pkgconfig.freedesktop.org	Fri 05 Apr 2013 04:49:32 PM EDT
pkgconfig	0.27	A tool for determining compilation options	The pkgconfig tool determines compilation options. For each required library, it reads the configuration file and outputs the necessary compiler and linker flags.	http://pkgconfig.freedesktop.org	Wed 20 Mar 2013 09:49:56 AM EDT
plasma-scriptengine-python	4.10.2	Plasma scriptengine for python	Plasma scriptengine for python.	https://projects.kde.org/projects/kde/kde-workspace	Tue 23 Apr 2013 09:35:53 AM EDT

Name	Version	Summary	Description	URL	Install Time
plotutils	2.6	GNU vector and raster graphics utilities and libraries	The GNU plotutils package contains software for both programmers and technical users. Its centerpiece is libplot, a powerful C/C++ function library for exporting 2-D vector graphics in many file formats, both vector and raster. It can also do vector graphics animations. Besides libplot, the package contains command-line programs for plotting scientific data. Many of them use libplot to export graphics	http://www.gnu.org/software/plotutils/	Wed 20 Mar 2013 09:50:28 AM EDT
plymouth	0.8.8	Graphical Boot Animation and Logger	Plymouth provides an attractive graphical boot animation in place of the text messages that normally get shown. Text messages are instead redirected to a log file for viewing after boot.	http://www.freedesktop.org/wiki/Software/Plymouth	Wed 20 Mar 2013 09:56:54 AM EDT
plymouth-core-libs	0.8.8	Plymouth core libraries	This package contains the libply and libply-splash-core libraries used by Plymouth.	http://www.freedesktop.org/wiki/Software/Plymouth	Wed 20 Mar 2013 09:50:17 AM EDT
plymouth-graphics-libs	0.8.8	Plymouth graphics libraries	This package contains the libply-splash-graphics library used by graphical Plymouth splashes.	http://www.freedesktop.org/wiki/Software/Plymouth	Wed 20 Mar 2013 09:50:29 AM EDT

Name	Version	Summary	Description	URL	Install Time
plymouth-plugin-label	0.8.8	Plymouth label plugin	This package contains the label control plugin for Plymouth. It provides the ability to render text on graphical boot splashes using pango and cairo.	http://www.freedesktop.org/wiki/Software/Plymouth	Wed 20 Mar 2013 09:56:54 AM EDT
plymouth-plugin-two-step	0.8.8	Plymouth "two-step" plugin	This package contains the "two-step" boot splash plugin for Plymouth. It features a two phased boot process that starts with a progressing animation synced to boot time and finishes with a short, fast one-shot animation.	http://www.freedesktop.org/wiki/Software/Plymouth	Wed 20 Mar 2013 09:56:54 AM EDT
plymouth-scripts	0.8.8	Plymouth related scripts	This package contains scripts that help integrate Plymouth with the system.	http://www.freedesktop.org/wiki/Software/Plymouth	Wed 20 Mar 2013 09:56:54 AM EDT
plymouth-theme-charge	0.8.8	Plymouth "Charge" plugin	This package contains the "charge" boot splash theme for Plymouth. It features the shadowy hull of a Fedora logo charge up and and finally burst into full form.	http://www.freedesktop.org/wiki/Software/Plymouth	Wed 20 Mar 2013 09:56:55 AM EDT
pm-utils	1.4.1	Power management utilities and scripts	The pm-utils package contains utilities and scripts useful for tasks related to power management.	http://pm-utils.freedesktop.org	Wed 20 Mar 2013 09:55:16 AM EDT
podofu-libs	0.9.1	Runtime library for podofu	Runtime library for podofu.	http://podofu.sourceforge.net	Wed 20 Mar 2013 09:52:22 AM EDT

Name	Version	Summary	Description	URL	Install Time
policycoreutils	2.1.13	SELinux policy core utilities	Security-enhanced Linux is a feature of the Linux kernel and a number of utilities with enhanced security functionality designed to add mandatory access controls to Linux. The Security-enhanced Linux kernel contains new architectural components originally developed to improve the security of the Flask operating system. These architectural components provide general support for the enforcement of many kinds of mandatory access control policies, including those based on the concepts of Type Enforcement, Role-based Access Control, and Multi-level Security. policycoreutils contains the policy core utilities that are required for basic operation of a SELinux system. These utilities include load_policy to load policies, setfiles to label filesystems, newrole to switch roles.	http://www.selinuxproject.org	Fri 05 Apr 2013 04:36:38 PM EDT
policycoreutils-devel	2.1.13	SELinux policy core policy devel utilities	The policycoreutils-devel package contains the management tools use to develop policy in an SELinux environment.	http://www.selinuxproject.org	Fri 05 Apr 2013 04:36:39 PM EDT

Name	Version	Summary	Description	URL	Install Time
policycoreutils-python	2.1.13	SELinux policy core python utilities	The policycoreutils-python package contains the management tools use to manage an SELinux environment.	http://www.selinuxproject.org	Fri 05 Apr 2013 04:36:38 PM EDT
polkit	0.107	polkit Authorization Framework	polkit is a toolkit for defining and handling authorizations. It is used for allowing unprivileged processes to speak to privileged processes.	http://www.freedesktop.org/wiki/Software/polkit	Wed 20 Mar 2013 09:52:50 AM EDT
polkit-kde	0.99.0	PolicyKit integration for KDE Desktop	Provides Policy Kit Authentication Agent that nicely fits to KDE.	http://www.kde.org/	Wed 20 Mar 2013 09:56:25 AM EDT
polkit-qt	0.103.0	Qt bindings for PolicyKit	Polkit-qt is a library that lets developers use the PolicyKit API through a nice Qt-styled API.	https://projects.kde.org/projects/kdesupport/polkit-qt-1	Wed 20 Mar 2013 09:52:59 AM EDT
poppler	0.20.2	PDF rendering library	Poppler, a PDF rendering library, is a fork of the xpdf PDF viewer developed by Derek Noonburg of Glyph and Cog, LLC.	http://poppler.freedesktop.org/	Tue 23 Apr 2013 09:34:17 AM EDT
poppler-data	0.4.6	Encoding files	This package consists of encoding files for poppler. When installed, the encoding files enables poppler to correctly render CJK and Cyrillic properly.	http://poppler.freedesktop.org/	Sun 24 Mar 2013 04:44:30 PM EDT
poppler-glib	0.20.2	Glib wrapper for poppler	Glib wrapper for poppler.	http://poppler.freedesktop.org/	Tue 23 Apr 2013 09:36:40 AM EDT
poppler-qt	0.20.2	Qt4 wrapper for poppler	Qt4 wrapper for poppler.	http://poppler.freedesktop.org/	Tue 23 Apr 2013 09:34:17 AM EDT

Name	Version	Summary	Description	URL	Install Time
poppler- utils	0.20.2	Command line utilities for converting PDF files	Poppler, a PDF rendering library, is a fork of the xpdf PDF viewer developed by Derek Noonburg of Glyph and Cog, LLC. This utils package installs a number of command line tools for converting PDF files to a number of other formats.	http://poppler.freedesktop.org/	Tue 23 Apr 2013 09:34:23 AM EDT
popt	1.13	C library for parsing command line parameters	Popt is a C library for parsing command line parameters. Popt was heavily influenced by the getopt() and getopt_long() functions, but it improves on them by allowing more powerful argument expansion. Popt can parse arbitrary argv[] style arrays and automatically set variables based on command line arguments. Popt allows command line arguments to be aliased via configuration files and includes utility functions for parsing arbitrary strings into argv[] arrays using shell-like rules.	http://www.rpm5.org/	Wed 20 Mar 2013 09:49:48 AM EDT
popt-devel	1.13	Development files for the popt library	The popt-devel package includes header files and libraries necessary for developing programs which use the popt C library. It contains the API documentation of the popt library, too.	http://www.rpm5.org/	Fri 05 Apr 2013 04:34:33 PM EDT

Name	Version	Summary	Description	URL	Install Time
postgresql-libs	9.2.4	The shared libraries required for any PostgreSQL clients	The postgresql-libs package provides the essential shared libraries for any PostgreSQL client program or interface. You will need to install this package to use any other PostgreSQL package or any clients that need to connect to a PostgreSQL server.	http://www.postgresql.org/	Mon 08 Apr 2013 10:15:39 AM EDT
postr	0.12.4	Flickr uploader	Tool for uploading photos to the photo-sharing website Flickr.	http://projects.gnome.org/postr/	Wed 20 Mar 2013 09:57:07 AM EDT

Name	Version	Summary	Description	URL	Install Time
ppl	0.11.2	The Parma Polyhedra Library: a library of numerical abstractions	The Parma Polyhedra Library (PPL) is a library for the manipulation of (not necessarily closed) convex polyhedra and other numerical abstractions. The applications of convex polyhedra include program analysis, optimized compilation, integer and combinatorial optimization and statistical data-editing. The Parma Polyhedra Library comes with several user friendly interfaces, is fully dynamic (available virtual memory is the only limitation to the dimension of anything), written in accordance to all the applicable standards, exception-safe, rather efficient, thoroughly documented, and free software. This package provides all what is necessary to run applications using the PPL through its C and C++ interfaces.	http://www.cs.unipr.it/ppl/	Wed 20 Mar 2013 09:52:15 AM EDT

Name	Version	Summary	Description	URL	Install Time
ppl-pwl	0.11.2	The Parma Watchdog Library: a C++ library for watchdog timers	The Parma Watchdog Library (PWL) provides support for multiple, concurrent watchdog timers on systems providing setitimer(2). This package provides all what is necessary to run applications using the PWL. The PWL is currently distributed with the Parma Polyhedra Library, but is totally independent from it.	http://www.cs.unipr.it/ppl/	Wed 20 Mar 2013 09:52:14 AM EDT
ppp	2.4.5	The Point-to-Point Protocol daemon	The ppp package contains the PPP (Point-to-Point Protocol) daemon and documentation for PPP support. The PPP protocol provides a method for transmitting datagrams over serial point-to-point links. PPP is usually used to dial in to an ISP (Internet Service Provider) or other organization over a modem and phone line.	http://www.samba.org/ppp	Sun 24 Mar 2013 04:45:36 PM EDT
pptp	1.7.2	Point-to-Point Tunneling Protocol (PPTP) Client	Client for the proprietary Microsoft Point-to-Point Tunneling Protocol, PPTP. Allows connection to a PPTP based VPN as used by employers and some cable and ADSL service providers.	http://pptpclient.sourceforge.net/	Wed 20 Mar 2013 09:53:55 AM EDT

Name	Version	Summary	Description	URL	Install Time
prelink	0.4.6	An ELF prelinking utility	The prelink package contains a utility which modifies ELF shared libraries and executables, so that far fewer relocations need to be resolved at runtime and thus programs come up faster.		Wed 20 Mar 2013 09:58:35 AM EDT
preupgrade	1.1.11	Prepares a system for an upgrade	preupgrade prepares your Fedora system for upgrading to a newer version by examining your system, downloading all the files needed for the upgrade, and then setting up your system to perform the upgrade after rebooting.	https://fedorahosted.org/preupgrade/	Wed 20 Mar 2013 09:53:29 AM EDT
prison	1.0	A Qt-based barcode abstraction library	Prison is a Qt-based barcode abstraction layer/library that provides an uniform access to generation of barcodes with data.	https://projects.kde.org/projects/kdesupport/prison	Wed 20 Mar 2013 09:52:57 AM EDT

Name	Version	Summary	Description	URL	Install Time
procmail	3.22	Mail processing program	Procmail can be used to create mail-servers, mailing lists, sort your incoming mail into separate folders/files (real convenient when subscribing to one or more mailing lists or for prioritising your mail), preprocess your mail, start any programs upon mail arrival (e.g. to generate different chimes on your workstation for different types of mail) or selectively forward certain incoming mail automatically to someone.	http://www.procmail.org	Wed 20 Mar 2013 09:51:34 AM EDT

Name	Version	Summary	Description	URL	Install Time
procps-ng	3.3.3	System and process monitoring utilities	<p>The procps package contains a set of system utilities that provide system information. Procps includes ps, free, skill, pkill, pgrep, snice, tload, top, uptime, vmstat, w, watch and pdwx. The ps command displays a snapshot of running processes. The top command provides a repetitive update of the statuses of running processes. The free command displays the amounts of free and used memory on your system. The skill command sends a terminate command (or another specified signal) to a specified set of processes. The snice command is used to change the scheduling priority of specified processes. The tload command prints a graph of the current system load average to a specified tty. The uptime command displays the current time, how long the system has been running, how many users are logged on, and system load averages for the past one, five, and fifteen minutes. The w command displays a list of the users who are currently logged on and what they are running. The watch program watches a running program. The vmstat command displays virtual memory statistics about processes, memory, paging, block I/O, traps, and CPU activity. The pwdx command reports the current working directory of a process or processes.</p>	http://gitorious.org/procps	Sun 24 Mar 2013 04:44:53 PM EDT

Name	Version	Summary	Description	URL	Install Time
proj	4.8.0	Cartographic projection software (PROJ.4)	Proj and invproj perform respective forward and inverse transformation of cartographic data to or from cartesian data with a wide range of selectable projection functions.	http://proj.osgeo.org	Wed 20 Mar 2013 09:52:47 AM EDT
protobuf-python	2.4.1	Python bindings for Google Protocol Buffers	This package contains Python libraries for Google Protocol Buffers	http://code.google.com/p/protobuf/	Sun 24 Mar 2013 04:46:16 PM EDT
psacct	6.5.5	Utilities for monitoring process activities	The psacct package contains several utilities for monitoring process activities, including ac, lastcomm, accton and sa. The ac command displays statistics about how long users have been logged on. The lastcomm command displays information about previous executed commands. The accton command turns process accounting on or off. The sa command summarizes information about previously executed commands.	ftp://ftp.gnu.org/pub/gnu/acct/	Sun 24 Mar 2013 04:48:59 PM EDT

Name	Version	Summary	Description	URL	Install Time
psmisc	22.20	Utilities for managing processes on your system	The psmisc package contains utilities for managing processes on your system: pstree, killall and fuser. The pstree command displays a tree structure of all of the running processes on your system. The killall command sends a specified signal (SIGTERM if nothing is specified) to processes identified by name. The fuser command identifies the PIDs of processes that are using specified files or filesystems.	http://sourceforge.net/projects/psmisc	Wed 20 Mar 2013 09:50:38 AM EDT
pstoedit	3.61	Translates PostScript and PDF graphics into other vector formats	Pstoedit converts PostScript and PDF files to various vector graphic formats. The resulting files can be edited or imported into various drawing packages. Pstoedit comes with a large set of integrated format drivers	http://www.pstoedit.net/	Wed 20 Mar 2013 09:52:22 AM EDT

Name	Version	Summary	Description	URL	Install Time
pth	2.0.7	The GNU Portable Threads library	Pth is a very portable POSIX/ANSI-C based library for Unix platforms which provides non-preemptive priority-based scheduling for multiple threads of execution ("multithreading") inside server applications. All threads run in the same address space of the server application, but each thread has it's own individual program-counter, run-time stack, signal mask and errno variable.	http://www.gnu.org/software/pth/	Wed 20 Mar 2013 09:52:16 AM EDT
pugixml	1.0	A light-weight C++ XML processing library	pugixml is a light-weight C++ XML processing library. It features: - DOM-like interface with rich traversal/modification capabilities - Extremely fast non-validating XML parser which constructs the DOM tree from an XML file/buffer - XPath 1.0 implementation for complex data-driven tree queries - Full Unicode support with Unicode interface variants and automatic encoding conversions	http://pugixml.org	Wed 20 Mar 2013 09:52:14 AM EDT

Name	Version	Summary	Description	URL	Install Time
pulseaudio	2.1	Improved Linux Sound Server	PulseAudio is a sound server for Linux and other Unix like operating systems. It is intended to be an improved drop-in replacement for the Enlightened Sound Daemon (ESOUND).	http://www.freedesktop.org/wiki/Software/PulseAudio	Sun 24 Mar 2013 04:49:32 PM EDT
pulseaudio-libs	2.1	Libraries for PulseAudio clients	This package contains the runtime libraries for any application that wishes to interface with a PulseAudio sound server.	http://www.freedesktop.org/wiki/Software/PulseAudio	Sun 24 Mar 2013 04:44:43 PM EDT
pulseaudio-libs-glib2	2.1	GLIB 2.x bindings for PulseAudio clients	This package contains bindings to integrate the PulseAudio client library with a GLIB 2.x based application.	http://www.freedesktop.org/wiki/Software/PulseAudio	Sun 24 Mar 2013 04:44:51 PM EDT
pulseaudio-module-bluetooth	2.1	Bluetooth support for the PulseAudio sound server	Contains Bluetooth audio (A2DP/HSP/HFP) support for the PulseAudio sound server. Also contains a module that can be used to automatically turn down the volume if a bluetooth mobile phone leaves the proximity or turn it up again if it enters the proximity again	http://www.freedesktop.org/wiki/Software/PulseAudio	Sun 24 Mar 2013 04:49:32 PM EDT
pulseaudio-module-x11	2.1	X11 support for the PulseAudio sound server	X11 bell and security modules for the PulseAudio sound server.	http://www.freedesktop.org/wiki/Software/PulseAudio	Sun 24 Mar 2013 04:49:33 PM EDT

Name	Version	Summary	Description	URL	Install Time
pulseaudio- utils	2.1	PulseAudio sound server utilities	This package contains com- mand line utilities for the PulseAudio sound server.	http://www. freedesktop.org/ wiki/Software/ PulseAudio	Sun 24 Mar 2013 04:44:58 PM EDT
pycairo	1.8.10	Python bindings for the cairo library	Python bindings for the cairo library.	http:// cairographics.org/ pycairo	Wed 20 Mar 2013 09:53:21 AM EDT
pygobject2	2.28.6	Python 2 bindings for GObject	The pygobject2 package provides a convenient wrapper for the GObject library for use in Python programs.	http://www.pygtk. org/	Wed 20 Mar 2013 09:52:31 AM EDT
pygobject3	3.4.2	Python 2 bindings for GObject Introspection	The pygobject3 package provides a convenient wrapper for the GObject library for use in Python programs.	https://live.gnome. org/PyGObject	Wed 20 Mar 2013 09:53:22 AM EDT
pygobject3- base	3.4.2	Python 2 bindings for GObject Introspection base package	This package provides the non-cairo specific bits of the GObject Introspection library.	https://live.gnome. org/PyGObject	Wed 20 Mar 2013 09:52:32 AM EDT
pygpgme	0.3	Python module for working with OpenPGP messages	PyGPGME is a Python module that lets you sign, verify, encrypt and decrypt files using the OpenPGP format. It is built on top of GNU Privacy Guard and the GPGME library.	http://cheeseshop. python.org/pypi/ pygpgme	Sun 24 Mar 2013 04:45:47 PM EDT

Name	Version	Summary	Description	URL	Install Time
pygtk2	2.24.0	Python bindings for GTK+	PyGTK is an extension module for Python that gives you access to the GTK+ widget set. Just about anything you can write in C with GTK+ you can write in Python with PyGTK (within reason), but with all the benefits of using a high-level scripting language.	http://www.pygtk.org/	Wed 20 Mar 2013 09:53:22 AM EDT
pygtk2-libglade	2.24.0	A wrapper for the libglade library for use with PyGTK	This module contains a wrapper for the libglade library. Libglade allows a program to construct its user interface from an XML description, which allows the programmer to keep the UI and program logic separate.	http://www.pygtk.org/	Wed 20 Mar 2013 09:53:22 AM EDT
pykde4	4.10.2	Python bindings for KDE4	Python bindings for KDE4.	http://developer.kde.org/language-bindings/	Tue 23 Apr 2013 09:34:54 AM EDT
pyliblzma	0.5.3	Python bindings for lzma	PylibLZMA provides a python interface for the liblzma library to read and write data that has been compressed or can be decompressed by Lasse Collin's lzma utils.	https://launchpad.net/pyliblzma	Wed 20 Mar 2013 09:52:33 AM EDT

Name	Version	Summary	Description	URL	Install Time
pyOpenSSL	0.13	Python wrapper module around the OpenSSL library	High-level wrapper around a subset of the OpenSSL library, includes among others * SSL.Connection objects, wrapping the methods of Python's portable sockets * Callbacks written in Python * Extensive error-handling mechanism, mirroring OpenSSL's error codes	http://pyopenssl.sourceforge.net/	Wed 20 Mar 2013 09:52:43 AM EDT
PyQt4	4.10	Python bindings for Qt4	These are Python bindings for Qt4.	http://www.riverbankcomputing.com/software/pyqt/	Sun 24 Mar 2013 04:47:15 PM EDT
pyserial	2.6	Python serial port access library	This module encapsulates the access for the serial port. It provides backends for standard Python running on Windows, Linux, BSD (possibly any POSIX compliant system) and Jython. The module named "serial" automatically selects the appropriate backend.	http://pyserial.sourceforge.net	Wed 20 Mar 2013 09:52:40 AM EDT
pytalloc	2.0.8	Developer tools for the Talloc library	Pytalloc libraries for creating python bindings using talloc	http://talloc.samba.org/	Sun 24 Mar 2013 04:44:57 PM EDT

Name	Version	Summary	Description	URL	Install Time
python	2.7.3	An interpreted, interactive, object-oriented programming language	<p>Python is an interpreted, interactive, object-oriented programming language often compared to Tcl, Perl, Scheme or Java. Python includes modules, classes, exceptions, very high level dynamic data types and dynamic typing. Python supports interfaces to many system calls and libraries, as well as to various windowing systems (X11, Motif, Tk, Mac and MFC).</p> <p>Programmers can write new built-in modules for Python in C or C++. Python can be used as an extension language for applications that need a programmable interface.</p> <p>Note that documentation for Python is provided in the python-docs package.</p> <p>This package provides the "python" executable; most of the actual implementation is within the "python-libs" package.</p>	http://www.python.org/	Wed 20 Mar 2013 09:52:30 AM EDT
python-chardet	2.0.1	Character encoding auto-detection in Python	Character encoding auto-detection in Python. As smart as your browser. Open source.	http://chardet.feedparser.org	Wed 20 Mar 2013 09:52:43 AM EDT

Name	Version	Summary	Description	URL	Install Time
python-cups	1.9.62	Python bindings for CUPS	This package provides Python bindings for the CUPS API, known as pycups. It was written for use with system-config-printer, but can be put to other uses as well.	http://cyberelk.net/tim/software/pycups/	Wed 20 Mar 2013 09:52:37 AM EDT
python-decorator	3.4.0	Module to simplify usage of decorators	The aim of the decorator module is to simplify the usage of decorators for the average programmer, and to popularize decorators usage giving examples of useful decorators, such as memoize, tracing, redirecting_stdout, locked, etc. The core of this module is a decorator factory called decorator.	http://pypi.python.org/pypi/decorator/	Wed 20 Mar 2013 09:52:33 AM EDT
python-deltarpm	3.6	Python bindings for deltarpm	This package contains python bindings for deltarpm.	http://gitorious.org/deltarpm/deltarpm	Wed 20 Mar 2013 09:52:39 AM EDT

Name	Version	Summary	Description	URL	Install Time
python-devel	2.7.3	The libraries and header files needed for Python development	<p>The Python programming language's interpreter can be extended with dynamically loaded extensions and can be embedded in other programs. This package contains the header files and libraries needed to do these types of tasks.</p> <p>Install python-devel if you want to develop Python extensions. The python package will also need to be installed. You'll probably also want to install the python-docs package, which contains Python documentation.</p>	http://www.python.org/	Fri 05 Apr 2013 04:34:47 PM EDT
python-ethtool	0.7	Ethernet settings python bindings	Python bindings for the ethtool kernel interface, that allows querying and changing of Ethernet card settings, such as speed, port, auto-negotiation, and PCI locations.	http://fedorapeople.org/gitweb?p=dsommers/public_git/python-ethtool.git;a=summary	Wed 20 Mar 2013 09:52:43 AM EDT
python-fpconst	0.7.3	Python module for handling IEEE 754 floating point special values	This python module implements constants and functions for working with IEEE754 double-precision special values. It provides constants for Not-a-Number (NaN), Positive Infinity (PosInf), and Negative Infinity (NegInf), as well as functions to test for these values.	http://research.warnes.net/statcomp/projects/RStatServer/fpconst	Wed 20 Mar 2013 09:52:35 AM EDT

Name	Version	Summary	Description	URL	Install Time
python-imaging	1.1.7	Python's own image processing library	<p>Python Imaging Library</p> <p>The Python Imaging Library (PIL) adds image processing capabilities to your Python interpreter.</p> <p>This library provides extensive file format support, an efficient internal representation, and powerful image processing capabilities.</p> <p>Notice that in order to reduce the package dependencies there are three subpackages: devel (for development); tk (to interact with the tk interface) and sane (scanning devices interface).</p>	http://www.pythonware.com/products/pil/	Wed 20 Mar 2013 09:52:31 AM EDT
python-iniparse	0.4	Python Module for Accessing and Modifying Configuration Data in INI files	<p>iniparse is an INI parser for Python which is API compatible with the standard library's ConfigParser, preserves structure of INI files (order of sections & options, indentation, comments, and blank lines are preserved when data is updated), and is more convenient to use.</p>	http://code.google.com/p/iniparse/	Wed 20 Mar 2013 09:52:37 AM EDT

Name	Version	Summary	Description	URL	Install Time
python-inotify	0.9.4	Monitor filesystem events with Python under Linux	This is a Python module for watching filesystems changes. pyinotify can be used for various kind of fs monitoring. pyinotify relies on a recent Linux Kernel feature (merged in kernel 2.6.13) called inotify. inotify is an event-driven notifier, its notifications are exported from kernel space to user space.	https://github.com/seb-m/pyinotify	Tue 26 Mar 2013 01:26:04 PM EDT
python-IPy	0.75	Python module for handling IPv4 and IPv6 Addresses and Networks	IPy is a Python module for handling IPv4 and IPv6 Addresses and Networks in a fashion similar to perl's Net::IP and friends. The IP class allows a comfortable parsing and handling for most notations in use for IPv4 and IPv6 Addresses and Networks.	http://software.inl.fr/trac/trac.cgi/wiki/IPy	Wed 20 Mar 2013 09:52:36 AM EDT
python-kitchen	1.1.1	Small, useful pieces of code to make python coding easier	kitchen includes functions to make gettext easier to use, handling unicode text easier (conversion with bytes, outputting xml, and calculating how many columns a string takes), and compatibility modules for writing code that uses python-2.7 modules but needs to run on python-2.3	https://pypi.python.org/pypi/kitchen/	Wed 20 Mar 2013 09:52:43 AM EDT

Name	Version	Summary	Description	URL	Install Time
python-ldap	2.4.6	An object-oriented API to access LDAP directory servers	python-ldap provides an object-oriented API for working with LDAP within Python programs. It allows access to LDAP directory servers by wrapping the OpenLDAP 2.x libraries, and contains modules for other LDAP-related tasks (including processing LDIF, LDAPURLs, LDAPv3 schema, etc.).	http://python-ldap.sourceforge.net/	Fri 05 Apr 2013 04:34:47 PM EDT
python-libs	2.7.3	Runtime libraries for Python	This package contains runtime libraries for use by Python: - the libpython dynamic library, for use by applications that embed Python as a scripting language, and by the main "python" executable - the Python standard library	http://www.python.org/	Wed 20 Mar 2013 09:52:30 AM EDT
python-lockfile	0.9.1	A platform-independent file locking module	The lockfile module exports a FileLock class which provides a simple API for locking files. Unlike the Windows msvert.locking function, the Unix fcntl.flock, fcntl.lockf and the deprecated posixfile module, the API is identical across both Unix (including Linux and Mac) and Windows platforms. The lock mechanism relies on the atomic nature of the link (on Unix) and mkdir (on Windows) system calls.	http://code.google.com/p/pylockfile	Wed 20 Mar 2013 09:52:42 AM EDT

Name	Version	Summary	Description	URL	Install Time
python-lxml	2.3.5	ElementTree-like Python bindings for libxml2 and libxslt	lxml provides a Python binding to the libxslt and libxml2 libraries. It follows the ElementTree API as much as possible in order to provide a more Pythonic interface to libxml2 and libxslt than the default bindings. In particular, lxml deals with Python Unicode strings rather than encoded UTF-8 and handles memory management automatically, unlike the default bindings.	http://codespeak.net/lxml/	Wed 20 Mar 2013 09:52:34 AM EDT
python-meh	0.20	A python library for handling exceptions	The python-meh package is a python library for handling, saving, and reporting exceptions.	http://git.fedorahosted.org/git/?p=python-meh.git	Sun 24 Mar 2013 04:47:54 PM EDT
python-mwclient	0.6.5	Mwclient is a client to the MediaWiki API	Mwclient is a client to the MediaWiki API http://mediawiki.org/wiki/API , and allows access to almost all implemented API functions	http://sourceforge.net/apps/mediawiki/mwclient/index.php?title=Main_%5BPage	Wed 20 Mar 2013 09:52:43 AM EDT

Name	Version	Summary	Description	URL	Install Time
python-nose	1.3.0	Discovery-based unittest extension for Python	<p>nose extends the test loading and running features of unittest, making it easier to write, find and run tests. By default, nose will run tests in files or directories under the current working directory whose names include "test" or "Test" at a word boundary (like "test_this" or "functional_test" or "TestClass" but not "libtest"). Test output is similar to that of unittest, but also includes captured stdout output from failing tests, for easy print-style debugging. These features, and many more, are customizable through the use of plugins. Plugins included with nose provide support for doctest, code coverage and profiling, flexible attribute-based test selection, output capture and more.</p>	http://somethingaboutorange.com/mrl/projects/nose/	Tue 23 Apr 2013 09:35:30 AM EDT
python-pwquality	1.2.1	Python bindings for the libpwquality library	<p>This is pwquality Python module that provides Python bindings for the libpwquality library. These bindings can be used for easy password quality checking and generation of random pronounceable passwords from Python applications.</p>	http://libpwquality.fedorahosted.org/	Sun 24 Mar 2013 04:44:54 PM EDT

Name	Version	Summary	Description	URL	Install Time
python-pycurl	7.19.0	A Python interface to libcurl	PycURL is a Python interface to libcurl. PycURL can be used to fetch objects identified by a URL from a Python program, similar to the urllib Python module. PycURL is mature, very fast, and supports a lot of features.	http://pycurl.sourceforge.net/	Sun 24 Mar 2013 04:45:01 PM EDT
python-reportlab	2.5	Python PDF generation library	Python PDF generation library.	http://www.reportlab.org/	Wed 20 Mar 2013 09:52:39 AM EDT
python-setuptools	0.6.28	Easily build and distribute Python packages	Setuptools is a collection of enhancements to the Python distutils that allow you to more easily build and distribute Python packages, especially ones that have dependencies on other packages. This package contains the runtime components of setuptools, necessary to execute the software that requires pkg_resources.py. This package contains the distribute fork of setuptools.	http://pypi.python.org/pypi/distribute	Wed 20 Mar 2013 09:52:41 AM EDT

Name	Version	Summary	Description	URL	Install Time
python-simplejson	2.6.2	Simple, fast, extensible JSON encoder/decoder for Python	<p>simplejson is a simple, fast, complete, correct and extensible JSON http://json.org encoder and decoder for Python 2.5+. It is pure Python code with no dependencies, but includes an optional C extension for a serious speed boost. The encoder may be subclassed to provide serialization in any kind of situation, without any special support by the objects to be serialized (somewhat like pickle). The decoder can handle incoming JSON strings of any specified encoding (UTF-8 by default).</p> <p>simplejson is the externally maintained development version of the json library included with Python 2.6 and Python 3.0, but maintains backwards compatibility with Python 2.5. It gets updated more regularly than the json module in the python stdlib.</p>	http://undefined.org/python/#simplejson	Fri 05 Apr 2013 04:37:32 PM EDT
python-slip	0.4.0	Miscellaneous convenience, extension and workaround code for Python	<p>The Simple Library for Python packages contain miscellaneous code for convenience, extension and workaround purposes. This package provides the "slip" and the "slip.util" modules.</p>	http://fedorahosted.org/python-slip	Tue 23 Apr 2013 09:34:18 AM EDT

Name	Version	Summary	Description	URL	Install Time
python-slip-dbus	0.4.0	Convenience functions for dbus services	The Simple Library for Python packages contain miscellaneous code for convenience, extension and workaround purposes. This package provides slip.dbus.service.Object, which is a dbus.service.Object derivative that ends itself after a certain time without being used and/or if there are no clients anymore on the message bus, as well as convenience functions and decorators for integrating a dbus service with PolicyKit.	http://fedorahosted.org/python-slip	Tue 23 Apr 2013 09:34:23 AM EDT
python-slip-gtk	0.4.0	Code to make auto-wrapping gtk labels	The Simple Library for Python packages contain miscellaneous code for convenience, extension and workaround purposes. This package provides slip.gtk.set_utowrap(), a convenience function which lets gtk labels be automatically re-wrapped upon resizing.	http://fedorahosted.org/python-slip	Tue 23 Apr 2013 09:36:18 AM EDT
python-smbc	1.0.13	Python bindings for libsmbclient API from Samba	This package provides Python bindings for the libsmbclient API from Samba, known as pysmbc. It was written for use with system-config-printer, but can be put to other uses as well.	http://cyberelk.net/tim/software/pysmbc/	Tue 23 Apr 2013 09:36:44 AM EDT

Name	Version	Summary	Description	URL	Install Time
python-twisted-core	12.1.0	Asynchronous networking framework written in Python	<p>An extensible framework for Python programming, with special focus on event-based network programming and multiprotocol integration.</p> <p>It is expected that one day the project will expanded to the point that the framework will seamlessly integrate with mail, web, DNS, netnews, IRC, RDBMSs, desktop environments, and your toaster.</p> <p>Twisted Core is used by most of the servers, clients and protocols that are part of other Twisted projects.</p>	http://twistedmatrix.com/trac/wiki/TwistedCore	Wed 20 Mar 2013 09:52:44 AM EDT
python-twisted-web	12.1.0	Twisted web client and server, programmable in Python	<p>Twisted is an event-based framework for internet applications.</p> <p>Twisted Web is a complete web server, aimed at hosting web applications using Twisted and Python, but fully able to serve static pages too.</p>	http://twistedmatrix.com/trac/wiki/TwistedWeb	Wed 20 Mar 2013 09:52:45 AM EDT
python-urlgrabber	3.9.1	A high-level cross-protocol url-grabber	A high-level cross-protocol url-grabber for python supporting HTTP, FTP and file locations. Features include keepalive, byte ranges, throttling, authentication, proxies and more.	http://urlgrabber.baseurl.org/	Sun 24 Mar 2013 04:45:01 PM EDT

Name	Version	Summary	Description	URL	Install Time
python-zope-event	4.0.2	Zope Event Publication	The zope.event package provides a simple event system. It provides an event publishing system and a very simple event-dispatching system on which more sophisticated event dispatching systems can be built. (For example, a type-based event dispatching system that builds on zope.event can be found in zope.component.) This package contains the version for Python 2.	http://pypi.python.org/pypi/zope.event/	Sun 24 Mar 2013 04:46:14 PM EDT
python-zope-interface	4.0.4	Zope 3 Interface Infrastructure	Interfaces are a mechanism for labeling objects as conforming to a given API or contract. This is a separate distribution of the zope.interface package used in Zope 3.	http://pypi.python.org/pypi/zope.interface	Sun 24 Mar 2013 04:47:51 PM EDT
python3	3.3.0	Version 3 of the Python programming language aka Python 3000	Python 3 is a new version of the language that is incompatible with the 2.x line of releases. The language is mostly the same, but many details, especially how built-in objects like dictionaries and strings work, have changed considerably, and a lot of deprecated features have finally been removed.	http://www.python.org/	Wed 20 Mar 2013 09:50:48 AM EDT
python3-libs	3.3.0	Python 3 runtime libraries	This package contains files used to embed Python 3 into applications.	http://www.python.org/	Wed 20 Mar 2013 09:50:31 AM EDT

Name	Version	Summary	Description	URL	Install Time
pyxattr	0.5.1	Extended attributes library wrapper for Python	Python extension module wrapper for libattr. It allows to query, list, add and remove extended attributes from files and directories.	http://pyxattr.sourceforge.net/	Sun 24 Mar 2013 04:45:06 PM EDT
pyxdg	0.24	Python library to access freedesktop.org standards	PyXDG is a python library to access freedesktop.org standards	http://freedesktop.org/Software/pyxdg	Wed 20 Mar 2013 09:52:36 AM EDT
qaccessibilityclient	0.1.0	Accessibility client library for Qt	Accessibility client library for Qt.	https://projects.kde.org/projects/playground/accessibility/libkdeaccessibilityclient	Sun 24 Mar 2013 04:47:17 PM EDT
qca-openssl	2.0.0	OpenSSL plugin for the Qt Cryptographic Architecture v2	This is a plugin to provide SSL/TLS capability to programs that use the Qt Cryptographic Architecture (QCA). QCA is a library providing an easy API for several cryptographic algorithms to Qt programs. This package only contains the TLS plugin.	http://delta.affinix.com/qca/	Wed 20 Mar 2013 09:50:51 AM EDT

Name	Version	Summary	Description	URL	Install Time
qca2	2.0.3	Qt Cryptographic Architecture	Taking a hint from the similarly-named Java Cryptography Architecture, QCA aims to provide a straightforward and cross-platform crypto API, using Qt datatypes and conventions. QCA separates the API from the implementation, using plugins known as Providers. The advantage of this model is to allow applications to avoid linking to or explicitly depending on any particular cryptographic library. This allows one to easily change or upgrade crypto implementations without even needing to recompile the application!	http://delta.affinix.com/qca	Wed 20 Mar 2013 09:50:50 AM EDT
qhull	2003.1	General dimension convex hull programs	Qhull is a general dimension convex hull program that reads a set of points from stdin, and outputs the smallest convex set that contains the points to stdout. It also generates Delaunay triangulations, Voronoi diagrams, furthest-site Voronoi diagrams, and halfspace intersections about a point.	http://www.qhull.org	Wed 20 Mar 2013 09:52:24 AM EDT

Name	Version	Summary	Description	URL	Install Time
qimageblitz	0.0.6	Graphical effect and filter library	Blitz is a graphical effect and filter library for KDE4 that contains improvements over KDE 3.x's kdefx library including bugfixes, memory and speed improvements, and MMX/SSE support.	http://qimageblitz.sourceforge.net/	Wed 20 Mar 2013 09:52:55 AM EDT
qjdns	1.0.0	a simple DNS implementation that can perform normal as well as Multicast DNS queries	JDNS is a simple DNS implementation that can perform normal DNS queries of any record type (notably SRV), as well as Multicast DNS queries and advertising. Multicast support is based on Jeremie Miller's "mdnsd" implementation. For Qt users there is a wrapper available called QJDns.	http://delta.affinix.com/iris/	Sun 24 Mar 2013 04:47:16 PM EDT
qjson	0.8.1	A qt-based library that maps JSON data to QVariant objects	JSON is a lightweight data-interchange format. It can represent integer, real number, string, an ordered sequence of value, and a collection of name/value pairs. QJson is a qt-based library that maps JSON data to QVariant objects.	http://sourceforge.net/projects/qjson/	Sun 24 Mar 2013 04:46:25 PM EDT
ql2400-firmware	5.08.00	Firmware for qlogic 2400 devices	Firmware for qlogic 2400 devices.	ftp://ftp.qlogic.com/outgoing/linux/firmware/	Wed 20 Mar 2013 09:59:55 AM EDT
ql2500-firmware	5.08.00	Firmware for qlogic 2500 devices	Firmware for qlogic 2500 devices.	ftp://ftp.qlogic.com/outgoing/linux/firmware/	Wed 20 Mar 2013 09:59:54 AM EDT

Name	Version	Summary	Description	URL	Install Time
qoauth	1.0.1	Qt-based C++ library for OAuth authorization scheme	QOAuth is a Qt-based C++ implementation of an interface to services using OAuth authorization scheme.	http://github.com/ayoy/qoauth	Wed 20 Mar 2013 09:50:51 AM EDT
qrencode-libs	3.4.1	QR Code encoding library - Shared libraries	The qrencode-libs package contains the shared libraries and header files for applications that use qrencode.	http://megauai.net/fukuchi/works/qrencode/index.en.html	Sun 24 Mar 2013 04:45:08 PM EDT
qt	4.8.4	Qt toolkit	Qt is a software toolkit for developing applications. This package contains base tools, like string, xml, and network handling.	http://qt.nokia.com/	Sun 24 Mar 2013 04:46:19 PM EDT
qt-gstreamer	0.10.2	C++ bindings for GStreamer with a Qt-style API	QtGStreamer provides C++ bindings for GStreamer with a Qt-style API, plus some helper classes for integrating GStreamer better in Qt applications.	http://gstreamer.freedesktop.org/wiki/QtGStreamer	Wed 20 Mar 2013 09:53:37 AM EDT

Name	Version	Summary	Description	URL	Install Time
qt-mobility	1.2.2	Qt Mobility Framework	Qt Mobility Project delivers a set of new APIs to Qt with features that are well known from the mobile device world, in particular phones. However, these APIs allow the developer to use these features with ease from one framework and apply them to phones, netbooks and non-mobile personal computers. The framework not only improves many aspects of a mobile experience, because it improves the use of these technologies, but has applicability beyond the mobile device arena.	http://qt.nokia.com/products/qt-addons/mobility	Wed 20 Mar 2013 09:54:16 AM EDT
qt-mysql	4.8.4	MySQL driver for Qt's SQL classes	MySQL driver for Qt's SQL classes.	http://qt.nokia.com/	Sun 24 Mar 2013 04:47:17 PM EDT
qt-recordmydesktop	0.3.8	KDE Desktop session recorder with audio and video	Graphical KDE frontend for the recordmydesktop desktop session recorder. recordMyDesktop is a desktop session recorder for linux that attempts to be easy to use, yet also effective at it's primary task.	http://recordmydesktop.sourceforge.net/	Tue 26 Mar 2013 04:01:52 PM EDT
qt-settings	4.9	Configuration files for Qt	Configuration files for Qt.	http://fedorahosted.org/kde-settings	Sun 24 Mar 2013 04:46:19 PM EDT
qt-x11	4.8.4	Qt GUI-related libraries	Qt libraries used for drawing widgets and OpenGL items.	http://qt.nokia.com/	Sun 24 Mar 2013 04:46:21 PM EDT

Name	Version	Summary	Description	URL	Install Time
qt3	3.3.8b	The shared library for the Qt 3 GUI toolkit	Qt is a GUI software toolkit which simplifies the task of writing and maintaining GUI (Graphical User Interface) applications for the X Window System. Qt is written in C++ and is fully object-oriented. This package contains the shared library needed to run Qt 3 applications, as well as the README files for Qt 3.	http://www.troll.no	Wed 20 Mar 2013 11:29:36 AM EDT
qtlockedfile	2.4	QFile extension with advisory locking functions	This class extends the QFile class with inter-process file locking capabilities. If an application requires that several processes should access the same file, QtLockedFile can be used to easily ensure that only one process at a time is writing to the file, and that no process is writing to it while others are reading it.	http://qt.nokia.com/products/appdev/add-on-products/catalog/4/Utilities/qtlockedfile	Tue 26 Mar 2013 01:02:24 PM EDT
qtscriptbindings	3.2.0	Qt bindings for Qt Script	Bindings providing access to substantial portions of the Qt API from within Qt Script.	http://code.google.com/p/qtscriptgenerator/	Wed 20 Mar 2013 09:54:19 AM EDT

Name	Version	Summary	Description	URL	Install Time
qtsingleapplication	2.6.1	Qt library to start applications only once per user	For some applications it is useful or even critical that they are started only once by any user. Future attempts to start the application should activate any already running instance, and possibly perform requested actions, e.g. loading a file, in that instance. The QtSingleApplication class provides an interface to detect a running instance, and to send command strings to that instance.	http://qt.nokia.com/products/appdev/add-on-products/catalog/4/Utilities/qtsingleapplication	Tue 26 Mar 2013 01:02:24 PM EDT
qtsoap	2.7	The Simple Object Access Protocol Qt-based client side library	The SOAP (Simple Object Access Protocol) library uses the XML standard for describing how to exchange messages. Its primary usage is to invoke web services and get responses from Qt-based applications.	http://qt.nokia.com/products/appdev/add-on-products/catalog/4/Utilities/qtsoap/	Wed 20 Mar 2013 09:53:58 AM EDT
qtwebkit	2.2.2	Qt WebKit bindings	Qt WebKit bindings	http://trac.webkit.org/wiki/QtWebKit	Sun 24 Mar 2013 04:46:22 PM EDT

Name	Version	Summary	Description	URL	Install Time
quazip	0.5	Qt/C++ wrapper for the minizip library	QuaZIP is a simple C++ wrapper over Gilles Vollant's ZIP/UNZIP package that can be used to access ZIP archives. It uses Trolltech's Qt toolkit. QuaZIP allows you to access files inside ZIP archives using QIODevice API, and - yes! - that means that you can also use QTextStream, QDataStream or whatever you would like to use on your zipped files. QuaZIP provides complete abstraction of the ZIP/UNZIP API, for both reading from and writing to ZIP archives.	http://quazip.sourceforge.net/	Tue 26 Mar 2013 01:02:24 PM EDT
quota	4.00	System administration tools for monitoring users' disk usage	The quota package contains system administration tools for monitoring and limiting user and or group disk usage per file system.	http://sourceforge.net/projects/linuxquota/	Sun 24 Mar 2013 04:46:15 PM EDT
quota-nls	4.00	Gettext catalogs for disk quota tools	Disk quota tools messages translated into different natural languages.	http://sourceforge.net/projects/linuxquota/	Sun 24 Mar 2013 04:46:14 PM EDT

Name	Version	Summary	Description	URL	Install Time
qwt	6.0.1	Qt Widgets for Technical Applications	The Qwt library contains GUI Components and utility classes which are primarily useful for programs with a technical background. Besides a 2D plot widget it provides scales, sliders, dials, compasses, thermometers, wheels and knobs to control or display values, arrays or ranges of type double.	http://qwt.sourceforge.net	Wed 20 Mar 2013 09:53:57 AM EDT
raptor2	2.0.7	RDF Parser Toolkit for Redland	Raptor is the RDF Parser Toolkit for Redland that provides a set of standalone RDF parsers, generating triples from RDF/XML or N-Triples.	http://librdf.org/raptor/	Wed 20 Mar 2013 09:51:57 AM EDT
rasqal	0.9.29	RDF Query Library	Rasqal is a library providing full support for querying Resource Description Framework (RDF) including parsing query syntaxes, constructing the queries, executing them and returning result formats. It currently handles the RDF Data Query Language (RDQL) and SPARQL Query language.	http://librdf.org/rasqal/	Wed 20 Mar 2013 09:52:03 AM EDT
rawtherapee	4.0.10	Raw image processing software	Rawtherapee is a RAW image processing software. It gives full control over many parameters to enhance the raw picture before finally exporting it to some common image format.	http://www.rawtherapee.com/	Tue 23 Apr 2013 09:35:51 AM EDT

Name	Version	Summary	Description	URL	Install Time
rsc	5.8.1	Revision Control System (RCS) file version management tools	The Revision Control System (RCS) is a system for managing multiple versions of files. RCS automates the storage, retrieval, logging, identification and merging of file revisions. RCS is useful for text files that are revised frequently (for example, programs, documentation, graphics, papers and form letters). The rcs package should be installed if you need a system for managing different versions of files.	http://www.gnu.org/software/rcs/	Wed 20 Mar 2013 09:59:00 AM EDT
rdate	1.4	Tool for getting the date/time from a remote machine	The rdate utility retrieves the date and time from another machine on your network, using the protocol described in RFC 868. If you run rdate as root, it will set your machine's local time to the time of the machine that you queried.	ftp://people.redhat.com/sopwith/	Wed 20 Mar 2013 09:59:52 AM EDT
rdesktop	1.7.1	X client for remote desktop into Windows Terminal Server	rdesktop is an open source client for Windows NT Terminal Server and Windows 2000 & 2003 Terminal Services, capable of natively speaking Remote Desktop Protocol (RDP) in order to present the user's NT desktop. Unlike Citrix ICA, no server extensions are required.	http://www.rdesktop.org/	Wed 20 Mar 2013 09:51:50 AM EDT

Name	Version	Summary	Description	URL	Install Time
rdist	6.1.5	Maintains identical copies of files on multiple machines	The RDist program maintains identical copies of files on multiple hosts. If possible, RDist will preserve the owner, group, mode and mtime of files and it can update programs that are executing. Install rdist if you need to maintain identical copies of files on multiple hosts.	http://www.MagniComp.com/rdist	Wed 20 Mar 2013 09:59:53 AM EDT
readline	6.2	A library for editing typed command lines	The Readline library provides a set of functions that allow users to edit command lines. Both Emacs and vi editing modes are available. The Readline library includes additional functions for maintaining a list of previously-entered command lines for recalling or editing those lines, and for performing csh-like history expansion on previous commands.	http://cnswww.cns.cwru.edu/php/chet/readline/rltop.html	Thu 02 May 2013 12:32:46 AM EDT

Name	Version	Summary	Description	URL	Install Time
readline	6.2	A library for editing typed command lines	The Readline library provides a set of functions that allow users to edit command lines. Both Emacs and vi editing modes are available. The Readline library includes additional functions for maintaining a list of previously-entered command lines for recalling or editing those lines, and for performing csh-like history expansion on previous commands.	http://cnswww.cns.cwru.edu/php/chet/readline/rltop.html	Wed 20 Mar 2013 09:49:48 AM EDT
readline-devel	6.2	Files needed to develop programs which use the readline library	The Readline library provides a set of functions that allow users to edit typed command lines. If you want to develop programs that will use the readline library, you need to have the readline-devel package installed. You also need to have the readline package installed.	http://cnswww.cns.cwru.edu/php/chet/readline/rltop.html	Fri 05 Apr 2013 04:34:39 PM EDT
realmd	0.12	Kerberos realm enrollment service	realmd is a DBus system service which manages discovery and enrollment in realms and domains like Active Directory or IPA. The control center uses realmd as the back end to 'join' a domain simply and automatically configure things correctly.	http://cgit.freedesktop.org/realmd/realmd/	Wed 20 Mar 2013 09:58:31 AM EDT

Name	Version	Summary	Description	URL	Install Time
recordmydesktop	0.8.8.1	Desktop session recorder with audio and video	<p>recordMyDesktop is a desktop session recorder for linux that attempts to be easy to use, yet also effective at it's primary task.</p> <p>As such, the program is separated in two parts; a simple command line tool that performs the basic tasks of capturing and encoding and an interface that exposes the program functionality in a usable way.</p>	http://recordmydesktop.sourceforge.net/	Sun 24 Mar 2013 04:44:55 PM EDT
redhat-lsb	4.1	Implementation of Linux Standard Base specification	<p>The Linux Standard Base (LSB) is an attempt to develop a set of standards that will increase compatibility among Linux distributions. It is designed to be binary-compatible and produce a stable application binary interface (ABI) for independent software vendors. The lsb package provides utilities, libraries etc. needed for LSB Compliant Applications. It also contains requirements that will ensure that all components required by the LSB are installed on the system.</p>	http://www.linuxfoundation.org/collaborate/workgroups/lsb	Wed 20 Mar 2013 11:29:38 AM EDT

Name	Version	Summary	Description	URL	Install Time
redhat-lsb-core	4.1	LSB Core module support	The Linux Standard Base (LSB) Core module support provides the fundamental system interfaces, libraries, and runtime environment upon which all conforming applications and libraries depend.	http://www.linuxfoundation.org/collaborate/workgroups/lsb	Wed 20 Mar 2013 11:29:37 AM EDT
redhat-lsb-cxx	4.1	LSB CXX module support	The Linux Standard Base (LSB) CXX module supports the core interfaces by providing system interfaces, libraries, and a runtime environment for applications built using the C++ programming language. These interfaces provide low-level support for the core constructs of the language, and implement the standard base C++ libraries.	http://www.linuxfoundation.org/collaborate/workgroups/lsb	Wed 20 Mar 2013 11:29:37 AM EDT
redhat-lsb-desktop	4.1	LSB Desktop module support	The Linux Standard Base (LSB) Desktop Specifications define components that are required to be present on an LSB conforming system.	http://www.linuxfoundation.org/collaborate/workgroups/lsb	Wed 20 Mar 2013 11:29:38 AM EDT
redhat-lsb-languages	4.1	LSB Languages module support	The Linux Standard Base (LSB) Languages module supports components for runtime languages which are found on an LSB conforming system.	http://www.linuxfoundation.org/collaborate/workgroups/lsb	Wed 20 Mar 2013 11:29:38 AM EDT

Name	Version	Summary	Description	URL	Install Time
redhat-lsb-printing	4.1	LSB Printing module support	The Linux Standard Base (LSB) Printing specifications define components that are required to be present on an LSB conforming system.	http://www.linuxfoundation.org/collaborate/workgroups/lsb	Wed 20 Mar 2013 11:29:37 AM EDT
redhat-lsb-submod-multimedia	4.1	LSB Multimedia submodule support	The Linux Standard Base (LSB) Multimedia submodule specifications define components that are required to be present on an LSB conforming system.	http://www.linuxfoundation.org/collaborate/workgroups/lsb	Wed 20 Mar 2013 11:29:36 AM EDT
redhat-lsb-submod-security	4.1	LSB Security submodule support	The Linux Standard Base (LSB) Security submodule specifications define components that are required to be present on an LSB conforming system.	http://www.linuxfoundation.org/collaborate/workgroups/lsb	Wed 20 Mar 2013 11:29:37 AM EDT
redhat-menus	12.0.2	Configuration and data files for the desktop menus	This package contains the XML files that describe the menu layout for GNOME and KDE, and the .desktop files that define the names and icons of "subdirectories" in the menus.	http://www.redhat.com	Wed 20 Mar 2013 09:50:23 AM EDT
redhat-rpm-config	9.1.0	Red Hat specific rpm configuration files	Red Hat specific rpm configuration files.	http://git.fedorahosted.org/git/redhat-rpm-config	Wed 20 Mar 2013 09:58:41 AM EDT

Name	Version	Summary	Description	URL	Install Time
redland	1.0.15	RDF Application Framework	Redland is a library that provides a high-level interface for RDF (Resource Description Framework) implemented in an object-based API. It is modular and supports different RDF/XML parsers, storage mechanisms and other elements. Redland is designed for applications developers to provide RDF support in their applications as well as for RDF developers to experiment with the technology.	http://librdf.org/	Tue 23 Apr 2013 09:34:17 AM EDT
redland-virtuoso	1.0.15	Virtuoso storage support for Redland	This package provides Redland's storage support for graphs in memory and persistently with Virtuoso files or URIs.	http://librdf.org/	Tue 23 Apr 2013 09:36:18 AM EDT

Name	Version	Summary	Description	URL	Install Time
rest	0.7.90	A library for access to RESTful web services	This library was designed to make it easier to access web services that claim to be "RESTful". A RESTful service should have urls that represent remote objects, which methods can then be called on. The majority of services don't actually adhere to this strict definition. Instead, their RESTful end point usually has an API that is just simpler to use compared to other types of APIs they may support (XML-RPC, for instance). It is this kind of API that this library is attempting to support.	http://www.gnome.org	Wed 20 Mar 2013 09:52:13 AM EDT
rhino	1.7R3	JavaScript for Java	Rhino is an open-source implementation of JavaScript written entirely in Java. It is typically embedded into Java applications to provide scripting to end users.	http://www.mozilla.org/rhino/	Wed 20 Mar 2013 09:52:38 AM EDT
rmt	0.4	Provides certain programs with access to remote tape devices	The rmt utility provides remote access to tape devices for programs like dump (a filesystem backup program), restore (a program for restoring files from a backup), and tar (an archiving program).	http://dump.sourceforge.net/	Sun 24 Mar 2013 04:45:08 PM EDT
rng-tools	4	Random number generator related utilities	Hardware random number generation tools.	http://sourceforge.net/projects/gkernel/	Wed 20 Mar 2013 09:58:37 AM EDT

Name	Version	Summary	Description	URL	Install Time
rocs	4.10.2	Graph Theory IDE	Graph Theory IDE.	https://projects.kde.org/projects/kde/kdeedu/rocs	Tue 23 Apr 2013 09:35:24 AM EDT
rocs-libs	4.10.2	Runtime files for rocs	Runtime files for rocs.	https://projects.kde.org/projects/kde/kdeedu/rocs	Tue 23 Apr 2013 09:35:24 AM EDT
rootfiles	8.1	The basic required files for the root user's directory	The rootfiles package contains basic required files that are placed in the root user's account. These files are basically the same as those in /etc/skel, which are placed in regular users' home directories.		Wed 20 Mar 2013 09:59:54 AM EDT
rp-pppoe	3.10	A PPP over Ethernet client (for xDSL support).	PPPoE (Point-to-Point Protocol over Ethernet) is a protocol used by many ADSL Internet Service Providers. This package contains the Roaring Penguin PPPoE client, a user-mode program that does not require any kernel modifications. It is fully compliant with RFC 2516, the official PPPoE specification.	http://www.roaringpenguin.com/pppoe/	Wed 20 Mar 2013 09:57:45 AM EDT
rpcbind	0.2.0	Universal Addresses to RPC Program Number Mapper	The rpcbind utility is a server that converts RPC program numbers into universal addresses. It must be running on the host to be able to make RPC calls on a server on that machine.	http://nfsv4.bullopensource.org	Wed 20 Mar 2013 09:53:22 AM EDT

Name	Version	Summary	Description	URL	Install Time
rpm	4.10.3.1	The RPM package management system	The RPM Package Manager (RPM) is a powerful command line driven package management system capable of installing, uninstalling, verifying, querying, and updating software packages. Each software package consists of an archive of files along with information about the package like its version, a description, etc.	http://www.rpm.org/	Sun 24 Mar 2013 04:45:00 PM EDT
rpm-build	4.10.3.1	Scripts and executable programs used to build packages	The rpm-build package contains the scripts and executable programs that are used to build packages using the RPM Package Manager.	http://www.rpm.org/	Sun 24 Mar 2013 04:48:28 PM EDT
rpm-build-libs	4.10.3.1	Libraries for building and signing RPM packages	This package contains the RPM shared libraries for building and signing packages.	http://www.rpm.org/	Sun 24 Mar 2013 04:45:00 PM EDT

Name	Version	Summary	Description	URL	Install Time
rpm-devel	4.10.3.1	Development files for manipulating RPM packages	This package contains the RPM C library and header files. These development files will simplify the process of writing programs that manipulate RPM packages and databases. These files are intended to simplify the process of creating graphical package managers or any other tools that need an intimate knowledge of RPM packages in order to function. This package should be installed if you want to develop programs that will manipulate RPM packages and databases.	http://www.rpm.org/	Fri 05 Apr 2013 04:34:40 PM EDT
rpm-libs	4.10.3.1	Libraries for manipulating RPM packages	This package contains the RPM shared libraries.	http://www.rpm.org/	Sun 24 Mar 2013 04:45:00 PM EDT
rpm-python	4.10.3.1	Python bindings for apps which will manipulate RPM packages	The rpm-python package contains a module that permits applications written in the Python programming language to use the interface supplied by RPM Package Manager libraries. This package should be installed if you want to develop Python programs that will manipulate RPM packages and databases.	http://www.rpm.org/	Sun 24 Mar 2013 04:45:00 PM EDT

Name	Version	Summary	Description	URL	Install Time
rpmfusion-free-release	18	RPM Fusion (free) Repository Configuration	<p>RPM Fusion repository contains open source and other distributable software for Fedora. It is the merger of the Dribble, FreshRPMs and Livna repositories.</p> <p>This package contains the RPM Fusion GPG key as well as Yum package manager configuration files for RPM Fusion's "free" repository, which holds only software that is considered as Open Source Software according to the Fedora packaging guidelines.</p>	http://rpmfusion.org	Tue 26 Mar 2013 01:26:04 PM EDT
rpmfusion-nonfree-release	18	RPM Fusion (nonfree) Repository Configuration	<p>RPM Fusion repository contains open source and other distributable software for Fedora. It is the merger of the Dribble, FreshRPMs and Livna repositories.</p> <p>This package contains the RPM Fusion GPG key as well as Yum package manager configuration files for RPM Fusion's "nonfree" repository, which holds software that is not considered as Open Source Software according to the Fedora packaging guidelines.</p>	http://rpmfusion.org	Tue 26 Mar 2013 01:26:21 PM EDT

Name	Version	Summary	Description	URL	Install Time
rsh	0.17	Clients for remote access commands (rsh, rlogin, rcp)	The rsh package contains a set of programs which allow users to run commands on remote machines, login to other machines and copy files between machines (rsh, rlogin and rcp). All three of these commands use rhosts style authentication. This package contains the clients needed for all of these services. The rsh package should be installed to enable remote access to other machines	ftp://ftp.uk.linux.org/pub/linux/Networking/netkit	Wed 20 Mar 2013 09:59:52 AM EDT
rsync	3.0.9	A program for synchronizing files over a network	Rsync uses a reliable algorithm to bring remote and host files into sync very quickly. Rsync is fast because it just sends the differences in the files over the network instead of sending the complete files. Rsync is often used as a very powerful mirroring process or just as a more capable replacement for the rcp command. A technical report which describes the rsync algorithm is included in this package.	http://rsync.samba.org/	Wed 20 Mar 2013 09:51:17 AM EDT

Name	Version	Summary	Description	URL	Install Time
rsyslog	7.2.6	Enhanced system logging and kernel message trapping daemon	Rsyslog is an enhanced, multi-threaded syslog daemon. It supports MySQL, syslog/TCP, RFC 3195, permitted sender lists, filtering on any message part, and fine grain output format control. It is compatible with stock sysklogd and can be used as a drop-in replacement. Rsyslog is simple to set up, with advanced features suitable for enterprise-class, encryption-protected syslog relay chains.	http://www.rsyslog.com/	Tue 23 Apr 2013 09:35:50 AM EDT
rtkit	0.11	Realtime Policy and Watchdog Daemon	RealtimeKit is a D-Bus system service that changes the scheduling policy of user processes/threads to SCHED_RR (i.e. realtime scheduling mode) on request. It is intended to be used as a secure mechanism to allow real-time scheduling to be used by normal user processes.	http://git.0pointer.de/?p=rtkit.git	Wed 20 Mar 2013 09:53:59 AM EDT
SAASound	3.2	Phillips SAA 1099 sound chip emulator library	Phillips SAA 1099 sound chip emulator library	http://simonowen.com/sam/saasound	Fri 05 Apr 2013 04:29:41 PM EDT
SAASound-devel	3.2	Development files for SAASound	Development files for SAA-Sound	http://simonowen.com/sam/saasound	Fri 05 Apr 2013 04:29:41 PM EDT
samba-client	4.0.4	Samba client programs	The samba4-client package provides some SMB/CIFS clients to complement the built-in SMB/CIFS filesystem in Linux. These clients allow access of SMB/CIFS shares and printing to SMB/CIFS printers.	http://www.samba.org/	Tue 26 Mar 2013 01:26:21 PM EDT

Name	Version	Summary	Description	URL	Install Time
samba-common	4.0.4	Files used by both Samba servers and clients	samba4-common provides files necessary for both the server and client packages of Samba.	http://www.samba.org/	Tue 26 Mar 2013 01:26:02 PM EDT
samba-libs	4.0.4	Samba libraries	The samba4-libs package contains the libraries needed by programs that link against the SMB, RPC and other protocols provided by the Samba suite.	http://www.samba.org/	Tue 26 Mar 2013 01:26:02 PM EDT
sane-backends	1.0.23	Scanner access software	Scanner Access Now Easy (SANE) is a universal scanner interface. The SANE application programming interface (API) provides standardized access to any raster image scanner hardware (flatbed scanner, hand-held scanner, video and still cameras, frame-grabbers, etc.).	http://www.sane-project.org	Sun 24 Mar 2013 04:45:36 PM EDT
sane-backends-drivers-scanners	1.0.23	SANE backend drivers for scanners	This package contains backend drivers to access scanner hardware through SANE.	http://www.sane-project.org	Sun 24 Mar 2013 04:48:33 PM EDT
sane-backends-libs	1.0.23	SANE libraries	This package contains the SANE libraries which are needed by applications that want to access scanners.	http://www.sane-project.org	Sun 24 Mar 2013 04:44:46 PM EDT

Name	Version	Summary	Description	URL	Install Time
schroedinger	1.0.11	Portable libraries for the high quality Dirac video codec	<p>The Schrdinger project will implement portable libraries for the high quality Dirac video codec created by BBC Research and Development. Dirac is a free and open source codec producing very high image quality video.</p> <p>The Schrdinger project is a project done by BBC R&D and Fluendo in order to create a set of high quality decoder and encoder libraries for the Dirac video codec.</p>	http://www.diracvideo.org/	Tue 26 Mar 2013 01:02:00 PM EDT
screen	4.1.0	A screen manager that supports multiple logins on one terminal	<p>The screen utility allows you to have multiple logins on just one terminal. Screen is useful for users who telnet into a machine or are connected via a dumb terminal, but want to use more than just one login.</p> <p>Install the screen package if you need a screen manager that can support multiple logins on one terminal.</p>	http://www.gnu.org/software/screen	Wed 24 Apr 2013 02:52:53 PM EDT

Name	Version	Summary	Description	URL	Install Time
scribus	1.4.2	DeskTop Publishing application written in Qt	<p>Scribus is an desktop open source page layout program with the aim of producing commercial grade output in PDF and Postscript, primarily, though not exclusively for Linux.</p> <p>While the goals of the program are for ease of use and simple easy to understand tools, Scribus offers support for professional publishing features, such as CMYK color, easy PDF creation, Encapsulated Postscript import/export and creation of color separations.</p>	http://www.scribus.net/	Sun 24 Mar 2013 04:47:46 PM EDT
SDL	1.2.15	A cross-platform multimedia library	Simple DirectMedia Layer (SDL) is a cross-platform multimedia library designed to provide fast access to the graphics frame buffer and audio device.	http://www.libsdl.org/	Sun 24 Mar 2013 04:45:37 PM EDT
SDL_image	1.2.12	Image loading library for SDL	Simple DirectMedia Layer (SDL) is a cross-platform multimedia library designed to provide fast access to the graphics frame buffer and audio device. This package contains a simple library for loading images of various formats (BMP, PPM, PCX, GIF, JPEG, PNG) as SDL surfaces.	http://www.libsdl.org/projects/SDL/_image/	Tue 26 Mar 2013 01:02:03 PM EDT

Name	Version	Summary	Description	URL	Install Time
sed	4.2.1	A GNU stream text editor	The sed (Stream Editor) editor is a stream or batch (non-interactive) editor. Sed takes text as input, performs an operation or set of operations on the text and outputs the modified text. The operations that sed performs (substitutions, deletions, insertions, etc.) can be specified in a script file or from the command line.	http://sed.sourceforge.net/	Wed 20 Mar 2013 09:49:51 AM EDT
seed	3.2.0	GNOME JavaScript interpreter	Seed is a library and interpreter, dynamically bridging (through GObject-Introspection) the WebKit JavaScriptCore engine, with the GNOME platform. Seed serves as something which enables you to write standalone applications in JavaScript, or easily enable your application to be extensible in JavaScript.	http://live.gnome.org/Seed	Wed 20 Mar 2013 09:54:12 AM EDT
selinux-policy	3.11.1	SELinux policy configuration	SELinux Reference Policy - modular. Based off of reference policy: Checked out revision 2.20091117	http://oss.tresys.com/repos/refpolicy/	Tue 23 Apr 2013 09:34:17 AM EDT
selinux-policy-devel	3.11.1	SELinux policy devel	SELinux policy development and man page package	http://oss.tresys.com/repos/refpolicy/	Tue 23 Apr 2013 09:36:19 AM EDT
selinux-policy-doc	3.11.1	SELinux policy documentation	SELinux policy documentation package	http://oss.tresys.com/repos/refpolicy/	Tue 23 Apr 2013 09:36:30 AM EDT

Name	Version	Summary	Description	URL	Install Time
selinux-policy-targeted	3.11.1	SELinux targeted base policy	SELinux Reference policy targeted base module.	http://oss.tresys.com/repos/refpolicy/	Tue 23 Apr 2013 09:36:31 AM EDT
sendmail	8.14.6	A widely used Mail Transport Agent (MTA)	<p>The Sendmail program is a very widely used Mail Transport Agent (MTA). MTAs send mail from one machine to another. Sendmail is not a client program, which you use to read your email. Sendmail is a behind-the-scenes program which actually moves your email over networks or the Internet to where you want it to go.</p> <p>If you ever need to reconfigure Sendmail, you will also need to have the sendmail-cf package installed. If you need documentation on Sendmail, you can install the sendmail-doc package.</p>	http://www.sendmail.org/	Sun 24 Mar 2013 04:48:33 PM EDT

Name	Version	Summary	Description	URL	Install Time
setools-libs	3.3.7	Policy analysis support libraries for SELinux	SETools is a collection of graphical tools, command-line tools, and libraries designed to facilitate SELinux policy analysis. This package includes the following run-time libraries: libapol policy analysis library libpoldiff semantic policy difference library libqpol library that abstracts policy internals libseaudit parse and filter SELinux audit messages in log files libsefs SELinux file contexts library	http://oss.tresys.com/projects/setools	Sun 24 Mar 2013 04:44:52 PM EDT
setools-libs-python	3.3.7	Python bindings for SELinux policy analysis	SETools is a collection of graphical tools, command-line tools, and libraries designed to facilitate SELinux policy analysis. This package includes Python bindings for the following libraries: libapol policy analysis library libpoldiff semantic policy difference library libqpol library that abstracts policy internals libseaudit parse and filter SELinux audit messages in log files libsefs SELinux file contexts library	http://oss.tresys.com/projects/setools	Sun 24 Mar 2013 04:44:55 PM EDT

Name	Version	Summary	Description	URL	Install Time
setroubleshoot	3.2.3	Helps troubleshoot SELinux problems	setroubleshoot GUI. Application that allows you to view setroubleshoot-server messages. Provides tools to help diagnose SELinux problems. When AVC messages are generated an alert can be generated that will give information about the problem and help track its resolution. Alerts can be configured to user preference. The same tools can be run on existing log files.	https://fedorahosted.org/setroubleshoot	Sun 24 Mar 2013 04:47:54 PM EDT
setroubleshoot-plugins	3.0.50	Analysis plugins for use with setroubleshoot	This package provides a set of analysis plugins for use with setroubleshoot. Each plugin has the capacity to analyze SELinux AVC data and system data to provide user friendly reports describing how to interpret SELinux AVC denials.	https://fedorahosted.org/setroubleshoot	Sun 24 Mar 2013 04:45:36 PM EDT
setroubleshoot-server	3.2.3	SELinux troubleshoot server	Provides tools to help diagnose SELinux problems. When AVC messages are generated an alert can be generated that will give information about the problem and help track its resolution. Alerts can be configured to user preference. The same tools can be run on existing log files.	https://fedorahosted.org/setroubleshoot	Sun 24 Mar 2013 04:45:37 PM EDT

Name	Version	Summary	Description	URL	Install Time
setup	2.8.57	A set of system configuration and setup files	The setup package contains a set of important system configuration and setup files, such as passwd, group, and profile.	https://fedorahosted.org/setup/	Wed 20 Mar 2013 09:49:29 AM EDT
setuptools	1.19.11	A text mode system configuration tool	Setuptools is a user-friendly text mode menu utility which allows you to access all of the text mode configuration programs included in the operating system distribution.	http://git.fedorahosted.org/git/?p=setuptools.git	Wed 20 Mar 2013 09:53:55 AM EDT
sg3_utils-libs	1.34	Shared library for sg3_utils	This package contains the shared library for sg3_utils.	http://sg.danny.cz/sg/sg3_utils.html	Wed 20 Mar 2013 09:56:45 AM EDT
sgml-common	0.6.3	Common SGML catalog and DTD files	The sgml-common package contains a collection of entities and DTDs that are useful for processing SGML, but that don't need to be included in multiple packages. Sgml-common also includes an up-to-date Open Catalog file.	http://www.w3.org/2003/entities/	Wed 20 Mar 2013 09:52:09 AM EDT
sgpio	1.2.0.10	SGPIO captive backplane tool	Intel SGPIO enclosure management utility	http://sources.redhat.com/lvm2/wiki/DMRAID_Eventing	Sun 24 Mar 2013 04:45:48 PM EDT

Name	Version	Summary	Description	URL	Install Time
shadow-utils	4.1.5.1	Utilities for managing accounts and shadow password files	The shadow-utils package includes the necessary programs for converting UNIX password files to the shadow password format, plus programs for managing user and group accounts. The pwconv command converts passwords to the shadow password format. The pwunconv command unconverts shadow passwords and generates a passwd file (a standard UNIX password file). The pwck command checks the integrity of password and shadow files. The lastlog command prints out the last login times for all users. The useradd, userdel, and usermod commands are used for managing user accounts. The groupadd, groupdel, and groupmod commands are used for managing group accounts.	http://pkg-shadow.alioth.debian.org/	Sun 24 Mar 2013 04:44:43 PM EDT
shapelib	1.3.0b2	API in "C" for Shapefile handling	The Shapefile C Library provides the ability to write simple C programs for reading, writing and updating (to a limited extent) ESRI Shapefiles, and the associated attribute file (.dbf).	http://shapelib.maptools.org/	Wed 20 Mar 2013 09:52:47 AM EDT

Name	Version	Summary	Description	URL	Install Time
shared-desktop-ontologies	0.10.0	Shared ontologies needed for semantic environments	<p>The vision of the Social Semantic Desktop defines a users personal information environment as a source and end-point of the Semantic Web: Knowledge workers comprehensively express their information and data with respect to their own conceptualizations.</p> <p>Semantic Web languages and protocols are used to formalize these conceptualizations and for coordinating local and global information access. The Resource Description Framework serves as a common data representation format. With a particular focus on addressing certain limitations of RDF, a novel representational language akin to RDF and the Web Ontology Language, plus a number of other high-level ontologies were created.</p> <p>Together, they provide a means to build the semantic bridges necessary for data exchange and application integration on distributed social semantic desktops. Although initially designed to fulfill requirements for the Nepomuk project, these ontologies are useful for the semantic web community in general.</p>	http://oscaf.sourceforge.net/	Wed 20 Mar 2013 09:49:31 AM EDT

Name	Version	Summary	Description	URL	Install Time
shared-mime-info	1.1	Shared MIME information database	This is the freedesktop.org shared MIME info database. Many programs and desktops use the MIME system to represent the types of files. Frequently, it is necessary to work out the correct MIME type for a file. This is generally done by examining the file's name or contents, and looking up the correct MIME type in a database.	http://freedesktop.org/Software/shared-mime-info	Sun 24 Mar 2013 04:44:37 PM EDT
shotwell	0.13.1	A photo organizer for the GNOME desktop	Shotwell is a new open source photo organizer designed for the GNOME desktop environment. It allows you to import photos from your camera, view and edit them, and share them with others.	http://www.yorba.org/shotwell/	Wed 20 Mar 2013 09:58:14 AM EDT

Name	Version	Summary	Description	URL	Install Time
sil-abyssinica-fonts	1.200	SIL Abyssinica fonts	SIL Abyssinica is a Unicode typeface family containing glyphs for the Ethiopic script. The Ethiopic script is used for writing many of the languages of Ethiopia and Eritrea. Abyssinica SIL supports all Ethiopic characters which are in Unicode including the Unicode 4.1 extensions. Some languages of Ethiopia are not yet able to be fully represented in Unicode and, where necessary, we have included non-Unicode characters in the Private Use Area (see Private-use (PUA) characters supported by Abyssinica SIL). Abyssinica SIL is based on Ethiopic calligraphic traditions. This release is a regular typeface, with no bold or italic version available or planned.	http://scripts.sil.org/AbyssinicaSIL	Wed 20 Mar 2013 09:59:14 AM EDT
sil-nuosu-fonts	2.1.1	The Nuosu SIL Font	The Nuosu SIL Font is a single Unicode font for the standardized Yi script used by a large ethnic group in southwestern China. Until this version, the font was called SIL Yi.	http://scripts.sil.org/SILYi_home	Wed 20 Mar 2013 09:59:47 AM EDT

Name	Version	Summary	Description	URL	Install Time
sil-padauk-fonts	2.8	A font for Burmese and the Myanmar script	Padauk is a Myanmar font covering all currently used characters in the Myanmar block. The font aims to cover all minority language needs. At the moment, these do not extend to stylistic variation needs. The font is a smart font using a Graphite description.	http://scripts.sil.org/Padauk	Wed 20 Mar 2013 09:59:36 AM EDT
sip	4.14.5	SIP - Python/C++ Bindings Generator	<p>SIP is a tool for generating bindings for C++ classes so that they can be accessed as normal Python classes. SIP takes many of its ideas from SWIG but, because it is specifically designed for C++ and Python, is able to generate tighter bindings. SIP is so called because it is a small SWIG.</p> <p>SIP was originally designed to generate Python bindings for KDE and so has explicit support for the signal slot mechanism used by the Qt/KDE class libraries. However, SIP can be used to generate Python bindings for any C++ class library.</p>	http://www.riverbankcomputing.com/software/sip/intro	Mon 08 Apr 2013 10:15:39 AM EDT
sj-fonts-common	2.0.2	Common files for sj-fonts	<p>Two fonts by Steve Jordi released under the GPL</p> <p>This package consists of files used by other sj-fonts packages.</p>	http://sjfonts.sourceforge.net	Wed 20 Mar 2013 09:49:34 AM EDT

Name	Version	Summary	Description	URL	Install Time
sj-stevehand-fonts	2.0.2	Handwriting font	Two fonts by Steve Jordi released under the GPL Handwriting font by Steve Jordi covering latin glyphs.	http://sjfonts.sourceforge.net	Wed 20 Mar 2013 09:51:34 AM EDT
slang	2.2.4	The shared library for the S-Lang extension language	S-Lang is an interpreted language and a programming library. The S-Lang language was designed so that it can be easily embedded into a program to provide the program with a powerful extension language. The S-Lang library, provided in this package, provides the S-Lang extension language. S-Lang's syntax resembles C, which makes it easy to recode S-Lang procedures in C if you need to.	http://www.jedsoft.org/slang/	Wed 20 Mar 2013 09:50:25 AM EDT
slang-devel	2.2.4	Development files for the S-Lang extension language	This package contains files which you'll need if you want to develop S-Lang based applications. Documentation which may help you write S-Lang based applications is also included. Install the slang-devel package if you want to develop applications based on the S-Lang extension language.	http://www.jedsoft.org/slang/	Fri 05 Apr 2013 04:34:35 PM EDT

Name	Version	Summary	Description	URL	Install Time
smartmontools	6.0	Tools for monitoring SMART capable hard disks	The smartmontools package contains two utility programs (smartctl and smartd) to control and monitor storage systems using the Self-Monitoring, Analysis and Reporting Technology System (SMART) built into most modern ATA and SCSI hard disks. In many cases, these utilities will provide advanced warning of disk degradation and failure.	http://smartmontools.sourceforge.net/	Sun 24 Mar 2013 04:49:01 PM EDT
smc-fonts-common	5.0.1	Common files for smc-fonts	The SMC Fonts package contains fonts for the display of traditional and new Malayalam Script.	http://savannah.nongnu.org/projects/smc	Sun 24 Mar 2013 04:46:16 PM EDT
smc-meera-fonts	5.0.1	Open Type Fonts for Malayalam script	The Meera font package contains fonts for the display of traditional Malayalam Scripts.	http://savannah.nongnu.org/projects/smc	Sun 24 Mar 2013 04:47:48 PM EDT
smplayer	0.8.4	A graphical frontend for mplayer	smplayer intends to be a complete front-end for Mplayer, from basic features like playing videos, DVDs, and VCDs to more advanced features like support for Mplayer filters and more. One of the main features is the ability to remember the state of a played file, so when you play it later it will resume at the same point and with the same settings. smplayer is developed with the Qt toolkit, so it's multi-platform.	http://smplayer.sourceforge.net/linux/	Tue 23 Apr 2013 09:36:42 AM EDT

soundtouch	1.4.0	Audio Processing library for changing Tempo, Pitch and Playback Rates	<p>SoundTouch is a LGPL-licensed open-source audio processing library for changing the Tempo, Pitch and Playback Rates of audio streams or files. The SoundTouch library is suited for application developers writing sound processing tools that require tempo/pitch control functionality, or just for playing around with the sound effects.</p> <p>The SoundTouch library source kit includes an example utility SoundStretch which allows processing .wav audio files from a command-line interface.</p>	http://www.surina.net/soundtouch/	Wed 20 Mar 2013 09:50:39 AM EDT
sox	14.4.0	A general purpose sound file conversion tool	<p>SoX (Sound eXchange) is a sound file format converter. SoX can convert between many different digitized sound formats and perform simple sound manipulation functions, including sound effects.</p>	http://sox.sourceforge.net/	Wed 20 Mar 2013 09:51:51 AM EDT

Name	Version	Summary	Description	URL	Install Time
spambayes	1.1	Bayesian anti-spam filter	SpamBayes will attempt to classify incoming email messages as 'spam', 'ham' (good, non-spam email) or 'unsure'. This means you can have spam or unsure messages automatically filed away in a different mail folder, where it won't interrupt your email reading. First SpamBayes must be trained by each user to identify spam and ham. Essentially, you show SpamBayes a pile of email that you like (ham) and a pile you don't like (spam). SpamBayes will then analyze the piles for clues as to what makes the spam and ham different. For example; different words, differences in the mailer headers and content style. The system then uses these clues to examine new messages.	http://spambayes.sourceforge.net	Wed 20 Mar 2013 09:52:42 AM EDT

Name	Version	Summary	Description	URL	Install Time
speech-dispatcher	0.7.1	To provide a high-level device independent layer for speech synthesis	<p>* Common interface to different TTS engines</p> <p>* Handling concurrent synthesis requests</p> <p>requests may come asynchronously from multiple sources within an application and/or from more different applications.</p> <p>* Subsequent serialization, resolution of conflicts and priorities of incoming requests</p> <p>* Context switching state is maintained for each client connection independently, event for connections from within one application.</p> <p>* High-level client interfaces for popular programming languages</p> <p>* Common sound output handling</p> <p>audio playback is handled by Speech Dispatcher rather than the TTS engine, since most engines have limited sound output capabilities.</p>	http://www.freebsoft.org/speechd	Wed 20 Mar 2013 09:56:44 AM EDT
speex	1.2	A voice compression format (codec)	Speex is a patent-free compression format designed especially for speech. It is specialized for voice communications at low bit-rates in the 2-45 kbps range. Possible applications include Voice over IP (VoIP), Internet audio streaming, audio books, and archiving of speech data (e.g. voice mail).	http://www.speex.org/	Wed 20 Mar 2013 09:50:04 AM EDT

subversion	1.7.8	A Modern Concurrent Version Control System	Subversion is a concurrent version control system which enables one or more users to collaborate in developing and maintaining a hierarchy of files and directories while keeping a history of all changes. Subversion only stores the differences between versions, instead of every complete file. Subversion is intended to be a compelling replacement for CVS.	http://subversion.apache.org/	Sun 24 Mar 2013 04:48:22 PM EDT
subversion-libs	1.7.8	Libraries for Subversion Version Control system	The subversion-libs package includes the essential shared libraries used by the Subversion version control tools.	http://subversion.apache.org/	Sun 24 Mar 2013 04:44:58 PM EDT

Name	Version	Summary	Description	URL	Install Time
sudo	1.8.6p7	Allows restricted root access for specified users	Sudo (superuser do) allows a system administrator to give certain users (or groups of users) the ability to run some (or all) commands as root while logging all commands and arguments. Sudo operates on a per-command basis. It is not a replacement for the shell. Features include: the ability to restrict what commands a user may run on a per-host basis, copious logging of each command (providing a clear audit trail of who did what), a configurable timeout of the sudo command, and the ability to use the same configuration file (sudoers) on many different machines.	http://www.courtesan.com/sudo/	Sun 24 Mar 2013 04:49:03 PM EDT

Name	Version	Summary	Description	URL	Install Time
suitesparse	3.6.1	A collection of sparse matrix libraries	suitesparse is a collection of libraries for computations involving sparse matrices. The package includes the following libraries: AMD approximate minimum degree ordering BTF permutation to block triangular form (beta) CAMD constrained approximate minimum degree ordering COLAMD column approximate minimum degree ordering CCOLAMD constrained column approximate minimum degree ordering CHOLMOD sparse Cholesky factorization CSparse a concise sparse matrix package CXSparse CSparse extended: complex matrix, int and long int support KLU sparse LU factorization, primarily for circuit simulation LDL a simple LDL' factorization SQPR a multithread, multifrontal, rank-revealing sparse QR factorization method UMFPACK sparse LU factorization UFconfig configuration file for all the above packages. RBio read/write files in Rutherford/Boeing format	http://www.cise.ufl.edu/research/sparse/SuiteSparse	Wed 20 Mar 2013 09:50:47 AM EDT

Name	Version	Summary	Description	URL	Install Time
swig	2.0.8	Connects C/C++/Objective C to some high-level programming languages	Simplified Wrapper and Interface Generator (SWIG) is a software development tool for connecting C, C++ and Objective C programs with a variety of high-level programming languages. SWIG is primarily used with Perl, Python and Tcl/Tk, but it has also been extended to Java, Eiffel and Guile. SWIG is normally used to create high-level interpreted programming environments, systems integration, and as a tool for building user interfaces	http://swig.sourceforge.net/	Wed 20 Mar 2013 09:59:04 AM EDT
symlinks	1.4	A utility which maintains a system's symbolic links	The symlinks utility performs maintenance on symbolic links. Symlinks checks for symlink problems, including dangling symlinks which point to non-existent files. Symlinks can also automatically convert absolute symlinks to relative symlinks. Install the symlinks package if you need a program for maintaining symlinks on your system.	ftp://metalab.unc.edu/pub/Linux/utils/file/	Wed 20 Mar 2013 09:59:51 AM EDT

Name	Version	Summary	Description	URL	Install Time
synfig	0.63.05	Vector-based 2D animation rendering backend	Synfig is a powerful, industrial-strength vector-based 2D animation software, designed from the ground-up for producing feature-film quality animation with fewer people and resources. It is designed to be capable of producing feature-film quality animation. It eliminates the need for tweening, preventing the need to hand-draw each frame. Synfig features spatial and temporal resolution independence (sharp and smooth at any resolution or framerate), high dynamic range images, and a flexible plugin system. This package contains the command-line-based rendering backend. Install synfigstudio package for GUI-based animation studio.	http://synfig.org/	Wed 20 Mar 2013 09:58:41 AM EDT
sysprof	1.2.0	A system-wide Linux profiler	Sysprof is a sampling CPU profiler for Linux that collects accurate, high-precision data and provides efficient access to the sampled calltrees.	http://www.sysprof.com	Wed 20 Mar 2013 10:00:14 AM EDT

Name	Version	Summary	Description	URL	Install Time
system-config-date	1.10.5	A graphical interface for modifying system date and time	system-config-date is a graphical interface for changing the system date and time, configuring the system time zone, and setting up the NTP daemon to synchronize the time of the system with an NTP time server.	http://fedorahosted.org/system-config-date	Sun 24 Mar 2013 04:49:00 PM EDT
system-config-keyboard	1.3.1	A graphical interface for modifying the keyboard	system-config-keyboard is a graphical user interface that allows the user to change the default keyboard of the system.	https://fedorahosted.org/system-config-keyboard/	Wed 20 Mar 2013 09:53:55 AM EDT
system-config-keyboard-base	1.3.1	system-config-keyboard base components	Base components of system-config-keyboard.	https://fedorahosted.org/system-config-keyboard/	Wed 20 Mar 2013 09:52:34 AM EDT
system-config-printer	1.3.12	A printer administration tool	system-config-printer is a graphical user interface that allows the user to configure a CUPS print server.	http://cyberelk.net/tim/software/system-config-printer/	Fri 05 Apr 2013 04:37:03 PM EDT
system-config-printer-libs	1.3.12	Libraries and shared code for printer administration tool	The common code used by both the graphical and non-graphical parts of the configuration tool.	http://cyberelk.net/tim/software/system-config-printer/	Fri 05 Apr 2013 04:36:18 PM EDT
system-config-printer-udev	1.3.12	Rules for udev for automatic configuration of USB printers	The udev rules and helper programs for automatically configuring USB printers.	http://cyberelk.net/tim/software/system-config-printer/	Fri 05 Apr 2013 04:37:03 PM EDT
system-config-services	0.101.8	Utility to start and stop system services	system-config-services is a utility which allows you to configure which services should be enabled on your machine.	http://fedorahosted.org/system-config-services	Wed 20 Mar 2013 09:58:25 AM EDT

Name	Version	Summary	Description	URL	Install Time
system-config-users	1.3.3	A graphical interface for administering users and groups	system-config-users is a graphical utility for administrating users and groups. It depends on the libuser library.	http://fedorahosted.org/system-config-users	Sun 24 Mar 2013 04:49:02 PM EDT
systemd	197	A System and Service Manager	systemd is a system and service manager for Linux, compatible with SysV and LSB init scripts. systemd provides aggressive parallelization capabilities, uses socket and D-Bus activation for starting services, offers on-demand starting of daemons, keeps track of processes using Linux cgroups, supports snapshotting and restoring of the system state, maintains mount and automount points and implements an elaborate transactional dependency-based service control logic. It can work as a drop-in replacement for sysvinit.	http://www.freedesktop.org/wiki/Software/systemd	Sun 24 Mar 2013 04:45:08 PM EDT
systemd-libs	197	systemd libraries	Libraries for systemd and udev, as well as the systemd PAM module.	http://www.freedesktop.org/wiki/Software/systemd	Fri 05 Apr 2013 04:24:10 PM EDT
systemd-libs	197	systemd libraries	Libraries for systemd and udev, as well as the systemd PAM module.	http://www.freedesktop.org/wiki/Software/systemd	Sun 24 Mar 2013 04:44:42 PM EDT

Name	Version	Summary	Description	URL	Install Time
systemd-python	197	Python Bindings for systemd	This package contains python binds for systemd APIs	http://www.freedesktop.org/wiki/Software/systemd	Sun 24 Mar 2013 04:45:36 PM EDT
systemd-sysv	197	SysV tools for systemd	SysV compatibility tools for systemd	http://www.freedesktop.org/wiki/Software/systemd	Sun 24 Mar 2013 04:45:09 PM EDT
systemtap	2.1	Programmable system-wide instrumentation system	SystemTap is an instrumentation system for systems running Linux. Developers can write instrumentation scripts to collect data on the operation of the system. The base systemtap package contains/requires the components needed to locally develop and execute systemtap scripts.	http://sourceware.org/systemtap/	Tue 23 Apr 2013 09:35:50 AM EDT
systemtap-client	2.1	Programmable system-wide instrumentation system - client	This package contains/requires the components needed to develop systemtap scripts, and compile them using a local systemtap-devel or a remote systemtap-server installation, then run them using a local or remote systemtap-runtime. It includes script samples and documentation, and a copy of the tapset library for reference.	http://sourceware.org/systemtap/	Tue 23 Apr 2013 09:35:32 AM EDT

Name	Version	Summary	Description	URL	Install Time
systemtap-devel	2.1	Programmable system-wide instrumentation system - development headers, tools	This package contains the components needed to compile a systemtap script from source form into executable (.ko) forms. It may be installed on a self-contained developer workstation (along with the systemtap-client and systemtap-runtime packages), or on a dedicated remote server (alongside the systemtap-server package). It includes a copy of the standard tapset library and the runtime library C files.	http://sourceware.org/systemtap/	Tue 23 Apr 2013 09:34:48 AM EDT
systemtap-runtime	2.1	Programmable system-wide instrumentation system - runtime	SystemTap runtime contains the components needed to execute a systemtap script that was already compiled into a module using a local or remote systemtap-devel installation.	http://sourceware.org/systemtap/	Tue 23 Apr 2013 09:35:31 AM EDT
systemtap-sdt-devel	2.1	Static probe support tools	This package includes the <code>sys/sdt.h</code> header file used for static instrumentation compiled into userspace programs and libraries, along with the optional <code>dtrace-compatibility</code> preprocessor to process related <code>.d</code> files into tracing-macro-laden <code>.h</code> headers.	http://sourceware.org/systemtap/	Tue 23 Apr 2013 09:35:08 AM EDT
sysvinit-tools	2.88	Tools used for process and utmp management.	The sysvinit-tools package contains various tools used for process management.	http://savannah.nongnu.org/projects/sysvinit/	Wed 20 Mar 2013 09:55:13 AM EDT

Name	Version	Summary	Description	URL	Install Time
t1lib	5.1.2	PostScript Type 1 font rasterizer	T1lib is a rasterizer library for Adobe Type 1 Fonts. It supports rotation and transformation, kerning underlining and antialiasing. It does not depend on X11, but does provides some special functions for X11. AFM-files can be generated from Type 1 font files and font subsetting is possible.	ftp://sunsite.unc.edu/pub/Linux/libs/graphics/t1lib-5.1.2.lsm	Wed 01 May 2013 05:01:12 PM EDT
taglib	1.8	Audio Meta-Data Library	TagLib is a library for reading and editing the meta-data of several popular audio formats. Currently it supports both ID3v1 and ID3v2 for MP3 files, Ogg Vorbis comments and ID3 tags and Vorbis comments in FLAC, MPC, Speex, WavPack, TrueAudio files, as well as APE Tags.	http://taglib.github.com/	Sun 24 Mar 2013 04:44:44 PM EDT
taglib-extras	1.0.1	Taglib support for other formats	Taglib-extras delivers support for reading and editing the meta-data of audio formats not supported by taglib, including: asf, mp4v2, rmff, wav.	http://websvn.kde.org/trunk/kdesupport/taglib-extras/	Wed 20 Mar 2013 09:50:34 AM EDT

Name	Version	Summary	Description	URL	Install Time
talk	0.17	Talk client for one-on-one Internet chatting	The talk package provides client programs for the Internet talk protocol, which allows you to chat with other users on different systems. Talk is a communication program which copies lines from one terminal to the terminal of another user. Install talk if you'd like to use talk for chatting with users on different systems.	http://web.archive.org/web/20070817165301/http://www.hcs.harvard.edu/~{}dholland/computers/netkit.html	Wed 20 Mar 2013 09:59:49 AM EDT
tar	1.26	A GNU file archiving program	The GNU tar program saves many files together in one archive and can restore individual files (or all of the files) from that archive. Tar can also be used to add supplemental files to an archive and to update or list files in the archive. Tar includes multivolume support, automatic archive compression/decompression, the ability to perform remote archives, and the ability to perform incremental and full backups. If you want to use tar for remote backups, you also need to install the rmt package.	http://www.gnu.org/software/tar/	Sun 24 Mar 2013 04:49:05 PM EDT

Name	Version	Summary	Description	URL	Install Time
tbb	4.0	The Threading Building Blocks library abstracts low-level threading details	Threading Building Blocks (TBB) is a C++ runtime library that abstracts the low-level threading details necessary for optimal multi-core performance. It uses common C++ templates and coding style to eliminate tedious threading implementation work. TBB requires fewer lines of code to achieve parallelism than other threading models. The applications you write are portable across platforms. Since the library is also inherently scalable, no code maintenance is required as more processor cores become available.	http://threadingbuildingblocks.org/	Wed 20 Mar 2013 09:50:39 AM EDT
tcl	8.5.13	Tool Command Language, pronounced tickle	The Tcl (Tool Command Language) provides a powerful platform for creating integration applications that tie together diverse applications, protocols, devices, and frameworks. When paired with the Tk toolkit, Tcl provides a fastest and powerful way to create cross-platform GUI applications. Tcl can also be used for a variety of web-related tasks and for creating powerful command languages for applications.	http://tcl.sourceforge.net/	Wed 20 Mar 2013 09:50:26 AM EDT

Name	Version	Summary	Description	URL	Install Time
tcp_wrappers	7.6	A security tool which acts as a wrapper for TCP daemons	The tcp_wrappers package provides small daemon programs which can monitor and filter incoming requests for systat, finger, FTP, telnet, rlogin, rsh, exec, tftp, talk and other network services. Install the tcp_wrappers program if you need a security tool for filtering incoming network services requests. This version also supports IPv6.	ftp://ftp.porcupine.org/pub/security/index.html	Wed 20 Mar 2013 09:51:17 AM EDT
tcp_wrappers-libs	7.6	Libraries for tcp_wrappers	tcp_wrappers-libs contains the libraries of the tcp_wrappers package.	ftp://ftp.porcupine.org/pub/security/index.html	Wed 20 Mar 2013 09:49:51 AM EDT
tcpdump	4.3.0	A network traffic monitoring tool	Tcpdump is a command-line tool for monitoring network traffic. Tcpdump can capture and display the packet headers on a particular network interface or on all interfaces. Tcpdump can display all of the packet headers, or just the ones that match particular criteria. Install tcpdump if you need a program to monitor network traffic.	http://www.tcpdump.org	Wed 20 Mar 2013 09:58:39 AM EDT

Name	Version	Summary	Description	URL	Install Time
tcsh	6.18.00	An enhanced version of csh, the C shell	Tcsh is an enhanced but completely compatible version of csh, the C shell. Tcsh is a command language interpreter which can be used both as an interactive login shell and as a shell script command processor. Tcsh includes a command line editor, programmable word completion, spelling correction, a history mechanism, job control and a C language like syntax.	http://www.tcsh.org/	Tue 30 Apr 2013 01:40:36 PM EDT
telepathy-glib	0.20.2	GLib bindings for Telepathy	Telepathy-glib is the glib bindings for the telepathy unified framework for all forms of real time conversations, including instant messaging, IRC, voice calls and video calls.	http://telepathy.freedesktop.org/wiki/FrontPage	Tue 23 Apr 2013 09:36:41 AM EDT
telepathy-mission-control	5.14.0	Central control for Telepathy connection manager	Mission Control, or MC, is a Telepathy component providing a way for "end-user" applications to abstract some of the details of connection managers, to provide a simple way to manipulate a bunch of connection managers at once, and to remove the need to have in each program the account definitions and credentials.	http://telepathy.freedesktop.org/wiki/Mission_Control	Sun 24 Mar 2013 04:48:34 PM EDT

Name	Version	Summary	Description	URL	Install Time
telepathy-qt4	0.9.3	High-level bindings for Telepathy	Telepathy-qt4 are high level bindings for Telepathy and provides both the low level 1:1 auto generated API, and a high-level API build on top of that, in the same library.	http://telepathy.freedesktop.org/wiki/Telepathy-Qt4	Wed 20 Mar 2013 09:56:32 AM EDT
telnet	0.17	The client program for the Telnet remote login protocol	Telnet is a popular protocol for logging into remote systems over the Internet. The package provides a command line Telnet client	http://web.archive.org/web/20070819111735/www.hcs.harvard.edu/~dholland/computers/old-netkit.html	Wed 20 Mar 2013 09:59:49 AM EDT
tepsonic	0.98.3	A simple, fast and lightweight Qt audio player	A simple, small and fast Qt audio player with collections and all the other basic functions that every good audio player should have.	http://www.tepsonic.org	Tue 26 Mar 2013 01:15:41 PM EDT
texinfo	4.13a	Tools needed to create Texinfo format documentation files	Texinfo is a documentation system that can produce both online information and printed output from a single source file. The GNU Project uses the Texinfo file format for most of its documentation. Install texinfo if you want a documentation system for producing both online and print documentation from the same source file and/or if you are going to write documentation for the GNU Project.	http://www.gnu.org/software/texinfo/	Wed 20 Mar 2013 09:59:02 AM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-ae	svn1587 8.1.4	Virtual fonts for T1 encoded CMR-fonts	A set of virtual fonts which emulates T1 coded fonts using the standard CM fonts. The package name, AE fonts, supposedly stands for "Almost European". The main use of the package was to produce PDF files using Adobe Type 1 versions of the CM fonts instead of bitmapped EC fonts. Note that direct substitutes for the bitmapped EC fonts are now available, via the CM-super, Latin Modern and (in a restricted way) CM-LGC font sets. date: 2009-06-30 11:37:01 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:22 PM EDT
texlive-algorithms	svn1587 8.0.1	A suite of tools for typesetting algorithms in pseudo-code	Consists of two environments: algorithm and algorithmic. The algorithm package defines a floating algorithm environment designed to work with the algorithmic style. Within an algorithmic environment a number of commands for typesetting popular algorithmic constructs are available. date: 2009-08-25 14:02:57 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:15 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-amscls	svn2920 7.0	AMS document classes for LaTeX	This bundle contains three AMS classes, amsart (for writing articles for the AMS), amsbook (for books) and amsproc (for proceedings), together with some supporting material. The material is made available as part of the AMS-LaTeX distribution. date: 2013-02-02 11:29:56 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:19 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-amsfonts	svn2920 8.3.04	TeX fonts from the American Mathematical Society	An extended set of fonts for use in mathematics, including: extra mathematical symbols; blackboard bold letters (uppercase only); fraktur letters; subscript sizes of bold math italic and bold Greek letters; subscript sizes of large symbols such as sum and product; added sizes of the Computer Modern small caps font; cyrillic fonts (from the University of Washington); Euler mathematical fonts. All fonts are provided as Adobe Type 1 files, and all except the Euler fonts are provided as Metafont source. The distribution also includes the canonical Type 1 versions of the Computer Modern family of fonts. Plain TeX and LaTeX macros for using the fonts are provided. date: 2013-01-28 18:05:09 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:00:56 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive- amsmath	svn2932 7.2.14	AMS mathematical facilities for LaTeX	<p>The package provides the principal packages in the AMS-LaTeX distribution. It adapts for use in LaTeX most of the mathematical features found in AMS-TeX; it is highly recommended as an adjunct to serious mathematical typesetting in LaTeX. When amsmath is loaded, AMS-LaTeX packages amsbsy (for bold symbols), amsopn (for operator names) and amstext (for text embedded in mathematics) are also loaded. Amsmath is part of the LaTeX required distribution; however, several contributed packages add still further to its appeal; examples are empheq, which provides functions for decorating and highlighting mathematics, and ntheorem, for specifying theorem (and similar) definitions.</p> <p>date: 2013-03-09 20:29:31 +0100</p>	http://tug.org/texlive/	Wed 01 May 2013 05:00:55 PM EDT
texlive- anysize	svn1587 8.0	A simple package to set up document margins	<p>This package is considered obsolete; alternatives are the typearea package from the koma-script bundle, or the geometry package.</p> <p>date: 2009-09-24 14:57:17 +0200</p>	http://tug.org/texlive/	Wed 01 May 2013 05:01:12 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-attachfile	svn2186 6.v1.5b	Attach arbitrary files to a PDF document	Starting with PDF 1.3 (Adobe Acrobat 4.0), PDF files can contain file attachments – arbitrary files that a reader can extract, just like attachments to an e-mail message. The attachfile package brings this functionality to pdfLaTeX and provides some additional features not available in Acrobat, such as the ability to use arbitrary LaTeX code for the file icon – including things like <code>\{\}includegraphics</code> , <code>tabular</code> , and mathematics. Settings can be made either globally or on a per-attachment basis. Attachfile makes it easy to attach files and customize their appearance in the enclosing document. The package supports the Created, Modified, and Size keys in the EmbeddedFile's Params dictionary. date: 2011-03-28 07:44:29 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:14 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-avantgar	svn2861 4.0	URW "Base 35" font pack for LaTeX	<p>A set of fonts for use as "drop-in" replacements for Adobe's basic set, comprising:</p> <ul style="list-style-type: none"> - Century Schoolbook (substituting for Adobe's New Century Schoolbook); - Dingbats (substituting for Adobe's Zapf Dingbats); - Nimbus Mono L (substituting for Adobe's Courier); - Nimbus Roman No9 L (substituting for Adobe's Times); - Nimbus Sans L (substituting for Adobe's Helvetica); - Standard Symbols L (substituting for Adobe's Symbol); - URW Bookman; - URW Chancery L Medium Italic (substituting for Adobe's Zapf Chancery); - URW Gothic L Book (substituting for Adobe's Avant Garde); and - URW Palladio L (substituting for Adobe's Palatino). <p>date: 2012-06-06 22:57:48 +0200</p>	http://tug.org/texlive/	Wed 01 May 2013 05:01:07 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-babel	svn2475 6.3.8m	Multilingual support for Plain TeX or LaTeX	The package manages culturally-determined typographical (and other) rules, and hyphenation patterns for a wide range of languages. A document may select a single language to be supported, or it may select several, in which case the document may switch from one language to another in a variety of ways. Note that the package has contributions for several languages that remain to be incorporated. Examples are: Arabic; Magyar (Hungarian); Serbian written in cyrillic; Spanish; and Spanish, using Mexican conventions.. Users of XeTeX are advised to use polyglossia rather than Babel. date: 2011-10-07 15:38:55 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:15 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-babelbib	svn2524 5.1.31	Multilingual bibliographies	This package enables to generate multilingual bibliographies in cooperation with babel. Two approaches are possible: Each citation may be written in another language, or the whole bibliography can be typeset in a language chosen by the user. In addition, the package supports commands to change the typography of the bibliographies. date: 2012-01-30 12:34:22 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:15 PM EDT
texlive-base	2012	TeX Live filesystem, metadata and licenses shipped in text form	TeX Live licenses shipped in text form.	http://tug.org/texlive/	Wed 01 May 2013 05:00:55 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-beamer	svn2934 9.3.26	A LaTeX class for producing presentations and slides	<p>The beamer LaTeX class can be used for producing slides. Its functionality is similar to Prosper but does not need any external programs and can directly produce a presentation using pdf_latex. Beamer uses pgf for pdf/ps independent graphics. Frames are created using <code>\frame{...}</code>, and a frame can build multiple slides through a simple notation for specifying material for each slide within a frame. Beamer supports bibliographies, appendices and transitions. Short versions of title, authors, institute can also be specified as optional parameters. A <code>\plainframe{}</code> allows a picture, for example, to fill the whole frame. Support figure and table environments, transparency effects, a <code>\transduration</code> command, animation commands, a pauses environment. Beamer also provides compatibility with other packages like prosper. The package now incorporates the functionality of the former translator package, which is used for customising the package for use in other language environments.</p> <p>date: 2013-01-04 23:53:30 +0100</p>	http://tug.org/texlive/	Wed 01 May 2013 05:01:21 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-bera	svn2003 1.0	Bera fonts	The package contains the Bera Type 1 fonts, and a zip archive containing files to use the fonts with LaTeX. Bera is a set of three font families: Bera Serif (a slab-serif Roman), Bera Sans (a Frutiger descendant), and Bera Mono (monospaced/typewriter). Support for use in LaTeX is also provided. The Bera family is a repackaging, for use with TeX, of the Bitstream Vera family. date: 2008-01-28 20:53:41 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:14 PM EDT
texlive-beton	svn1587 8.0	Use Concrete fonts	Typeset a LaTeX2e document with the Concrete fonts designed by Don Knuth and used in his book "Concrete Mathematics". date: 2009-09-24 15:05:48 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:09 PM EDT
texlive-bibtex-bin	svn2650 9.0	Binaries for bibtex	Binaries for bibtex	http://tug.org/texlive/	Wed 01 May 2013 05:01:02 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive- bibtex	svn2668 9.0.99d	Process bibliographies for LaTeX, etc	<p>BibTeX allows the user to store his citation data in generic form, while printing citations in a document in the form specified by a BibTeX style, to be specified in the document itself (one often needs a LaTeX citation-style package, such as natbib as well). BibTeX itself is an ASCII-only program; there is, however, a version that copes with 8-bit character sets. However, BibTeX's facilities rapidly run out as one moves away from simple ASCII (for example, in the various national sorting rules for languages expressed in different parts of ISO-8859 – the "ISO Latin" series). For more flexibility, the user is urged to consider using biber with biblatex to typeset its output. In particular, it is best to avoid BibTeX in favour of biblatex, if at all possible.</p> <p>date: 2011-12-28 13:17:09 +0100</p>	http://tug.org/texlive/	Wed 01 May 2013 05:01:02 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-bookman	svn2861 4.0	URW "Base 35" font pack for LaTeX	<p>A set of fonts for use as "drop-in" replacements for Adobe's basic set, comprising:</p> <ul style="list-style-type: none"> - Century Schoolbook (substituting for Adobe's New Century Schoolbook); - Dingbats (substituting for Adobe's Zapf Dingbats); - Nimbus Mono L (substituting for Adobe's Courier); - Nimbus Roman No9 L (substituting for Adobe's Times); - Nimbus Sans L (substituting for Adobe's Helvetica); - Standard Symbols L (substituting for Adobe's Symbol); - URW Bookman; - URW Chancery L Medium Italic (substituting for Adobe's Zapf Chancery); - URW Gothic L Book (substituting for Adobe's Avant Garde); and - URW Palladio L (substituting for Adobe's Palatino). <p>date: 2012-06-06 22:57:48 +0200</p>	http://tug.org/texlive/	Wed 01 May 2013 05:01:07 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-booktabs	svn1587 8.1.6180 3	Publication quality tables in LaTeX	The package enhances the quality of tables in LaTeX, providing extra commands as well as behind-the-scenes optimisation. Guidelines are given as to what constitutes a good table in this context. From version 1.61, the package offers longtable compatibility. date: 2009-09-24 15:05:48 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:00:56 PM EDT
texlive-breakurl	svn1587 8.1.30	Line-breakable <code>\{\}url</code> -like links in hyperref when compiling via dvips/ps2pdf	This package provides a command much like hyperref's <code>\{\}url</code> that typesets a URL using a typewriter-like font. However, if the dvips driver is being used, the original <code>\{\}url</code> doesn't allow line breaks in the middle of the created link: the link comes in one atomic piece. This package allows such line breaks in the generated links. date: 2009-09-27 09:44:19 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:14 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-caption	svn2902 6.3.3--2 013-02- 03-	Customising captions in floating environments	The caption package provides many ways to customise the captions in floating environments like figure and table, and cooperates with many other packages. Facilities include rotating captions, sideways captions, continued captions (for tables or figures that come in several parts). A list of compatibility notes, for other packages, is provided in the documentation. The package also provides the "caption outside float" facility, in the same way that simpler packages like capt-of do. The package supersedes caption2. date: 2013-02-03 23:55:29 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:00 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-carlisle	svn1825 8.0	David Carlisle's small packages	Many of David Carlisle's more substantial packages stand on their own, or as part of the LaTeX tools set; this set contains: - Making dotless 'j' characters for fonts that don't have them; - Fix marks in 2-column output; - A method for combining the capabilities of longtable and tabularx; - A proforma for building personalised LaTeX formats; - A jiffy to suppress page numbers; - An environment for including Plain TeX in LaTeX documents; - A jiffy to remove counters from other counters' reset lists; - A package to rescale fonts to arbitrary sizes; - A jiffy to create 'slashed' for physicists; and - An environment for including HTML in LaTeX documents. date: 2010-02-18 13:36:42 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:00:57 PM EDT
texlive-charter	svn1587 8.0	Charter fonts	A commercial text font donated for the common good. Support for use with LaTeX is available in freenfs, part of psnfss. date: 2009-05-23 20:19:02 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:07 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-chngcitr	svn1715 7.1.0a	Change the resetting of counters	Defines <code>\counterwithin</code> (which sets up a counter to be reset when another is incremented) and <code>\counterwithout</code> (which unsets such a relationship). date: 2010-03-09 12:54:42 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:06 PM EDT
texlive-cite	svn1995 5.5.3	Improved citation handling in LaTeX	The package supports compressed, sorted lists of numerical citations, and also deals with various punctuation and other issues of representation, including comprehensive management of break points. The package is compatible with both <code>hyperref</code> and <code>backref</code> . The package is (unsurprisingly) part of the <code>cite</code> bundle of the author's citation-related packages. date: 2010-09-12 10:54:58 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:12 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-cm-super	svn1587 8.0	CM-Super family of fonts	CM-Super family of fonts are Adobe Type 1 fonts that replace the T1/TS1-encoded Computer Modern (EC/TC), T1/TS1-encoded Concrete, T1/TS1-encoded CM bright and LH fonts (thus supporting all European languages except Greek, and all Cyrillic-based languages), and bringing many ameliorations in typesetting quality. The fonts exhibit the same metrics as the MetaFont-encoded originals. date: 2008-01-16 21:31:11 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:25 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-cm	svn2495 6.0	Computer Modern fonts	Knuth's final iteration of his re-interpretation of a c.19 Modern-style font from Monotype. The family is comprehensive, offering both sans and roman styles, and a monospaced font, together with mathematics fonts closely integrated with the mathematical facilities of TeX itself. The base fonts are distributed as Metafont source, but auto-traced PostScript Type 1 versions are available (one version in the AMS fonts distribution, and also the BaKoMa distribution). The Computer Modern fonts have inspired many later families, notably the European Computer Modern and the Latin Modern families. date: 2011-04-10 19:35:44 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:05 PM EDT
texlive-cmap	svn2656 8.0	cmap package	cmap package	http://tug.org/texlive/	Wed 01 May 2013 05:01:06 PM EDT
texlive-cmextra	svn1407 5.0	cmextra package	cmextra package	http://tug.org/texlive/	Wed 01 May 2013 05:01:12 PM EDT
texlive-colortbl	svn2539 4.v1.0a	Add colour to LaTeX tables	The package allows rows and columns to be coloured, and even individual cells. date: 2012-02-14 10:56:36 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:00:57 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-courier	svn2861 4.0	URW "Base 35" font pack for LaTeX	<p>A set of fonts for use as "drop-in" replacements for Adobe's basic set, comprising:</p> <ul style="list-style-type: none"> - Century Schoolbook (substituting for Adobe's New Century Schoolbook); - Dingbats (substituting for Adobe's Zapf Dingbats); - Nimbus Mono L (substituting for Adobe's Courier); - Nimbus Roman No9 L (substituting for Adobe's Times); - Nimbus Sans L (substituting for Adobe's Helvetica); - Standard Symbols L (substituting for Adobe's Symbol); - URW Bookman; - URW Chancery L Medium Italic (substituting for Adobe's Zapf Chancery); - URW Gothic L Book (substituting for Adobe's Avant Garde); and - URW Palladio L (substituting for Adobe's Palatino). <p>date: 2012-06-06 22:57:48 +0200</p>	http://tug.org/texlive/	Wed 01 May 2013 05:01:11 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-crop	svn1587 8.1.5	Support for cropmarks	<p>A package providing corner marks for camera alignment as well as for trimming paper stacks, and additional page information on every page if required. Most macros are easily adaptable to personal preferences. An option is provided for selectively suppressing graphics or text, which may be useful for printing just colour graphics on a colour laser printer and the rest on a cheap mono laser printer. A page info line contains the time and a new cropmarks index and is printed at the top of the page. A configuration command is provided for the info line font. Options for better collaboration with dvips, pdftex and vtex are provided.</p> <p>date: 2009-07-10 18:40:58 +0200</p>	http://tug.org/texlive/	Wed 01 May 2013 05:01:05 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-csquotes	svn2439 3.5.1d	Context sensitive quotation facilities	This package provides advanced facilities for inline and display quotations. It is designed for a wide range of tasks ranging from the most simple applications to the more complex demands of formal quotations. The facilities include commands, environments, and user-definable 'smart quotes' which dynamically adjust to their context. Quotation marks are switched automatically if quotations are nested and they can be adjusted to the current language if the babel package is available. There are additional facilities designed to cope with the more specific demands of academic writing, especially in the humanities and the social sciences. All quote styles as well as the optional active quotes are freely configurable. The package is dependent on e-TeX, and requires the author's etoolbox package. date: 2011-10-24 17:03:17 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:03 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive- ctable	svn2669 4.1.23	Easily typeset centered tables	Provides commands to typeset centered, left- or right-aligned table and (multiple-)figure floats, with footnotes. Instead of an environment, a command with 4 arguments is used; the first is optional and is used for key,value pairs generating variations on the defaults and offering a route for future extensions. date: 2012-05-28 15:39:00 +0200	http://tug.org/ texlive/	Wed 01 May 2013 05:01:19 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive- currfile	svn2901 2.0.7b	Provide file name and path of input files	The package provides macros holding file name information (directory, base name, extension, full name and full path) for files read by LaTeX <code>\input</code> and <code>\include</code> macros; it uses the file hooks provided by the author's file-hook. In particular, it restores the parent file name after the trailing <code>\clearpage</code> of an <code>\included</code> file; as a result, the macros may be usefully employed in the page header and footer of the last printed page of such a file. The depth of inclusion is made available, together with the "parent" (including file) and "parents" (all including files to the root of the tree). The package supersedes FiNK. date: 2013-02-02 11:38:19 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:14 PM EDT
texlive- dvipdfm- bin	svn1366 3.0	Binaries for dvipdfm	Binaries for dvipdfm	http://tug.org/texlive/	Wed 01 May 2013 05:01:02 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-dvipdfm	svn2668 9.0.13.2 d	A DVI driver to produce PDF directly	The driver offers a wide range of \{\}special commands (including a colour stack), and supports compression of data streams, etc. Note that the extended version dvipdfmx will operate "as dvipdfm" if necessary. date: 2012-04-21 10:57:19 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:03 PM EDT
texlive-dvipdfmx-bin	svn2650 9.0	Binaries for dvipdfmx	Binaries for dvipdfmx	http://tug.org/texlive/	Wed 01 May 2013 05:01:01 PM EDT
texlive-dvipdfmx-def	svn1587 8.0	dvipdfmx-def package	dvipdfmx-def package	http://tug.org/texlive/	Wed 01 May 2013 05:01:01 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-dvipdfmx	svn2676 5.0	An extended version of dvipdfm	Dvipdfmx (formerly dvipdfm-cjk) is a development of dvipdfm created to support multi-byte character encodings and large character sets for East Asian languages. Dvipdfmx, if "called" with the name dvipdfm, operates in a "dvipdfm compatibility" mode, so that users of the both packages need only keep one executable. A secondary design goal is to support as many "PDF" features as does pdfTeX. There being no documentation as such, users are advised to consult the documentation of dvipdfm (as well, of course, as the package Readme. date: 2012-04-21 10:57:19 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:01 PM EDT
texlive-dvips-bin	svn2650 9.0	Binaries for dvips	Binaries for dvips	http://tug.org/texlive/	Wed 01 May 2013 05:01:00 PM EDT
texlive-dvips	svn2861 6.0	A DVI to PostScript driver	This package has been withdrawn from CTAN, and bundled into the distributions' package sets. The current sources of dvips may be found in the distribution of dvipsk which forms part of the TeX-live sources. date: 2012-07-03 17:35:36 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:00 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-ec	svn2503 3.1.0	Computer modern fonts in T1 and TS1 encodings	<p>The EC fonts are European Computer Modern Fonts, supporting the complete LaTeX T1 encoding defined at the 1990 TUG conference hold at Cork/Ireland. These fonts are intended to be stable with no changes being made to the tfm files. The set also contains a Text Companion Symbol font, called tc, featuring many useful characters needed in text type-setting, for example oldstyle digits, currency symbols (including the newly created Euro symbol), the permille sign, copyright, trade mark and servicemark as well as a copyleft sign, and many others. Recent releases of LaTeX2e support the EC fonts. The EC fonts supersede the preliminary version released as the DC fonts. The fonts are available in (traced) Adobe Type 1 format, as part of the cm-super bundle. The other Computer Modern-style T1-encoded Type 1 set, Latin Modern, is not actually a direct development of the EC set, and differs from the EC in a number of particulars.</p> <p>date: 2009-08-27 17:24:27 +0200</p>	http://tug.org/texlive/	Wed 01 May 2013 05:01:12 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive- enctex	svn2860 2.0	A TeX extension that translates input on its way into TeX	EncTeX is (another) tex extension, written at the change-file level. It provides means of translating input on the way into TeX. It allows, for example, translation of multibyte sequences, such as utf-8 encoding. date: 2012-11-01 10:06:10 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:05 PM EDT
texlive- enumitem	svn2414 6.3.5.2	Control layout of itemize, enumerate, description	This package provides user control over the layout of the three basic list environments: enumerate, itemize and description. It supersedes both enumerate and mdwlist (providing well-structured replacements for all their functionality), and in addition provides functions to compute the layout of labels, and to 'clone' the standard environments, to create new environments with counters of their own. date: 2011-09-28 17:37:11 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:03 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-eso-pic	svn2151 5.2.0c	Add picture commands (or backgrounds) to every page	Eso-pic is an extension of everyshi. Using everyshi's <code>\{EveryShipout</code> command, eso-pic adds one or more user commands to LaTeX's shipout actions. date: 2010-10-06 15:20:29 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:17 PM EDT
texlive-etex-pkg	svn1587 8.2.0	E-TeX support package	The package provides a straightforward interface to many of the extensions offered by e-TeX; in particular, it modifies LaTeX's register allocation macros to make use of the extended register range. The etoolbox and etextools packages provide macros that make more sophisticated use of e-TeX's facilities. date: 2009-07-22 12:43:06 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:00:56 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-etex	svn2219 8.2.1	An extended version of TeX, from the NTS project	An extended version of TeX (which is capable of running as if it were TeX unmodified). E-TeX has been specified by the LaTeX team as the engine for the development of LaTeX, in the immediate future; as a result, LaTeX programmers may (in all current TeX distributions) assume e-TeX functionality. date: 2010-02-06 00:03:35 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:08 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive- etoolbox	svn2092 2.2.1	Tool-box for LaTeX programmers using e-TeX	<p>The etoolbox package is a toolbox of programming facilities geared primarily towards LaTeX class and package authors. It provides LaTeX frontends to some of the new primitives provided by e-TeX as well as some generic tools which are not strictly related to e-TeX but match the profile of this package. Note that the initial versions of this package were released under the name elatex. The package provides functions that seem to offer alternative ways of implementing some LaTeX kernel commands; nevertheless, the package will not modify any part of the LaTeX kernel.</p> <p>date: 2011-01-03 19:54:22 +0100</p>	http://tug.org/texlive/	Wed 01 May 2013 05:00:57 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-euler	svn1726 1.2.5	Use AMS Euler fonts for math	Provides a setup for using the AMS Euler family of fonts for mathematics in LaTeX documents. "The underlying philosophy of Zapf's Euler design was to capture the flavour of mathematics as it might be written by a mathematician with excellent handwriting." [concrete-tug] The euler package is based on Knuth's macros for the book 'Concrete Mathematics'. The text fonts for the Concrete book are supported by the beton package. date: 2010-02-28 19:16:53 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:02 PM EDT
texlive-euro	svn2219 1.1.1	Provide Euro values for national currency amounts	Converts arbitrary national currency amounts using the Euro as base unit, and typesets monetary amounts in almost any desired way. Write, e.g., <code>\{}ATS{17.6}</code> to get something like '17,60 oS (1,28 Euro)' automatically. Conversion rates for the initial Euro-zone countries are already built-in. Further rates can be added easily. The package uses the fp package to do its sums. date: 2006-09-12 14:13:09 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:03 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-eurosym	svn1726 5.1.4_su brfix	MetaFont and macros for Euro sign	The new European currency symbol for the Euro implemented in MetaFont, using the official European Commission dimensions, and providing several shapes (normal, slanted, bold, outline). The package also includes a LaTeX package which defines the macro, pre-compiled tfm files, and documentation. date: 2009-03-31 14:27:12 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:04 PM EDT
texlive-extsizes	svn1726 3.1.4a	Extend the standard classes' size options	Provides classes extarticle and extreport, extletter, extbook, extproc which allow for documents with a base font of size 8- 20pt. date: 2010-02-28 19:16:53 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:21 PM EDT
texlive-fancybox	svn1830 4.1.4	Variants of <code>\{\}fbox</code> and other games with boxes	Provides variants of <code>\{\}fbox</code> : <code>\{\}shadowbox</code> , <code>\{\}doublebox</code> , <code>\{\}ovalbox</code> , <code>\{\}Ovalbox</code> , with helpful tools for using box macros and flexible verbatim macros. You can box mathematics, floats, center, flushleft, and flushright, lists, and pages. date: 2010-05-15 22:45:27 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:06 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-fancyhdr	svn1587 8.3.1	Extensive control of page headers and footers in LaTeX2e	The package provides extensive facilities, both for constructing headers and footers, and for controlling their use (for example, at times when LaTeX would automatically change the heading style in use). date: 2009-01-10 12:36:34 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:10 PM EDT
texlive-fancyref	svn1587 8.0.9c	A LaTeX package for fancy cross-referencing	Provides fancy cross-referencing support, based on the package's reference commands (<code>\{fref</code> and <code>\{Fref</code>) that recognise what sort of object is being referenced. So, for example, the label for a <code>\{section</code> would be expected to be of the form 'sec:foo': the package would recognise the 'sec:' part. date: 2006-12-05 17:23:05 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:03 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-fancyvrb	svn1849 2.2.8	Sophisticated verbatim text	Flexible handling of verbatim text including: verbatim commands in footnotes; a variety of verbatim environments with many parameters; ability to define new customized verbatim environments; save and restore verbatim text and environments; write and read files in verbatim mode; build "example" environments (showing both result and verbatim source). date: 2010-05-25 20:13:54 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:18 PM EDT
texlive-filecontents	svn2425 0.1.3	Extended filecontents and filecontents* environments	LaTeX2e's filecontents and filecontents* environments enable a LaTeX source file to generate external files as it runs through LaTeX. However, there are two limitations of these environments: they refuse to overwrite existing files, and they can only be used in the preamble of a document. The filecontents package removes these limitations, letting you overwrite existing files and letting you use filecontents/filecontents* anywhere. date: 2011-10-09 16:42:04 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:10 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-filehook	svn2428 0.0.5d	Hooks for input files	The package provides several file hooks (AtBegin, AtEnd, ...) for files read by <code>\input</code> , <code>\include</code> and <code>\InputIfFileExists</code> . General hooks for all such files (e.g. all <code>\include</code> 'd ones) and file specific hooks only used for named files are provided; two hooks are provided for the end of <code>\included</code> files – one before, and one after the final <code>\clearpage</code> . date: 2011-10-13 10:45:00 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:14 PM EDT
texlive-fix2col	svn1713 3.0	Fix miscellaneous two column mode features	Fix mark handling so that <code>\firstmark</code> is taken from the first column if that column has any marks at all; keep two column floats like figure* in sequence with single column floats like figure. date: 2010-02-23 16:16:11 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:06 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-float	svn1587 8.1.3d	Improved interface for floating objects	Improves the ter- face defin- ing ing float- ob- jects such as fig- ures and ta- bles. In- tro- duces the boxed float, ruled float and the plain- top float. You can de- fine your own floats and im- prove the be- haviour of the old ones. The pack- age also pro- vides the H float	http://tug.org/ texlive/	Wed 01 May 2013 05:01:02 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-fontspec	svn2941 2.v2.3a	Advanced font selection in XeLaTeX and LuaLaTeX	Fontspec is a package for XeLaTeX and LuaLaTeX. It provides an automatic and unified interface to feature-rich AAT and OpenType fonts through the NFSS in LaTeX running on XeTeX or LuaTeX engines. The package requires the l3kernel and xparse bundles from the LaTeX 3 development team. date: 2013-03-17 00:29:52 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:17 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-footmisc	svn2333 0.5.5b	A range of footnote options	A collection of ways to change the typesetting of footnotes. The package provides means of changing the layout of the footnotes themselves (including setting them in 'paragraphs' – the para option), a way to number footnotes per page (the perpage option), to make footnotes disappear when an argument moves (stable option) and to deal with multiple references to footnotes from the same place (multiple option). The package also has a range of techniques for labelling footnotes with symbols rather than numbers. Some of the functions of the package are overlap with the functionality of other packages. The para option is also provided by the manyfoot and bigfoot packages, though those are both also portmanteau packages. (Don't be seduced by fnpara, whose implementation is improved by the present package.) The perpage option is also offered by footnpag and by the rather more general-purpose perpage date: 2011-06-09 17:50:36 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:02 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-fp	svn1587 8.0	Fixed point arithmetic	An extensive collection of arithmetic operations for fixed point real numbers of high precision. date: 2009-09-26 11:43:36 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:00 PM EDT
texlive-fpl	svn1587 8.1.002	SC and OsF fonts for URW Palladio L	The FPL Fonts provide a set of SC/OsF fonts for URW Palladio L which are compatible with respect to metrics with the Palatino SC/OsF fonts from Adobe. Note that it is not my aim to exactly reproduce the outlines of the original Adobe fonts. The SC and OsF in the FPL Fonts were designed with the glyphs from URW Palladio L as starting point. For some glyphs (e.g. 'o') I got the best result by scaling and boldening. For others (e.g. 'h') shifting selected portions of the character gave more satisfying results. All this was done using the free font editor FontForge. The kerning data in these fonts comes from Walter Schmidt's improved Palatino metrics. LaTeX use is enabled by the mathpazo package, which is part of the psnfss distribution. date: 2007-09-28 22:20:10 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:05 PM EDT

texlive-glyphlist	svn2857 6.0	glyphlist package	glyphlist package	http://tug.org/texlive/	Wed 01 May 2013 05:01:01 PM EDT
texlive-graphics	svn2540 5.1.0o	Standard LaTeX graphics	The package was designed to accommodate all needs for inclusion of graphics in LaTeX documents, replacing many earlier packages used in LaTeX 2.09. The package aims to give a consistent interface to including the file types that are understood in your output, by use of 'printer drivers' (now known, simply, as 'drivers'). The distribution of the package contains several drivers, but others (for example, pdfTeX) are distributed separately. The package also offers several means of manipulating graphics in the course of inserting them into a document (for example, rotation and scaling). For extended documentation see epslatex. The package is part of the graphics bundle, which is one of the collections in the LaTeX 'required' set of packages. date: 2011-05-30 14:43:49 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:00:55 PM EDT

texlive-hydvips	svn2866 7.3.00	Hyperref extensions for use with dvips	The hypdvips package fixes some problems when using hyperref with dvips. It also adds support for breaking links, file attachments, embedded documents and different types of GoTo- links. The cooperation of hyperref with cleveref is improved, which in addition allows an enhanced back-referencing system. date: 2012-12-30 16:12:46 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:43:21 PM EDT
texlive-hypernat	svn1735 8.1.0b	Allow hyperref and natbib to work together	Allows hyperref package and the natbib package with options 'numbers' and 'sort&compress' to work together. This means that multiple sequential citations (e.g [3,2,1]) will be compressed to [1-3], where the '1' and the '3' are (color-)linked to the bibliography. date: 2010-03-08 12:29:56 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:43:21 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-hyperref	svn2821 3.6.83m	Extensive support for hypertext in LaTeX	The hyperref package is used to handle cross-referencing commands in LaTeX to produce hypertext links in the document. The package provides backends for the <code>\{special</code> set defined for HyperTeX DVI processors; for embedded pdfmark commands for processing by Acrobat Distiller (dvips and Y&Y's dvipsone); for Y&Y's dviwindo; for PDF control within pdfTeX and dvipdfm; for TeX4ht; and for VTeX's pdf and HTML backends. The package is distributed with the backref and nameref packages, which make use of the facilities of hyperref. The package depends on the author's kvoptions, ltxcmds and refcount packages. date: 2012-11-08 00:51:05 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:16 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-hyph-utf8	svn2919 3.0	Hyphenation patterns expressed in UTF-8	Modern native UTF-8 engines such as XeTeX and LuaTeX need hyphenation patterns in UTF-8 format, whereas older systems require hyphenation patterns in the 8-bit encoding of the font in use (such encodings are codified in the LaTeX scheme with names like OT1, T2A, TS1, OML, LY1, etc). The present package offers a collection of conversions of existing patterns to UTF-8 format, together with converters for use with 8-bit fonts in older systems. Since hyphenation patterns for Knuthian-style TeX systems are only read at iniTeX time, it is hoped that the UTF-8 patterns, with their converters, will completely supplant the older patterns. date: 2013-02-21 09:30:41 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:10 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-lua-alt-getopt	svn2934 9.0.7.0	Process application arguments the same way as getopt_long	lua.altgetopt is a MIT-licensed module for Lua, for processing application arguments in the same way as BSD/GNU getopt_long(3) functions do. This module is made available for lua script writers to have consistent command line parsing routines. date: 2012-07-10 13:36:48 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:05 PM EDT
texlive-lualatex-math	svn2934 6.1.2	Fixes for mathematics-related LuaLaTeX issues	The package patches a few commands of the LaTeX2e kernel and the amsmath and mathtools packages to be more compatible with the LuaTeX engine. It is only meaningful for LuaLaTeX documents containing mathematical formulas, and does not exhibit any new functionality. The fixes are mostly moved from the unicode-math package to this package since they are not directly related to Unicode mathematics typesetting. date: 2013-03-11 10:36:18 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:17 PM EDT
texlive-luaotfload-bin	svn1857 9.0	Binaries for luaotfload	Binaries for luaotfload	http://tug.org/texlive/	Wed 01 May 2013 05:00:57 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-luaotfload	svn2671 8.1.26	OpenType layout system for Plain TeX and LaTeX	The package adopts the TrueType/OpenType Font loader code provided in ConTeXt, and adapts it to use in Plain TeX and LaTeX. date: 2012-04-27 17:19:37 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:00:57 PM EDT
texlive-luatex-bin	svn2691 2.0	Binaries for luatex	Binaries for luatex	http://tug.org/texlive/	Wed 01 May 2013 05:01:13 PM EDT
texlive-luatex	svn2668 9.0.70.1	The LuaTeX engine	LuaTeX is an extended version of pdfTeX using Lua as an embedded scripting language. The LuaTeX project's main objective is to provide an open and configurable variant of TeX while at the same time offering downward compatibility. LuaTeX uses Unicode (as UTF-8) as its default input encoding, and is able to use modern (OpenType) fonts (for both text and mathematics). It should be noted that LuaTeX is still under development; its specification has been declared stable, but absolute stability may not in practice be assumed. date: 2011-11-09 15:33:34 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:13 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-luatexbase	svn2256 0.0.31	Basic resource management for LuaTeX code	The bundle provides basic facilities for LuaTeX macro programmers, mostly resource allocation and convenience packages. Provided are: - luatexbase-attr: attribute allocation; - luatexbase-cctb: catcode table allocation; - luatexbase-compat: compatibility helpers; - luatexbase-loader: Lua module loading; - luatexbase-modutils: Lua module declaration; - luatexbase-mcb: callbacks extension; and - luatexbase-regs: allocation of registers and the like. In addition, the (unadorned) luatexbase package loads all the above in one fell swoop. date: 2011-05-21 16:06:38 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:00:57 PM EDT
texlive-makeindex-bin	svn2650 9.0	Binaries for makeindex	Binaries for makeindex	http://tug.org/texlive/	Wed 01 May 2013 05:01:03 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-makeindex	svn2668 9.2.12	Process index output to produce typesettable code	A general purpose hierarchical index generator; it accepts one or more input files (often produced by a text formatter such as TeX or troff), sorts the entries, and produces an output file which can be formatted. The formats of the input and output files are specified in a style file; by default, input is assumed to be an .idx file, as generated by LaTeX. date: 2011-09-24 09:40:13 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:03 PM EDT
texlive-marginnote	svn2588 0.v1.1i	Notes in the margin, even where <code>\{}marginpar</code> fails	This package provides the command <code>\{}marginnote</code> that may be used instead of <code>\{}marginpar</code> at almost every place where <code>\{}marginpar</code> cannot be used, e.g., inside floats, footnotes, or in frames made with the framed package. date: 2012-04-08 16:44:52 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:08 PM EDT

texlive-marvosym	svn2934 9.2.2a	Martin Vogel's Symbols (marvosym) font	Martin Vogel's Symbol font (marvosym) contains the Euro currency symbol as defined by the European commission, along with symbols for structural engineering; symbols for steel cross-sections; astronomy signs (sun, moon, planets); the 12 signs of the zodiac; scissor symbols; CE sign and others. The package contains both the original TrueType font and the derived Type 1 font, together with support files for TeX (LaTeX). date: 2012-04-08 13:55:52 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:04 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-mathpazo	svn1587 8.1.003	Fonts to typeset mathematics to match Palatino	<p>The Pazo Math fonts are a family of PostScript fonts suitable for typesetting mathematics in combination with the Palatino family of text fonts. The Pazo Math family is made up of five fonts provided in Adobe Type 1 format (PazoMath, PazoMath-Italic, PazoMath-Bold, PazoMath-BoldItalic, and PazoMathBlackboardBold). These contain, in designs that match Palatino, glyphs that are usually not available in Palatino and for which Computer Modern looks odd when combined with Palatino. These glyphs include the uppercase Greek alphabet in upright and slanted shapes in regular and bold weights, the lowercase Greek alphabet in slanted shape in regular and bold weights, several mathematical glyphs (partialdiff, summation, product, coproduct, emptyset, infinity, and proportional) in regular and bold weights, other glyphs (Euro and dotlessj) in upright and slanted shapes in regular and bold weights, and the uppercase letters commonly used to represent various number sets (C, I, N, Q, R, and Z) in blackboard bold. The set also includes a set of 'true' small-caps fonts, also suitable for use with Palatino (or one of its clones). LaTeX macro support (using package mathpazo.sty) is provided in psnfss (a required part of any LaTeX distribution).</p>	http://tug.org/texlive/	Wed 01 May 2013 05:01:10 PM EDT

texlive-memoir	svn2163 8.3.6j-patch_6.0g	Typeset fiction, non-fiction and mathematical books	<p>The memoir class is for typesetting poetry, fiction, non-fiction, and mathematical works. Permissible document 'base' font sizes range from 9 to 60pt. There is a range of page- styles and well over a dozen chapter-styles to choose from, as well as methods for specifying your own layouts and designs. The class also provides the functionality of over thirty of the more popular packages, thus simplifying document sources. The class automatically loads an associated patch file mempatch; the patch file may be updated from time to time, between releases of the class itself. (The patch file stays around even when there are no extant patches.) Users who wish to use the hyperref package, in a document written with the memoir class, should also use the memhfixc package (part of this bundle). Note, however, that current versions of hyperref actually load the package automatically if they detect that they are running under memoir.</p> <p>date: 2011-03-06 22:53:00 +0100</p>	http://tug.org/texlive/	Wed 01 May 2013 05:01:16 PM EDT

texlive-metafont-bin	svn2691 2.0	Binaries for metafont	Binaries for metafont	http://tug.org/texlive/	Wed 01 May 2013 05:01:01 PM EDT
texlive-metafont	svn2668 9.2.7182 81	A system for specifying fonts	The program takes a semi-algorithmic specification of a font, and produces a bitmap font (whose properties are defined by a set of parameters of the target device), and a set metrics for use by TeX. The bitmap output may be converted into a format directly usable by a device driver, etc., by the tools provided in the parallel mfware distribution. (Third parties have developed tools to convert the bitmap output to outline fonts.) The distribution includes the source of Knuth's Metafont book; this source is there to read, as an example of writing TeX – it should not be processed without Knuth's direct permission. date: 2012-05-23 16:10:32 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:01 PM EDT

texlive-mh	svn2942 0.0	The MH bundle	<p>The mh bundle is a series of packages designed to enhance the appearance of documents containing a lot of math. The main backbone is amsmath, so those unfamiliar with this required part of the LaTeX system will probably not find the packages very useful. Component parts of the bundle are: breqn, empheq, flexisym, mathstyle and mathtools, mhsetup, The empheq package is a visual markup extension of amsmath. Empheq allows sophisticated boxing and other marking of multi-line maths displays, and fixes problems with the way that the ntheorem package places end-of-theorem markers. The mathtools package provides many useful tools for mathematical typesetting. It fixes various deficiencies of amsmath and standard LaTeX. The mhsetup package defines various programming tools needed by both empheq and mathtools. The breqn package makes more easy the business of preparing displayed equations in LaTeX, including permitting automatic line-breaking within displayed equations. (Breqn uses the mathstyle package to keep track of the current maths typesetting style, something that raw TeX hides from the programmer.)</p> <p>date: 2013-03-17 00:29:52 +0100</p>	http://tug.org/texlive/	Wed 01 May 2013 05:01:21 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-microtype	svn2939 2.2.5	Subliminal refinements towards typographical perfection	<p>The package provides a LaTeX interface to the microtypographic extensions that were introduced by pdfTeX and have since also propagated to XeTeX and LuaTeX: most prominently, character protrusion and font expansion, furthermore the adjustment of interword spacing and additional kerning, as well as hyphenatable letterspacing (tracking) and the possibility to disable all or selected ligatures. These features may be applied to customisable sets of fonts, and all microtypographic aspects of the fonts can be configured in a straight-forward and flexible way. Settings for various fonts are provided. Note that character protrusion requires pdfTeX, LuaTeX, or XeTeX. Font expansion works with pdfTeX or LuaTeX. The package will by default enable protrusion and expansion if they can safely be assumed to work. Disabling ligatures requires pdfTeX or LuaTeX, while the adjustment of interword spacing and of kerning only works with pdfTeX. Letterspacing is available with pdfTeX or LuaTeX. The alternative package ‘letterspace’, which also works with plain TeX, provides the user commands for letterspacing only, omitting support for all other extensions.</p> <p>date: 2013-03-14 12:45:44 +0100</p>	http://tug.org/texlive/	Wed 01 May 2013 05:01:05 PM EDT

texlive- psfrag	svn1587 8.3.04	Replace strings in encapsulated PostScript figures	Allows LaTeX constructions (equations, picture environments, etc.) to be precisely superimposed over Encapsulated PostScript figures, using your own favorite drawing tool to create an EPS figure and placing simple text 'tags' where each replacement is to be placed, with PSfrag automatically removing these tags from the figure and replacing them with a user specified LaTeX construction, properly aligned, scaled, and/or rotated. date: 2009-10-07 22:25:55 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:05 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive- pslatex	svn1641 6.0	Use PostScript fonts by default	<p>A small package that makes LaTeX default to 'standard' PostScript fonts. It is basically a merger of the times and the (obsolete) mathptm packages from the psnfss suite. You must have installed standard LaTeX and the psnfss PostScript fonts to use this package. The main novel feature is that the pslatex package tries to compensate for the visual differences between the Adobe fonts by scaling Helvetica by 90%, and 'condensing' Courier (i.e. scaling horizontally) by 85%. The package is supplied with a (unix) shell file for a 'pslatex' command that allows standard LaTeX documents to be processed, without needing to edit the file. Note that current psnfss uses a different technique for scaling Helvetica, and treats Courier as a lost cause (there are better free fixed-width available now, than there were when pslatex was designed). As a result, pslatex is widely considered obsolete.</p> <p>date: 2009-10-07 22:25:55 +0200</p>	http://tug.org/texlive/	Wed 01 May 2013 05:01:06 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive- psnfss	svn2339 4.9.2a	Font support for common PostScript fonts	Font definition files, macros and font metrics for freely-available Adobe Type 1 fonts. The font set consists of the 'LaserWriter 35' set (originally 'freely available' because embedded in PostScript printers), and a variety of other free fonts, together with some additions. Note that while many of the fonts are available in PostScript (and other) printers, most publishers require fonts embedded in documents, which requires that you have the fonts in your TeX system. Fortunately, there are free versions of the fonts from URW (available in the URW base5 bundle). The base set of text fonts covered by PSNFSS are: Avant-Garde, Bookman, Courier, Helvetica, New Century Schoolbook, Palatino, Symbol, Times Roman and Zapf Dingbats. In addition, the fonts Bitstream Charter and Adobe Utopia are covered (those fonts were contributed to the Public Domain by their commercial foundries). Separate packages are provided to load each font for use as main text font. The packages helvet (which allows Helvetica to be loaded with its size scaled to something more nearly appropriate for its use as a Sans-Serif font to match Times) and pi-font (which provides the means to select single glyphs from symbol fonts) are tailored to special requirements of their fonts. Mathematics are cov-	http://tug.org/texlive/	Wed 01 May 2013 05:00:57 PM EDT

texlive-pst- 3d	svn1725 7.1.10	A PSTricks package for tilting and other pseudo-3D tricks	The pst-3d package provides basic macros for shadows, tilting and three dimensional representations of text or graphical objects. date: 2010-02-15 10:59:10 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:16 PM EDT
texlive-pst- blur	svn1587 8.2.0	PSTricks package for "blurred" shadows	Pst-blur is a package built for use with PSTricks. It provides macros that apply blurring to the normal shadow function of PSTricks. date: 2006-12-19 19:38:44 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:19 PM EDT
texlive-pst- coil	svn2402 0.1.06	A PSTricks package for coils, etc	Pst-coil is a PSTricks based package for coils and zigzags and for coil and zigzag node connections. date: 2011-09-19 17:03:12 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:18 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-pst-eps	svn1587 8.1.0	Create EPS files from PSTricks figures	Pst-eps is a PSTricks-based package for exporting PSTricks images 'on the fly' to encapsulated PostScript (EPS) image files, which can then be read into a document in the usual way. date: 2007-02-28 00:07:21 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:16 PM EDT
texlive-pst-fill	svn1587 8.1.01	Fill or tile areas with PSTricks	Pst-fill is a PSTricks-based package for filling and tiling areas or characters. date: 2007-03-11 15:39:31 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:16 PM EDT
texlive-pst-grad	svn1587 8.1.06	Filling with colour gradients, using PSTricks	Pst-grad is a PSTricks based package for filling with colour gradients. Supported are colours in the RGB, CMYK or HSB models. Other colour gradient mechanisms are to be found in package pst-slpe. date: 2007-07-11 11:50:31 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:18 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-pst-math	svn2017 6.0.61	Enhancement of PostScript math operators to use with pstricks	PostScript lacks a lot of basic operators such as tan, acos, asin, cosh, sinh, tanh, acosh, asinh, atanh, exp (with e base). Also (oddly) cos and sin use arguments in degrees. Pst-math provides all those operators in a header file pst-math.pro with wrappers pst-math.sty and pst-math.tex. In addition, sinc, gauss, gammaln and bessel are implemented (only partially for the latter). pst-math is designed essentially to work with pst-plot but can be used in whatever PS code (such as pstricks SpecialCoor"!”, which is useful for placing labels). The package also provides a routine SIMPSON for numerical integration and a solver of linear equation systems. date: 2010-10-02 23:46:37 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:11 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-pst-node	svn2779 9.1.25	Draw connections using pstricks	The package enables the user to connect information, and to place labels, without knowing (in advance) the actual positions of the items to be connected, or where the connecting line should go. The macros are useful for making graphs and trees, mathematical diagrams, linguistic syntax diagrams, and so on. The package contents were previously distributed as a part of the pstricks base distribution. date: 2012-09-21 20:41:56 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:18 PM EDT
texlive-pst-plot	svn2872 9.1.44	Plot data using PSTricks	The package provides plotting of data (typically from external files), using PSTricks. Plots may be configured using a wide variety of parameters. date: 2013-01-04 14:21:22 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:18 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-pst-slpe	svn2439 1.1.31	Sophisticated colour gradients	This PSTricks package covers all the colour gradient functionality of pst-grad (part of the base pstricks distribution), and provides the following facilities: - it permits the user to specify an arbitrary number of colours, along with the points at which they are to be reached; - it converts between RGB and HSV behind the scenes; - it provides concentric and radial gradients; - it provides a command \{}psBall that generates bullets with a three-dimensional appearance; and - uses the xkeyval package for the extended key handling. date: 2011-10-25 20:39:05 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:19 PM EDT
texlive-pst-text	svn1587 8.1.00	Text and character manipulation in PSTricks	Pst-text is a PSTricks based package for plotting text along a different path and manipulating characters. It includes the functionality of the old package pst-char. date: 2007-03-11 16:56:01 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:18 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-pst-tree	svn2414 2.1.12	Trees, using pstricks	pst-tree is a pstricks package that defines a macro <code>\{pstree</code> which offers a structured way of joining nodes created using <code>pst-node</code> in order to draw trees. date: 2011-09-29 17:52:33 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:18 PM EDT
texlive-pstricks-add	svn2875 0.3.59	A collection of additions and bugfixes for PSTricks	Collects together examples that have been posted to the pstricks mailing list, together with many additional features for the basic pstricks, pst-plot and pst-node, including: - bugfixes; - new options for the pspicture environment; - arrows; - braces as node connection/linestyle; - extended axes for plots (e.g., logarithm axes); - polar plots; - plotting tangent lines of curves or functions; - solving and printing differential equations; - box plots; - matrix plots; and - pie charts. The package makes use of PostScript routines provided by pst-math. date: 2012-09-28 14:00:56 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:18 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-pstricks	svn2948 2.2.37	PostScript macros for TeX	<p>An extensive collection of macros for generating PostScript that is usable with most TeX macro formats, including Plain TeX, LaTeX, AMS-TeX, and AMS-Latex. Included are macros for colour, graphics, pie charts, rotation, trees and overlays. It has many special features, including a wide variety of graphics (picture drawing) macros, with a flexible interface and with colour support. There are macros for colouring or shading the cells of tables. The package pstricks-add contains bug-fixes and additions for pstricks (among other things). PSTricks uses PostScript <code>\{ }special</code> commands, which are not supported by PDF(La)TeX. This limitation may be overcome by using either the <code>pst-pdf</code> or the <code>pdftricks</code> package, to generate a PDF inclusion from a PSTricks diagram.</p> <p>date: 2013-03-23 11:50:30 +0100</p>	http://tug.org/texlive/	Wed 01 May 2013 05:01:18 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive- pxfonts	svn1587 8.0	Palatino-like fonts in support of mathematics	<p>Pxfonts supplies virtual text roman fonts using Adobe Palatino (or URWPalladioL) with some modified and additional text symbols in the OT1, T1, and TS1 encodings; maths alphabets using Palatino/Palladio; maths fonts providing all the symbols of the Computer Modern and AMS fonts, including all the Greek capital letters from CMR; and additional maths fonts of various other symbols. The set is complemented by a sans-serif set of text fonts, based on Helvetica/NimbusSanL, and a monospace set derived from the parallel TX font set. All the fonts are in Type 1 format (AFM and PFB files), and are supported by TeX metrics (VF and TFM files) and macros for use with LaTeX.</p> <p>date: 2009-01-15 09:33:18 +0100</p>	http://tug.org/texlive/	Wed 01 May 2013 05:01:04 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-qstest	svn1587 8.0	Bundle for unit tests and pattern matching	This is the public release of the qstest bundle (written for DocScape Publisher) (C) 2006, 2007 QuinScape GmbH. The bundle contains the packages 'makematch' for matching patterns to targets (with a generalization in the form of pattern lists and keyword lists), and 'qstest' for performing unit tests, allowing the user to run a number of logged tests ensuring the consistency of values, properties and call sequences during execution of test code. Both packages make extensive use of in their package documentation, providing illustrated examples that are automatically verified to work as expected. Check the README file for details. date: 2008-08-24 10:50:19 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:03 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-rcs	svn1587 8.0	Use RCS (revision control system) tags in LaTeX documents	The rcs package utilizes the inclusion of RCS supplied data in LaTeX documents. It's upward compatible to *all* rcs styles I know of. In particular, you can easily - access values of every RCS field in your document - put the checkin date on the titlepage - put RCS fields in a footline You can typeset revision logs. Not in verbatim – real LaTeX text! But you need a configurable RCS for that. Refer to the user manual for more detailed information. You can also configure the rcs package easily to do special things for any keyword. This bundle comes with a user manual, an internal interface description, full documentation of the implementation, style information for AUC- TeX, and test cases. date: 2007-06-06 17:06:28 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:09 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-rotating	svn1683 2.2.16b	Rotation tools, including rotated full-page floats	<p>A package built on the standard LaTeX graphics package to perform all the different sorts of rotation one might like, including complete figures and tables with their captions. If you want continuous text (i.e., more than one page) set in landscape mode, use the lscape package instead. The rotating packages only deals in rotated boxes (or floats, which are themselves boxes), and boxes always stay on one page. If you need to use the facilities of the float in the same document, load rotating.sty via rotfloat, which smooths the path between the rotating and float packages.</p> <p>date: 2010-01-26 14:36:34 +0100</p>	http://tug.org/texlive/	Wed 01 May 2013 05:01:19 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-rsfs	svn1587 8.0	Ralph Smith's Formal Script font	The fonts provide uppercase 'formal' script letters for use as symbols in scientific and mathematical typesetting (in contrast to the informal script fonts such as that used for the 'calligraphic' symbols in the TeX maths symbol font). The fonts are provided as MetaFont source, and as derived Adobe Type 1 format. LaTeX support, for using these fonts in mathematics, is available via one of the packages calrsfs and mathrsfs. date: 2008-12-14 19:11:27 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:05 PM EDT
texlive-sansmath	svn1799 7.1.1	Maths in a sans font	The package defines a new math version sans, and a command <code>\{ }sansmath</code> that behaves somewhat like <code>\{ }boldmath</code> date: 2010-04-29 07:59:03 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:09 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-sauerj	svn1587 8.0	A bundle of utilities by Jonathan Sauer	The bundle consists of: a tool for collecting text for later re-use, a tool for typesetting the "meta-information" within a text, a tool for use in constructing macros with multiple optional parameters, a package for multiple column parallel texts, a tool for processing key-value structured lists, and macros for typesetting a number as a German-language string. date: 2007-01-15 20:25:47 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:05 PM EDT
texlive-savetrees	svn2249 1.2.0	Pack as much as possible onto each page of a LaTeX document	The goal of the savetrees package is to pack as much text as possible onto each page of a LaTeX document. Admittedly, this makes the document far less attractive. Nevertheless, savetrees is a simple way to save paper when printing draft copies of a document. It can also be useful when trying to meet a tight page-length requirement for a conference or journal submission. date: 2011-05-15 09:57:20 +0200	http://tug.org/texlive/	Thu 02 May 2013 12:18:16 AM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-section	svn2018 0.0	Modifying section commands in LaTeX	The package implements a pretty extensive scheme to make more manageable the business of configuring LaTeX output. date: 2010-10-24 14:28:08 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:07 PM EDT
texlive-seminar	svn1832 2.1.5	Make overhead slides	A class that produces overhead slides (transparencies), with many facilities. The class requires availability of the fancybox package. Seminar is also the basis of other classes, such as prosper. In fact, seminar is not nowadays reckoned a good basis for a presentation – users are advised to use more recent classes such as powerdot or beamer, both of which are tuned to 21st-century presentation styles. Note that the seminar distribution relies on the xcomment package, which was once part of the bundle, but now has a separate existence. date: 2010-05-17 14:53:01 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:19 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-sepnum	svn2018 6.2.0	Print numbers in a "friendly" format	Provides a command to print a number with (potentially different) separators every three digits in the parts either side of the decimal point (the point itself is also configurable). The macro is fully expandable and not fragile (unless one of the separators is). There is also a command <code>\{sepnumform</code> , that may be used when defining <code>\{the\counter</code> macros. date: 2010-10-24 14:34:20 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:06 PM EDT
texlive-seqsplit	svn1587 8.0.1	Split long sequences of characters in a neutral way	When one needs to type long sequences of letters (such as in base-sequences in genes) or of numbers (such as calculations of transcendental numbers), there's no obvious break points to be found. The package provides a command <code>\{seqsplit</code> , which makes its argument splittable anywhere, and then leaves the TeX paragraph-maker to do the splitting. While the package may obviously be used to typeset DNA sequences, the user may consider the dnaseq as a rather more powerful alternative. date: 2007-07-23 22:41:48 +0200	http://tug.org/texlive/	Thu 02 May 2013 01:38:28 AM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-setspace	svn2488 1.6.7a	Set space between lines	Provides support for setting the spacing between lines in a document. Package options include singlespacing, onehalfspacing, and doublespacing. Alternatively the spacing can be changed as required with the <code>\{ }singlespacing</code> , <code>\{ }onehalfspacing</code> , and <code>\{ }doublespacing</code> commands. Other size spacings also available. date: 2011-12-19 12:40:22 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:03 PM EDT
texlive-showexpl	svn2779 0.v0.3j	Typesetting LaTeX source code	This package provides a way to typeset LaTeX source code and the related result in the same document. date: 2012-09-23 11:23:18 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:16 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-soul	svn1587 8.2.4	Hyphenation for letterspacing, underlining, and more	Provides hyphenatable spacing out (letterspacing), underlining, striking out, etc., using the TeX hyphenation algorithm to find the proper hyphens automatically. The package also provides a mechanism that can be used to implement similar tasks, that have to treat text syllable by syllable. This is shown in two examples. The package itself does not support UTF-8 input in ordinary (PDF)LaTeX; some UTF-8 support is offered by package soulutf8 date: 2009-10-10 00:35:28 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:11 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-subfig	svn1587 8.1.3	Figures broken into subfigures	<p>The package provides support for the manipulation and reference of small or 'sub' figures and tables within a single figure or table environment. It is convenient to use this package when your subfigures are to be separately captioned, referenced, or are to be included in the List-of-Figures. A new <code>\subfigure</code> command is introduced which can be used inside a figure environment for each subfigure. An optional first argument is used as the caption for that subfigure. This package supersedes the subfigure package (which will continue to be supported, but no longer maintained). The name has changed because the subfig package is not completely backward compatible with the older subfigure package due to an extensive rewrite to use the new caption package to produce its subcaptions. The major advantage to the new package is that the user interface is keyword/value driven and easier to use. To ease the transition from the subfigure package it includes a configuration file (subfig.cfg) which nearly emulates the subfigure package.</p> <p>date: 2010-05-10 00:41:23 +0200</p>	http://tug.org/texlive/	Wed 01 May 2013 05:01:01 PM EDT

texlive- type1cm	svn2182 0.0	Arbitrary size font selection in LaTeX	LaTeX, by default, restricts the sizes at which you can use its default computer modern fonts, to a fixed set of discrete sizes (effectively, a set specified by Knuth). The type1cm package removes this restriction; this is particularly useful when using scalable versions of the cm fonts (Bakoma, or the versions from BSR/Y&Y, or True Type versions from Kinch, PCTeX, etc.). In fact, since modern distributions will automatically generate any bitmap font you might need, type1cm has wider application than just those using scaleable versions of the fonts. Note that the LaTeX distribution now contains a package fix-cm, which performs the task of type1cm, as well as doing the same job for T1- and TS1-encoded ec fonts. date: 2011-03-24 10:40:42 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:09 PM EDT
texlive- typehtml	svn1713 4.0	Typeset HTML directly from LaTeX	Can handle almost all of HTML2, and most of the math fragment of the draft HTML3. date: 2010-02-23 16:16:11 +0100	http://tug.org/texlive/	Wed 01 May 2013 05:01:22 PM EDT

texlive-ucs	svn2754 9.2.1	Extended UTF-8 input encoding support for LaTeX	<p>The bundle provides the ucs package, and utf8x.def, together with a large number of support files. The utf8x.def definition file for use with inputenc covers a wider range of Unicode characters than does utf8.def in the LaTeX distribution. The package provides facilities for efficient use of its large sets of Unicode characters. Glyph production may be controlled by various options, which permits use of non-ASCII characters when coding mathematical formulae. Note that the bundle previously had an alias "unicode"; that alias has now been withdrawn, and no package of that name now exists.</p> <p>date: 2012-08-28 17:41:15 +0200</p>	http://tug.org/texlive/	Wed 01 May 2013 05:01:21 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-underscore	svn1826 1.0	Control the behaviour of ”_” in text	With the package, \{}_ in text mode (i.e., \{}textunderscore) prints an underscore so that hyphenation of words either side of it is not affected; a package option controls whether an actual hyphenation point appears after the underscore, or merely a break point. The package also arranges that, while in text, ’_’ itself behaves as \{}textunderscore (the behaviour of _ in maths mode is not affected. date: 2010-06-07 08:23:51 +0200	http://tug.org/texlive/	Wed 01 May 2013 05:01:03 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive- unicode- math	svn2941 3.0.7d	Unicode mathematics support for XeTeX and LuaTeX	<p>The current release of this package typesets mathematics with unicode input and using Open-Type maths fonts. (There is little compatibility with older maths packages.) XeTeX support is well tested, though LuaTeX support less so. The package can typeset using STIX fonts, the XITS development of those fonts, the Asana-Math fonts, the Latin Modern Math, and the TeX Gyre Math font families, as well as the commercial Cambria Math fonts. There is no support for extra alphabets in the Unicode 'private use area'. The package relies on recent versions of the fontspec package and the l3kernel and l3packages bundles.</p> <p>date: 2013-03-17 15:18:45 +0100</p>	http://tug.org/texlive/	Wed 01 May 2013 05:01:17 PM EDT

Name	Version	Summary	Description	URL	Install Time
texlive-url	svn1686 4.3.2	Verbatim with URL-sensitive line breaks	<p>The command <code>\{\}url</code> is a form of verbatim command that allows linebreaks at certain characters or combinations of characters, accepts reconfiguration, and can usually be used in the argument to another command. (The <code>\{\}urldef</code> command provides robust commands that serve in cases when <code>\{\}url</code> doesn't work in an argument.)</p> <p>The command is intended for email addresses, hypertext links, directories/paths, etc., which normally have no spaces, so by default the package ignores spaces in its argument. However, a package option "allows spaces", which is useful for operating systems where spaces are a common part of file names.</p> <p>date: 2010-01-27 23:13:46 +0100</p>	http://tug.org/texlive/	Wed 01 May 2013 05:00:57 PM EDT

Name	Version	Summary	Description	URL	Install Time
trf	407b	Tandem Repeats Finder	<p>A tandem repeat in DNA is two or more adjacent, approximate copies of a pattern of nucleotides. Tandem Repeats Finder is a program to locate and display tandem repeats in DNA sequences. In order to use the program, the user submits a sequence in FASTA format. There is no need to specify the pattern, the size of the pattern or any other parameter. The output consists of two files: a repeat table file and an alignment file. The repeat table contains information about each repeat, including its location, size, number of copies and nucleotide content. Clicking on the location indices for one of the table entries opens a second web browser that shows an alignment of the copies against a consensus pattern. The program is very fast, analyzing sequences on the order of .5Mb in just a few seconds. Submitted sequences may be of arbitrary length. Repeats with pattern size in the range from 1 to 2000 bases are detected. Sequence information sent to the server is confidential and deleted after program execution. Citation: G. Benson, Tandem repeats finder: a program to analyze DNA sequences. Nucleic Acids Research (1999) Vol. 27, No. 2, pp. 573-580.</p>	http://tandem.bu.edu/trf/trf.html	Tue 02 Apr 2013 06:31:20 PM EDT

vlgothic-p-fonts	20121230	Proportional Japanese TrueType font	VLGothic provides Japanese TrueType fonts from the Vine Linux project. Most of the glyphs are taken from the M+ and Sazanami Gothic fonts, but some have also been improved by the project. This package provides the VL-Gothic font with proportional glyphs for some non-Japanese characters.	http://dicey.org/vlgothic	Sun 24 Mar 2013 04:49:11 PM EDT
vo-amrwbenc	0.1.2	VisualOn AMR-WB encoder library	This library contains an encoder implementation of the Adaptive Multi Rate Wideband (AMR-WB) audio codec. The library is based on a codec implementation by VisualOn as part of the Stagefright framework from the Google Android project.	http://opencore-amr.sourceforge.net/	Tue 26 Mar 2013 01:01:30 PM EDT
vorbis-tools	1.4.0	The Vorbis General Audio Compression Codec tools	Ogg Vorbis is a fully open, non-proprietary, patent- and royalty-free, general-purpose compressed audio format for audio and music at fixed and variable bitrates from 16 to 128 kbps/channel. The vorbis package contains an encoder, a decoder, a playback tool, and a comment editor.	http://www.xiph.org/	Sun 24 Mar 2013 04:49:02 PM EDT

Name	Version	Summary	Description	URL	Install Time
vpnc	0.5.3	IPSec VPN client compatible with Cisco equipment	A VPN client compatible with Cisco's EasyVPN equipment. Supports IPSec (ESP) with Mode Configuration and Xauth. Supports only shared-secret IPSec authentication, 3DES, MD5, and IP tunneling.	http://www.unix-ag.uni-kl.de/~{}massar/vpnc/	Wed 20 Mar 2013 09:56:40 AM EDT
vpnc-script	0.5.3	Routing setup script for vpnc and openconnect	This script sets up routing for VPN connectivity, when invoked by vpnc or openconnect.	http://www.unix-ag.uni-kl.de/~{}massar/vpnc/	Wed 20 Mar 2013 09:50:39 AM EDT
wavpack	4.60.1	A completely open audiocodec	WavPack is a completely open audio compression format providing lossless, high-quality lossy, and a unique hybrid compression mode. Although the technology is loosely based on previous versions of WavPack, the new version 4 format has been designed from the ground up to offer unparalleled performance and functionality.	http://www.wavpack.com/	Wed 20 Mar 2013 09:50:25 AM EDT
webkitgtk	1.10.2	GTK+ Web content engine library	WebKitGTK+ is the port of the portable web rendering engine WebKit to the GTK+ platform.	http://www.webkitgtk.org/	Sun 24 Mar 2013 04:45:56 PM EDT
webkitgtk3	1.10.2	GTK+ Web content engine library	WebKitGTK+ is the port of the portable web rendering engine WebKit to the GTK+ platform. This package contains WebKit-GTK+ for GTK+ 3.	http://www.webkitgtk.org/	Sun 24 Mar 2013 04:47:56 PM EDT

wqy-zenhei-fonts	0.9.46	WenQuanYi Zen Hei CJK Font	WenQuanYi Zen Hei is a Hei-Ti style (sans-serif type) Chinese outline font. It is designed for general purpose text formatting and on-screen display of Chinese characters and symbols from many other languages. The embolden strokes of the font glyphs produces enhanced screen contrast, making it easier to read recognize. The embedded bitmap glyphs further enhance on-screen performance, which can be enabled with the provided configuration files. WenQuanYi Zen Hei provides a rather complete coverage to Chinese Hanzi glyphs, including both simplified and traditional forms. The total glyph number in this font is over 35,000, including over 21,000 Chinese Hanzi. This font has full coverage to GBK(CP936) charset, CJK Unified Ideographs, as well as the code-points needed for zh_cn, zh_sg, zh_tw, zh_hk, zh_mo, ja (Japanese) and ko (Korean) locales for fontconfig. Starting from version 0.8, this font package has contained two font families, i.e. the proportionally-spaced Zen Hei, and a mono-spaced face named "WenQuanYi Zen Hei Mono".	http://wenq.org/enindex.cgi	Sun 24 Mar 2013 04:46:07 PM EDT

xerces-c	3.1.1	Validating XML Parser	Xerces-C is a validating XML parser written in a portable subset of C++. Xerces-C makes it easy to give your application the ability to read and write XML data. A shared library is provided for parsing, generating, manipulating, and validating XML documents. Xerces-C is faithful to the XML 1.0 recommendation and associated standards: XML 1.0 (Third Edition), XML 1.1 (First Edition), DOM Level 1, 2, 3 Core, DOM Level 2.0 Traversal and Range, DOM Level 3.0 Load and Save, SAX 1.0 and SAX 2.0, Namespaces in XML, Namespaces in XML 1.1, XML Schema, XML Inclusions).	http://xml.apache.org/xerces-c/	Wed 20 Mar 2013 09:50:24 AM EDT

Name	Version	Summary	Description	URL	Install Time
xerces-j2	2.11.0	Java XML parser	<p>Welcome to the future! Xerces2 is the next generation of high performance, fully compliant XML parsers in the Apache Xerces family. This new version of Xerces introduces the Xerces Native Interface (XNI), a complete framework for building parser components and configurations that is extremely modular and easy to program. The Apache Xerces2 parser is the reference implementation of XNI but other parser components, configurations, and parsers can be written using the Xerces Native Interface. For complete design and implementation documents, refer to the XNI Manual.</p> <p>Xerces2 is a fully conforming XML Schema processor. For more information, refer to the XML Schema page.</p> <p>Xerces2 also provides a complete implementation of the Document Object Model Level 3 Core and Load/Save W3C Recommendations and provides a complete implementation of the XML Inclusions (XInclude) W3C Recommendation. It also provides support for OASIS XML Catalogs v1.1. Xerces2 is able to parse documents written according to the XML 1.1 Recommendation, except that it does not yet provide an option to enable normalization checking as described in section 2.13 of this specification. It also handles name spaces according</p>	http://xerces.apache.org/xerces2-j/	Wed 24 Apr 2013 11:45:35 AM EDT

xmlrpc-c-client	1.32.5	C client libraries for xmlrpc-c	XML-RPC is a quick-and-easy way to make procedure calls over the Internet. It converts the procedure call into XML document, sends it to a remote server using HTTP, and gets back the response as XML. This library provides a modular implementation of XML-RPC for C clients.	http://xmlrpc-c.sourceforge.net/	Sun 24 Mar 2013 04:44:59 PM EDT
xmms2	0.8	A modular audio framework and plugin architecture	XMMS2 is an audio framework, but it is not a general multimedia player - it will not play videos. It has a modular framework and plugin architecture for audio processing, visualisation and output, but this framework has not been designed to support video. Also the client-server design of XMMS2 (and the daemon being independent of any graphics output) practically prevents direct video output being implemented. It has support for a wide range of audio formats, which is expandable via plugins. It includes a basic CLI interface to the XMMS2 framework, but most users will want to install a graphical XMMS2 client (such as gxmms2 or esperanza).	http://wiki.xmms2.xmms.se/	Tue 26 Mar 2013 01:15:40 PM EDT

xulrunner	20.0	XUL Runtime for Gecko Applications	XULRunner is a Mozilla runtime package that can be used to bootstrap XUL+XPCOM applications that are as rich as Firefox and Thunderbird. It provides mechanisms for installing, upgrading, and uninstalling these applications. XULRunner also provides libxul, a solution which allows the embedding of Mozilla technologies in other projects and products.	http://developer.mozilla.org/En/XULRunner	Fri 05 Apr 2013 04:36:23 PM EDT
xvidcore	1.3.2	MPEG-4 Simple and Advanced Simple Profile codec	The Xvid video codec implements MPEG-4 Simple Profile and Advanced Simple Profile standards. It permits compressing and decompressing digital video in order to reduce the required bandwidth of video data for transmission over computer networks or efficient storage on CDs or DVDs. Due to its unrivalled quality Xvid has gained great popularity and is used in many other GPLed applications, like e.g. Transcode, MEncoder, MPlayer, Xine and many more.	http://www.xvid.org/	Tue 26 Mar 2013 01:02:01 PM EDT

xz	5.1.2	LZMA compression utilities	XZ Utils are an attempt to make LZMA compression easy to use on free (as in freedom) operating systems. This is achieved by providing tools and libraries which are similar to use than the equivalents of the most popular existing compression algorithms. LZMA is a general purpose compression algorithm designed by Igor Pavlov as part of 7-Zip. It provides high compression ratio while keeping the decompression speed fast.	http://tukaani.org/xz/	Wed 20 Mar 2013 09:50:15 AM EDT
xz-devel	5.1.2	Devel libraries & headers for liblzma	Devel libraries and headers for liblzma.	http://tukaani.org/xz/	Fri 05 Apr 2013 04:34:34 PM EDT
xz-libs	5.1.2	Libraries for decoding LZMA compression	Libraries for decoding files compressed with LZMA or XZ utils.	http://tukaani.org/xz/	Fri 05 Apr 2013 04:24:10 PM EDT
xz-libs	5.1.2	Libraries for decoding LZMA compression	Libraries for decoding files compressed with LZMA or XZ utils.	http://tukaani.org/xz/	Wed 20 Mar 2013 09:49:49 AM EDT
yajl	2.0.4	Yet Another JSON Library (YAJL)	Yet Another JSON Library. YAJL is a small event-driven (SAX-style) JSON parser written in ANSI C, and a small validating JSON generator.	http://lloyd.github.com/yajl/	Wed 20 Mar 2013 09:50:08 AM EDT
yaml-cpp	0.3.0	A YAML parser and emitter for C++	yaml-cpp is a YAML parser and emitter in C++ written around the YAML 1.2 spec.	http://code.google.com/p/yaml-cpp/	Wed 20 Mar 2013 09:52:15 AM EDT

Name	Version	Summary	Description	URL	Install Time
yp-tools	2.12	NIS (or YP) client programs	<p>The Network Information Service (NIS) is a system which provides network information (login names, passwords, home directories, group information) to all of the machines on a network. NIS can enable users to login on any machine on the network, as long as the machine has the NIS client programs running and the user's password is recorded in the NIS passwd database. NIS was formerly known as Sun Yellow Pages (YP).</p> <p>This package's NIS implementation is based on FreeBSD's YP and is a special port for glibc 2.x and libc versions 5.4.21 and later. This package only provides the NIS client programs. In order to use the clients, you'll need to already have an NIS server running on your network. An NIS server is provided in the ypserv package. Install the yp-tools package if you need NIS client programs for machines on your network. You will also need to install the ypbind package on every machine running NIS client programs. If you need an NIS server, you'll need to install the ypserv package on one machine on the network.</p>	http://www.linux-nis.org/nis/yp-tools/index.html	Wed 20 Mar 2013 09:53:27 AM EDT

Name	Version	Summary	Description	URL	Install Time
ypbind	1.36	The NIS daemon which binds NIS clients to an NIS domain	<p>The Network Information Service (NIS) is a system that provides network information (login names, passwords, home directories, group information) to all of the machines on a network. NIS can allow users to log in on any machine on the network, as long as the machine has the NIS client programs running and the user's password is recorded in the NIS passwd database. NIS was formerly known as Sun Yellow Pages (YP).</p> <p>This package provides the ypbind daemon. The ypbind daemon binds NIS clients to an NIS domain. Ypbind must be running on any machines running NIS client programs.</p> <p>Install the ypbind package on any machines running NIS client programs (included in the yp-tools package). If you need an NIS server, you also need to install the ypserv package to a machine on your network.</p>	http://www.linux-nis.org/nis/ypbind-mt/index.html	Wed 20 Mar 2013 09:53:27 AM EDT

yum	3.4.3	RPM package installer/updater/manager	Yum is a utility that can check for and automatically download and install updated RPM packages. Dependencies are obtained and downloaded automatically, prompting the user for permission as necessary.	http://yum.baseurl.org/	Tue 23 Apr 2013 09:35:32 AM EDT
yum-langpacks	0.3.1	Langpacks plugin for yum	Yum-langpacks is a plugin for YUM that looks for langpacks for your native language for packages you install.	https://fedorahosted.org/yum-langpacks/	Tue 23 Apr 2013 09:35:50 AM EDT
yum-metadata-parser	1.1.4	A fast metadata parser for yum	Fast metadata parser for yum implemented in C.	http://linux.duke.edu/projects/yum/	Wed 20 Mar 2013 09:52:31 AM EDT
yum-presto	0.9.0	Presto plugin for yum	Yum-presto is a plugin for yum that looks for deltarpm's rather than rpms whenever they are available. This has the potential of saving a lot of bandwidth when downloading updates. A Deltarpm is the difference between two rpms. If you already have foo-1.0 installed and foo-1.1 is available, yum-presto will download the deltarpm for foo-1.0 \rightarrow 1.1 rather than the full foo-1.1 rpm, and then build the full foo-1.1 package from your installed foo-1.0 and the downloaded deltarpm.	http://www.lesbg.com/jdieter/presto/	Wed 20 Mar 2013 09:58:40 AM EDT

yum-utils	1.1.31	Utilities based around the yum package manager	yum-utils is a collection of utilities and examples for the yum package manager. It includes utilities by different authors that make yum easier and more powerful to use. These tools include: debuginfo-install, find-repos-of-install, needs-restarting, package-cleanup, repoclosure, repodiff, repograph, repomanage, repoquery, repo-rss, reposync, repotrack, show-installed, show-changed-rco, verifytree, yumdownloader, yum-builddep, yum-complete-transaction, yum-config-manager, yum-debug-dump, yum-debug-restore and yum-groups-manager.	http://yum.baseurl.org/download/yum-utils/	Sun 24 Mar 2013 04:48:00 PM EDT
zd1211-firmware	1.4	Firmware for wireless devices based on zd1211 chipset	This package contains the firmware required to work with the zd1211 chipset.	http://zd1211.wiki.sourceforge.net	Wed 20 Mar 2013 09:59:53 AM EDT
zip	3.0	A file compression and packaging utility compatible with PKZIP	The zip program is a compression and file packaging utility. Zip is analogous to a combination of the UNIX tar and compress commands and is compatible with PKZIP (a compression and file packaging utility for MS-DOS systems). Install the zip package if you need to compress files using the zip program.	http://www.info-zip.org/Zip.html	Wed 20 Mar 2013 09:50:26 AM EDT

zlib	1.2.7	The compression and decompression library	Zlib is a general-purpose, patent-free, lossless data compression library which is used by many different programs.	http://www.zlib.net/	Fri 05 Apr 2013 04:24:01 PM EDT
zlib	1.2.7	The compression and decompression library	Zlib is a general-purpose, patent-free, lossless data compression library which is used by many different programs.	http://www.zlib.net/	Wed 20 Mar 2013 09:49:46 AM EDT
zlib-devel	1.2.7	Header files and libraries for Zlib development	The zlib-devel package contains the header files and libraries needed to develop programs that use the zlib compression and decompression library.	http://www.zlib.net/	Fri 05 Apr 2013 04:49:32 PM EDT
zlib-devel	1.2.7	Header files and libraries for Zlib development	The zlib-devel package contains the header files and libraries needed to develop programs that use the zlib compression and decompression library.	http://www.zlib.net/	Fri 05 Apr 2013 04:34:31 PM EDT

Name	Version	Summary	Description	URL	Install Time
zvbi	0.2.33	Raw VBI, Teletext and Closed Caption decoding library	ZVBI provides functions to capture and decode VBI data. The vertical blanking interval (VBI) is an interval in a television signal that temporarily suspends transmission of the signal for the electron gun to move back up to the first line of the television screen to trace the next screen field. The vertical blanking interval can be used to carry data, since anything sent during the VBI would naturally not be displayed; various test signals, closed captioning, and other digital data can be sent during this time period.	http://zapping.sourceforge.net/ZVBI/index.html	Tue 26 Mar 2013 01:02:03 PM EDT
zziplib	0.13.60	Lightweight library to easily extract data from zip files	The zziplib library is intentionally lightweight, it offers the ability to easily extract data from files archived in a single zip file. Applications can bundle files into a single zip archive and access them. The implementation is based only on the (free) subset of compression with the zlib algorithm which is actually used by the zip/unzip tools.	http://zziplib.sourceforge.net/	Wed 01 May 2013 05:01:13 PM EDT
